Claudia Betzner, the executive director of the National Computer Service Network, said "Virtual, like many of our members, is much smaller than the computer manufacturers against which they compete. Verdicts like this one are likely to bring about a more level playing field and therefore lower prices for computer maintenance. Because computers and their maintenance have become so important to our economy, the savings to consumers should be substantial and widespread."

MOSCOW (OCT. 9) TASS - A ROUTINE DELIVERY OF TUBING TO THE CHELYABINSK VTORCHERMET ENTERPRISE IN THE SOUTH URALS TURNED OUT TO BE FAR FROM ROUTINE WHEN THE TUBING WAS FOUND TO BE HIGHLY RADIOACTIVE, EMITTING 300 MICROROENTGENS AN HOUR.

THE KOMSOMOLSKAYA PRAVDA NEWSPAPER WRITES TODAY THAT THE FACT WAS DISCOVERED DURING A RADIOLOGICAL CONTROL OF 23 TONS OF TUBES, DELIVERED FROM AN OIL PRODUCING ENTERPRISE IN TURKMENIA. SO FAR, THE SOURCE OF THE RADIOACTIVITY HAS NOT BEEN FOUND.

SCIENTISTS TOLD TASS THAT A "NORMAL" RADIATION LEVEL WAS 20 MICROROENTGENS PER HOUR. THE TUBES ARE NOT IMMEDIATELY HAZARDOUS, AS A MAN WOULD RECEIVE DANGEROUS DOSES ONLY IF SPENDING SEVERAL YEARS NEAR THEM.

MOSCOW OCTOBER 9 TASS - WORK ON BOARD THE MIR SPACE COMPLEX BEGAN TODAY WITH TECHNICAL EXPERIMENTS AND GEOPHYSICAL RESEARCH.

ON OCTOBER 8, COSMONAUTS GENNADY MANAKOV AND GENNADY STREKALOV BEGAN A 270-HOUR EXPERIMENT TO GROW CRYSTALS OF SEMICONDUCTOR GALLIUM ARSENIDE ON THE TECHNOLOGICAL INSTALLATION KRATER-V.

IN ACCORDANCE WITH THE FLIGHT PROGRAM, THEY ARE CONTINUING EXPERIMENTS TO ASSESS THE INFLUENCE OF OPEN SPACE ON VARIOUS STRUCTURAL MATERIALS, WHICH MIGHT BE USED IN FUTURE SPACE EQUIPMENT.

AFTER CARRYING OUT SCHEDULED PROPHYLACTIC WORK WITH THE PRIMARY CIRCUIT OF THE STATION HEATING, THE CREW BEGAN TO REPLACE THE SECONDARY THERMAL REGULATION CIRCUIT.

ON TUESDAY, MANAKOV AND STREKALOV ARE PHOTOGRAPHING THE DISTRICTS NEAR KHARKOV AND VOLGOGRAD AND THE ARAL SEA WITH THE HELP OF VIDEO SPECTRAL EQUIPMENT INSTALLED IN THE HYDROSTABILISED PLATFORM OF THE KVANT-2 MODULE.

IN ORDER TO OBTAIN HIGH QEALITY PHOTOGRAPHS, THE COSMONAUTS ARE USING THE PRIRODA-5 PHOTOGRAPHIC COMPLEX AND THE KAP-350 TOPOGRAPHIC CAMERA.

ACCORDING TO TELEMETRIC INFORMATION AND REPORTS FROM THE CREW, ALL SYSTEMS ON BOARD ARE FUNCTIONING NORMALLY.

#90282u0108 10/09/1990 ~United Press International

NASHVILLE, Tenn. (OCT. 9) UPI - George Strait, the laid-back Texas crooner who got his first success singing at Army service clubs, repeated as the County Music Assocaition's Entertainer of the Year.

''I'm truly speechless. I really don't have a speech,'' said Strait, who beat out Clint Black, Ricky Van Shelton, Kathy Mattea and Randy Travis Monday night for the top award in country music.

Strait gave special thanks to his band ''that are out there on the road with me every day. It's so much fun to play with them. They are so solid.''

Strait's victory, in what most observers believe was the stiffest competition in recent years, was not surprising since the Country Music Association has shown a tendency for repeat winners in the '80s with Barbara Mandrell, Alabama and Hank Williams Jr. all multiple winners.

There were two double winners, Garth Brooks and the rollicking country group The Kentucky Headhunters.

The Headhunters, the country-rockers who have given a new meaning to re-interpretation of some country standards such as Don Gibson's ''Oh, Lonesome Me,'' was named Vocal Group of the Year.

Lead singer Ricky Lee Phelps in his acceptance told his mother that he wore a buttoned up shirt. He also thanked the people who bought tickets and records for the past year. The group was virtually unknown a year ago, and country radio has only recently given them total acceptance.

The Heads, as their fans now affectionately call them, also won the Album of the Year award for ''Pickin' on Nashville.''

The Headhunters, who have been around the music scene for more than 20 years, were given a contract by Harold Shedd, formerly the producer for Alabama. Shedd told the band members that he was taking a chance on them but the public ought to have a chance to hear them. Shedd, Nashville's Polygram Records top executive, told the group they both may be out on the street selling hamburgers.

Brooks, who led with five nominations, won the Video of the Year award for ''The Dance.''

Brooks, an Oklahaoma native who is living out the dream of his mother Colleen Carrooll, who was a country singer in the 1950s, also picked up the prestigious Horizon award.

''I've got a million people to thank. I'll never thank them all. The two kings of country to me are George Jones and George Strait,'' Brooks said accepting the Horizon, an award given to the performer whose career has shown the most development over the past year.

Vince Gill, who has been recognized as a great talent by his peers for years,

finally won some recognition. The Oklahoman won the Single of the Year award, which is given for the best performance of a single recording.

''Man, I've been around for a long time. I waited for this for a long time, so I'm going to stand up here for a long time. I think this is about as good a way to start the CMA awards for 1990,'' Gill said.

Lorrie Morgan and her late husband, Keith Whitley, won the Vocal Event of the Year award for ''When Each Tear Becomes A Rose.'' Whitley died in 1989 of an overdose of alcohol.

This year's 24th annual awards show was hosted by Travis and Reba McEntire and featured some of the biggest names in country music. It was broadcast live by CBS from the Grand Ole Opry House.

The top songwriting award went to Jon Vezner and Don Henry for ''Where've You Been,'' a plaintive song about a loving couple growing old and ending up at the same hospital.

The song was recorded by Mattea, who is Vezner's wife.

''It pays to be a husband,'' Vezner said. ''I want to thank radio for playing the song because I know it was real hard to play,'' Vezner said in a tearful acceptance of the award.

The mother and daughter team of Naomi and Wynonna Judd picked up their third straight Vocal Duo award.

Last year's Horizon award winner, Black won the coveted Male Vocalist of the Year award. ''I promise all you wonderful people who voted for me that this could never get old,'' said Black.

For the second year in a row, West Virginian Mattea won the Female Vocalist of the Year award. ''I'd like to thank all the songwriters and pickers,'' she said. ''Without them we couldn't do what we do.''

Tennessee Ernie Ford, the ''Old Peapicker,'' was chosen for induction into the Country Music Hall of Fame. ''I'm a happy man,'' said Ford, whose biggest hit was ''16 Tons.''

Chosen as musician of the year was Johnny Gimble.

#90282u0133 10/09/1990 ~United Press International

(OCT. 9) UPI - Iran's president said he would honor U.N. sanctions against Iraq despite warming relations between the former Gulf War enemies, but he ruled out the possibility of sending Iranians to serve with American

peacekeeping troops.

President Ali-Akbar Hashemi Rafsanjani was quoted Monday as saying Tehran is observing the embargo and blamed Iraq for the presence of foreign troops in the Persian Gulf region following its Aug. 2 invasion of Kuwait.

''If, like us, all countries fully applied the embargo ordered by the United Nations, Iraq would be obliged to yield and withdraw from Kuwait, '' Rafsanjani told the French daily Le Monde.

Ties between Iran and Iraq improved considerably two months ago when Iraqi President Saddam Hussein capitulated to Iranian peace demands and surrendered rights to a strategic waterway in the northern gulf. Both countries decided to renew diplomatic ties, cut during the 1980-88 Iran- Iraq war.

But Rafsanjani said he was not willing to send Iranian troops to ''the same trenches with the Americans in (Saudi) Arabia,'' saying Tehran had enough problems guarding the 750-mile Iran-Iraq frontier.

On the diplomatic front, talks were held in Damascus Monday between Syrian leader Hafez Assad and Egyptian Foreign Minister Esmat Abdel Meguid on a new Arab initiative to resolve the crisis.

A spokesman for Assad, who has sent troops to Saudi Arabia, said that Egypt and Syria were working on a ''new Arab initiative, within the framework of the Arab League,'' aimed at ''securing an Iraqi withdrawal from Kuwait.''

State-run Cairo Radio said the new initiative would be discussed at an Arab League meeting in Tunis later this month.

In Cairo, the semi-official Al Ahraman Egyptian newspaper said Monday that police arrested more suspected members of the notorious pro-Iraqi Palestinian Abu Nidal guerrilla group. The newspaper said the five had not been formally charged but were believed to have obtained arms and explosives from Egyptian Islamic fundamentalists who oppose the presence of foreign troops.

Egypt has strongly opposed the Iraqi invasion and sent 15,000 troops to Saudi Arabia to help defend the oil-rich state. But radical Palestinian groups in Iraq threatened to retaliate with terrorist acts against the United States and other pro-Kuwaiti nations should U.S.-led forces attack Iraq.

Although Libya has not backed Iraq's call for terrorism, Moammar Gadhafi called on Iraq to withdraw from Kuwait and then declare war on any Western forces remaining in the region.

Gadhafi said in a speech that Iraq should be given disputed Kuwaiti oilfields and border territory as compensation for Baghdad's loss of revenue stemming from Kuwaiti oil production before the invasion.

Gadhafi said he had assurances from Egypt and Syria that they would oppose the presence of foreign forces in the gulf after Iraq withdraws from Kuwait.

Palestine Liberation Organization officials in Cairo, meanwhile, have warned Palestinians in Egypt not to become involved in pro-Iraqi terrorism.

The call came as PLO leader Yasser Arafat, accused by gulf Arab states of siding with Iraq in the dispute, discussed efforts to resolve the crisis through peaceful means during talks with Jordanian leaders in Amman.

Arafat left Amman for Tunis Monday after talks with King Hussein. The PLO leader told reporters that despite initial reservations, an international consensus has emerged linking the crisis with a settlement of the Arab-Israeli conflict.

In other developments related to the gulf crisis:

-An RF-4C Phantom reconnaissance jet crashed in the southern Arabian peninsula Monday, killing both crewmen. The plane was attached to the Alabama Air National Guard stationed at Birmingham Municipal Airport. The crewmen were identified as pilot Maj. Barry Henderson, 40, of Tuscumbia, Ala., and navigator Maj. Stephen Schramm, 43, of Birmingham.

-Two Marine UH-IN helicopters with eight crewmen aboard were reported missing in the North Arabian Sea, a U.S. Navy spokesman said. The helicopters were from the amphibious assault ship USS Okinawa. Search efforts were under way.

-Kuwait's exiled planning minister, Suleiman al Muttawa, was reported to have said in London Monday that the large Iraqi troop presence in the occupied emirate had throttled active Kuwaiti resistance.

-British, U.S. and Australian naval vessels fired warning shots at an Iraqi cargo ship when it failed to stop for inspection Monday. The ship heeded the shots and allowed British Royal Marines and U.S. Coast Guard officers to board. It was found to be empty and allowed to proceed.

-Later Monday, the three countries stopped another ship, the Iraqi tanker Tadmur, and ''stores were discovered on board,'' a defense spokeswoman said. The British Broadcasting Corp. said the tanker was in violation of U.N. sanctions and was being diverted to a nearby port for further inspection.

BANGKOK, Thailand (OCT. 9) UPI - A Vietnamese crackdown on smuggling has netted more than $3 million in gold and 1.2 million packs of foreign cigarettes, the official Vietnam News Agency reported.

''The Central Task Force Committee in the past two months spotted and treated many cases of foreign goods smuggling, refunding to the state budget 20 billion dong (about $3.3 million),'' said the report dated Monday.

It quoted Le Minh Dao, a member of the Task Force, as saying that in southern Vietnam alone, authorities ''have confiscated more than 1.2 million packs of foreign cigarettes, many cars, refrigerators and canned beer smuggled across the border.''

A total of 300 smugglers have been arrested along the border with Cambodia, it said.

Vietnam, desperate to stop the revenue leakage that has left its budget in deep deficit, announced a nationwide crackdown on smuggling and corruption nearly three months ago.

A Cabinet report, however, said last week that implementation of the crackdown has been spotty and slow, with officials intervening to delay or derail investigations into major smuggling operations.

#90282u0175 10/09/1990 ~United Press International

MANILA, Philippines (OCT. 9) UPI - The chairman of the Philippine Senate defense committee called Tuesday for a reorganization in military leadership following a two-day rebellion last week in the southern island of Mindanao.

In a radio interview, Sen. Ernesto Maceda expressed concern that government troops offered no resistance when the rebel soldiers led by Col. Alexander Noble seized two major army camps before dawn Thursday in Mindanao, 500 miles south of Manila. Noble surrendered unconditionally Saturday.

Maceda said junior officers and soldiers in the 159,000-member armed forces have deep-seated grievances against the military leadership that were not being adressed. He mentioned, among others, graft and corruption, favoritism in promotions and misuse of so-called intelligence funds.

Military officials have said Noble, former deputy security chief of President Corazon Aquino's elite presidential guards, hoped to trigger a chain of revolts in other parts of the country to force the president out of office.

Aquino has crushed seven rebellions during her four years as president.

''The events (in Mindanao) have confirmed what we have been saying long ago,

that reforms are being demanded by the lower ranks which are not happening,'' Maceda said.

He said the revamp should include the top leadership because ''the truth is that the deficiency reaches even up to the top.''

Maceda said the fact Noble traveled in a military convoy over 150 miles from Butuan to Cagayan de Oro, passing through 11 army camps without being stopped, showed ''that those who did not join must have some grievances so they just didn't resist.''

He added the mutiny showed that if there is an officer who was willing to lead the rebel soldiers, they would follow.

Military spokesman Brig. Gen. Emiliano Templo said the soldiers have some ''valid grievances'' but these were being addressed by the government and there was no need to resort to violence.

Armed forces chief Gen. Renato De Villa, who visited Butuan and Cagayan de Oro Monday, said at least four officers, 159 soldiers and 63 tribal militiamen who joined Noble either surrendered or have been captured. The military recovered five armored carriers, seven trucks, a 105mm howitzer and 5 mortars.

He said three more groups of ''stragglers'' were being pursued by government troops in the area and that a reorganization of the Southern Command was forthcoming.

#90282u0187 10/09/1990 ~United Press International
NEW YORK (OCT. 9) UPI - Last season New York Rangers GM Neil Smith gambled to jump-start his team's struggling offense by trading two of his top forwards Tomas Sandstrom and Tony Granato, to the Los Angeles Kings for high-scoring

center Bernie Nicholls.

Smith then obtained right wing Mike Gartner to skate on a line with Nicholls, and the two proved to be an explosive scoring combination in the handful of games they were together.

This season the Rangers are looking for Nicholls to establish himself as a leader in his first full season with the team, a role that loomed even larger when captain Kelly Kisio suffered a broken ankle last Saturday in Hartford, knocking him out for at least six weeks.

Coach Roger Neilson made Nicholls an alternate captain for Monday night's home opener and Nicholls responded by igniting a three-goal first period outburst and pacing the Rangers to their first victory of the season, a 6-3 triumph over the Minnesota North Stars.

Nicholls, who played in the shadow of Wayne Gretzky in Los Angeles, relishes the chance to shoulder such responsibility. ''This team has high expectations, and getting off 0-2 added pressure to tonight's game, '' he said. ''We knew we had to do well on opening night at home.''

Nicholls wasted little time putting his team in front, breaking Darren Turcotte into the offensive zone with a pretty pass for a 1-0 lead. It was Turcotte's second goal of the season and Nicholls' 800th NHL point.

''My job is to create offense,'' said Nicholls. ''We don't really care who scores the goals.''

Nicholls then gave the Rangers a 2-0 lead when he scored his third goal of the season from point-blank range on a power play after receiving a perfect pass from James Patrick.

''Our defense helps a lot,'' said Nicholls. ''They put the puck on the net, create rebounds and set up plays.''

Nicholls put New York ahead 3-0 when he skated across the blue line, fed Gartner at the right faceoff circle and Gartner rifled the puck past goaltender Jarmo Myllys for his 450th career NHL goal.

''We had a good start tonight and all four lines were going,'' said Neilson. ''It was an important win. We didn't want to go 0-3 - there's a confidence factor.''

After Mark Janssens scored at 1:55 of the second period to make it 4- 0, Brian Bellows converted on a power play at 10:54 and Mike Craig scored at 18:35 to pull Minnesota to 4-2.

''Frankly in game 53, I think we would have relaxed with the three- goal lead

'' said Nicholls, ''but I got uptight when they scored a couple of goals.''

The Rangers were able to turn the pressure back on, and when Gartner scored his second at 7:27 of the third period on a power play to make the score 5-2 the North Stars were finished.

''If we had gotten a fourth goal we might have pulled it off,'' said Gainey. ''Gartner's fifth goal added the clock as an element.''

Brian Propp scored his second of the season to cut the margin to 5-3, but John Ogrodnick scored his first of the year into an empty net.

Elsewhere in the NHL Monday night, it was: Montreal 5, Hartford 3; and Calgary 4, Winnipeg 3.

-- AROUND THE NHL --

Canadiens 5, Whalers 3

At Montreal, Stephane Richer capped a four-goal first period and added an assist. Richer's fourth goal of the season at 19:43 gave the Canadians a 4-1 lead. Brian Skrudland, Brent Gilchrist and Eric Desjardins also scored in the first period for Montreal, and Stephan Lebeau added a third-period goal. Kevin Dineen, Ron Francis and Randy Cunneyworth scored for Hartford, and Brad Shaw had two assists for the Whalers.

Flames 4, Jets 3

At Winnipeg, Stephane Matteau and Brian MacLellan scored goals in a 56-second span of the third period and Joe Nieuwendyk scored twice to lead Calgary to its third straight victory. Tomas Steen set up goals a minute apart in the first period by Fredrik Olausson and Doug Smail to give Winnipeg a 2-0 lead. Teppo Nummenin scored the final Winnipeg goal with 37 seconds remaining in the third period.

#90282u0222 10/09/1990 ~United Press International
(OCT. 9) UPI - Around the world... around the clock... news from United Press International:

The White House says President Bush will sign a new budget agreement and an emergency spending bill to end the government's shutdown. Congress passed the budget early this morning. It reduces the deficit by 500-BILLION dollars over five years. The shutdown of the government began Saturday, but the White House says federal workers should report to work today.

David Souter was sworn in yesterday at the White House as a justice of the Supreme Court. Chief Justice William Rehnquist administered the oath. Souter joins the court today for a ceremony. Tomorrow he participates in hearing a dispute about exclusion of women from jobs that might endanger a fetus.

One of Japan's top business executives, 80-year-old Hisashi Shinto , was convicted today of taking bribes from Recruit Company, the firm that touched off the nation's biggest political scandal. He was given a two-year suspended sentence. In June 1989, Prime Minister Noboru Takeshita resigned because of admissions that he accepted questionable donations from Recruit.

Palestinian leaders have asked for U-N forces to be sent as peacekepers to the territories occupied by Israel. They accuse Israel of crimes against Palestinian people. Yesterday at least 19 Moslems were killed in Jerusalem when Israeli police fired on demonstrators.

An early autumn snowstorm has socked the Rockies and Plains. Fort Collins, Colorado, had eight inches of snow. Colorado ski resorts got up a to a foot. Denver's homeless shelters filled up with people. Scottsbluff, Nebraska, got about six inches of snow. Snow also fell in Kansas, but quickly melted away.

-30- 1875
#90282u0271 10/09/1990 ~United Press International
DENVER (OCT. 9) UPI - After kicking two field goals in Cleveland's opening win, Jerry Kauric sat through three consecutive losses without attempting a single field goal.

''I wasn't going to let the 46 other players down,'' Kauric said. ''They fought so hard to get us here.''

Kauric kicked a 30-yard field goal as time expired to give the Browns a 30-29 win over the Denver Broncos.

The Browns trailed 29-20 midway through the final period when Bernie Kosar connected with Brian Brennan for a 24-yard TD to set the stage for Kauric's game-winner.

''In the last two drives with two minutes, we were just calling the plays at the line,'' Kosar said. ''It was really just a great gut-check.

''We proved we could go on the road and win a tough game,'' said Kosar. ''The pressure was on us and it was almost a must-win. We put a lot of effort in tonight, and nobody quit.''

Kosar completed 24 passes on 38 attempts for 318 yards and three touchdowns. He hooked up with Kevin Mack on an 11-yard TD toss and with Webster Slaughter on a 43-yard TD. Eric Metcalf scored on a 5-yard run for Cleveland, 2-3.

Cleveland Coach Bud Carson said, ''Victories like this are always great, especially when no one thinks you can win it. Wins like this are better than all the other victories, and this was really a big one for us.''

Bobby Humphrey scored on a 19-yard run and rushed for 106 yards, gaining over 100 yards on the ground for the fourth consecutive game, tying Otis Armstrong's team record.

John Elway ran a quarterback draw 13 yards for a TD. Mark Jackson ran a reverse 16 yards for a score. David Treadwell kicked field goals of 20 and 25 yards, and Simon Fletcher blocked a punt out of the end zone for a safety for Denver, 2-3.

''We had a nine-point lead with five minutes remaining,'' Denver Coach Dan Reeves said. ''We were unable to stop them. They drove down and scored 10 points, and that's very disappointing.

''We can't count on other people helping us out in our division. This is especially dissappointing because Kansas City lost and the Raiders lost, but we didn't capitalize on the opportunity to take advantage of that and pick up a game on them,'' Reeves said.

Denver took the opening kickoff and marched 92 yards for a 7-0 lead. Elway converted on two third-down situations in the nine-play drive and completed all five of his passes. On third-and-two, he burst up the middle and went in for the game's first score.

Kosar brought the Browns right back, engineering a 76-yard scoring drive. At the Denver five, Metcalf took Kosar's pitch, picked up a block from Mack and went in to make it 7-6. The extra point was blocked.

Early in the second quarter, the Cleveland defense threw Humphrey for a 1-yard loss on a third-and-goal at the 2 and Denver settled for Treadwell's 20-yard field goal for a 10-6 lead.

After Denver failed to move the ball, a short punt gave the Browns excellent field position at the Denver 43. On their first play, Metcalf took a handoff

from Kosar, and pitched back to the quarterback, who hit Slaughter in the end zone. Kosar's second TD pass of the season gave the Browns a 13-10 lead.

Steve Atwater set up the Broncos next TD, intercepting Kosar and returning it to the Denver 47. On third-and-one at the Cleveland 44, tight end Orson Mobley collided with Elway and knocked the ball loose, but the Browns were called offside, negating their recovery. Four plays later, Humphrey ran around right end for 19-yard TD.

Fletcher stormed up the middle on Cleveland's next punt and knocked it through the end zone for a safety to extend the Denver lead to 19-13 at halftime.

With the Broncos driving, Felix Wright intercepted Elway at the Cleveland goal line and returned the ball to the Browns' 37. Kosar's second TD pass, an 11-yard completion to Mack over the middle, gave Cleveland a 20-19 lead at 6:38 of the third quarter.

After Kosar completed a 13-yard pass to Brennan on a third down and eight, Alton Montgomery intercepted Kosar's next pass and returned it to the Denver 31.

Elway completed passes of 19 and 34 yards to Vance Johnson and then handed off to Jackson on a reverse to give the Broncos a 26-20 lead with 10:31 remaining.

Fullback Leroy Hoard fumbled on Cleveland's next play from scrimmage, and Dennis Smith recovered at the Browns' 32. Cleveland held, and Treadwell made his second field goal to widen Denver's lead to 29-20 midway through the final period.

Cleveland converted two fourth-down plays in an 80-yard scoring drive. Kosar found Vernon Joines for a 24-yard gain on fourth down and two at the Denver 48.

''That was just an outstanding play,'' said Kosar. ''It really wasn't designed. Vernon made a really nice catch on that ball.''

Kosar hit Brennan for 24-yard TD on the next play.

The Broncos still led 29-27, but lost seven yards on their next possession. Horan's 40-yard punt gave the Browns the ball on their own 39 with 2:04 left.

Kosar directed a 10-play drive to the Denver 12-yard line before Kauric kicked his field goal.

''We're on the road in Denver where we've had horrible luck,'' Kosar said. ''To come back and win in the fourth quarter is a tribute to a lot of players.''

BANGKOK, Thailand (OCT. 9) UPI - Tropical storms have flooded large areas of Thailand and Vietnam, killing at least 20 people and causing widespread damage to crops, official reports said Tuesday.

Tropical storm Ira triggered serious flooding in 19 provinces in Thailand in the past week with 11 people reported killed, official reports said.

A total of more than 120,000 familes were affected by the floods which swept away 49 bridges and damaged more than 500 roads, the reports from the Ministry of the Interior said.

More than 500,000 acres of crops are under water, the reports said.

In Bangkok, flooding worsened already serious traffic problems, preventing many people from getting to work or to schools. By Tuesday, however, most of the floodwaters had subsided.

The official Vietnam News Agency reported similar damage in Vietnam from a storm that lashed the country from Oct. 2 to Oct. 6.

''Nine persons were reported dead and dozens of houses collapsed or were heavily damaged'' in Dong Nai province just northeast of Ho Chi Minh City in southern Vietnam.

The storm, dumping up to 19 inches of rain in some areas, also hit the central province of Nghe Tinh and the Red River province of Thai Binh, near Hanoi, causing ''heavy losses in lives and property,'' it said.

It said the floods destroyed many rice fields just as the crops were due to be harvested.

(OCT. 9) UPI - Unseasonably cold weather prevailed from the central Plains to the upper Great Lakes early Tuesday and snow fell in Texas.

The National Weather Service posted freeze warnings for western Kansas and for the south-central and northeastern sections of Nebraska, where the temperature rose only into the 40s Monday afternoon.

A cold front brought sleet and light snow to the Texas Panhandle Monday night and dropped the mercury into the 50s in rainy north Texas.

High temperatures were in the 80s and 90s Monday, but were expected to reach only the 50s and low 60s Tuesday in the northern half of the state.

The first Texas snow of the season was reported from east of Dalhart to Perryton, while thunderstorms brought sleet from Amarillo to Dumas.

Temperatures behind the front were about 30 degrees lower than those ahead of it. Gusty north winds and drenching rains added drama to the change to chilly weather.

The touch of winter fingered southward into the Texas Hill Country Monday night along a line from Tyler to Temple to near Ozona.

Heavy continuous rain in the Dallas-Fort Worth area caused some urban and small stream flood problems Monday night, the NWS said.

A high pressure system continued to influence Southern weather, which remained warm and relatively dry.

In Montgomery, Ala., it was 95 degrees Monday, tying a 106-year-old record.

The high of 91 degrees at Columbus, Ga., was the city's warmest reading of record for so late in the season, and also marked a record 106 days of 90-degree weather for the year, the NWS said.

MANILA, Philippines (OCT. 9) UPI - At least 14 people were killed as government troops battled communist guerrillas in five separate incidents over a 48-hour period, the military reported Tuesday.

Brig. Gen. Emiliano Templo said rebels of the communist New Peoples Army raided an army outpost and a police detachment simultaneously at dawn Tuesday in towns of Catarman and San Isidro, Samar island, 300 miles south of Manila. The attacks left three policemen killed and eight people wounded.

Templo said the rebels also ambushed an army team from San Isidro out to reinforce the soldiers, wounding two troopers. He said guerrillas then raided the army detachment after the reinforcing soldiers have left.

On Monday, eight guerrillas were killed when troops, backed by helicopter gunships, strafed rebel positions in Ragay, Camarines Sur, 130 miles southeast of Manila, constabulary spokesman Col. Ernesto Maristela said.

A military report also said three other guerrillas were slain in an encounter in nearby Quezon province Monday.

The 19,000-member NPA, armed wing of the outlawed Communist Party of the Philippines, has been fighting the Manila government for the past 21 years.

LAHORE, Pakistan (OCT. 9) UPI - A court Tuesday adjourned hearing of two cases against Benazir Bhutto of misconduct during her term as prime minister.

The Special Disqualification Court ordered Bhutto to reappear on Oct. 16 to face corruption charges, which some observers say have been brought in an attempt by President Ghulam Ishaq Khan to have her barred from the forthcoming elections.

The president has alleged Bhutto attempted to help a London hotel company obtain prime land in Islamabad at throwaway prices and that she gave a liquefied natural gas distribution agency to a company owned by a relative.

The ousted prime minister also faces two separate cases in the southern port of Karachi on Wednesday. If found guilty of any of the charges, she could be barred from politics for seven years, including the Oct. 24 polls.

Bhutto, 37, has denied the accusations and has challenged the validity of the special courts, which were set up by Ishaq Khan to try the ex-prime minister and members of her administration.

''The president wants me out of his way,'' Bhutto told reporters during a break in Tuesday's proceedings. ''He wants to overturn the people's verdict by bringing such cases against me.''

Bhutto said she had agreed to appear before the courts only ''because we need a forum to explain our position.''

Ishaq Khan dismissed Bhutto's 20-month-old administration on Aug. 6, accusing it of corruption and nepotism and of failing to maintain law and order. He appointed opposition leader Ghulam Mustafa Jatoi as interim prime minister until the elections.

Two of Bhutto's former ministers are facing criminal charges of corruption, while three more must appear before the disqualification courts. Bhutto's husband, businessman Asif Ali Zardari, also faces bank fraud charges and is free on bail.

Tuesday's hearing was postponed from Saturday, when thousands of Bhutto supporters broke through barricades surrounding the High Court building in the northeastern city of Lahore and occupied for about two hours the courtroom where she was to appear.

BEIJING (OCT. 9) UPI - Aviation authorities said Tuesday a fugitive embezzler hijacked and caused the crash of a jetliner in southern China last week that killed 127 people, but also criticized local airline and airport managers for mishandling the incident.

The government actions came with unusual swiftness for aviation mishaps in China and effectively acknowledged wide criticism overseas that officials in Canton, capital of southern Guangdong Province, botched the response to the hijack and crash aftermath.

The Boeing 737 of the Xiamen Airline Co., a state-owned regional airline, was hijacked Oct. 2 on a domestic flight and crashed as it landed at Canton's Baiyun Airport, slamming into two parked planes in a fireball that left 127 dead and more than 50 injured.

The government statements Tuesday, carried by the Xinhua news agency, were the first detailed official accounts of the incident.

Canton's Aviation Administration Bureau and Public Security Bureau, in a joint statement, identified the hijacker as Jiang Xiaofeng, 21, a purchasing agent for a county government office in the central city of Changsha.

Jiang had been sought by police since July for embezzling $3,600. He boarded the flight in the east coast city of Xiamen, forced his way into the cockpit and threatened to detonate explosives unless he was flown to Taiwan, the statement said.

The pilot said the plane had only enough fuel for Hong Kong, but Jiang refused to go there. Low on fuel, the crew landed the 737 at the Canton airport, but ''the hijacker attacked the pilot and the plane swung to the right, out of control,'' the statement said.

The investigation confirmed survivor accounts of a cockpit struggle before impact, but contradicted reports of an explosion before the crash, saying ''no trace of explosives was found.''

In a separate statement, however, a spokesman for the Civil Aviation Administration of China (CAAC), the national airline and aviation agency, also criticized local officials.

''This serious incident has revealed the existing problems of the airport and airline company in their management,'' the CAAC spokesman said. ''It has been decided that a shakeup of the airport and the company will be made.''

The spokesman reaffirmed that all CAAC staff, airline companies and airports should adhere to existing regulations ''putting safety first, and make the guarantee of the passengers' personal safety in whatever circumstances their priority concern.''

The incident has given travel in China another black eye at a time when tourism is just recovering from the aftermath of the violent crackdown in June 1989 on pro-democracy protesters.

Hong Kong, Taiwan and Macao Chinese and one American were among the dead. Officials of those governments have publicly criticized the handling of the hijack and the crash aftermath, with U.S. officials citing lengthy delay in identifying the bodies.

In Beijing, U.S. Embassy spokesman Sheridan Bell said the remains of the American victim, Mary Anna Gilbert, a teacher from Alabama, were finally confirmed as identified only on Monday by an official of the U.S. Consulate in Canton.

Gilbert's traveling companion, Erin L. Thomas of Oklahoma City, remains hospitalized in Canton with injuries from the crash, Bell said.

At the same time, security at the Xiamen airport has been criticized for allowing the hijacker to board.

Baiyun airport officials have also been criticized for their failure to clear the runway, despite the fact that they were alerted by the 737's crew to the hijacking before landing. One of the parked planes hit was a fully loaded flight bound for Shanghai.

The handling of the hijack itself has also been questioned, since Chinese air crews have in the past tried to mislead hijackers into believing they were being taken to Taiwan when in fact they were landing within China.

The Canton aviation bureau statement claimed the landing at Baiyun was necessitated by low fuel and said ground officials had authorized the crew to land the 737 ''at any airport within or without China's borders,'' including Taiwan, to ensure safety.

Responding to the hijack, Taiwan announced last week it would no longer grant asylum to hijackers as it has for decades. Tuesday's CAAC statement said Chinese authorities ''welcome the decision.''

#90282u0493 10/09/1990 ~United Press International

BANGKOK, Thailand (OCT. 9) UPI - The Thai cabinet Tuesday lifted a ban on imports of foreign cigarettes but maintained government control of distribution, a government spokesman said.

Spokesman Pornthep Techapaiboon said the cabinet approved imports of foreign cigarettes after the General Agreement of Tariffs and Trade ruled last week

Thailand acted unfairly in prohibiting foreign cigarettes.

The United States has long pressured Thailand to import American cigarettes despite Thai insistance the ban was a measure to protect public health.

U.S. officials, however, have pointed out Thailand did not ban the sale of domestically produced cigarettes, meaning the ban was actually an unfair trade practice.

''If we don't follow GATT's decision, the Americans will launch tough retaliatory measures against Thai products,'' Pornthep said.

He said the cabinet was concerned that Thai exports would suffer from U.S. actions under Section 301 of the Trade Act.

''We might lose our GSP (Generalized System of Preferences) privileges in the United States,'' he said.

Pornthep said Thailand still has the right to strictly control cigarette distribution and prohibit cigarette sponsorship of sporting events.

''There will be no advertisments allowed of any kind and imported cigarettes will be charged with (a) 55 percent excise tax,'' he said.

Pornthep said legislation would be considered to require all cigarettes sold in Thailand to have health warnings in the Thai language and include a list of all ingrediants.

Despite the existing ban, foreign cigarettes are smuggled into Thailand and are widely available in most cities.

(OCT. 9) UPI - Stock prices on the Tokyo Stock Exchange closed lower in light trading Tuesday, giving up early gains amid profit taking prompted by last week's fast-paced recovery.

The Nikkei Average of 225 selective issues, which gained 802.35 points Monday, slipped 134.89 points to 23,495.11.

Early in the session, the Nikkei gained as much as 340 points before being dragged down by cautious investors and profit taking.

The broader-based Tokyo Stock Exchange Price Index eked out a 1.50 point gain to 1,728.69. TOPIX had jumped 46.52 points Monday.

Advances outnumbered declines 583 to 381, while 130 issues remained unchanged.

Volume remained light as an estimated 450 million shares changed hands, slightly higher 395 million shares Monday.

Traders in Tokyo will take a break Wednesday, as banks, markets and most major businesses close for Sports Day. Trading will resume Thursday.

Elsewhere in Asia, stock prices closed lower on the Hong Kong Stock Exchangein a slow trading.

The benchmark Hang Seng Index, which surged 75.03 points Monday, slipped 11.96 points to 2,913.52.

In Singapore, stocks closed lower in quiet trading on the Singapore Stock Exchange.

The Straits Times Industrial Index, which eased 3.90 points Monday, slipped 4.73 points to 1,105.30. The broader-based All Singapore Index, which eased 1.02 points Monday, dipped 3.76 points to 307.58.

An estimated 20.9 million shares changed hands, compared with 22.2 million shares Monday.

In Bangkok, stock prices closed slightly higher in light trading on the Thailand Stock Exchange.

The Stock Exchange of Thailand Index, which added 7.11 points Monday, added another 2.10 points to 682.19.

Volume amounted to around 2.4 billion shares, compared with 1.7 billion shares Monday.

Advances edged out declines, 79 to 61 with the best-performing stocks in the financial sector.

In Australia, stock prices closed slightly higher in moderate trading on the Sydney Sharemarket boosted in part by Monday's strong performance in London.

The All Ordinaries Index, which gained 12.6 points Monday, added another 5.9 points to 1,375.4.

Volume amounted to 55.7 million shares, compared with 49.3 million shares Monday.

#90282u0658 10/09/1990 ~United Press International

BEIJING (OCT. 9) UPI - A senior Communist Party official indicated Tuesday a crucial party meeting has been postponed until December at the earliest, apparently due to a lack of consensus concerning China's troubled economy, Japanese sources said.

Li Ruihuan, a member of the party Politburo's ruling Standing Committee, made the remark during a meeting with a visiting Japanese politician. Li oversees cultural affairs and is regarded as the most liberal among the committee's six members.

The meeting in question is a so-called plenum of the party's policy- making Central Committee, at which the country's conservative leadership is expected to finalize a new five-year economic plan.

''Japanese papers reported that the plenum will open in November, but thats incorrect,'' Li told former Japanese Construction Minister Kiyoshi Mizuno at a meeting, according to Japanese sources who declined to be identified.

''The plenum will not open until after November,'' Li said.

Initial forecasts were that the plenum would be held this month after the just-concluded Beijing Asian Games. The date was then pushed back to November.

Government spokesman Yuan Mu told reporters privately last week that the plenum would be held in late November.

Li did not say whether the meeting would be held in December or later, and gave no explanation for the postponement. But different factions within the party are known to be in disagreement over economic policy and personnel matters.

At the heart of the matter is the pace and shape of economic reform, with some aging leaders favoring central planning over calls for a more liberal market system.

Li's comment coincided with a lengthy article on the economy by hard- line Premier Li Peng.

The article, which took up almost a full page in the Communist Party flagship Peoples Daily, outlined a number of problems in the domestic economy and advocated more central planning.

''All vital national projects must be incorporated into the (state) plan,'' the Soviet-trained premier wrote. ''We cannot blindly develop.''

Li Peng denounced past ''boom-bust'' cycles of inflation followed by periods of tightening, and said future outbreaks of economic chaos must be prevented. He also warned China's natural resources are too scarce for land to be used to entice foreign investment.

Land has been leased to some foreign companies in south China's special economic zones.

Both Li Peng and Li Ruihuan spoke of ''combining'' a new five-year economic plan with an ambitious 10-year overall development plan that would ideally map out the direction of the Chinese economy.

Among the leadership's goals is the doubling of China's gross national product by the year 2000, thus duplicating the feat of senior Chinese leader Deng Xiaoping over the past decade of economic reform.

(OCT. 9) UPI - President Bush signed an omnibus emergency spending bill this morning, hours after it won congressional approval. That means the federal government will open today for business. The White House says Bush signed the bill at 7:07 eastern time, this mornin+tion is congressional passage of a budget reconciliation bill by October 19th.

Discovery astronauts Richard Richards and Robert Cabana today carried out tests on the ship to make sure all is well for a space shuttle landing tomorrow in the California desert. Richards and Cabana briefly switched on one of Discovery's three auxiliary power units to test the spaceship's control systems.

Newly sworn-in Supreme Court justice David Souter joins his eight colleagues tomorrow in hearing one of the year's major cases. The court examines a dispute over the legality of company policies excluding women from jobs that may endanger a fetus. Souter was formally sworn in as a Supreme Court justice yesterday at the White House.

Security forces are on alert throughout Israel and the occupied territories as Arabs observe a strike protesting the deaths of at least 21 Palestinians killed by police during riots on the Temple Mount. The Gaza Strip and West Bank towns and all refugee camps are under curfew to prevent more violence. Several Arab neighborhoods in Jerusalem were declared closed after disturbances today.

Philippine Army officials say at least 14 people died as government forces battled communist rebels in five separate incidents during the last two days. Rebels of the New Peoples Army raided an army outpost and a police detachment simultaneously today in towns 300 miles south of Manila. Three police officers were killed and eight people were wounded.

(OCT. 9) UPI - Political sources in Lebanon say Druze Moslem leader Walid Jumblatt has been called to Syria after he publicly condemned a 12-day seige in Beirut by pro-Syrian troops against a Christian general. Jumblatt's remarks came at a weekend rally of Christian citizens from the Israel-occupied security zone, 15 miles south of Beirut.

Winter-like weather prevailed from the central Plains to the upper Great Lakes today. A cold front brought sleet and light snow to the Texas Panhandle last night, as the mercury fell to the 50's in north Texas. A high pressure system

influenced weather across the South, where it remained warm and mostly dry.

Country singer George Strait was nearly speechless when he was named Entertainer of the Year at the Country Music Association awards in Nashville last night. The Texas crooner beat out Kathy Mattea, Randy Travis, Clint Black and Ricky Van Shelton to capture the top award in country music.

Chinese doctors have UNveiled a so-called anti-AIDS ''tonic'' made from herbs and seaweed. Doctors in Beijing introduced a concoction made of honeysuckle, chrysanthemums, seaweed and something called ''Chinese gromwell.'' They gave NO detailed evidence that the treatment works, recommending that it be used in conjunction with Western drugs.

South African officials say a gang of 25 black men with Ninja knives staged random attacks on white pedestrians in the port city of Durban. Police say at least eight white South Africans were injured. Authorities report that six men were arrested as police searched the area. Police say there was NO apparent motive for the attack.

LOWELL, MA (OCT. 9) UPI - A dancer who asked Lowell police for political asylum after she defected from her touring Cambodian troupe apparently has headed to Washington, D.C., to confer with immigration officials, her lawyer said Tuesday.

Mas Adi Meas, 23, is the fourth dancer to leave the troupe since it arrived in the United States about a month ago. Three others left in Minnesota and as many as seven other members sought asylum while the troupe was in London, according to Jeffrey Davidson, a Lowell police inspector.

The lawyer who was representing Meas, Joseph Sexton III of Lowell, said he had arranged to meet with immigration officials in Boston Tuesday but learned late Monday that she apparently went to Washington to present her asylum request to the Immigration and Naturalization Service.

Meas on Sunday walked into the Lowell police station to request political asylum just before the rest of her touring dance company, the Classical Dance Company of Cambodia from Phnom Penh, headed for New York where five performances were scheduled.

The Boston Herald reported Tuesday that the New York performances may not go on because of the defections and death threats.

Producer Eileen Blumenthal said one of the show's stars, Yim Devi, was the target of an attempted abduction at knifepoint Monday by a Cambodian man in New York. She said the man had followed Devi since the troupe first performed

in Los Angeles.

''He showed her a knife and said that if she went with him she would be all right but if she kept dancing, he would kill her,'' Blumenthal said.

She said the death threat was the latest against members of the troupe.

Meas asked for police help early Sunday, Lowell Police Lt. John Sullivan said. At the station, police contacted the State Department in Washington, which apparently contacted the INS, Sullivan said.

Lowell has the second largest Cambodian community in the country behind Long Beach, Calif., with about 25,000 people.

Leny You, program director for Cambodian-American Community Television in Lowell, said he taped the troupe's performance in Lowell Saturday night and also taped the troupe boarding a bus headed for New York on Sunday.

''Everybody got on the bus and (Meas) went to a car,'' You said, adding Meas has family in the Lowell area.

RALEIGH, NC (OCT. 9) UPI - A new poll shows that the Senate race between Republican three-term incumbent Jesse Helms and Democratic challenger Harvey Gantt is in a dead heat.

The poll for The News and Observer and WRAL-TV shows that 43.5 percent of those asked favored Gantt and 42.7 percent said they supported Helms. Nine percent said they were undecided in the Nov. 6 contest.

The survey of 621 registered voters conducted Oct. 1-4 and published Tuesday, has a 3.5 percent to 4 percent margin of error.

The poll shows the race is even tighter when those undecided were asked who they were leaning toward. With that, each candidate got 46.9 percent and only 6.3 percent were totally uncommitted.

White voters make up 35 percent of Gantt's supporters. The first black Democratic U.S. Senate nominee has 81 percent of the black vote to Helms' 9 percent.

About 67 percent of those surveyed were Democrats and 30 percent were Republicans, 80 percent were white, 20 percent were black, 56.2 were women and 43.8 percent were men.

The survey found 42.2 percent thought Helms was doing a good or excellent job

but 53.2 percent said the senator was doing a fair or poor job.

Independent Opinion Research and Communications of Wrightsville Beach conducted the poll.

FORT WORTH, Texas (OCT. 9) UPI - American Airlines has issued layoff notices to about 40 employees as part of a plan to trim 1,000 jobs in light of the weakening U.S. economy and rising jet fuel prices.

Airline spokesman Al Becker confirmed Monday that layoff notices had been sent to ''about 40 people system wide.''

The layoffs are the first for the carrier, based in Fort Worth, Texas, in nearly eight years. The carrier employs more than 90,400 people.

American officials initially planned to trim most of the jobs through attrition and a hiring freeze in management and clerical ranks. In recent interviews, they said layoffs were possible, but would be considered only as a last resort.

Becker said the laid-off workers may be re-absorbed by the company in other jobs. Those who are left without positions will have priority rights over other applicants if they qualify for new posts.

American is continuing to hire pilots, flight attendants, mechanics and other workers needed to handle the carrier's rapidly growing fleet. American expects to add a net gain of 114 aircraft to its fleet by the end of 1991.

Becker said the carrier's jet fuel prices have risen from 54 cents a gallon in the summer to the current 92 cents, with prices as high as $1.26 on some spot markets.

Several workers at American's home base at Dallas-Fort Worth International Airport were laid off. They include airplane cleaners and baggage handlers.

(OCT. 9) UPI - President Bush was up at dawn to sign the emergency spending bill into law. He signed it at 7:07 a-m, early enough to allow government offices to open for the day after a two-day shutdown because of lack of money. The bill and a plan to reduce the deficit by 500- BILLION dollars over five years were approved by Congress this morning.

The five shuttle Discovery astronauts are in their last full day in space.

They are preparing for tomorrow's re-entry and return to Earth. That involves testing the shuttle's landing and guidance systems. Discovery was launched on Saturday. Its main mission was sending the space probe Ulysses on a trip that eventually will put it into orbit around the sun.

Police report a rampage in the South African Indian Ocean port city of Durban. A gang of 25 black men raided a curio shop and took Ninja knives and other weapons. They then ran through the center of the city and randomly attacked white pedestrians. At least eight people- as old as 85- were hurt. A police spokesman says hundreds of people panicked. Police made six arrests.

Two Middle East leaders are calling on Iraqi President Saddam Hussein to pull his troops out of occupied Kuwait. Libyan leader Moammar Gadhafi said after the withdrawal, Saddam should declare war on western forces staying in the region. Gadhafi said, however, Iraq should be given a ''disputed territory'' on the Iraqi-Kuwaiti border, including oil fields. Iranian President Rafsanjani also called for a pullout. He said Iraq is to blame for the foreign troops' presence.

#90282u0812 10/09/1990 ~United Press International

BRUSSELS, Belgium (OCT. 9) UPI - A Renault-Volvo alliance to create the world's largest truck-and-bus producer is the first agreement to be probed by the European Community's new merger agency, officials said Tuesday.

The 46-member EC Merger Task Force, designed to police most large EC mergers, began operations Sept. 21 and is expected to scrutinize about 40 deals annually.

Renault, the state-owned automaker in France, and the Swedish firm Volvo AB announced the complicated stock deal in February at a news conference in Amsterdam.

Under the agreement, Gothenburg, Sweden-based Volvo would acquire a 20 percent share in Renault, with an option to take another 5 percent stake. Renault would assume a 10 percent stake in Volvo. Each firm would hold 45 percent of the other's truck and bus divisions.

The EC competition commissioner, Sir Leon Brittan, said earlier this year the deal did not appear to present problems under EC competition law, which barred ''abuse of a dominant position.''

The new merger law, passed last December but effective only last month, is designed to prevent creation of a dominant position in the first place.

''The criteria are slightly different,'' an EC spokesman said Tuesday.

Under the new merger rules, firms participating in large mergers must notify the Merger Task Force when a deal is finalized. The EC spokesman said Renault and Volvo notified the task force last Friday.

When announced, the deal was said to create the world's fourth- largest auto entity, with yearly sales of $45 billion.

''The combination of the truck and bus side will give us the largest combined operation of the world market,'' Volvo Chairman Pehr Gyllenhammar said in announcing the arrangement.

Volvo specializes in heavy-duty trucks, while Renault's strength is in light-duty trucks and vans.

The EC task force has sole jurisdiction to police most mergers involving companies trading a combined 5 billion European Currency Units ($6.5 billion) within the 12-nation Community. Smaller mergers are handled by national authorities.

The task force must decide within a month whether the Renault-Volvo deal poses competition problems, and if so, it has an additional four months to approve the deal, veto it or approve the transaction with modifications.

#90282u0834 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - The Supreme Court Tuesday agreed to decide whether police can legally board interstate buses and trains to randomly search luggage for drugs, as long as passengers give their consent and are advised they have a right to refuse.

The Florida Supreme Court outlawed the practice, claiming it was ''inherently coercive'' and violated the Fourth Amendment's prohibition against unreasonable searches and seizures.

The state of Florida asked the high court to review the finding, which made drug evidence inadmissable in six cases.

As part of drug interdiction programs, police departments in Broward County and Palm Beach County adopted a policy of having officers routinely board interstate buses and trains at random during scheduled stops.

The uniformed police would then ask passengers for permission to search their luggage and advise them they may refuse to consent.

A trial court held the practice unlawful, but that decision was overturned by an appeals court.

The Florida Supreme Court then took up the matter and ruled that the police policy was unconstitutional.

The court found that in the case of Terrance Bostick, he was effectively ''seized'' by police who asked to search his bags during a short layover on a bus trip in Fort Lauderdale.

''Because Bostick was en route to Atlanta, he could not leave the bus, which was soon to depart,'' the court wrote. ''He had only the confines of the bus in which to move about, had he felt the officers would let him do so.''

The court ruled that the government ''exceeded its power to interfere with the privacy of an individual citizen who is not even suspected of any criminal wrongdoing,'' and called the ''intrusion upon privacy rights ... too great for a democracy to sustain.''

89-1717 State of Florida vs. Terrance Bostick

#90282u0842 10/09/1990 ~United Press International

BEIJING (OCT. 9) UPI - China, worried about economic sanctions and a growing bilateral trade surplus, is sending its largest-ever import mission to the United States and is telling its foreign-trade agencies to buy American, fficials said Tuesday.

''This will be the biggest group we have sent,'' said Sun Zhenyu, deputy director of the Americas department of the Chinese Ministry of Foreign Trade and Economic Relations. ''We want to demonstrate how eager we are to improve our imports.''

The delegation, numbering up to 300 during the 20-day mission, will leave later this month and visit Washington, New York, Chicago, Houston, Los Angeles and Seattle. Its members include national, provincial and local trade and business officials.

Sun and delegation leader Wang Runsheng, a former MOFERT deputy minister, acknowledged a primary objective is to ease criticism in the U.S. Congress of China's rising exports to the U.S. market and shrinking imports of American products.

They also acknowledged the continued sanctions imposed on China since the government crackdown on pro-democracy protesters in June 1989. The Bush administration suspended high-level visits, military cooperation and most new lending to China.

''This fully puts our priorities on imports from the United States,'' said Wang, currently a member of the Standing Committee of the National People's Congress, China's nominal parliament.

Sun said delegation members hoped to negotiate several hundred million dollars worth of purchases, and indicated the government was encouraging provincial trade agencies to buy U.S. products.

''If left on their own, they might buy from Europe or Japan, but we are putting emphasis on telling them to organize purchases from American businesses,'' he said. ''We must try to do something to correct this state of affairs.''

The officials said delegation members planned also to meet with members of Congress to discuss China's most-favored-nation trade status, which guarantees preferential tariff treatment for Chinese exports to the United States.

President Bush earlier this year recertified China for MFN, but Congress has considered revoking it over human rights concerns.

According to U.S. figures, China sold $12 billion in exports to the United States last year, while buying about $6 billion of American goods. Beijing has much lower figures, but fails to include exports shipped through Hong Kong to the U.S. market.

China's exports continued to rise in the first half of this year, while imports declined 15 percent, due to a combination of the sanctions, a Chinese government austerity program and the devaluation last December of the Chinese currency.

The officials said the delegation was going at the invitation of the U.S.-China Business Council and would look to buy grain, cotton, timber, machinery and advanced technology products.

#90282u0843 10/09/1990 ~United Press International

BRUSSELS, BELGIUM (OCT. 9) UPI - The European Community executive agency said Tuesday it ''vigorously condemns'' the latest violence in Jerusalem and the Israeli-occupied territories.

Some 20 Arab protesters were killed on Monday when Israli police opened fire during a demonstration, and problems were reported later in the occupied territories.

The EC executive agency, which is known as the Commission, expressed ''consternation'' at the turn of events.

''All provocation and all violence in the region only delays and complicates again the search for a solution to the Israeli-Palestinian conflict,'' the EC agency said.

-30- 812
#90282u0846 10/09/1990 ~United Press International
NAIROBI, KENYA (OCT. 9) UPI - Bush warfare continued to rage in northern Rwanda Tuesday, but Foreign Minister Casimir Bizimungu reportedly said tough military action and cooperation from neighbor countries was stemming the east African country's 10-day civil war.

About 1,500 disaffected long-term Rwandan refugees from Uganda stormed across Rwanda's northern border Sept. 30, vowing to depose President Juvenal Habyarimana. Western diplomats in Nairobi say there are now 5,000 to 7,000 rebels, including deserters from the Ugandan army and Rwandan refugees who have lived in Uganda.

That has now stopped, Bizimungu told diplomats in the capital Kigali in a statement read over Rwanda Radio.

The Ugandan government has prevented about 10,000 refugees ''who had planned to enter Rwanda to commit subversive activities'' from doing so, and Bizimungu added, ''The government of Rwanda is now dealing with those who entered a few days ago.''

Meanwhile, he said the government was holding about 500 people in Kigali at a sports stadium. Other reports said as many as 1,500 people had been detained, mostly civilians with inadequate identification papers.

''More than 500 traitors, thugs and troublemakers have been caught in Kigali '' Bizimungu said, five days after bands of armed men attacked installations in the capital.

He said more than 200 rebels, led by Maj. Gen. Fred Rwigyema - a former army commander in Uganda - had been killed in fighting along the northern border and stressed no foreign troops were involved in the fighting.

France, Belgium and Zaire have all deployed soldiers into Rwanda in the past week. The rebels, calling themselves the Rwandese Patriotic Front, have warned all three countries not to get involved in the fighting.

France and Belgium have repeatedly stressed they are only there to protect about 2,300 French and Belgian civilians living in Rwanda. About half of these civilians left the country at the weekend.

The government has flown continuous helicopter bombing missions against the rebels, but diplomats contacted by telephone in Kigali said it was unclear Tuesday who was winning the bush war.

Habyarimana's government, dominated by the majority Hutu tribe, accused the rebels of starting a tribal war along the lines of conflicts and uprisings in

the 1950s and 1960s, when Hutu massacres drove hundreds of thousands of the minority Tutsi tribe into exile in Uganda, Burundi, Tanzania and Zaire.

There are about 80,000 Rwandans in Uganda alone.

The rebels, mainly Tutsi, countered their forces include many Hutu and said in a statement Monday ''the present conflict is motivated by nationalistic and patriotic ideals.''

They accused France, Belgium and Zaire of ''refusing to see the plight of a persecuted and deprived people. You have closed your ears to the wails of millions of Rwandese wriggling helplessly in the grip of a brutal dictatorship.''

Habyarimana's government, stable since his military coup in 1973, has a relatively good human rights record in the eyes of most western governments, according to diplomats.

The concentration of power in the hands of a few close advisers from the president's native area of the country, however, has in recent years brought an upsurge of anti-government feeling from excluded Hutu and Tutsi alike.

According to rebels interviewed in Ugandan newspapers, Habyarimana's statement earlier this year that Rwanda was too overcrowded to accomodate returning refugees triggered much of the exiles' bitterness against him.

Rwanda has the highest population density in Africa, and suffered a minor famine in February this year because of overfarming of its crowded hills.

#90282u0870 10/09/1990 ~United Press International

BEIRUT, LEBANON (OCT. 9) UPI - Palestinian and Lebanese Moslem leaders called Tuesday for an armed struggle against Israel as thousands of angry Palestinians protested the killing of about 20 Arabs in Jerusalem.

Iraqi President Saddam Hussein, in a statement to the Moslem world Tuesday, warned Israel to evacuate occupied Arab territories or risk a quick response to its actions.

''The wounds of sad Jerusalem cannot be healed by statements or condemnations. ... Only quick action to revenge the Israeli massacres against the Palestinians can heal its wounds,'' Saddam's statement said.

Thousands of Palestinians in the refugee camp of Ein El Helweh, 24 miles south of Beirut, chanted anti-Israeli and anti-American slogans, witnesses said.

The demonstrators denounced the Israeli and U.S. policy in the Israel-occupied

territories and called for escalating the struggle against ''the Zionist enemy.''

Witnesses said the protesters, who carried Palestinian and black flags and pictures of Palestine Liberation Organization leader Yasser Arafat, burned tires at the entrances to the camp.

Israeli police opened fire on thousands of Palestinians demonstrating at Islam's third-holiest site in Jerusalem Monday, killing at least 21 Moslems and wounding more than 150.

''Woe unto them. They are the killers of the prophets,'' said Husniyah, a 70-year-old Palestinian woman in El Helweh.

''With blood we redeem Jerusalem,'' chanted some 200 PLO guerrillas carrying Soviet-made rifles. ''We will avenge our martyred brothers.''

Among the demonstrators were representatives of various Palestinian factions and Lebanese Moslem and leftist parties.

A PLO representative in Lebanon, Zeid Wehbeh, called for ''a joint military stand to confront Israel and the United States, which occupies the Arab Peninsula, a reference to the deployment of U.S. troops in Saudi Arabia to counter Iraqi aggression.

Wehbeh described the Jerusalem killings as ''a terrible massacre.''

''This crime will not pass without punishment, and we clearly announce that any Israeli soldier will be from now on a target for our uprising heroes and Palestinian strugglers,'' Wehbeh said.

The radical Palestinian group of Abu Nidal said that ''the massacre was part of a Zionist plot to terrorize our people as a prelude to empty Palestinian Arab territories and pave the way for settling thousands of Soviet Jews.''

The statement called for the rejection of dialogue and negotiation with Israel.

A spokesman for the breakaway Al Fatah-Uprising in Damascus, Syria, called on the ''Palestinian strugglers inside the occupied territories to use firearms at a large scale to confront Israeli soldiers and settlers.''

The mentor of the Iranian-backed Hezbollah, Sheik Mohammed Hussein Fadlallah, said the Jerusalem killings were aimed at undermining the nearly 3-year-old Palestinian uprising.

''The natural response to this brutal and barbaric massacre is to boost the Intifada (uprising) and escalate Lebanese resistance against Israeli troops in southern Lebanon,'' Fadlallah said.

Pro-Syrian Lebanese Prime Minister Selim Al Hoss condemned the killings, saying, ''This was not Israel's first crime, as the history of the Jewish state is full of collective crimes committed against our people inside the occupied territories and Lebanon.''

Palestinian and Lebanese parties proclaimed Wednesday a day of mourning in Moslem West Beirut and southern Lebanon.

Security sources said Israeli troops along the Israeli-Lebanese frontier and inside Israel's self-proclaimed ''security zone'' were on full alert, fearing attacks by Palestinian and Lebanese guerrillas.

#90282u0873 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - The Supreme Court Tuesday refused a request to review the constitutionality of the Army's urinalysis drug testing program.

At issue was whether a urinalysis test without suspicion, conducted as part of a military commander's inspection of his troops, violated the Fourth Amendment's protection against unreasonable searches and seizures.

The case was brought by Army Staff Sgt. Clarence E. Peten, who was court-martialed in Fort Rucker, Ala., in October 1988 for, among other things, using cocaine. The charge was based on a drug test conducted eight months earlier.

Peten, who was convicted and sentenced to six months incarceration, a rank reduction and a bad-conduct discharge, contended the military's rationale for conducting drug tests is illegal because it uses them primarily as a basis to court-martial soldiers.

While the high court has upheld the use of ''special needs'' drug tests to ensure safety in certain jobs like railroad workers, the Army's policy differs because it uses urinalysis ''to ferret out and prosecute drug abusers,'' attorneys for Peten argued.

The Justice Department, in asking the court not to hear the case, pointed out that the court already has upheld the legality of drug tests for Customs Service agents who carry guns.

#90282u0890 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - The Supreme Court Tuesday let stand a decision that

a public school system allowing its choice of organizations to use its facilities is required to grant similar access to a wide range of groups.

At issue was whether a public school system renting its facilities to some community, civic and cultural organizations during non-school hours is legally an open public forum required under the First Amendment to grant similar access to other groups - including those it may not agree with.

Many school systems nationwide allow their facilities to be used by various groups, thus the court's refusal to hear the case could affect school districts nationwide.

The case stemmed from a decision of the 3rd U.S. Circuit Court of Appeals, which held that Centennial School District in Pennsylvania violated freedom of speech when in October 1987 it refused to allow the evangelical group Campus Crusade for Christ Inc., to use one of its schools for a religious activity.

At the time the school district rented space to other religious groups, and a federal court issued a preliminary injunction forcing Centennial to rent space at William Tennent High School in Warminster, Pa., to Campus Crusade for Christ and barring it from refusing to rent its facilities to groups based on the religious content of their speech.

The basis of the court's order was that the school district had in effect created an ''open forum'' for free speech and assembly at its facilities and so could not refuse to rent to a group based solely on the content of that group's religious message.

In March 1988, the school district amended its policies to limit use of its facilities, including the exclusion of all religious groups. It maintained it no longer constituted an open forum.

Campus Crusade for Christ said it might wish to use the facilities again and returned to federal court, which granted a permanent injunction again barring the school district from refusing to rent space to the religious group.

Centennial took the case to the 3rd U.S. Circuit Court of Appeals, which ruled in June by a 2-1 decision that the school district had indeed created an open forum and could not exclude religious speech.

''This case presents a constitutional question of enormous practical moment to school districts around the nation,'' Centennial said in its appeal to the high court.

It argued that if the appeals court decision was upheld, most American public school systems would be required to grant access to ''even the most fractious religious and political speakers.''

''School districts should not be forced by the First Amendment to the Draconian choice of closing their doors to the likes of the Girl Scouts, adult education classes, and local Rotary Clubs if they are to avoid becoming a soapbox for every form of divisive proselytizing speech,'' the school district argued.

ST. LOUIS (OCT. 9) UPI - The St. Louis Cardinals have hired Bucky Dent, Dave Collins, Joe Coleman and Gaylen Pitts as coaches for the 1991 season, Manager Joe Torre announced Tuesday.

Dent, fired earlier this season as manager of the New York Yankees, will be the third-base coach for the Cardinals, Torre said. He said Collins will coach first base and Coleman will be the pitching coach. Pitts, who managed the team's Class AAA affiliate in Louisville, Ky., this season, will work with the infielders and help set the defense.

Two coaches who already were with the Cardinals when Torre succeeded former Manager Whitey Herzog earlier this season - bench coach Red Schoendienst and bullpen coach Dave Ricketts - will remain on Torre's staff. Torre and Schoendienst will serve as the team's hitting instructors.

In late September, Torre announced four of the team's coaches would not return for the 1991 season. The coaches let go were pitching coach Mike Roarke, hitting coach Steve Braun, first-base coach Jim Riggleman and third-base coach Rich Hacker.

''Regardless of whether you're playing in the major leagues or the rookie league, fundamentals are important,'' Torre said. ''With the number of young players we anticipate having on our team next season, it was important to have a coaching staff that can work with the players.

''I'm confident that this coaching staff will help everyone on the team - youngsters and veterans - improve their performance.''

Dent, 38, who took over from Dallas Green as manager of the Yankees last season but was replaced this season by Stump Merrill, previously managed for five years in New York's minor league system. He played 12 seasons in the majors with the Yankees, Chicago White Sox, Texas Rangers and Kansas City Royals.

During his stint with the Yankees, Dent appeared in four League Championship Series and three World Series.

Dent hit the game-winning home run in the 1978 American League East playoff game, a dramatic three-run shot off Mike Torrez of the Boston Red Sox. He then hit .417 in the 1978 World Series as the Yankees defeated the Los Angeles Dodgers and was named the Most Valuable Player of the series.

Collins, 37, played sparingly for the Cardinals this season, the last of a 16-year career that began in 1975 with the California Angels. He hit .224 in 58 at-bats for the Cardinals, with no home runs and three RBI.

Collins also played for the Seattle Mariners, Cincinnati Reds, Yankees, Toronto Blue Jays, Oakland Athletics and Detroit Tigers.

Coleman has served as bullpen coach for the Angels for the past three seasons. He previously spent four seasons as a roving pitching instructor for California's minor league teams.

Coleman, 43, pitched 15 years in the majors with the Washington Senators, Tigers, Chicago Cubs, Athletics, Blue Jays, San Francisco Giants and Pittsburgh Pirates. He finished his career with a record of 142-135 in 484 games.

The right-hander posted a 20-9 record for the Tigers in 1971, and set a League Championship Series record with 14 strikeouts in a 3-0 victory over the Athletics in 1972.

Pitts, 44, was signed by the Cardinals in 1964 and spent 10 years in the minor leagues before appearing in 28 games with Oakland in 1974-75. He led St. Louis's Class AA affiliate Arkansas to the Texas League championship in 1989, then managed the Louisville Redbirds this season.

MONROVIA, LIBERIA (OCT. 9) UPI - The strength of the West African peacekeeping force in Liberia will be doubled to 9,000 troops, a representative of the Liberian interim government said Tuesday after heavy artillery battles ended a three-day lull.

''We need to have more troops to hold the ground while others move forward,'' Levi Zangai said, adding the number of troops from five African nations would rise from 4,500 to 9,000. He did not specify a timetable.

The Economic Community of West African States' peacekeeping force was deployed Oct. 24 and its 4,500 troops have struggled to push back Charles Taylor's National Patriotic Front of Liberia, the main rebel movement, for the past 10 days.

Liberia has been ravaged by civil war since December when Taylor launched his

offensive to topple President Samuel Doe, who was killed Sept. 9 by the forces of a rival rebel leader, Prince Johnson. A third faction, led by army Gen. David Nimely has refused to yield the presidential executive mansion and environs.

Before dawn, cannon fire resounded through the city on both the northern and eastern fronts, signaling an end to three days without fighting.

Taylor's forces attacked ECOWAS troops in the eastern Sinkor district of the city. The rebels were believed to have used boats to go by sea behind ECOWAS lines.

At a news conference, Zangai also said Amos Sawyer, the president of the ECOWAS-supported interim government, would relocate from the Sierra Leonean capital of Freetown to Monrovia as soon as security improves.

''It is indispensable now to bring the political authority into the country, as a complement to the military action by ECOWAS, Zangai said at the Hotel Africa in the northwestern outskirts of Monrovia, which will become the provisional seat of government.

The representative of the interim government also stressed the urgent need for food supplies to be brought in from Freetown.

''This is now our top priority,'' Zangai said. ''Rice will decide the battle for the minds and hearts in Monrovia.''

The first shipment of 150 tons of rice sent by the World Food Program arrived in Monrovia Sept. 27 and still has not been distributed.

The amount is insufficient to feed all of the estimated 120,000 people remaining in the capital and has remained in warehouses, local aid workers said.

WFP has blocked the shipment of another 3,200 tons of rice stockpiled in Freetown until it receives a full report on the successful distribution of the first consignment, diplomatic sources in Monrovia said.

#90282u0905 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - The Supreme Court Tuesday refused to become involved in allegations that a state licensing agency violated the civil rights of Vietnamese physicians by refusing to grant them permits to practice medicine.

The case was brought by four doctors who escaped Vietnam during the 1970s and emigrated to California. Having graduated from the University of Saigon

Medical School - and repeated their medical education in California - they applied to California's Board of Medical Assurance for licenses.

The doctors allege that in 1986, the board ''abruptly suspended all further licensing of Vietnamese doctors as a class.'' Two of the medical students, Le Dao and Tao Nguyen, received letters from the board stating they had met all requirements to be licensed. But the board allegedly met in closed session on Jan. 30, 1986, and decided to halt licensing of all Vietnamese doctors.

The alleged discriminatory policy was not reversed until 1988.

The doctors contend the board members refused to license any Vietnamese immigrants on the fear they were ''communists,'' or were ''trained by communists.''

The board argued there is no evidence that its members ''acted with racial animus when the delays in licensure occurred.''

At issue was on what grounds the states and their agencies can be sued for damages under the Civil Rights Act and whether state officials can be sued individually for actions taken on behalf of the state.

The case made its way to the California Court of Appeals, which ruled this year that the board could not be sued under the provisions stated. It also held that the board's members had ''qualified immunity'' from being sued individually because they had acted in their official capacities.

The high court's refusal to accept the case means the lower court ruling stands.

NEW YORK (OCT. 9) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 81.50 c-lb.

Antimony, domestic, refined in alloy, $1.40-2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 133.625-139.00 c-lb.

Lead, common, U.S. primary producers 42.00-58.00 c-lb.; U.S. non- primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $240.00-$270.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $102.00-$107.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $457.50-$459.00; dealer- approx., $459.00-$460.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $108.00-$118.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 298.25 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 82.00-88.00 c-lb.

#90282u0923 10/09/1990 ~United Press International

WARSAW, POLAND (OCT. 9) UPI - An ex-chief of secret police and another former police general have been charged with organizing and directing the 1984 murder of a popular pro-Solidarity priest whose death sent shock waves throughout the overwhelmingly Catholic nation, the Justice Ministry said Tuesday.

The Rev. Jerzy Popieluszko, whose fiery sermons urged the population to demand the revival of the banned Solidarity labor union, was kidnapped and killed on Oct. 19, 1984.

For more than a week until his body was found dumped in a reservior, the entire nation held a mournful vigil. More than half a million were at his funeral, and his grave in Warsaw has become an unofficial national shrine.

Popieluszko's death forced the communist leadership under Gen. Wojciech Jaruzelski to put four low-level secret police agents on trial in the northern city of Torun. All were convicted and imprisoned. At the time, the trial of responsibility led no higher despite the conviction of observers that some

high-level official was responsible for the order to kill the priest.

But five years later under a Solidarity-led government, Gen. Wladyslaw Ciaston former deputy interior minister, and Gen. Zenon Jan Platek, another high-ranking ministry official, were interrogated about the Oct. 19, 1984 slaying and then arrested.

''Prosecutors accused the two of inciting their subordinates in September and October 1984 to murder Father Popieluszko, and of directing the crime on Oct. 19, 1984,'' the Polish news agency PAP said Tuesday.

A Justice Ministry spokesman said more arrests may be possible.

''The two generals have been charged so far, but it is possible that the investigation would broaden,'' he said.

Ciaston, 62, was deputy ministy of interior in 1984 and in charge of the secret police, spending most of his career with the Interior Ministry except for a break in the mid-1950s.

He left the ministry in 1988 when he was made ambassador to Albania, but was recalled in January by the Solidarity-led government following strong protests by a group of Solidarity deputies.

Platek was director the infamous Department Four, which among other duties was responsible for surveillance and harassment of the church.

He began his career in Rzeszow in southern Poland, where he was promoted to Warsaw for his work in collecting evidence with the help of the Soviet KGB that compromised a local bishop.

Platek was sacked this year under a purge of the ministry by the new non-communist government.

The Justice Ministry spokesman said the arrests were not related to the arrest Monday of seven high-ranking Interior Ministry officials on corruption charges.

Platek appeared briefly at the trial of the secret agents and was the highest-ranking official to testify. The government newspaper Rzczpospolita described his testimony as ''evasive.''

Deputy Attorney General Aleksander Herzog told Rzeczpospolita that the arrests culminated a long investigation.

Herzog apparently was seeking to allay suspicions that the spectacular development was announced at this time to boost the presidential campaign of Prime Minister Tadeusz Mazowiecki against his former colleague, Solidarity leader Lech Walesa. The election is Nov. 25.

''I wouldn't like that all of this, including the arrests, be perceived as an effect of a spectacular action, but as a result of several weeks of difficult work by a group of prosecutors,'' Herzog said.

Rzeczpospolita said preparation for the trial is expected to be difficult because ''in such cases, one does not find evidence in documents.''

#90282u0928 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - The Supreme Court Tuesday let stand a ruling that upheld the intent of a man's will that established an educational trust at a Virginia school contingent on the school's continued segregation.

The high court refused to review a ruling by the Virginia Supreme Court, which held that Prince Edward School Foundation and other educational beneficiaries are no longer entitled to the will of a Lynchburg, Va., man, who died in 1968 and left an estate now worth more than $1 million.

Virginia's highest court held that the fifth named beneficiary, Hermitage Methodist Homes of Virginia Inc., is entitled to the trust.

In 1968, when Jack Adams died, he named four successive private schools as beneficiaries, but stipulated in his will that each would relinquish its rights to the money upon the admission of any non-white students. Hermitage

Methodist Homes - a nursing home - was the fifth beneficiary, but Adams did not include any racial restrictions on its qualifying for the trust.

Prince Edward School Foundation in Prince Edward County, Va., was the first named beneficiary and received proceeds from 1968 until 1986, when black students were admitted to the school.

In 1987, the trustee of Adams' will asked a circuit court for guidance. The court ruled that all racially discriminatory conditions of the trust were unconstitutional and void, and ordered that Prince Edward School Foundation continue to receive the proceeds of the trust.

On appeal, the state's highest court agreed that the racially discriminatory provisions of the trust were illegal and void, but ruled that all of the schools were ineligible for the trust funds and only Hermitage Methodist Homes remained a beneficiary ''because the offending language cannot be stricken from the provision without changing the essential nature and quality of the estate.''

In asking the Supreme Court to review the case, Prince Edward School Foundation argued that at the time Adams wrote his will, Virginia common law required an educational trust to discriminate on the basis of race to be valid.

89-1901 Prince Edward School Foundation vs. Hermitage Methodist Homes of Va. Inc.

#90282u0932 10/09/1990 ~United Press International

BANGKOK, THAILAND (OCT. 9) UPI - The Vietnamese-backed government of Cambodia warned Tuesday that resistance leader Prince Norodom Sihanouk has become a ''personal obstacle'' to peace, and urged he be dropped to save a U.N. peace plan from collapse.

At the same time witnesses and radio reports said fighting was escalating in western Cambodia, with communist Khmer Rouge guerrillas ready to use Chinese-supplied tanks for the first time.

Fighting has continued intermittently in Cambodia since a Khmer Rouge regime blamed for the deaths of more than 1 million Cambodians was ousted by a Vietnamese invasion in December 1978.

''We think that if the other Cambodian groups really want to resolve the Cambodian problem through peaceful means, then they should get rid of this personal obstacle,'' said a commentary carried by official Phnom Penh radio.

Sihanouk, the former king of Cambodia and leader of the resistance, has long been supported by the United States and other nations as the only individual

who can lead Cambodia back to peace.

The radio said the three-part resistance should reverse its rejection of government proposals for a rotating chairmanship of the joint Supreme National Council, which is meant to serve as the representative of Cambodian sovereignty under a peace plan worked out by the U.N. Security Council.

It said if Sihanouk insisted on being sole chairman, then government leader Hun Sen should be vice chairman. Otherwise, the radio said, the council would disappear and the U.N. peace plan ''will become meaningless.''

Sihanouk, changing his mind at the last moment, refused to attend last month's conference in Jakarta, Indonesia that accepted the U.N. plan and set up the council. Later he agreed to join the council as chairman.

''Prince Sihanouk has never given any thought to the fate of the Cambodian people,'' the commentary charged.

The broadside indicated the Hun Sen government was ready to back away from its earlier acceptance of the U.N. plan, which proposes Sihanouk as interim leader.

Westerners who recently returned from western Cambodia said the deadlock in the peace process has apparently brought an escalation in the fighting.

''We could hear heavy artillery fire every night,'' said one traveler, who spent several nights in Sisophon, a key town about 200 miles northwest of Phnom Penh.

He said government troops in the area appeared to be better armed and more numerous than previously.

The road to Sisophon was still open, despite monsoon rains and guerrilla attacks, but was ''very rough and insecure in some places,'' he said.

Resistance radio said the Khmer Rouge, the most powerful of the three guerrilla groups were building up for a major attack in the west.

''The Khmer Rouge forces, equipped with tanks, are preparing an attack to retake Siem Reap Province's central area, which is Cambodia's most important cultural and historic region,'' said a broadcast by the Voice of the Khmer radio station.

It did not say where the Khmer Rouge obtained their tanks, but other reports have said they were provided by China - the main arms supplier for the resistance.

Siem Reap, about 150 miles northwest of Phnom Penh, includes the famous 12th century temple at Angkor Wat.

Phnom Penh radio said government forces launched eight counterattacks against resistance forces in the last week of September, killing 39 guerrillas and capturing 64 others.

Military analysts in Bangkok said the fighting was still hampered by heavy monsoon rains, but that both sides appeared to be building for larger scale operations in November or December, when the rains end.

WASHINGTON (OCT. 9) UPI - The State Department issued new warnings to American travelers in the Middle East Tuesday following the clashes in East Jerusalem, which left 21 Palestinian Arabs dead and scores of Jews and Arabs injured.

In the new travel advisory, the State Department advises ''all U.S. citizens to avoid travel to the West Bank, Gaza and East Jerusalem until further notice.''

The department also issued a wider advisory warning Americans travelling to the Middle East, South Asia and North Africa that increased tensions ''may lead to demonstrations or other actions that may be directed against the United States.''

The advisory noted that the Israeli government has begun issuing gas masks to all residents of Israel starting Oct. 14. The advisory said, ''Americans should take this situation into account in planning to visit Israel.''

#90282u0940 10/09/1990 ~United Press International

(OCT. 9) UPI - It's business as usual for the federal government, or at least until one week from this coming Friday. That's when the emergency spending bill signed this morning by President Bush ends and the government is again left without any money. Congress has been given the time between now and then to work out a new budget compromise that can stand the test of passage by both the House and Senate. It must also be strong enough to gain a presidential signature.

Iraqi leader Saddam Hussein is telling Israel to get out of occupied Arab territories or face what he calls ''quick revenge'' for yesterday's slayings of Palestinians in Jerusalem. Israeli security forces opened fire on demonstrators, killing at least 20 Palestinians. Hussein's stern warning was read by an announcer live on Iraqi television and radio.

The shuttle Discovery crew will spend this day in space preparing to return

home tomorrow. They have completed all of the scientific experiments assigned them, including the successful launch of the European-built Ulysses probe on its long voyage to the sun. Discovery is to touch down tomorrow morning at California's Edwards Air Force Base.

#90282u0949 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - The Supreme Court Tuesday refused to become involved in a dispute over what standards the companies formed in the 1982 breakup of the American Telephone & Telegraph Co. must meet before being allowed to enter the telephone information services market.

At stake is when the seven ''Baby Bell'' companies formed in the divestiture would be allowed to offer information services such as Lexis that are accessed by telephone lines.

Competitors in the multibillion-dollar industry claim the companies formed in the breakup of the Bell system must meet the original restrictions imposed in the 1982 consent decree that terminated the United States' antitrust case against AT&T, one of the largest in history. The decree placed line-of-business restrictions on the individual Bell companies, generally restricting them to providing local telephone service.

To ensure against use of what was once monopoly control of the telephone lines to obtain unfair advantages in other ventures, the agreement forbade the ''Baby Bells'' from, among other things, providing long-distance telephone service, manufacturing telecommunications equipment, or offering information services through telephone lines.

In 1987, the Justice Department recommended to the courts that in light of competitive conditions, line-of-business restrictions on the Bell companies be lifted except for where they involve long-distance service.

A district court ruled that the restrictions should remain because the Bell companies had failed to show that there was ''no substantial possibility that they could not, and indeed would not, use their monopoly power to impede competition in the information services market.''

But the U.S. Court of Appeals for the District of Columbia Circuit ruled that the district court decision was too restrictive. It ordered the lower court to look at the provisions again and determine whether removal of the information services restriction would be anti- competitive under ''present'' market conditions.

The high court was asked to step into the case by major players in the telephone-based information services field, headed by MCI Communications Corp.

In its brief before the court, MCI claims many companies entered the information services field on the belief that the Bell operating companies would be precluded from endangering an ''open, competitive market.''

The Justice Department asked the court to refuse to hear the case and allow it to be resolved by the lower court.

NEW YORK (OCT. 9) UPI - ''Twin Peaks'' freaks who miss an episode of the ABC series now can dial the ''Twin Peaks Sheriff's Office Hotline'' for an update and the latest scoop - at a price, it was announced Tuesday.

Receptionist Lucy Moran, Deputy Andy and Dr. Haywood will provide information about the prvious week's episode during each call and an unidentified mystery voice will disclose new information and clues on events likely to arise.

The telephone recording will be changed weekly with new information on line Sunday mornings at 6 a.m.

Being a ''Peaks'' groupie doesn't come cheap - calls are $2 for the first minute and $1 for each additional minute. Lynch-Frost productions will donate a portion of the profits to environmental organizations, according to Phone Programs, the organization that created the telephone hotline for the producers.

The ''Twin Peaks Sheriff's Office Hotline'' can be reached by dialing 1-900-860-0911.

CHICAGO (OCT. 9) UPI - Grain futures were mixed but mostly lower at midmorning Tuesday on the Chicago Board of Trade.

The market was pressured by profit-taking in the wake of Monday's run-up in prices, especially in soybeans and soybean meal. But there was continued support from a break in the harvest because of rainy weather across much of the Midwest.

Some farmers might be kept out of their fields until the weekend because of the rain.

Corn and soybean production estimates from private analyst Conrad Leslie were slightly higher than he predicted one month ago, which tended to encourage a little selling.

Wheat was mostly lower at midmorning in light, choppy trading.

Tunisia bought 125,000 tons of wheat and Mexico was in the market for 50,000 tons of corn, otherwise the export markets were quiet.

The midmorning prices:

Corn Dec 2.33 off 1; Mar 2.42 off 3/4; May 2.48 off 1/2.

Soybeans Nov 6.32 1/2 off 1 1/2; Jan 6.46 3/4 off 3/4; Mar 6.59 off 3/4; May 6.69 up 1/2.

Wheat Dec 2.77 3/4 off 1 1/2; Mar 2.91 3/4 off 1/2; May 2.98 3/4 off 1/4.

Oats Dec 1.22 1/2 off 1; Mar 1.32 1/2 off 1; May 1.39 1/4 off 3/4.

NAIROBI, Kenya (OCT. 9) UPI - Kenya, angered over the disqualification of two of its relay teams, Tuesday threatened to withdraw from next year's All Africa Games in Cairo unless Egypt changes its attitude toward Kenyan athletes.

David Okeyo, secretary of the Kenya Amateur Athletic Association, issued the warning after hearing reports from Kenyan athletes that they were unfairly treated during the recent African Championships in Cairo.

The Kenyans complained, among other things, that their disqualification from the 4 x 400 and 4 x 100 relay events was unjustified. The relay teams were prevented from running because they did not have standardized uniforms, as the race's rules dictated.

Three members of the 4 x 400 relay team - Simon Kipkemboi and the Kitur brothers, Samson and David - won a gold medal in the event at the Commonwealth Games in New Zealand earlier this year.

Okeyo told United Press International the KAAA would lodge a formal protest with the African Amateur Athletic Conferedation in Senegal. Had Kenya won the two relays it would have taken first place in the competition, ahead of its arch-rival, Nigeria.

COLUMBUS, Miss. (OCT. 9) UPI - Weyerhaeuser Co. has dedicated its $500 million tate-of-the-art pulp and paper plant, the largest single capital commitment in the company's 90-year history.

Company executives and state and local officials flocked to Columbus Monday to officially dedicate the new plant, which actually began production in May.

George Weyerhaeuser, chairman and chief executive officer, said the plant, an addition to existing facilities, is capable of producing about 425,000 tons of pulp per year. It is expected to take three years to reach full capacity.

The plant employs 262, boosting total company employment to 700 at Weyerhaeuser Columbus Pulp & Paper Complex. The plant created another 400 indirect jobs in a four-county area for haulers and loggers.

Weyerhaeuser said the annual payroll of the entire complex is $25 million.

He said Weyerhaeuser's local purchases of raw materials, equipment, goods and services increased from $15 million to $20 million per year with completion of the plant.

With the start-up of the new plant, Weyerhaeuser has capacity to produce more than 1.5 million tons of paper pulp per year, serving 600 customers in 60 countries, said Jack Creighton, company president.

The plant can produce 1,200 tons per day of bleached kraft pulp for domestic and export customers, said Scott Jenkins vice president. Bleached kraft pulp is a raw materal for manufacturing paper, paperboard and a variety of other industrial and consumer products.

The project employed 2,650 construction workers at its peak and took 23 months to complete.

Officials said the complex and related facilities require 110 million watts of electricity - more than three times the needs of the city of Columbus with its 30,000 population. The complex has its own on-site generating plant, which can

produce up to 130 million watts. It uses wood waste materials as its primary fuel.

In addition to the Columbus complex, Weyerhaeuser, based in Tacoma, Wash., operates lumber and plywood manufacturing complexes at Bruce and Philadelphia, Miss., and Millport, Ala.; a wood chip facility at Amory, Miss., and a packaging plant near Jackson, Miss.

(OCT. 9) UPI - Israel has put its security forces on alert following the deaths of at least 21 Palestinians in Jerusalem yesterday. They were killed when Israeli troops switched from rubber bullets to live ammunition as they tried to quell rock-throwing Moslem demonstrations on the Temple Mount in the Old City. .

The slayings prompted Iraqi leader Saddam Hussein to warn of ''quick action'' to avenge the deaths unless Israel gets out of occupied Arab lands. Arab diplomats in Cairo have told United Press International that Saddam's warnings are just a ploy to turn world attention away from his occupation of Kuwait.

The Supreme Court is staying out of the student loan dispute. Education loan officials from five states had asked the justices to decide whether a provision requiring loan agencies to return Millions in excess cash reserves to the government is constitutional. The court refused to take the case. .

The high court DID agree to decide whether police can randomly search luggage for drugs on interstate trains and buses, if passengers are advised of the searches and give their consent.

People in more than 120 countries were able to commemorate what would have been John Lennon's 50th birthday by tuning in a world-wide simulcast from the United Nations. Lennon's widow, Yoko Ono, says she wanted to focus on Lennon's life and away from the 10th anniversary of his death on December 8th.

(OCT. 9) UPI - The latest polls show the winner of next month's Senate race in North Carolina is anyone's guess. The poll shows Democratic challenger Harvey Gantt has 43-point- five percent of the vote while three-term incumbent Republican Jesse Helms has 42-point-seven.

Published reports indicate that the government of Brazil has ended a secret military program that could have given the South American nation its first nuclear bomb. The project apparently was started in 1975 when a military junta ruled Brazil.

Police in St. Paul, Minnesota, arrested a 41-year-old man on drug- trafficking charges last Friday after he was turned in by his 12-year- old son. Officers obtained a search warrant based in information provided by the boy and found about three ounces of cocaine and one pound of marijuana in the house. The boy was placed in a county shelter for his own protection.

NEW YORK (OCT. 9) UPI - Business executives' confidence in the U.S. economy sank in the third quarter to its lowest level since 1980, a private business research organization said Wednesday.

The Conference Board said its measure of business confidence fell to 40 for the quarter, as opposed to 46 in the first quarter and 48 in the second. A reading below 50 indicates that pessimists outnumber optimists.

The decline in the confidence rating more than erased the modest improvement experienced in the first half of the year, the board said.

The survey, covering about 1,000 chief executive officers and other top executives in 25 sectors of the economy, also found that nearly 70 percent of the respondents thought economic conditions have worsened over the past six months. Barely 6 percent said conditions have improved.

The survey also found that almost half of the business leaders anticipate further weakening in the economy during the next six months. Only 15 percent expect the economy to improve.

''Executives responding to the survey prior to the Iraqi invasion of Kuwait

were as pessimistic as those reponding after,'' noted Jason Bram, associate economist for the Conference Board's consumer research center.

''This suggests that the Middle East crisis has had little effect on business leaders' spirits. Either way, it's clear that business leaders' confidence has dipped.''

Although respondents in all sectors reported weakness, banking and financial executives were the most negative about current conditions and expectations for the next six months.

Executives in the utilities and insurance industries were the most positive in their outlook for the next six months, the Conference Board said.

WASHINGTON (OCT. 9) UPI - The Federal Trade Commission said Tuesday it has authorized its staff to seek a preliminary injunction to block a proposed joint venture between two large telescope makers.

The FTC said it believes the proposed joint venture - between Meade Instruments Corp., of Costa Mesa, Calif., and Celestron International, of Torrance, Calif. - ''would create a virtual monopoly'' in the manufacture and sale of mid-sized Schmidt-Cassegrain telescopes.

The telescopes cost about $1,000 and are used by amateur astronomers for observation of nearby planets and ''deep-sky objects,'' the FTC said.

Meade and Celestron are two of the largest makers of Schmidt- Cassegrain telescopes.

The parent companies of both telescope makers have announced plans to combine the two into a new joint venture Celestron meade International.

The FCT said its application to a federal district court will seek to block the joint venture pending administrative hearings into the legality of the deal.

#90282u1152 10/09/1990 ~United Press International

WINDHOEK, NAMIBIA (OCT. 9) UPI - At least 10 trucks carrying tons of emergency food supplies entered drought-stricken southern Angola Tuesday in an unprecedented international relief operation providing aid to civilians on both sides of a bitter civil war.

''So far so good,'' said Nicholas Rougement, director of the International Committee of the Red Cross in Windhoek, Namibia. ''It's the first time in the history of the 15-year civil war that we're allowed to do this sort of thing.''

Seventeen vehicles of the state-run transport firm TransNamib - all carrying the cross of the International Committee of the Red Cross - began their journey Monday after adding 150 tons of corn meal at the northern town of Otavia to a 50-ton load of beans.

Ten of the trucks crossed the Namibia-Angola border Tuesday afternoon en route to the Angolan government-controlled towns of Ondjiva and Xangongo and the Wela provincial capital of Lubango.

The other seven trucks were to enter territory held by the U.S.- backed guerrillas of Jonas Savimbi Wednesday from the Namibian Caprivi strip after leaving the northern town of Grootfontein Tuesday morning.

Once inside Angola, the cargo was to be shifted into all-terrain trucks for the rugged journey deep into territory held by rebels of the Union for the Total Independence of Angola, which is battling the Marxist government of President Jose Eduardo dos Santos.

None of the trucks had any military escort.

A third convoy of Red Cross vehicles, also without military escort, Monday left Angola's port of Lobito and arrived in Huambo, the capital of Huambo province, Tuesday afternoon, Rougement said. No incidents were reported.

Also Monday, the first Red Cross airlift to cross a front line in Angola was completed from Huambo to Likwa, a bush-airstrip in UNITA-held territory, Rougement said.

The large-scale operation is the first of its kind in 15 years of civil war in Angola in which the warring factions both approved the plan.

The aid comes at a time of serious drought that has affected an estimated 1.5

million of the southwest African nation's 9 million people. Relief sources estimate hundreds of thousands of people at risk of starvation.

In addition to the food aid, Red Cross officials hope to have distributed by mid-October some 300 tons of seed and 30,000 hoes to civilians in southern Cuando-Cubango province, also under UNITA control.

The decision to allow relief supplies to enter Angola and areas under UNITA control came after Dos Santos accepted an offer by Namibian President Sam Nujoma to use Namibian territory as a ''Corridor of Peace.''

Angola had previously objected to food aid to areas under UNITA control, fearing it also would contain contraband, but the government is now evidently satisfied the aid is strictly humanitarian.

#90282u1170 10/09/1990 ~United Press International

LONDON (OCT. 9) UPI - The Conservative Party opened its annual conference Tuesday, still trailing in opinion polls but more optimistic about prospects for winning a fourth term as mortgage rates fell.

After a year of bad then worse news - including double-digit inflation, poll tax riots and the highest interest rate among leading industrial countries - Conservatives had expected little reason for cheer when they gathered at the seaside town of Bournemouth, 100 miles south of London.

But when Britain knocked a point off its interest rate and joined a European system regulating exchange rates Monday, the pound and London Stock Exchange soared, and so did the Conservatives' political fortunes.

The conference was tightly guarded by 1,500 police in an operation costing $4 million that is intended to prevent a terrorist attack. The outlawed Irish Republican Army bombed the Conservative's meeting Brighton in 1984, killing five people.

The Bournemouth conference center and the hotel where Prime Minister Margaret Thatcher is staying have been ringed by a seven-foot steel fence.

In opening speeches, party leaders attacked what was described as the opposition Labor Party's opportunistic reversal of its socialist leanings. Labor has in recent years tried to shed its ''loony left'' label, abandoning policies requiring increased government ownership and unilateral disarmament.

''Like a reluctant weight-watcher compulsively reaching for the cream cakes, Labor still finds state control irresistible,'' said Trade Minister Peter Lilley.

''Tax and spend, spend and tax,'' said party Chairman Kenneth Baker. ''The Labor Party habits of yesterday would be the Labor policy of tomorrow.''

With Britain beset by economic problems, including inflation topping 10 percent for the first time since the Conservatives came to power and anger over a regressive tax imposed in England last spring, Labor had begun to be seen as a viable alternative.

Ladbrokes, a betting agency, tipped Labor as the favorite for the next election on Saturday for the first time since 1982.

Labor once held a 26-point lead over the Conservatives in polls but the margin was cut to 14 points in the latest Gallup survey, partly because of backing for Thatcher's handling of the Persian Gulf crisis.

The timing of Britain's entry into the Exchange Rate Mechanism, which economists expect to produce a six- to 12-month honeymoon before the side effects such as higher unemployment and lower wages hikes are felt, has fueled speculation Thatcher will call an early election.

While Thatcher is not obliged to announced an election until July 1992, the reduction in mortgages and possibly inflation over the next few months may persuade her to call for a ballot sooner.

Labor leader Neil Kinnock predicted the Conservatives would ''cut and run in '91.''

Arriving at the conference, Thatcher dismissed the talk of an early election without ruling out the possibility.

''Everyone's talking about dates except me,'' she said. ''I'm not even thinking about it yet. There's far too much else to do.''

#90282u1173 10/09/1990 ~United Press International

UNITED NATIONS (OCT. 9) UPI - A tearful Yoko Ono urged fans of her slain husband, John Lennon, to keep the power of dreams and love alive as millions of people around the world tuned in to hear the song ''Imagine'' on the former Beatle's 50th birthday.

''His spirit still lives in all of us whose lives have been touched by him,'' Ono said at the solemn ceremony in the U.N. Trusteeship Council chambers.

''I would like us to remember as we celebrate his birthday as a day of love, because he's a man of love and because love is much needed in this time of our lives,'' she told an audience of 200 guests and friends of Lennon's family.

The haunting words of Lennon's ''Imagine'' then were sent around the world as part of a radio broadcast. Organizers of the event said a potential 1 billion people from North America to the Soviet Union and American GIs in the Persian Gulf listened to broadcasts of the celebration at the U.N. headquarters in New York.

In a strong reminder of her husband's words in the song, Ono said, ''In celebration of John's life, let's use the power of dreams. Let's dream of trees growing in abundance, birds flying in clean air, fish swimming in clear water and our children living in joy.

''Let's dream of men and women feeling good together and people embracing each other regardless of their creed and religion.

Ono, whose voice trailed into a soft sob when she said, ''Happy Birthday, John '' said, ''For a dream we dream alone, it's only a dream. But a dream we dream together, it's reality.

''Life continues to be difficult for most of us,'' Ono said in a strong remembrance of her departed husband.

Ono said in a short news conference later that today's youth know how to react to the peace message left by her husband.

''It seems that they have their own way to be in touch with John,'' she said.

In Milwaukee, radio station WQFM asked listeners and musicians to sing the song outside its downtown office and those who took up the invitation rendered a somewhat off-key version of ''Imagine.''

In Hollywood, a ''classic rock'' station broadcast live from Lennon's star on the Hollywood Walk of Fame.

Tuesday night, the Alliance for Survival, an anti-war, anti-nuclear group that has marked Lennon's birthday every year since his death, was holding a ''Beatleblast'' party at a Hollywood nightclub featuring a Beatles' sound-alike band and pro-environmental speeches.

Elliott Mintz, a spokesman for Ono, said of Ono on the eve of the birthday celebration at the United Nations, ''I've never seen her as excited about anything as she is about this.''

''She wanted to draw attention away from Dec. 8, the tenth anniversary of John's death, and focus instead on what would have been his 50th birthday,'' he added.

Lennon was shot in the back by Mark David Chapman, a disaffected fan, on Dec. 8, 1980, as he entered the lobby of The Dakota, the Upper West Side apartment

building where he lived with Ono.

#90282u1188 10/09/1990 ~United Press International
MOSCOW (OCT. 9) UPI - The Soviet Parliament Tuesday ratified a 1974 treaty limiting the size of underground nuclear weapons tests and a separate 1976 pact on nuclear explosions for peaceful purposes.

Agreements reached at the June Washington summit upgrading verification procedures under the ''threshold'' treaties cleared the way for the ratification.

The 1974 treaty limits underground nuclear tests to 150 kilotons, with each kiloton equal to the explosive force of 1,000 tons of TNT. The 1976 treaty limits the size of nuclear explosions used for peaceful purposes such as building dams.

The official Tass news agency said the Supreme Soviet, the country's Parliament, ratified the two treaties and related protocols Tuesday ''after a stormy debate'' in a joint session of Parliament.

The U.S. Senate ratified the treaties last month.

-30- 1019
#90282u1193 10/09/1990 ~United Press International
COLUMBUS, Ohio (OCT. 9) UPI - Figures compiled by the Office of Thrift Supervision show Ohio's savings and loan industry had the largest thrift profit in the nation during the second quarter.

Ohio S&Ls collectively earned $71.2 million in the second quarter, up from $27.3 million in the first quarter. The OTS figures were obtained by The Columbus Dispatch from Sheshunoff Information Services of Austin, Texas.

The Ohio Savings and Loan League said Ohio's thrifts made an aggregate net profit of $50.9 million in the second quarter, compared with $44.3 million one year ago.

The aggregate net profit takes into account extraordinary adjustments to income, such as additions to loan loss resereves.

Kenneth Elshoff, president of the Ohio Savings and Loan League, attributed the results to the industry's conservative nature and its reluctance to stray.

''I think we have had a continual pattern of lending ... in the state,'' Elshoff said Monday. ''Savings and loans in many states make loans outside their areas, he said, and sometimes neglect their local business. When loan

volume slows, they are left without a market.

''We've had a continual relationship with the market, and that's continued to pay off.''

Ohio's S&Ls earned the highest profit in terms of dollars, but the return on average assets was 0.29 percent, low by bank industry standards. Hawaii's savings and loans generated the highest returns - 0.91 percent - but made less than half as much money - $32.9 million.

That's because of the difference in size of assets. Ohio's institutions controlled $49 billion in assets, while Hawaii's industry had $7.2 billion in assets June 30.

Return on average assets is a widely used method to compare performance. That means Ohio's S&Ls, on average, earned about three- tenths of a penny for every dollar in assets they managed, vs. nearly a full penny for Hawaii - but the Ohio thrifts managed seven times as much in assets, and so made more money.

The S&L industry nationwide lost $6.4 billion in the second quarter.

#90282u1201 10/09/1990 ~United Press International

BRUSSELS, BELGIUM (OCT. 9) UPI - A visit to NATO headquarters by Soviet President Mikhail Gorbachev will take place ''sometime next year'' and not this autumn as earlier hoped, the alliance said Tuesday.

Gorbachev's tight schedule and pressing business in the Soviet Union were given as the reasons for the delay.

An invitation to Gorbachev ''to come to Brussels'' and address a NATO meeting was issued by NATO leaders at their historic London summit in July.

Officials hoped the Soviet president could visit this fall, perhaps during a meeting of NATO foreign ministers tentatively scheduled for Dec. 17-18.

NATO Secretary General Manfred Woerner said on Tuesday, however, ''that it could not be done this year but instead sometime next year'' at an unspecified date, a spokesman said.

#90282u1202 10/09/1990 ~United Press International

AN AIRBASE IN SAUDI ARABIA (OCT. 9) UPI - ''Gooood Mooorning Saudi Arabia.''

With that greeting, Navy Chief Petty Officer Richard Yanku opened the Armed Forces Radio and Television Service live broadcasts to the estimated 175,000

U.S. Forces in Saudi Arabia for Operation Desert Shield.

His intro was a knock off of the movie ''Good Morning Vietnam'' with comedian Robin Williams that told the story of AFRTS disc jockey Adrien Cronauer's struggle to get political humor about the unpopular Vietnam War past military brass, and the intro was an absolute natural here.

''I think everyone was expecting it. It would have been a let-down if I hadn't done it,'' said Yanku, a veteran of 17 years with the Navy and now stationed at Virginia Beach, Va.

''I haven't spoken to Robin Williams but I'm sure if I had he'd say 'Sure, why not, go for it,''' said Yanku, who immediately started getting requests when he announced the request line telephone number.

The first call was a congratulatory one from the broadcasting service run by Aramco, the U.S.-Saudi oil operation.

The second came from a physician who identified himself only as Dr. Barubee, who wanted to hear something by Neil Diamond, said he'd been in Vietnam and added, '''We're just waiting for this. Thanks a lot.''

Since Sept. 13, the soldiers have been able to get in some areas the direct feed from AFRS headquarters, without any local live entertainment.

Baghdad Betty and Bob have had nothing on Armed Forces Radio.

Iraq's official Radio Baghdad, which bills itself as ''The voice of peace,'' is heard in Saudi Arabia on shortwave that fades in and out, making the audi quality marginal.

''Betty'' and Bob'' take turns reading the lines in between every three or four songs - most of them rock and roll tunes or numbing elevator music from 15 to 20 years ago - and declaring: ''This is the ''ng: ''This is the

In contrast, after his opening selection of ''Rock the Casbah'' by The Clash, Yanku moved through a series of popular rock and country tunes, including Pat Benetar's ''Hit me with your best shot'' at the request of a British journalist among reporters taken to the air base to witness the first show.

Yanku and three other broadcasaters will work out of a trailer just seven feet high and wide and a dozen feet long, with an air conditioner jutting out the side to keep the sensitive electronics cool.

They are, for the moment, hooked to a 1,500-watt transmitter that will cover a major concentration of troops in Saudi Arabia and soon hope to have four such transmitters operating to cover the bulk of the troops.

That gear will take the regular AFRTS feed from California - a mix of all broadcast news services, music and sports - but the remote sites will not be picking up Yanku's show or that of the three others who will work shifts to span 13 hours a day, to be followed by whatever baseball or football games are available for broadcast.

In addition to spinning records for the troops, the broadcast also provide a way to quickly disseminate non-sensitive information higher commands want the troops to know.

The broadcasters have been given a list of topics the Saudis consider sensitive and wish to be kept off the air. Neither the disc jockeys nor AFRTS officials would discuss what those topics were.

Yanku said his station would join others around the world marking the 10th anniversary of Beatle John Lennon's murder by playing his tune ''Imagine.''

By way of encouraging the U.S. forces to learn about the desert kingdom to which they've been sent, Yanku suggested, ''Saudi Arabia is a land of mystery. You ought to study it. Take a little time and learn about it. You'll make your stay here a little more enjoyable.''

With that, it was back to the rack of compact discs to pick out more music and remind the troops, ''This is Desert Shield, FM 107.''

#90282u1203 10/09/1990 ~United Press International

BY NORMAN D. SANDLER - UPI

WASHINGTON (OCT. 9) UPI - In a rare bit of public introspection, President Bush acknowledged Tuesday what many have long believed: that he prefers the challenge of foreign policy to the dirty work of domestic issues like the budget.

''That's about right,'' Bush said at a news conference when told he does not seem to ''have as much fun'' dealing with domestic concerns like the deficit debacle as in tackling diplomatic problems like the Persian Gulf crisis.

Bush tried to explain that away as a manifestation of the post-war adage that partisanship ''stops at the water's edge'' and that the American people tend to trust their leaders more to face threats from abroad than problems at home.

In foreign affairs, patriotic instincts overcome political divisions, he suggested, while in domestic policy, he is forced to contend with a Congress controllled with Democrats ''to do what I think is best and it's complicated.''

From the earliest days of his 10-year quest for the presidency, however, Bush styled himself as an internationalist, his resume emphasizing stints as ambassador to the United Nations, envoy to China and director of the CIA.

Close advisers have noted on repeated occasions how comfortable and engaged Bush seems in foreign policy discussions and how, in meetings on domestic affairs, which have been relegated to secondary status in his administration, his interest and patience can wane.

That has been borne out by polls giving him far stronger marks for leadership on such issues as the gulf crisis and East-West relations than in exhorting the nation to action in such areas as education, the environment and the deficit.

On the campaign trail, recitations of his domestic agenda lack the relative degree of passion often reserved for his efforts to rally world opinion against Saddam Hussein and his crowd-pleasing declarations that the Iraqi occupation of Kuwait ''will not stand.''

''I don't want to stretch out on the couch too far in terms of analysis,'' he said Tuesday, ''but you know, when you get a problem with the complexities that the Middle East has now and the gulf has now, I enjoy trying to put the coalition together and keep it together and work towards what I think is a proper end: seeing this aggression doesn't succeed.

''I can't say I just rejoice every time I go up and talk to Danny Rostenkowski my dear friend, about what he's going to do on taxes.''

Rostenkowski, an Illinois Democrat and sometime Bush golfing partner, is chairman of the tax-writing House Ways and Means Committee, which will have an influential role in deciding how to raise some $135 billion over the next five years to cut the deficit.

A pair of polls Tuesday indicated the crest of popularity Bush has ridden, thanks in large part to his handling of the gulf crisis, may be imperiled by finger-pointing over the budget mess.

A new Washington Post-ABC News poll had his overall approval rating at 65 percent, down 10 points from about a month ago. A CBS News poll had it at 62 percent, down from 76 percent in mid-August.

Bush, however, seemed unfazed by the fallout from the deficit deal gone bad.

''We're not doing too bad,'' he said. ''I think there's pretty strong support, but I guess I learned that I can't do it exactly my way when we get down on something like the deficit. I do think internationally the support is very, very strong.''

#90282u1204 10/09/1990 ~United Press International

CAPE CANAVERAL, FL (OCT. 9) UPI - The Discovery astronauts packed up Tuesday for a fiery glide to a California landing Wednesday, closing out a near-perfect mission highlighted by the successful launch of the Ulysses solar probe.

''As far as the flight control team is concerned, this flight is probably as close to perfect as we can get,'' said flight director Ron Dittemore. ''We have had no significant anomalies. The crew is in good spirits ... and they're right on schedule.''

Commander Richard ''Dick'' Richards, 44, and co-pilot Robert Cabana, 41, fired up Discovery's hydraulic steering system Tuesday before testing the shuttle's small maneuvering jets to make sure the 100-ton space freighter was ready for the long glide back to Earth.

If all goes well, Richards, Cabana, flight engineer William Shepherd, 41, Bruce Melnick, 40, and Thomas Akers, 39, will glide to a dawn touchdown at 6:57 a.m. PDT Wednesday at Edwards Air Force Base, Calif., to close out the 36th shuttle mission, NASA's first in nearly six months.

Unlike recent flights that have ended on dry Mojave Desert lakebed landing strips at Edwards, Richards and Cabana planned to land on a concrete runway to test Discovery's new carbon brakes, a post-Challenger safety improvement. The forecast called for ideal weather at landing time.

The astronauts spent the day Tuesday stowing Discovery's 50-foot robot arm, wrapping up a series of minor experiments and stowing loose gear for re-entry and landing.

Despite a disappointing summer of crippling fuel leaks and repeated delays, Discovery's mission has been virtually flawless, giving NASA's sagging morale a major boost after months of criticism about the flawed Hubble Space Telescope and trouble with the shuttle program.

Many problems remain for the beleagured space agency, including questions about quality control in the wake of a recent accident with the shuttle Atlantis, and work to fix the fuel leaks that have indefinitely grounded the shuttle Columbia.

But Discovery's picture-perfect blastoff Saturday and the flawless launch of the Ulysses probe six hours later were welcome successes for the National Aeronautics and Space Administration and the European Space Agency, which built the nuclear-powered solar probe.

NASA officials, sensitive to media attention to minor problems with on-board

experiments, said the flight should be viewed as a total success.

''We shouldn't forget the primary purpose of the mission was to get Ulysses deployed,'' Dittemore said at a news conference. ''And we did a good job at that, the crew did a super job, got it off on time, and we understand Ulysses is healthy and is well on its way to the sun by way of Jupiter.''

While critical of light media coverage of the mission, NASA officials decided not to schedule an expected news conference with the astronauts, who said very little during the flight other than to report on the status of various experiments.

Ulysses was built to study the sun from an orbit around its poles to give astronomers their first three-dimensional look at Earth's life- giving star and its effect on the solar system.

To get into such an orbit, Ulysses was fired away from the sun to Jupiter for a 1992 flyby that will utilize the giant planet's gravity for a slingshot-like boost down, out of the plane of the solar system and back toward the sun.

Three days after launch from Discovery, Ulysses was nearly 2 million miles from Earth and steadily speeding away into the deep night of space, on course for Jupiter and a 1994 pass over the south pole of the sun.

With Ulysses safely on its way, Discovery's taciturn crew devoted the remainder of the mission to a series of secondary experiments.

A panel of solar cells was exposed to the eroding effects of atomic oxygen to find out how a stranded communcications satellite will hold up until a shuttle rescue mission can be mounted in 1992.

In addition, the astronauts carried out a varity of medical and engineering studies, including tests of a personal computer ''trackball'' to find out how such data input devices work in the absence of gravity.

The crew also monitored the health of 16 rats on board as part of a medical experiment and the growth of plant root cells in research to learn more about the effects of weightlessness.

BEIJING (OCT. 9) UPI - President Yang Shangkun said Tuesday that China ''condemns'' Israeli authorities for opening fire on Palestinian demonstrators and he voiced support for the protracted Palestinian uprising in the occupied territories.

Yang's remarks came during a meeting with visiting senior Palestine Liberation

Organization official Abdullah Hourani. The meeting was reported by the official Xinhua news agency.

Yang blasted Israel for using force to put down a Palestinian protest in Jerusalem Monday that left at least 210 Moslems dead and wounded more than 150.

''We severely condemn the Israeli authorities for committing such a horrible crime,'' Yang told Hourani, who was described as paying a ''working visit'' to Beijing as the special envoy of PLO leader Yasser Arafat.

''We urge them to observe the norms of international law and cease their oppressive actions against the Palestinian people in the occupied territories '' Yang said, reiterating China's long-standing position of support for the nearly 3-year-old Palestinian uprising.

China has no diplomatic relations with Israel and has consistently backed the PLO, which maintains a mission in Beijing.

Ironically, Yang himself was one of the chief forces behind Beijing's June 4, 1989, military crackdown on democracy protesters in Tiananmen Square that left hundreds dead.

In addition to his post as president, Yang weilds actual control over China's 3.5 million-member army, which remained loyal to him throughout the bloody crackdown.

Yang also repeated China's oft-stated opposition to the use of force to resolve the stalemated Persian Gulf conflict and called for a ''restrained attitude'' in settling the crisis.

As one of the five permanent members of the U.N. Security Council, China has supported successive U.N. resolutions punishing Iraq for its Aug. 2 invasion of Kuwait but has criticized the mass deployment of U.S. troops in the Persian Gulf region.

#90282u1237 10/09/1990 ~United Press International

VIENNA (OCT. 9) UPI - President Kurt Waldheim named Chancellor Franz Vranitzky to head to a caretaker government Tuesday amid conflicting signals on whether Austria's two main parties will renew the ''grand coalition'' that has governed the country since 1986.

The old government was formally dissolved Tuesday, two days after parliamentary elections that gave Vranitzky's Socialist Party a decisive edge over its coalition partner, the conservative People's Party.

Vranitzky said he was confident following initial contacts that an agreement would be reached quickly on renewing the Socialists-People's alliance, dubbed the ''grand coalition'' because it encompassed 157 of 183 seats in the old parliament. He predicted the new cabinet would be in place within six weeks.

But People's Party officials have refused to commit themselves to joining a Socialist-led coalition.

Party leader Josef Riegler told reporters Tuesday his faction would not take part in the new government ''at any price.'' But later he indicated the party was waiting to see what kind of offer the Socialists would make.

Riegler said the People's Party also was negotiating with the right- wing Freedom Party, which surprised political observers Sunday by increasing its representation in parliament from 15 to 33 seats.

A coalition between the People's Party and Freedomites would represent a dramatic shift to the right for Austria, which has had Socialist-led governments since 1970.

Waldheim asked Vranitzky and his cabinet to assume a caretaker role until a new government was formed. He thanked the outgoing administration for its

''impressive work'' over the past four years.

An official vote count released Tuesday revised slightly the figures for the number of parliament seats won by the parties. The new numbers still do not reflect the votes of thousands of Austrians who reside outside the country.

The new count showed the Socialists won 80 seats, the same as in the last election, to remain the largest party in the National Assembly. The People's Party lost 17 of its 77 seats in the party's worst performance since its founding in 1945. The Freedomites won 33 seats and the environmentalist Greens 10.

The tally released by the Interior Ministry on Sunday showed the Socialists garnered 81 seats while the Greens won nine.

#90282u1241 10/09/1990 ~United Press International

AMMAN, JORDAN (OCT. 9) UPI - Palestinian frustration over Monday's killing of at least 21 Palestinians in Jerusalem erupted Tuesday across Jordan with thousands taking to the streets to mourn the deaths and call for vengeance.

Some 25,000 people gathered at the Baqa'a Palestinian refugee camp outside Amman, shouting pro-Palestinian slogans and calling for the government to arm the people to fight against Israel.

Workers in the camp observed a general strike, while black flags waved outside closed shops and tin-roofed shacks.

The demonstrators, which included participants from virtually all political organizations as well as the Moslem Brotherhood, called for a holy war against the Israelis in the occupied territories and the U.S.- led forces in Saudi Arabia and the Persian Gulf.

Protesters burned Israeli, U.S. and British flags at the end of the three-hour march.

Other demonstrations were scattered across refugee camps and in the streets of the capital, but there were no clashes with the security forces.

At least 21 Palestinians were killed and more than 150 wounded in Jerusalem when police opened fire on rioters on the Temple Mount, the site of the Al Aqsa Mosque, the third-holiest site in Islam.

Unlike the reaction last May after the massacre of Palestinian laborers near Tel Aviv, when demonstrators clashed with police for three days, leaders Tuesday in Jordan sought to limit protests in order to show a more unified position.

The demonstration in the Baqa'a camp was organized by Palestinian and Jordanian leftist groups in coordination with the right-wing Moslem Brotherhood for the first time, reflecting the national unity prompted by the gulf crisis.

A group of 2,000 college students marched toward the U.S. Embassy in Amman to protest U.S. support for Israel, but political leaders appealed for restraint and the students eventually were blocked by riot police and numerous armored jeeps.

The political leaders asked the students to postpone their march so that a larger-scale march could be organized.

Government and political organizations issued statements condemning the killing of Palestinians at Moslem holy sites in Jerusalem and calling for the immediate deployment of international troops in the occupied territories to protect Palestinians from the Israeli authorities and Jewish settlers.

The statements linked the resolution of the Persian Gulf crisis to the settlement of the Palestinian problem and the withdrawal of Israel from territories it has occupied since 1967.

#90282u1255 10/09/1990 ~United Press International

BUENOS AIRES, Argentina (OCT. 9) UPI - The privatization of Argentina's phone company, Entel, has been postponed for 31 days to give officials time to revise the contracts, a spokeswoman for the Public Works Ministry said Tuesday.

The contracts to transfer Entel to two international consortiums, one headed by Telefonica of Spain and the other by Stet of Italy, were originally scheduled to be signed Oct. 8, President Carlos Menem said last week in repeated announcements.

The deadline passed without the expected contract-signing ceremony.

Spokeswoman Maria del Carmen Llaver said there was not enough time prepare contracts because of the last-minute pullout of the consortium led by Bell Atlantic Corp. and Manufacturers Hanover Trust Co., which withdrew their bid Thursday to run the northern half of Entel.

''More time is needed to review the contracts,'' she said.

A group composed of Stet of Italy, France Cables and Radio, and Morgan Bank won the bid for the northern part of Entel when the American consortium backed off.

The Stet and Telefonica groups have offered to buy Entel for $600 million cash and $5 billion in Argentine debt paper, which now sells on the secondary market for about 14 cents to the dollar.

#90282u1256 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - Rep. Dan Rostenkowski, D-Ill., a tough big-city pol from the streets of Chicago, and Sen. Lloyd Bentsen, D-Texas, a patrician country club millionaire, moved into the spotlight Tuesday as the battle of the budget moved to a new, critical stage.

As autocratic chairmen of the House Ways and Means Committee and the Senate Finance Committee, respectively, they, and members of their panels, have been charged by Congress with writing the bulk of the budget agreement.

And under terms of the budget resolution approved by Congress, they have to complete their work by early next week, an excrutiatingly short time for putting together a sweeping tax bill as well as adjusting Medicare, the health insurance program for the elderly.

In all, the committees will be responsible for cutting the deficit by $18 billion of the $40 billion required in fiscal 1991 and by $194 billion of the $500 billion over five years.

The budget resolution adopted by Congress over the weekend gives the panels few specific instructions. It does, however, suggest the committees stick close to the agreement worked out by President Bush and congressional leaders and killed by the House.

The original agreement, the one rejected by House, contained new taxes on gasoline, tobacco, beer, wine, hard liquor, home heating oil, and luxury items such as expensive cars, yachts, jewels and furs. They are all on the table and other taxes may also be proposed.

The agreement also placed a $10,000 limit on deductions for home interest payments, would have created a new tax credit for investments in small business and saved $60 billion from Medicare - half by cutting payments for hospitals and doctors, and half through increased premiums and deductibles for beneficiaries. The budget resolution approved reduced the Medicare provision to $60 billion.

Not contained in the original agreement, however, was an increase in the tax rates for the wealthiest Americans that the committees are certain to consider - either with or without a reduction in the capital gains tax. Democrats want the top tax rate to, at a minimum, climb from 28 percent to 32 percent.

Bush, who has fought against higher taxes for the wealthy as hard as he has

battled for a cut in the capital gains tax, said today the White House would stay in touch with Rostenkowksi, Bentsen and the ranking Republicans on the committee and ''discuss with them what we can expect. I want them to know it.''

No two members could, on the basis of the background, be more different than Rostenkowki and Bentsen.

Bentsen, the 1988 Democratic vice presidential candidate, quit the House in 1954 to make a fortune in Texas oil and then returned to the Senate in 1970. He is considered a Sun Belt conservative Democrat, very protective of the interests of his state.

Rostenkowski, by contrast, comes from a heavily Polish-American district of Chicago, and is a product of the famed Daley machine. He made the obligatory tour through state service before being sent to Washington in 1958. Thoughtful and pragmatic, he likes to help the little people but also understands the problems faced by the big guys

One issue dramatizes their differences. Rostenkowski, whose constituents drive little, has no qualms about raising gasoline taxes, alhough he would like to divert a part to mass transit.

Bentsen hates higher taxes on gasoline that hurt the petroleum industry as well as gas-guzzling Texans. His antipathy is so deep that he forced budget summit negotiators to put a 2-cent tax on home heating oil to secure his support.

The Ways and Means Committee and the Finance Committee almost certainly will not produce identical bills and their products will also be open to amendments in the Senate and House chambers.

A final version that has to go to Bush for his signature will be worked out in negotiations that will be led and heavily influenced by Rostenkowki and Bentsen.

#90282u1258 10/09/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (OCT. 9) UPI - A gang of 25 young black males armed with Ninja knives rampaged through the center of the Indian Ocean port city of Durban Tuesday, randomly attacking white pedestrians and wounding eight, police said.

Officers shot and wounded two of the assailants - one a 15-year-old boy - and arrested seven others after the mid-morning stabbing spree, a police spokesman said.

The gang raided a curio shop specializing in martial-arts weapons about 9 a.m.

''then took a variety of Ninja knives and stabbing objects'' and ''ran down the street, chanting songs and attacking whites at random,'' the spokesman said.

He said the attackers wounded three males and five females, including a 15-year-old girl stabbed in the thigh and an 85-year-old man stabbed in the back. Four others were seriously hurt.

Some of the casualties, streaming blood, staggered into shops and hotels seeking refuge, witnesses said.

The gang panicked ''hundreds of ordinary shoppers and passersby'' before dozens of police converged on the scene of the stabbings on the main Gillespie Street, according to the police spokesman.

Officers shot and wounded two of the assailants and arrested seven others, aged 15 to 24, after a hunt through the streets, he said.

The rest of the gang fled, he added, but lawmen were combing the area. He noted police had not discovered any motive for the attack and declined to speculate on possible political reasons.

The police said there were unconfirmed reports all the attackers wore the colors of the African National Congress, but other accounts put them in the dress of the militant Pan-Africanist Congress, the chief rival group of the ANC.

''In any case, just because they are wearing particular colors doesn't mean they are necessarily members of that organization,'' the spokesman said.

#90282u1261 10/09/1990 ~United Press International

DHAHRAN, SAUDI ARABIA (OCT. 9) UPI - Baghdad Betty and Bob have nothing on Armed Forces Radio. In fact, they're downright boring.

Radio Baghdad, which bills itself as ''The voice of peace,'' is heard in Saudi Arabia on shortwave that fades in and out, making the audi quality marginal.

Until Tuesday with the much-awaited start of Armed Forces Radio-TV Service to U.S. troops in Saudi Arabia, soldiers picking up Radio Baghdad on their portable radios dismissed it as mildly amusing.

The commentaries are transparently propagandistic.

''Betty'' and Bob'' take turns reading the lines in between every three or four songs - most of them rock and roll tunes or numbing elevator music from 15 to 20 years ago - and declaring: ''This is the ''ng: ''This is the

The songs are rarely introduced.

Bob often delivers long commentaries, ones seemingly prepared for domestic consumption and for uneducated ears in the Arab world.

''American troops in Saudi Arabia, if the Sabeh family is driven from Kuwait by the Kuwaiti people, what is your interest,'' Betty asked Tuesday.

Tuesday, Bob talked about the 'very crude way (President Bush) introduced troops into Saudi Arabia ... before Saudi Arabia even asked ''ked

A sudden spark, he said, could set of ''an apocolypatic war.''

Monday's ''news'' broadcast cornered the market on the verb ''denounce'' as in ''Arab nations denounce ... the American invasion of the Arab Peninsula'' and they ''denounce the Security Council resolution imposing an economic blockade on Iraq.''

And Bob read a telegram from an unidentified nation saying it was ''ready to defend Iraq and foil the American-Zionist scheme.''

And on Tuesday, seizing on a variety of accidents and crashes, sought to raise questions about the quality of U.S. and allied weaponry. ''All that expensive weaponry, not to mention the pilots and mechanics, can't you see your technology'' is not up to the desert environment.'' Bob said.

And, he added, ''It is our humanly duty to warn you that the war George Bush is hoping to wage is about victims, you. ... We want to inform you you're facing 1 million Iraqis ready to enter into war. We have just finished a bloody eight-year war and are backed by 6 million more volunteers.''

Betty added that a State Department notice cautioning U.S. travelers in the Middle East as a sign of ''the growing panic'' in the United States over the situation.

-30- 2697

#90282u1270 10/09/1990 ~United Press International

PORTLAND, OR (OCT. 9) UPI - Jury selection entered a second day Tuesday in the trial of a $10 million lawsuit accusing a white supremacist of inciting three skinheads to beat a black man to death with a baseball bat.

The trial of the civil suit against Tom Metzger, 52, began Monday under tight security that included a metal-detector and a ring of police around the Multnomah County Courthouse.

There was no violence, despite reports that hundreds of skinheads - youthful members of loosely connected or unconnected groups who shave their heads, wear steel-toed jack boots and often espouse racist views - had flocked to Portland for the trial.

But three skinheads were arrested in or near the courthouse, two for carrying concealed weapons and one on an outstanding assault warrant involving an attack on an anti-racist skinhead.

Efforts to find a fair and impartial jury in the emotional case could take the rest of the week, lawyers said. Two prospective jurors - a black man and a retired Jewish attorney - were excused from the first pool of potential jurors Monday after saying they felt they could not be fair in the case.

Earlier, Circuit Judge Ancer Haggerty, one of only two black circuit judges in Oregon, rejected Metzger's motions to dismiss much of the evidence linking him to the November 1988 slaying.

The suit was brought by attorney Morris Dees of the Southern Poverty Law Center in Montgomery, Ala., and the Anti-Defamation League of B'nai B'rith. It accuses Metzger, of Fallbrook, Calif., and son John, 22, of recruiting three young skinheads who fatally beat Ethiopian student Mulugeta Seraw outside his Portland apartment.

The Metzgers run a group called White Aryan Resistance and the son is a national leader of skinheads.

Two of the three skinheads pleaded guilty to murder or manslaughter in the killing of Seraw, 27, and are serving long prison terms. Two of them, Kenneth Mieske and Kyle Brewster, are named as co-defendants in the civil suit.

The three confronted Seraw and two other blacks outside Seraw's apartment. A fight broke out in which Mieske hit Seraw in the head with a bat. All three whites then kicked him in the head with their steel- toed boots. Seraw died of a fractured skull.

The Metzgers were in California at the time and did not face criminal charges in the case, but in the civil suit they are accused of recruiting the three white youths into their organization and teaching them a doctrine of hate and violence towards blacks and Jews.

Haggerty denied motions by Metzger or his son to exclude bank and phone records or testimony from police and others. The Metzgers, dressed in conservative three-piece suits, contend they cannot afford to hire lawyers and are defending themselves.

Dees and fellow lawyer Elden Rosenthal filed suit on behalf of Seraw's uncle,

Engedaw Berhanu, in an effort to bankrupt the Metzgers' organization. Dees broke an Alabama Ku Klux Klan group that lynched a young black man in 1981 when he won a $7 million judgment that resulted in the group's headquarters and other property being turned over to the victim's family.

Metzger repeated his contention that his group does not advocate violence and called the incident one of ''mutual combat where an unfortunate death occurred.''

Metzger, a former California KKK grand dragon who lost a bid for Congress in 1980, said he will call few if any witnesses, ''except my mother, to say what a nice guy I am.''

Dees is expected to call California skinheads who have said in affidavits that the Metzgers taught them ''Jews and blacks were enemies of the Aryan race and it was necessary to use violence against them.'' One youth said he got the Portland skinhead group East Side White Pride ''all fired up to carry out Tom and John Metzger's goals of harming blacks and Jews.''

#90282u1271 10/09/1990 ~United Press International

LONDON (OCT. 9) UPI - Profit taking slammed stock prices Tuesday in active London International Stock Exchange trading, eating into gains achieved over the previous two trading sessions.

Similarly, prices weakened on the Frankfurt Stock Exchange after a strong rally Monday.

In London, the blue-chip Financial Times 100-stock index, which surged 57.7 points Monday, plunged 67.5 points to 2,134.1. The narrower top 30 industrial average dropped 65.2 points to 1,640.5.

Volume amounted to around 824 million shares, below the record 1.09 billion shares that changed hands Monday.

Analysts said stocks fell amid a combination of factors, including investors pausing to adjust their portfolios in light of the 131.2-point advance in the FT-100 index in the previous two sessions.

Market watchers said stocks weakened as the euphoria the erupted in the latter part of last week over Britain's entry into the exchange rate mechanism of the European Monetary System waned. Sentiment was hurt by worries over the situation in the Persian Gulf following the deaths in Jersualem Monday of a number of Arabs.

Worries over the effects on companies' overseas earnings resulting from the pound's entry into the exchange rate mechanism also hurt prices.

Analysts downgraded profit expectations of British companies with large overseas earnings. These firms' profits rose with the British pound weak relative to other currencies, but they now will see them fall with the pound strong inside the exchange rate mechanism, market watchers noted.

UBS Phillips and Drew issued several dowgraded forecasts on earnings outlooks sending share prices for BTR, Rio Tinto Zinc and Cable & Wireless broadly lower.

Industrial conglomerate BTR fell 23 cents to $6.05, mining company Rio Tinto Zinc lost 48 cents to $7.64 and telecommunications giant Cable and Wireless fell 36 cents to $8.13.

Britain's largest chemical group, Imperial Chemical Industries, another company whose business is tied to dollar sales, tumbled 90 cents to $15.83 after a bearish report by Barclays de Zoete Wedd.

Cadbury Schweppes dropped 44 cents to $5.93 after the U.S. company General Cinema announced it had sold its 16.7 percent stake.

In Frankfurt, prices closed broadly lower in thin trading. The closely watched German stock index, which surged 73.77 points Monday, fell 32.12 points to 1,433.41, a 2.2 percent pullback.

Traders said stocks came under some light selling pressure following Monday's 5.3 percent rally.

Elsewhere in Europe, stocks also eased in Paris and Zurich. In Paris, the French CAC 40 index fell 11.43 points to 1,574.73, while in Zurich the Swiss stock index slipped 5.90 points to 935.10.

-30- 2917

#90282u1277 10/09/1990 ~United Press International

(OCT. 9) UPI - The Supreme Court has refused to get involved in the question of whether the Army's urinalysis drug testing program violates constitutional protections against unreasonable search and seizure. The case was brought by an Army Staff Sergeant court-martialed in 1988 after testing positive for cocaine use. .

The nation's highest court also declined to hear arguments on a lower-court ruling that threw out rate surcharges placed against customers of five natural gas pipelines in the mid-1980's. The case involved long-term contracts signed earlier in the decade. At issue is whether the Federal Energy Regulatory Commission had the power to order the surcharges. .

And the high court has let stand a decision that public schools have to open

their facilities to a wide range of groups if they selectively allow other organizations use of the buildings. The case goes back to 1987 when a school district in Warminster, Pennsylvania, refused to let an evangelical Christian group use one of its schools, even though it rented out space to other religious groups.

A 10-day-old civil war continues in the central African nation of Rwanda. The government says it is gaining the upper hand against rebels who have been forced into the countryside. France, Belgium and the neighboring African nation of Zaire have all dispatched troops to Rwanda in the past week. But the French and Belgium governments say their troops are there to protect French and Belgian civilians living in the country.

#90282u1279 10/09/1990 ~United Press International

CAPE CANAVERAL, FL (OCT. 9) UPI - NASA managers ordered engineers to haul the leak-plagued shuttle Columbia off launch pad 39B and back to a processing building Tuesday to protect the $2 billion orbiter from expected high winds and rain.

At the same time, agency officials ordered a 48-hour delay for the shuttle Atlantis's trip from the Vehicle Assembly Building to launch pad 39A because of the threat of stormy weather associated with tropical depression Klaus.

The decision to move Columbia out of the weather came one day after the ship was moved from pad 39A to the shuttle Discovery's vacant firing stand for additional tests to pin down the source of crippling hydrogen leaks that have grounded Columbia since May.

Mounted atop a powerful crawler-transporter, Columbia began the 4.2- mile six-hour trip back to the Vehicle Assembly Building shortly after 10 a.m. EDT.

While shuttle launch facilities were designed to withstand hurricane- force winds, NASA managers decided not to risk any damage to Columbia or Atlantis, even though Klaus was downgraded from tropical storm status Tuesday.

Early Tuesday, Klaus was located southeast of Nassau in the Bahamas, moving toward the west-northwest at 15 mph with maximum sustained winds of about 45 mph. The storm was expected to turn toward the northwest over the next 24 hours.

#90282u1290 10/09/1990 ~United Press International

CAIRO, EGYPT (OCT. 9) UPI - Salah is one of many young angry Palestinians living in Egypt who dislike Saddam Hussein but think the Iraqi leader now has a chance to show whether he is a mad dictator or an Arab statesman who can

help solve the Palestinian problem.

''I could never agree with some of the things Saddam is doing,'' Salah said in an interview at his small downtown Cairo apartment.

''But Saddam now has a chance to show Arabs and Moslems whether he is a mad dictator or a statesman by either remaining in Kuwait, or withdrawing after receiving pledges that the Palestinian problem will be solved,'' he said.

In a statement to Moslems one day after Israeli security forces killed at least 21 Palestinians in Jerusalem, Saddam warned Israel Tuesday to withdraw from the occupied territories or risk war.

The Iraqi leader's warning was seen as an attempt to focus world attention away from the Persian Gulf crisis and toward the Arab-Israeli conflict to garner more support within the Arab and Moslem world for his lonely cause.

But Saddam's failure to suggest an Iraqi troop withdrawal from Kuwait as a gesture to facilitate a solution to the Palestinian problem has thrown into doubt his sincerity toward the Palestinian cause and not made the position of 50,000 Palestinians in Egypt any easier.

Even before the Aug. 2 Iraqi invasion of Kuwait, which Palestine Liberation Organization leader Yasser Arafat refused to condemn, government-supervised Cairo newspapers attacked the PLO for condoning anti-Israeli Palestinian terrorism in Egypt.

Egypt has strongly condemned Iraq's invasion and Saddam personally and angered Baghdad by sending troops to Saudi Arabia to help defend the kingdom against possible Iraqi aggression.

And despite recent arrests in Egypt of Palestinians suspected of working for notorious Palestinian guerrilla leader Abu Nidal, genuine support for Saddam has only come from the Palestinians in Jordan and the Israeli-occupied West Bank and Gaza strip, but not from Palestinians in Egypt.

''We have again become a target for the Egyptians,'' said Salah, a 24-year-old part-time carpenter and economics student who asked that his full name not be used. Mubarak last week warned Palestinians in Egypt such as Salah to stay away from pro-Iraqi extremist organizations or risk dire consequences.

Palestinians in the occupied territories, including the growing number who support the Islamic fundamentalist Hamas group and oppose the PLO for being too soft, see Saddam as ''a ray of hope'' who will stand up to the United States and Israel and ''settle the Palestinian problem.''

Despite Salah's reservations and pledges from Western leaders such as French President Francois Mitterrand to work harder to solve the Palestinian problem,

the Palestinian carpenter grudgingly agrees that Saddam now has in his hands a unique opportunity that no other Arab leader has held since the creation of the Jewish state and the division of British-controlled Palestine.

''It is sad that our cause can only be helped by a man who invaded an Arab state,'' he said. ''But it is true to say that Saddam is the only one who has stood up and who Israel cannot dismiss lightly.''

CHICAGO (OCT. 9) UPI - Directors of UAL Corp., Tuesday unanimously rejected a scaled-down buyout bid by United Airlines employees and terminated their merger agreement with the employee group.

A UAL spokesman said the merger agreement was terminated becasue the employee group - United Employee Acquisition Corp. - failed to arrange financing for the original $4.4 billion, $201-a-share buyout.

The company said the employee group presented a revised acquisition proposal but that the value, while uncertain, was considerably below the $4.4 billion offer accepted by the board last April.

''We firmly believe that the interests of both UAL shareholders and employees would be well-served by the company aggressively moving forward with its highly successful strategioc plan and taking advantage of its position of strength in a time of difficulty for the airline industry,'' the board said in a statement.

The board, facing potential labor problems with its three unions as a result of the buyout's failure, asked federal mediators to resume expedited mediation of new contracts for pilots and flight attendants.

Directors also said UAL is prepared to resume negotiations with the International Association of Machinists.

All three unions have been working under expired contracts while pursuing the buyout - which would have made UAL the world's largest employee-owned company. The unions - and particularly the Air Line Pilot's Association - have indicated they will seek major improvements in wages and benefits.

''Obviously, there are continuing significant issues to be addressed with each of our employee groups,'' the board statement said. ''We plan to do so in a spirit of constructive resolution.''

''Since pilots are further along in negotiations, we are offering to have any issues remaining unresolved at the concluision of expedited mediation with ALPA resolved by a neutral and independent arbitrator,'' it said.

#90282u1323 10/09/1990 ~United Press International
BOGOTA, COLOMBIA (OCT. 9) UPI - The government is seeking to lure cocaine cartel kingpins to surrender with new guarantees they will not be extradited to the United States.

The new guarantees were in response to letters received from the city of Medellin, headquarters city of the powerful Medellin cartel of cocaine traffickers, said Justice Minister Jaime Giraldo.

They also came after the kidnappings of seven journalists by the cartel and after an influential group formed to seek their release asked the government for more flexibility in its policies.

''With the new measures, the government is trying to give the cartel heads confidence that they will not be extradited in case they turn themselves in,'' said a Justice Ministry official.

The new policy issued Monday says drug traffickers who surrender to authorities and confess will not be extradited to the United States even if they fail to tell authorities about all of their criminal activities.

It modified a Sept. 5 decree issued by President Cesar Gaivira that promised reduced jail sentences for traffickers who turn themselves in and confess to their crimes. Under the Sept. 5 decree, traffickers could have been sent to face U.S. justice if they failed to confess to certain crimes for which U.S. authorities later sought their extradition.

Giraldo admitted the new measures ''were born in the doubts expressed by some people in letters'' sent from Medellin.

The modifications in the earlier decree also were introduced after a group of

influential Colombians asked Gaviria for ''flexibility'' in its judicial strategy against the cocaine cartels.

The group of two former presidents, a Catholic Church representative and a prominent leftist politician was formed to try to negotiate the release of seven journalists held by the Medellin cartel.

The seven were kidnapped apparently in an effort to bring the government to the bargaining table and seek a political deal similar to that proposed for communist guerrilla groups.

Gaviria has repeatedly said his administration would not negotiate with the cocaine cartels and that the decrees were issued without pressure from traffickers.

The decrees are part of the administration's effort to lower the level of violence in Colombia and to ''demilitarize'' the anti-cocaine effort. The government hopes to end a period of bombings and murders that began in September of 1989 with a string of assassinations and the imposition of a state of siege by the government of then-President Virgilio Barco.

Also Tuesday, the government denied the extradition of a cocaine suspect to the United States.

The Gaivira administration denied a request for extradition for Salomon Shuter wanted in the state of Florida, because the U.S. government failed to present the legal documents necessary to approve the extradition, the spokesperson said.

Since Friday, the government has turned over three Colombians for extradition and authorized one other extradition.

ORLANDO, Fla. (OCT. 9) UPI - The average price of gasoline nationwide continued to climb during the past week, rising 2.4 cents a gallon to $1.37, the American Automobile Association said Tuesday.

The latest increase followed a 3.6-cents-a-gallon increase the previous week.

The average price of regular unleaded gasoline sold at self-service pumps around the country is now 29.5 cents higher than on Aug. 1, the day before Iraq invaded Kuwait, the AAA said.

The AAA said the average price for mid-grade gasoline sold at self- service pumps rose 2.2 cents during the past week to $1.45 a gallon, while the average price of premium gasoline rose 2.1 cents to $1.534 a gallon.

The AAA said prices increased in all regions of the country during the past week. The steepest increase was recorded in the West, while the smallest increase was in the Midwest, AAA said.

#90282u1365 10/09/1990 ~United Press International

BUDAPEST, Hungary (OCT. 9) UPI - Hundreds of Turks, Romanians, Poles and Arabs faced possible deportation Tuesday following a nationwide crackdown on illegal aliens who are pouring into Hungary seeking visas to emigrate to the West.

Interior Minister Balazs Horvath, in an interview published Tuesday in the national daily Nepszabadsag, warned that ''those who stay in Hungary illegally will be returned to the country from which they came.''

But Horvath stressed Hungary would abide by U.N. resolutions pertaining to illegal immigrants, and insisted humanitarian considerations would be taken into account.

The crackdown was launched by the national police force, border guards and the Office for National Security in a series of coordinated moves beginning Monday. By Tuesday morning, more than 500 suspected illegal aliens were being held for questioning.

Tens of thousands of Eastern Europeans, Soviets, Turks and Arabs have entered Hungary in recent months as a gateway to Western Europe. Many are turned back at the Austrian border or are returned forcibly to Hungary after sneaking into Austria without a visa.

Nearly all are poor and most are unable to find work in Hungary, where jobs are scarce and the economy is in decline.

''They are often caught in the web of international crime,'' Horvath said.

The influx of foreigners is being blamed for a sharp rise in black market trading in Budapest, as well as pick-pocketing, burglaries and muggings.

There also has been an increase in violent crime among the immigrants themselves. In a highly publicized case on Sunday, a 32-year-old Yugoslav man was stabbed to death at a disco on a river boat near the southern town of Szeged during a brawl between Jordanian Arabs and a group of Yugoslavs. A Hungarian teenager also was seriously hurt.

Three Jordanians have been charged with the slaying and local police are now trying to prevent revenge attacks by Yugoslavs.

Horvath said the nationwide crackdown on illegal immigrants had been planned for months in coordination with the Austrian government.

He said anyone found without proper travel documents or residency permits would be immediately deported by buses or air force planes, although the government would continue to consider legitimate requests for political asylum.

#90282u1374 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - Sen. Daniel Moynihan, D-N.Y., urged the Senate Tuesday to approve legislation cutting Social Security taxes, saying that the surplus in the trust fund, now above $100 billion, should not be used to finance other government programs.

''These are not general revenues. They must not become sources of general revenue,'' Moynihan said as the Senate began debating his bill that would put Social Security on a ''pay-as-you-go'' basis beginning Jan. 1.

''The case for pay-as-you-go was powerful before the budget summit agreement '' Moynihan said. ''In my view, it is now overwhelming.

''I hope my colleagues will vote for this bill,'' he said. ''It is transparently just, overwhelmingly popular, economically sound and, as a matter of public trust, an elemental duty.''

Sen. Terry Sanford, D-N.C., said the current program, which included a raise in the Social Security tax on employees and employers from 6.06 percent to 6.2 percent this year, was a ''pay-now-and-pay-again-later retirement plan.''

Moynihan said his proposal would mean a ''immediate increase in take- home pay'' for 132 million Americans and after six years, a family with two incomes would have an increase in yearly income up to $1,544.

There was no indication when the Senate would vote on the measure, nor if it has any chance of passage before congressional adjournment expected later this month.

The legislation was called up only hours after the Senate gave final approval to a five-year, $500 billion cut in the federal deficit, including $40 billion in fiscal 1991.

Moynihan's bill, however, would reduce revenues for the Social Security trust fund by $3.9 billion in fiscal 1991 and by $110.6 billion over the five years.

Revenues paid to the Social Security trust fund, as well as several other trust funds, are calculated as income for the federal government and reduce the federal deficit.

Moynihan originally proposed a retroactive repeal of last January's increase in the Social Security tax rate and a reduction to 5.1 percent in January, 1991, that would have slashed revenues by $38 billion.

The bill, however, reduces the tax rate to 6.06 percent, last year's level, in January of next year and then dwindles to 5.1 percent over six years.

At the same time, the taxable income increases from $54,300 to $55, 500 in January and climbs to $85,500 in 1996.

The Moynihan bill would, at the end of 1995, have a reserve equal to at least 18 months of benefit payments.

''The essence of the question is that we now have a situation where the Social Security trust fund ... is now running and has been running a very large surplus and will continue to run a surplus for the next 30 years,'' he said, adding the surplus is growing by $1.3 billion a week.

Under the Moynihan bill, the tax rate would stay at 5.1 percent from 1996 through 2009 and then gradually climb to 8.1 percent in 2055. It would reach the current 6.2 percent in 2015.

#90282u1394 10/09/1990 ~United Press International

PARIS (OCT. 9) UPI - France called on the United Nations Tuesday to work ''as of today'' toward convening an international conference on the Middle East peace process and said such a gathering should not be conditional on Iraq's withdrawal from Kuwait.

''There is no need for a chronological link (between events in the Persian Gulf and the Palestinian question),'' said Elysee Palace spokesman Hubert Vedrine.

''If the problem presents itself today, France underlines that this underlines the absolute necessity as of today for that international conference.''

''One cannot wait for the U.N. Security Council resolutions concerning the Iraq-Kuwait question to be applied,'' he said.

Vedrine's statement followed comments by President Francois Mitterrand Monday on the latest deaths in Jerusalem in which the 73- year-old Socialist leader said such an international conference was ''more than ever'' the only way to resolve the Israeli-Palestinian problem.

Vedrine denied that the latest French stance could be interpreted as any movement toward demands by Iraq and the Palestine Liberation Organization for

all Middle East problems to be resolved together at the same conference.

''One is not proposing any more than before that at a big conference one mix together all subjects,'' he said.

Asked about the reticence of the United States to associate itself with a new U.N. condemnation of the Israeli occupation of the Arab territories, Vedrine said there was only a ''difference of approach'' between Washington and Paris and that this did not put in question the U.N. Security Council cohesion on the gulf crisis.

''There is no fissure on the Iraq-Kuwait affair and there is none in sight,'' Vedrine said.

''On the rest, there are differences of approach. That is not new. Unfortunately the cohesion of the international community on the Middle East problem remains to be created,'' he said.

He said the important thing was to start up the process ''leading at the right moment to an international conference'' that would consider the Israeli-Palestinian and Lebanese questions.

Vedrine recalled that Sept. 24 in a speech at the United Nations Mitterrand had proposed a path to follow to convene an international peace conference on the Mideast.

''Our initiative implies direct dialogue between the involved parties, the agreement with neighboring or near states, and at last an irreplacable international guarantee vested in the United Nations,'' Vedrine said.

''At the end of the path, one finds again the idea of the international conference to guarantee the execution of the agreement and to catalyse all successful negotiation,'' he said.

#90282u1402 10/09/1990 ~United Press International

(OCT. 9) UPI - President Bush says he is open minded about negotiating with Congress as it works to come up with a budget compromise that will get votes. Bush even hinted at a news conference this morning that he might agree to higher taxes for the rich if capital gains taxes are cut. The news conference was held just hours after Bush signed a stop-gap spending measure needed to fund the government to October 19th. But, the president then warned he won't sign any extension if Congress does NOT come up with a budget he can support.

Threats of Arab retaliation for the slayings of at least 21 Palestinians by Israeli security forces in Jerusalem yesterday sent oil prices rocketing to record highs on world markets today. Britain's North Brent crude jumped to 41S

West Texas Intermediate was up one dollar 80 cents, to 40 dollars 50 cents a barrel. Iraqi leader Saddam Hussein called for a Palestinian uprising and threatened Israel with a new rocket in his arsenal if it does NOT get out of the occupied Arab territories. .

Israeli security forces have been put on alert amid fears that yesterday's slayings of 21 Moslems could lead to even more violence. Curfews have been placed on the entire Gaza Strip and on most West Bank towns. And several Arab neighborhoods of Jerusalem have been ordered closed. The deaths came after Israeli forces switched from rubber bullets to live ammunition as they battled rock-throwing demonstrators on Jerusalem's holy Temple Mount.

NEW YORK (OCT. 9) UPI - Lots of Earth kids are ready to go to Mars and see the sights, expecting to meet friendly Martians with special talents, a survey reported Tuesday.

A Gallup poll of 1,500 children around the country aged 10 to 14, commissioned by the makers of M&M and Mars candies, found that 64 percent would go to the Red Planet if they could, while 31 percent said they'd rather not.

Seven out of 10 agreed with President Bush's prediction earlier this year of a landing on Mars by the year 2020.

The children were split, with 49 percent of boys and 43 percent of girls saying yes, on whether people would one day build cities on Mars, with older children more likely to have that expectation than kids aged 10-11, the survey found.

And most of the children - 73 percent of the girls and 66 percent of the boys surveyed - expected Martians would be friendly to Earthlings.

Eighty percent expected Martians would have ablities that people on Earth lack with 64 percent of the boys and 57 percent of the girls saying Martians would have better technology.

A few said Martians probably could fly or perform what, for humans, would be supernatural tricks.

Thirty percent of the boys and 28 percent of the girls said the most exciting thing about a visit to Mars would be the planet itself.

As for ideas about Martians, 80 percent of those surveyed expected they would not look alike and most expected Martians would have many different lnaguages, as we do on Earth.

Fifty-four percent said they expected interplanetary communication would be possible.

#90282u1423 10/09/1990 ~United Press International

MONTREAL (OCT. 9) UPI - About 3,800 Abitibi-Price Inc. paperworkers returned to their jobs Tuesday after ratifying a settlement reached last week, ending a four-week strike at seven mills in eastern Canada.

The Canadian Paperworkers Union said 15 of its 16 Abitibi-Price locals at mills in Ontario, Quebec and Newfoundland voted in favor of a new contract.Ratification was required by a majority of the locals, not individual members.

The new three-year deal calls for wage hikes of 5.5 percent each year, a paid 30-minute lunch for day workers on an eight-hour shift, an increase in the differential paid to workers on the overnight shift and improved benefits.

The wage settlement met a pattern established in talks with Stone-Consolidated Inc. in July.

The union said the deal also includes a clause providing for job security for permanent employees whose positions may be threatened due to layoffs or technological or processing changes.

The settlement apparently was reached after both sides compromised. The company received greater flexibility in assigning tasks to tradesmen, while the locals were given the right to decide on operating the mills on statutory holidays.

Abitibi-Price spokeswoman Sharon Paul said the settlement is good for both sides. ''We are looking forward to making paper at a profit,'' she said.

Paul said that she didn't know how much the strike had cost the company and that high pre-strike customer inventory would make it difficult to calculate actual losses.

The seven mills, which were closed Sept. 10, produce 2.1 million tons of newsprint a year, 60 percent of Abitibi-Price's capacity.

The Abitibi-Price settlement is expected to help break a labor deadlock at Canadian Pacific Forest Products Ltd., where about 1,800 members of the paperworkers union continued their strike at two mills in Quebec and New Brunswick. The picket lines were set up Sept. 12.

#90282u1424 10/09/1990 ~United Press International

FORT LAUDERDALE, Fla. (OCT. 9) UPI - The judge hearing the obscenity trial of three members of 2 Live Crew withstood Tuesday an attempt by prosecutors to remove her because she is a former student of the rap group's lead attorney.

Broward County Circuit Court Judge George Brescher denied the request to disqualify fellow Judge June Johnson, saying her relationship with defense attorney Bruce Rogow was not close enough to warrant her dismissal.

Brescher also said the prosecution motion should have been filed 10 days before the trial, instead of on the first day of jury selection.

Luther Campbell, lead singer of 2 Live Crew, and band members Chris Wongwon and Mark Ross are on trial for performing lyrics from their album ''As Nasty As They Wanna Be'' two days after a federal judge declared the music obscene.

The performance by the Miami rap group occurred at Hollywood's Club Futura June 11.

On Monday, Johnson refused to remove herself from the case, saying her relationship with Rogow, a Nova Law School professor, ended with her 1975 class.

Prosecutors also sought to have Johnson removed because she commented on her relationship with Rogow from the bench on Monday, noting that she did not do well in his class.

Brescher said it was a close call, but that he thought her comments were minor and would not affect the case.

Prosecutors may still appeal the decision to the 4th Circuit Court of Appeals in Palm Beach County.

Despite Brescher's decision, prosecutor Pedro Digols said, ''The state is ready to proceed today. We're ready to rock 'n' roll.''

Still undecided is whether Johnson will acceed to a defense request to alter the jury selection process. Defense attorneys feel the present pool of potential jurors does not include enough minorities and young people.

So far, 25 jurors have been called from a larger than normal pool of 70. None have been seated.

Rogow has propsed selecting a jury by relying on drivers license numbers, telephone listings and lists of food stamp recipients to obtain a more racially balanced jury.

''They (prosecutors) want a jury of middle class, white, 40- to 50- year-olds

'' Rogow said. ''I want an 18-year-old, black male jury. ... This is a First Amendment case and the First Amendment protects the freedom to provoke, the freedom to challenge, and the freedom to shock.''

To alter the jury selection process, Johnson would have to declare Florida law unconstitutional as applied to obscenity cases because obscenity is the only area of criminal law that relies on accepted community standards to determine guilt.

''I want to get the trial underway. I want to get rid of this lousy way of picking a jury. There are only three blacks so far out of 25 (potential jurors) and one of them is a black Cuban. He doesn't count as a black. I want to be judged by black Americans. You need people who understand the music,'' Campbell said.

''When rap first came to south Florida, even the young people didn't like it. Now, they understand. I don't expect 40- and 50-year-old housewives to understand what is going on.''

Co-defense attorney Allen Jacobi said the defense plans to call Arthur Henry Gates, a professor of literature at Duke University and an expert on Afro-American culture, Howard Casey, the lead singer of K.C. and the Sunshine Band, as well as Newsday music critic John Leland.

#90282u1433 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - The United States formally apologized and made $20,000 payments Tuesday to nine Japanese-Americans nearly a half century after they were rounded up and placed in internment camps during World War II.

In an emotional ceremony at the Department of Justice building, Attorney General Dick Thornburgh handed the checks, along with letters of apology from President Bush, to the recipients, age 73 to 107. The ceremony marked the beginning of a three-year $1.25 billion program to compensate Japanese-American internees.

''By finally admitting a wrong, a nation does not destroy its integrity but, rather, reinforces the sincerity of its commitment to the Constitution and hence, to its people,'' Thornburgh said.

Turning to the former internees, five of whom were in wheelchairs, he added, ''In forcing us to re-examine our history, you have made us only stronger and more proud. For that, all Americans are indebted to you.''

When Thornburgh handed a check and letter to Don Hatsuki Shima, 86, of Laurel, Md., Shima held it firmly and whispered, ''Thank you very much.'' His words were lost in a sea of applause from scores of tearful Japanese-Americans

attending the ceremony, including members of the highly decorated 442nd Battalion that fought in Europe during World War II.

Assistant Attorney General John Dunne noted that while the battalion of Japanese-Americans was suffering 9,486 casualties and earning 18,000 decorations, many had family members living behind barbed wire fences in U.S. internment camps.

Following the Japanese bombing of Pearl Harbor on Dec. 7, 1941, 120, 000 Americans of Japanese ancestory were rounded up and placed in the camps, which were formerly disbanded on June 30, 1946. The Justice Department has estimated that 65,000 of those relocated are still alive.

The Civil Liberties Act of 1988 provided a national apology and authorized $1.25 billion in redress payments to U.S. citizens and permanent resident aliens of Japanese ancestry who were forcibly relocated or interned.

The act requires the attorney general to find eligible people and make payments in order of age, beginning with the oldest. In cases where an eligible person has died since the law's enactment, the payment goes to surviving relatives.

To find those eligible, the Justice Department's Office of Redress Administration has sifted through 50-year-old internment records scattered across the country.

The office has so far verified the eligibility of 22,500 of the oldest Japanese-Americans. Under the three-year redress program, 25,000 payments will be made this year, 25,000 next year and the remaining payments the following year.

A handful of those identified have turned down the payments, which are exempt from federal taxes.

In his letter to the recipients Tuesday, Bush said: ''A monetary sum and words alone cannot restore lost years or erase painful memories; neither can they fully convey our nation's resolve to rectify injustice and to uphold the rights of individuals.

''We can never fully right the wrongs of the past. But we can take a clear stand for justice and recognize that serious injustices were done to Japanese-Americans during World War II.''

Following Tuesday's ceremonies, additional regional ceremonies will be held and the remaining checks for the first group of recipients will be mailed.

Those who received redress payements Tuesday:

-Mamoru Eto, 107, Los Angeles.
-Hau Dairiki, 102, Sacramento, Calif.
-Kisa Iseri, 102, Ontario, Ore.
-Hisano Fujimoto, 101, Lombard, Ill.
-Senkichi Yuge, 101, Los Angeles.
-Sugi Kiriyama, 100, West Los Angeles.
-Sade Ide, 90, Arlington, Va.
-Don Hatsuki Shima, 86, Laurel, Md.
-Ken Yamamoto, 73, Silver Spring, Md.

-30- 4006
#90282u1448 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - A small man from New Hampshire stepped through a velvet curtain and turned to his left. He walked a few paces, gathered his black robe and sat in a high-backed leather chair. David Souter was a member of the Supreme Court.

Souter, whose quiet demeanor and infrequent but impish smile disarmed potential critics, became the 105th justice of the nation's high court after taking an official judicial oath in the ornate chamber Tuesday.

It was his second oath-taking in as many days. On Monday, Chief Justice William Rehnquist had administered the constitutional oath required of all federal employees to Souter, 51, in the East Room of the White House.

Tuesday morning, Rehnquist administered the second oath to Souter inside the marble-columned courtroom on Capitol Hill where he will sit at the dark mahogany bench to hear oral arguments with his eight colleagues.

Among those witnessing both ceremonies was former Justice William Brennan, 84, a leading liberal on the court for 34 years whose retirement opened the door for Souter's nomination.

Others watching Tuesday's 10-minute swearing-in were former Justice Lewis Powell, Attorney General Dick Thornburgh, former Attorney General Edwin Meese and Sen. Joseph Biden, D-Del., chairman of the Senate Judiciary Committee, which endorsed President Bush's nomination of Souter after three days of questioning.

Biden and Souter shook hands in court moments before the ceremony began.

After the swearing-in, Souter took his seat to Rehnquist's far left - the traditional seat for the junior justice - and ''the Chief'' wished him a ''long and happy'' tenure on the court.

While posing for photographers after the ceremony, Souter, wearing a gray pinstriped suit, said he read legal papers over the weekend in preparation for

this week's cases.

''I got to work on time this morning,'' joked Souter. ''I'm starting off on the right foot.''

Less than an hour later, the public work began in earnest, with the justices emerging from their robing room and moving to their seats at the bench to begin the day's round of oral arguments.

Souter, a bachelor known as a keen legal scholar, had his attention tested on his first day. While most Americans think of the court in terms of abortion or civil rights or crime, Souter's maiden case involved securities law - one of those arcane, complicated matters the justices wrestle with most of the time.

A former New Hampshire attorney general and member of that state's supreme court, Souter had moved up to the federal bench in April of this year, becoming a member of the 1st U.S. Circuit Court of Appeals based in Boston.

Bush selected Souter as his first nominee for the Supreme Court just three days after Brennan's retirement in late July. The Senate confirmed him by a 90-9 vote on Oct. 2 - too late for him to be present for the Oct. 1 opening of the court's term.

#90282u1460 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - U.S. consumer borrowing increased only $2.09 billion in August at an annual growth rate of 3.4 percent following a $4.73 billion gain in July, the Federal Reserve said Tuesday.

''The slower growth in August reflected a larger decline in auto loans outstanding and a smaller expansion of revolving credit than in July,'' the Fed said in its monthly report.

''Mobile home loans ... grew more rapidly in August,'' the Fed added.

But the $2.09 billion increase in consumer credit was a better showing than expected by private economists, who anticipated a gain of $1.5 billion in borrowing during the month.

#90282u1464 10/09/1990 ~United Press International

BONN (OCT. 9) UPI - German and Soviet officials signed an agreement Tuesday under which Germany will pay $7.6 billion toward the cost of withdrawing Soviet troops from former East Germany and resettling them.

German Finance Minister Theo Waigel and Soviet Ambassador to Bonn Vladislav

Petrovich signed the bilateral document.

The agreement was reached last month after tough negotiations, which were also linked to the conclusion of a treaty settling the external aspects of German unification by the two Germanys, France, Britain, the Soviet Union and the United States.

The World War II allies agreed in the treaty to suspend the occupational rights they retained over Germany since the end of war, enabling Germany to regain full sovereignty upon its Oct. 3 unification.

The treaty calls for the withdrawal withing four years of the 380,000 Soviet troops stationed in what used to be East Germany.

In the agreement reached last month, and signed in Bonn Tuesday, Germany agreed to pay $7.6 billion toward the cost of withdrawing and resettling the troops.

The largest chunk of the German funding will be used to build 36,000 apartments in the Soviet Union for the returning soldiers. In addition, $650 million will go toward transportation costs and $2 billion will be used toward the stationing costs while the soldiers are still in eastern Germany.

The agreement also includes a $2 billion loan which will carry no interest for five years. The Bonn government will pay the interest, which will amount to an estimated $650 million.

#90282u1476 10/09/1990 ~United Press International
JERUSALEM (OCT. 9) UPI - Prime Minister Yitzhak Shamir accused Palestinian leaders Tuesday of exploiting the deaths of 21 Moslems for their ''malicious purposes'' and vowed violence would not alter Israeli policy.

''The rioters paid a high price in human life, but this is exactly what their leaders and activists are striving for,'' Shamir said during the dedication of a religious center in the Israel-occupied West Bank.

''Among them, there is no value for human life and it is not important if one is speaking about a Jew or an Arab, because in their evil, they think that the blood serves their malicious purposes - the upsetting of the quiet and the sowing of destruction and ruin,'' he said. ''We will not allow them this.''

Security forces were on alert throughout Israel and the occupied territories Tuesday as thousands of Arabs quietly mourned the killing of 21 Moslems by police during Monday's riots on the Temple Mount.

Isolated incidents of rock-throwing and tire-burning were reported in Israel, but the occupied West Bank and Gaza Strip were relatively quiet, military and Palestinians sources said. Three Gaza Arabs were injured in clashes.

In the village of Um Tuba south of Jerusalem, two paramilitary Border Policemen were lightly injured in a knife attack by Palestinians, a police spokesman said.

The entire Gaza Strip and most West Bank towns and all refugee camps were under curfew, and several Arab neighborhoods in Jerusalem were declared closed following disturbances Tuesday, a police spokesman said.

Arabs in Israel and the occupied territories observed a general strike to protest the killings, which they described as a massacre and one Hebrew newspaper called ''unprecedented bloody events.'' The underground leadership of the Palestinian uprising called for increased attacks on soldiers following the Temple Mount violence.

Shamir said Palestinians would not achieve anything through violence because ''we are here and we will stay here.''

''We will establish and create our presence in all parts of the country,'' Shamir said. ''This is our country. This is our land and no force in the world will change this eternal fact.''

Both the European Community and China condemned the Monday killings.

Between 40 and 50 Arabs were arrested Tuesday for questioning about the riots, Palestinian sources said. The police have launched an internal investigation into the violence and the police response, which some Israeli politicians called a major ''foul-up.''

Israeli authorities kept the gates to the Temple Mount closed most of Tuesday preventing worshipers and funeral processions from entering. In the early evening, police reopened the Temple Mount and returned to Moslem leaders the keys to seven gates of the area. Authorities kept the key to the Maghrebi Gate which they have held since 1967.

The Supreme Moslem Council denounced Monday's killings and the closing of the holy place and called on Moslems in Arab countries to stop work at noon Wednesday in protest.

During a protest outside one gate, the 80-year-old Mufti of Jerusalem, Saad Adin Alami, the senior Islamic leader in the holy city, was knocked down and overcome by tear gas. He was taken to Mokassed Hospital, where he was expected to remain for a few days.

Fifty-five Moslems held a sit-in at the Islamic Trust, or Waqf, offices, which ovesees Moslem holy sites, until the Temple Mount was reopened.

Earlier the Mufti appealed for help in telegrams to Egyptian President Hosni Mubarak, Iraqi President Saddam Hussein and Saudi King Fahd declaring the keys of the Temple Mount had been taken and the courtyard desecrated.

Israeli officials expressed sorrow at the high number of casualties, but said the demonstration on the Temple Mount was a premeditated effort to shift world attention from the gulf crisis to the Palestinian cause. During the riots, the Moslems threw stones at Jewish worshipers at the nearby Western Wall, lightly injuring about 20 Israelis.

During a city council session, Jerusalem Mayor Teddy Kollek denounced the attack on the Jewish worshipers, but said he opposed a change in the status quo of the holy sites. After Israel captured the Christian and Islamic sites, its leaders vowed to guarantee freedom of access to the mosques and churches.

Left-wing and ultra-Orthodox council members accused the police of serious negligence. The senior officers also accused the police command of insensitivity and charged there had been a major breakdown in all levels of intelligence as well as operational deficiencies during the suppression of Monday's riot, the daily Hebrew newspaper Ha'aretz reported.

MOSCOW (OCT. 9) UPI - A state-owned auto plant rejected an order from the Russian republic for armored limousines for Boris Yeltsin and the Russian prime minister, an official said Tuesday.

Russia's Vice President Ruslan Khasbulatov told the republic's Parliament the order for four limousines was rejected by the Gorky automotive works and the Soviet automobile industry minister because KGB permission had not been granted for building the cars.

Yeltsin, the populist who is effective president of the Russian republic as chairman of its Parliament, had previously rejected the idea of riding in a special limousine but the republic ordered the cars for him and Premier Ivan Silayev after Yeltsin was injured in a traffic accident Sept. 21.

#90282u1483 10/09/1990 ~United Press International

AUSTIN, TX (OCT. 9) UPI - Republican multimillionaire Clayton Williams has spent almost $16 million in his quest to become the next Texas governor, according to campaign finance reports filed Tuesday.

The $16 million figure breaks the previous $12 million record expenditure by Gov. Bill Clements in his unsuccessful 1982 re-election bid against Democrat Mark White.

Reports filed with the secretary of state show Williams raised $3.5 million and spent $4.7 million in the latest period covering July 1 to Sept. 27.

Democrat Ann Richards, who had raised a total of about $7 million through the previous reporting period, was expected to file her new report later in the day.

The new Williams figures bring to $16.7 million the total raised by the Midland oil man, banker and rancher since entering the governor's race last year.

He has spent a total $15.8 million, including more than $6 million of his own money pumped into the campaign before he swept the GOP primary in March.

The Williams campaign said he has not contributed any of his own funds since then, although the figures do include some $261,000 for the use of his private

aircraft.

Williams reported 14,363 contributions in the latest reporting period, pushing his donor file list to 28,972 names.

''We are obviously pleased with the number of contributors Clayton is attracting,'' said his campaign manager, Buddy Barfield. ''We anticipate raising $1.5 million on Oct. 15 during a lunch with President Bush, which will obviously generate excitement and help us maintain the strong financial support Clayton is receiving throughout the state.''

#90282u1515 10/09/1990 ~United Press International

MANILA, PHILIPPINES (OCT. 9) UPI - Congress, moving swiftly on President Corazon Aquino's instructions after an uprising was crushed last week, approved a bill Tuesday increasing penalties for rebellion and making coup d'etat a crime.

The bill raises the maximum penalty for rebellion 12 years to life imprisonment and makes it a non-bailable offense. It also recognizes a coup attempt as a crime with a penalty of life in jail, defining it as a violent power grab by military or state personnel.

Approved earlier Tuesday by a joint conference committee, which reconciled differences in the versions of the Senate and the House of Representatives, the bill later in the evening was passed by the two chambers.

Aquino had certified the urgent approval of the bill in December after she put down a sixth coup attempt since she took power in 1986. After crushing a two-day rebellion last week by a secession-minded army Col. Alexander Noble, in the southern island of Mindanao, Aquino prodded Congress to pass the measure immediately.

Speaker Antonio Cuenco said the ''anti-coup bill'' was ''not enough,'' acknowledging the government must address deep-seated grievances in the 150,000 armed forces.

''But I am sure it will contribute to deter coup plotters,'' said Cuenco.

Opposition Senator Juan Ponce Enrile said rebellion under the leadership of the late 20-year ruler Ferdinand Marcos was punishable by death.

''It did not deter us from mounting a capital offense. Happily, we succeeded '' said Enrile, who co-led the 1986 revolt that forced Marcos into exile in Hawaii, where he died on Sept. 18, 1989.

Aquino rescinded the tough Marcos decrees on rebellion after she took power to fulfill a campaign pledge. But after a series of uprisings against Aquino, Defense Secretary Fidel Ramos urged the reimposition of stiff penalties for the crime.

Enrile, who was sacked as defense minister by Aquino in November 1986 after his aides were implicated in a coup attempt, is facing rebellion charges in connection with the December uprising in which 119 people were killed and more than 500 wounded.

Also on Tuesday Aquino said she had ordered armed forces chief Gen. Renato de Villa to ''review the entire command structure in Mindanao with a view to strengthening its effectiveness in the discharge of its role to protect our people and our democracy.''

But Senator Ernesto Maceda, in a radio interview Tuesday, proposed a top-to-bottom revamp of the armed forces, pointing out the ease with which Noble seized the two garrisons in Mindanao, 500 milessouth of Manila, without firing a shot.

''The events (in Mindanao) have confirmed what we have been saying long ago that reforms are being demanded by the lower ranks which are not happening,'' said Maceda, chairman of the Senate defense committee.

After taking over the garrisons in Butuan and Cagayan de Oro cities on Thursday, Noble declared Mindanao an independent federal republic. But Noble, a former deputy chief of Aquino's security group, surrendered two days later after the support he expected did not materialize.

#90282u1532 10/09/1990 ~United Press International

HOLLYWOOD (OCT. 9) UPI - Moviegoers, clearly impressed with the slate of films this fall, have spent $3.76 billion at the box office so far this year, less than 2 percent behind last year's pace, which hit $3.82 billion at the same juncture.

The final domestic box-office tally for this year could reach $4.9 billion, off about 3 percent from last year's record $5.03 billion gross, Daily Variety reported Tuesday.

At this point in 1988, ticket sales had reached $3.39 billion.

With Steven Seagal's latest action movie ''Marked for Death'' leading the way, last weekend's ticket sales reached $65.5 million, up from the $61.3 million taken in for the same week last year. In 1988, the weekly total was $51.3 million.

Twentieth Century Fox's ''Marked for Death'' took in an impressive $10.5 million during its three-day debut, the second largest fall opening ever after Columbia's ''Look Who's Talking'' opened last October with $12.1 million.

A top Fox executive, Tom Sherak, said he expects the movie will continue to perform well for the rest of the year, since it comes at a time when there are currently few other male-oriented action films.

''We thought that there are a lot of upscale-type movies now, so that

action-adventure audience is hungry for a new one,'' Sherak said. ''In the summer, there may have been too many.''

Carolco's ''Total Recall,'' with Arnold Schwarzenegger, and Fox's ''Die Hard 2 '' with Bruce Willis, were the top action-adventure movies during the summer, with grosses having reached $118.1 million and $113.6 million, repectively.

''Marked for Death'' also represents a boost for Seagal, whose previous two films performed far above expectations. Sherak said that Seagal may become as popular as Schwarzenegger.

''We did some research and found that you don't have to be a man to like Steven Seagal,'' Sherak said. ''Young women love him. There's a realism he brings to the screen that's very watchable.''

''Marked for Death'' also represents another hit for Fox under the stewardship of studio head Joe Roth, who took over the post a little more than a year ago. The studio's ''Pacific Heights'' thriller has also performed well in 10 days of release, with a $14 million gross so far.

But the year's biggest money-maker will be Paramount's ''Ghost,'' which has taken in $161.5 million in 13 weeks and trails only Disney's ''Pretty Woman,'' which has grossed nearly $175 million since it was released eight months ago.

New Line's ''Teenage Mutant Ninja Turtles'' is in third place with $133.1 million after 27 weeks, and Paramount's ''Hunt for Red October'' is in fourth with $120.7 million after 32 weeks.

WASHINGTON (OCT. 9) UPI - The Marine Corps has declared Marine Lt. Col. William Richard Higgins, taken hostage in Lebanon, to be dead and will hold a memorial service Nov. 8 at Quantico, Va., officials said Tuesday.

Higgins, 44, who was kidnapped in southern Lebanon in February 1987, had been officially listed as missing, but Gen. A.M. Gray, Marine Corps commandant, changed his status to dead in a July 6 hearing on the case, the Pentagon disclosed.

The hearing came nearly a year after Moslem kidnappers released a 37- second videotape showing a hooded man whom they said was Higgins hanging by the neck from a rope.

A pro-Iranian Shiite group calling itself the Organization of the Oppressed on Earth said they killed Higgins on July 31, 1989, when a deadline passed for Israel to release Sheikh Abdul Karim Obeid, a Moslem cleric kidnapped by Israeli commandos in southern Lebanon two days earlier.

FBI analysts who studied the videotape last year said it was not a fake and that the man in the picture was dead. The FBI also said there was ''a high probability'' that the body was that of Higgins.

The body was never returned despite an appeal by Higgins's wife, Marine Maj. Robin Higgins, who formerly worked as a spokeswoman in the Pentagon, that the kidnappers turn her husband's remains over to authorities.

The Pentagon said Tuesday that memorial services for Higgins are scheduled for 11 a.m. Thursday, Nov. 8, at Quantico National Cemetery in Quantico, Va., site of a Marine base.

Higgins, the head of a 75-member U.N. peacekeeping force in Lebanon, was kidnapped while driving on the coastal road south of the port city of Tyre, 46 miles south of Beirut, on Feb. 17, 1987.

Six Americans remain hostage in Lebanon: Terry Anderson, Thomas Sutherland, Joseph J. Cicippio, Edward A. Tracy, Alann Steen and Jesse J. Turner.

(OCT. 9) UPI - President Bush says he's open-minded to negotiations and might be ready to raise some tax rates for the rich if it accompanies a capital gains tax cut. Bush spoke to reporters after signing a stop-gap spending bill to keep the federal government running. The bill was passed hours earlier by a battle-weary Congress, which now must draft a new budget deal in 10 days.

Iraqi President Saddam Hussein is warning Israel to get out of occupied Arab lands or risk war. The statement read on Baghdad Radio comes one day after Israeli soldiers shot at least 21 Arabs to death in Jerusalem. Arab diplomats say Saddam's statement is an attempt to refocus world opinion from his occupation of Kuwait to the Arab-Israeli conflict.

The orbiting Discovery astronauts are packing up their gear in preparation for tomorrow's fiery glide back to Earth. If all goes well, Discovery and its five-member crew will touch down at dawn at California's Edwards Air Force Base to close out a near-perfect mission highlighted by the successful launch of the Ulysses solar probe.

A solemn ceremony was held at the United Nations today to remember John Lennon

on what would have been the former Beatle's 50th birthday. A tearful Yoko Ono urged fans of her slain husband to keep the power of dreams and love alive. Millions around the world tuned in today as the haunting words of Lennon's ''Imagine'' were played in a world-wide radio broadcast.

CHICAGO (OCT. 9) UPI - Tuesday's truck and rail bids for grain delivered to Chicago, including delivery time, price and change from previous business day:

No. 2 soft wheat: up to 30 days, 2.63-2.68 3/4 up 5.

No. 1 yellow soybeans: up to 15 days, 6.26 1/4- 6.34 1/4 up 1/4.

Terminal elevator bids: No. 2 yellow corn, up to 15 days, 2.22 1/4-2.34 1/4 up 1/4.

Processor bids: No. 2 yellow corn, up to 15 days, 2.31 1/4-2.39 1/4 off 4 to up 1/4.

#90282u1574 10/09/1990 ~United Press International
WASHINGTON (OCT. 9) UPI - An old issue - the status of Jerusalem - arose anew Tuesday, threatening to further disrupt U.S.-Israeli relations at a time when other differences are already straining them.

The disagreement became evident in statements by the two governments over the terms of a $400 million housing loan guarantee the United States agreed to give Israel last week after more than a month of secret negotiations.

As described by Secretary of State James Baker last week at a New York news conference, the money would go for housing for the recent flood of immigrants from the Soviet Union, expected to reach 120,000 this year alone. But Baker said the money will be contingent on the Israeli assurance ''that immigrants will not be settled beyond the Green Line.''

The Green Line is the political boundary that marked the border of Israel before the 1967 Six-Day War. At that time, the West Bank, Gaza, and Arab East Jerusalem were outside the Green Line.

Since the war, Israel has officially annexed the Old City of Jerusalem and about 26,000 surrounding acres, but the annexation is not recognized by any other country, including the United States.

Baker said the housing agreement also provided assurances by Israel the money would not be spent in the occupied territories.

The Baker statement meant that none of the new settlements would be placed in East Jerusalem, but within 24 hours, Prime Minister Yitzhak Shamir announced that Israel would build new housing in East Jerusalem for the immigrants.

According to administration officials, Baker last weekend called his top aide on Middle East issues, Dennis Ross, and asked him to get a clarification and, if necessary, inform the Israeli government the United States would publish the full text of the agreement reached last week. Ross had negotiated the text with Israeli Foreign Minister David Levy.

Ross, according to an administration official, was unable to reach Levy or any of his deputies over the weekend, but State Department spokeswoman Margaret Tutwiler said the Israeli government will be informed, as a matter of courtesy that the letter is to be made public as soon as possible, probably Wednesday.

She told reporters, ''You can then judge for yourself.''

Congress has already approved the $400 million, but the administration can hold the money back until it is satisfied the money will not be used to strengthen Israel's hold on East Jerusalem or the occupied territories of the West Bank and Gaza.

Administration officials said the agreement includes two elements that have never been part of an accord with Israel.

For the first time, officials of the Agency for International Development, which will monitor the agreement, will audit the expenditure of the money. In the past, the Israeli government was simply given a check for U.S. economic aid - currently running $1.2 billion annually - and no accounting was given by the Israelis or requested by the United States.

Also for the first time, Israel has accepted some limits on its policy of expanding settlement activity in the occupied territories.

The disagreement came the day after Baker had indirectly criticized Israeli security forces for inadequate preparation in dealing with the distubances in Jerusalem that left more than 20 Moslems dead.

The Israeli government also was nervous about a line in President Bush's speech to the United Nations General Assembly last week that suggested the Persian Gulf crisis over Iraq's invasion of Kuwait might be used as a means of moving to settle the overall Arab-Israeli dispute.

The Israeli government has objected to any linkage between the two issues.

Bush later told reporters they had made too much of his mention of the Arab-Israeli issue in his speech.

#90282u1588 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - The new budget agreement, which calls for a 24 percent cut in agriculture spending through 1995, could lead to sharp changes in the decades-old farm program, Capitol Hill observers said Tuesday.

One economist said the agreement could spur adoption of the so-called triple base plan, a relatively new concept that would make some cropland ineligible for government payments while allowing farmers to grow crops on it.

Other money-saving options available to congressmen charged with revising the program include reductions in target prices; larger land set-asides; cuts in support programs, such as dairy, sugar and peanuts, that do not rely on target prices; ''targeting'' benefits to family-size operations, and raising loan rates.

The budget package given final congressional approval early Tuesday calls for $1 billion in savings in agriculture spending in fiscal 1991 and about $13.5 billion in savings through fiscal 1995.

Overall, the reductions would be slightly larger than an ill-fated package offered last week, but the House and Senate Agriculture committees would need to make a smaller cut this fiscal year - $1 billion vs. $1.3 billion in the rejected plan.

''The triple base concept will easily find that amount, but I want to stress again, nobody's going to be very happy,'' said the economist, who asked not to be identified.

One estimate last week said a 15 percent triple base, along with a small reduction in target prices, would save $1 billion right away and $12 billion over five years. The size of the cuts could be reduced, the economist said, if ''some amount of additional burden'' were imposed on commodities that benefit from guaranteed prices rather than subsidy payments, which are determined by the gap between market prices and the target price.

House Agriculture Committee leaders have indicated for weeks they would prefer to accomodate budget cuts through the triple base. There is little appetite in the Farm Belt for further cuts in target prices, which are down 10 percent since 1985, or lower loan rates, which have been slashed by nearly a quarter in the last five years.

Senate Agriculture Committee members have not been as forthcoming about their sentiments. One source indicated Democrats were leaning toward ''a conventional strategy,'' meaning a look at land set-asides and loan rates.

Agriculture Secretary Clayton Yeutter said the administration's preference is a combination of target price cuts and payment acres but declined to say what the mix should be.

The triple base concept has some attractive points. It would give farmers some freedom in deciding what to grow - a major point in this year's debate over farm policy - and it gives them a chance to make money that would be denied if a large land set-aside was ordered.

However, the triple base ''would reduce the income of most farmers'' because of smaller federal payments, the Congressional Budget Office says.

Some critics say the planting flexibility offered by triple base would have little value to farmers in regions where the climate allows few crop choices or there are few chances to market a new crop profitably.

#90282u1602 10/09/1990 ~United Press International

NEW YORK (OCT. 9) UPI - Composer-conductor Leonard Bernstein is virtually retiring from public life due to illness, it was announced Tuesday.

Bernstein has been advised by his physician, Dr. Kevin M. Cahill, to give up conducting and performing at the piano because these activities are too strenuous for his present physical stamina, according his spokeswoman Margaret Carson.

The announcement said Bernstein has been experiencing ''increased difficulty in breathing'' in the past few weeks due to progressive emphysema complicated by a plural tumor and a series of pulmonary infections.

It said Cahill had prescribed a continued regime of rest and recuperation as the best hope for Bernstein to return to a ''limited'' schedule of activity.

Bernstein was known as a heavy smoker for many years.

''As soon as his health allows, Maestro Bernstein will continue his work on a new chamber music piece to be performed next spring, a new musical theater piece he hopes to complete by next summer, several educational projects, several film and recording projects, as well as his memoirs,'' Carson said.

''In addition, he hopes to be well enough to participate in the Oct. 28 Carnegie Hall concert, 'Music for Life,' an AIDS benefit.''

The announcement said Bernstein's condition requires that he withdraw from scheduled appearances with the New York, Israel and Vienna philhamonics, and the London Symphony.

In addition he has canceled appearances next season at three music festivals - Tanglewood in Massachusetts, Schleswig-Holstein in Bermany, and the Pacific Music Festival in Japan.

HAWTHORNE, Calif. (OCT. 9) UPI - Conglomerate Teledyne Inc. said Tuesday that agents of the Federal Bureau of Investigation raided the company's relay division plant last week and seized an unspecified number of documents from the facility.

Teledyne spokesman Berkeley Baker said he could not comment on the matter, other than to say that the company was cooperating with the investigation. He refused to comment on the nature of the documents that were seized.

The plant, located in the Southern California beach city of Torrance, makes electrical relays used in military, space and industrial applications. The facility employs about 600 workers.

The FBI was not available for comment.

#90282u1662 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - President Bush, with unusual terminology, raised ''the Palestine question'' Tuesday in referring to a solution to the Arab-Israeli problem.

As a political entity, Palestine ceased to exist when the United Nations partitioned the British-mandated territory into Jewish and Arab states in November 1947.

Arab states neighboring Palestine rejected the partition plan when the Jewish sector of the newly divided land proclaimed itself an independent Israel May 14, 1948. Most of them went to war against Israel, which over two years of conflict won more territory than it would have received under the partition plan.

But Palestine as a concept is very much alive in the aspirations of Palestinians and their supporters in the Arab world, Israel and elsewhere who seek to carve out a new state in a land ripped apart and overrun by violence since man put history in writing.

At a White House news conference, Bush referred no fewer than three times to ''the Palestine question'' when replying to questions about an apparent attempt by Iraqi President Saddam Hussein to resolve the Persian Gulf crisis by linking it to a resolution of the decades-old Arab-Israeli dispute.

The deputy White House spokesman, Roman Popadiuk, said Bush's thrice- repeated phrase signaled ''no change in policy'' geared to the United States acting as an ''honest broker'' between Israel and the Arab states - chiefly Egypt - in seeking a resolution of the Palestinian issue.

At the State Department, spokeswoman Margaret Tutwiler said she saw nothing ''intentional'' in Bush's terminology.

The deputy spokesman for the Palestine Affairs Center, Khalil Futah, didn't know what to make of it.

''It is unusual,'' he said of Bush's term. ''It's the first time we hear it from a senior official, the top official (of the United States). But we're not going to read between the lines.''

Bush created a minor stir during his U.N. speech Oct. 1 when he appeared to make a vague link between settling the gulf and Arab-Israeli crises. He quickly denied any such intent.

The president's meeting with reporters Tuesday came less than 24 hours after Israeli authorities killed at least 21 Palestinians in the most violent eruption of violence in Israeli-annexed East Jersualem since the Arab sector of the city was seized from Jordan in the 1967 Middle East War.

Saddam apparently grabbed the opportunity to try to rally the Arab world against its longtime foe, Israel, and again link U.N. demands for Iraq's withdrawal from Kuwait to U.N. resolutions in 1967 and 1973 calling on Israel to pull out from Arab territories captured in the six- day 1967 conflict.

Bush would have none of it, saying that Saddam was ''trying to link the Palestine question in his - kind of giving justification for what he did against Kuwait. And yet the logic falls totally flat.''

Nevertheless, Bush's ''Palestine question'' phraseology was highly unusual, particularly in public and chiefly for a president, since U.S. policy generally refers to the ''Palestinian issue.''

The ''Palestinian issue'' is accepted shorthand for the layers of difficulties dealing with efforts since 1979 to negotiate autonomy for the 1.2 million Palestinians in the Israeli-occupied west bank of the Jordan River and the Gaza Strip.

#90282u1678 10/09/1990 ~United Press International
BOSTON (OCT. 9) UPI - Air Force veterans exposed to the herbicide Agent Orange during the Vietnam War suffered no apparent health problems as a result two summaries of previously published data said Tuesday.

The reports by Air Force researchers were based on a 20-year review of the health and mortality rates of 1,261 veterans of Operation Ranch Hand, the unit responsible for aerial spraying of herbicides in Vietnam.

The conclusion that Agent Orange did not pose a health risk drew fire from critics, and also seemed at odds with a recent government decision to pay $8 million a year to Vietnam veterans suffering from certain cancers that they claimed resulted from the herbicide.

Sen. Thomas Daschle, D-S.D., co-sponsor of an Agent Orange compensation bill for veterans, called the studies appearing in the Journal of the American

Medical Association ''merely a rehash of old Air Force reports that the Air Force scientists themselves have acknowleged are inadequate.''

Daschel said they ''only serve as a reminder of the Air Force's sustained, calculated effort to mislead the public on the Agent Orange issue.''

Dr. William Wolfe, an Air Force colonel and co-author of the research, acknowleged his team is now re-analyzing the data to address some of Daschle's concerns. But he denied there had been any attempted deception.

''The Air Force does not tell me what to do when it concerns my area of expertise,'' he said.

From January 1965 to April 1970, the Air Force sprayed Agent Orange, which contained the toxic contaminant dioxin, on the Vietnamese countryside to destroy enemy ground cover and crops.

During the past 15 years, 36,000 Vietnam veterans have filed compensation claims, saying the herbicide caused medical problems ranging from cancer to birth defects in their offspring.

The federal Centers for Disease Control's study of possible Agent Orange health effects was halted in 1987 when health officials said military records had insufficient information to draw any conclusions.

The Air Force studies, initially released in February, compared Operation Ranch Hand veterans to other Vietnam veterans who also worked for at least one year flying or loading transport planes, but were not exposed to herbicides.

In one study, Wolfe's team compared overall death rates and deaths from cancer circulatory disorders and accidents of the Ranch Hand group and 19,101 other Air Force veterans involved in cargo missions.

The researchers said they found no significant differences between the two groups in any of the four categories.

The second study compared the health of 995 members of the Ranch Hand group and 1,299 members of a comparison group who underwent medical examins in 1982, 1985 and 1987. Researchers said the two groups were similar in reported health problems, except for a slightly higher rate of a common and generally non-life threatening skin cancer.

Because the skin cancers were spread among the Ranch Hands without regard to their degree of Agent Orange exposure, the researchers said it is not thought they are linked to the herbicide.

WASHINGTON (OCT. 9) UPI - Matthew Maxwell Taylor Kennedy, son of Ethel and Robert Kennedy, will marry Victoria Anne Strauss in July, it was announced Tuesday.

Strauss, a first-year student at the University of Virginia Law School, is the daughter of Bonnie Strauss Gould of Los Angeles and Benjamin Strauss of Haverford, Pa.

Kennedy, the ninth of 11 children of the Kennedys, is a second-year student at the Virginia Law School.

They plan a July wedding in Philadelphia.

(OCT. 9) UPI - Iraqi President Saddam Hussein, saying his forces are armed with a new missile capable of striking ''evil targets'' hundreds of miles away warned Israel Tuesday to evacuate occupied Arab lands or face quick vengeance for the slayings of Palestinians in Jerusalem.

Shortly before the statement, a senior Palestinian guerilla leader said Saddam wants the Persian Gulf crisis resolved peacefully, provided the world links the solution to Israel's withdrawal from occupied Palestinian lands.

In Washington, State Department spokeswoman Margaret Tutwiler said that a U.S.-chartered 747 will leave Wednesday for Basra, Iraq, to pick up an estimated 400 American citizens and their foreign-born family members. The plane will fly to London and then to Raleigh-Durham, N.C. on Thursday.

Baghdad Radio said Saddam's statement was read by an announcer on television and radio ''for the ears of Moslems around the world.'' It came a day after Israeli security forces killed at least 21 Arabs during rioting at a Moslem holy site in Jerusalem.

''Words or denunciations are not enough to heal the wounds of the captive Jerusalem,'' Saddam's statement said. ''What will heal the wounds is action to free (East Jerusalem) from (Israeli) captivity. ... Only quick action to revenge the Israeli massacres against the Palestinians can heal its wounds.''

Israel captured East Jerusalem in the 1967 war.

Arab diplomats called Saddam's statement an attempt to refocus world opinion from his 2-month-old occupation of Kuwait to the Arab-Israeli conflict.

''Saddam is in trouble over Kuwait ... so he is trying to exploit the Israeli

massacre of Palestinians in Jerusalem to shift world attention away from his occupation of Kuwait and onto the Arab-Israeli conflict,'' an envoy in Cairo said.

''Saddam knows he is isolated, so his threats are an attempt to win more support among Arabs and Moslems,'' the diplomat said.

President Bush insisted in Washington Tuesday that there is ''no relationship'' between the gulf crisis and the Palestinian question.

Baghdad Radio also quoted Saddam as saying Iraq had developed a new rocket that could strike targets several hundred miles away. Meanwhile, world oil prices soared to record highs with word of Saddam's threat of retaliation on Israel and his disclosure about the rocket.

''The Al Hijara missile, which the Iraqis have manufactured with God's help, can be launched from somewhere in Iraq (and) can reach the evil targets,'' Baghdad Radio said.

In an indication Saddam was threatening a military strike against Israel, he said, ''The only thing that is good enough for Arabs now is quick and clear action to force the (Israeli) occupiers to evacuate Arab lands and holy (Islamic) shrines.''

Addressing Israel, Saddam said, ''Blood will not make you able to maintain the land of Palestine and Arab holy shrines. ... It is better for you to evacuate, leaving our land and shrines before it is too late for you.''

The Egyptian news agency MENA said thousands of Iraqis gathered in Baghdad and elsewhere Tuesday to protest the killings in Israel and the presence of the U.S.-led multinational military force deployed in the Persian Gulf area following Iraq's Aug. 2 invasion of Kuwait.

An estimated 25,000 people also gathered at the Baqa'a Palestinian refugee camp outside Amman, Jordan.

WASHINGTON (OCT. 9) UPI - U.S., British and Australian forces boarded and diverted an Iraqi tanker in the Arabian Sea that was carrying flour and rice, some of which apparently came from the United States via Jordan, the Pentagon said Tuesday.

The guided-missile destroyer USS Goldsborough, the British Royal Navy's HMS Brazen, and the Australian Royal Navy's HMAS Darwin shadowed the Iraqi tanker Tadmur and then took action in the north Arabian Sea Monday when the tanker refused to stop for inspection, the Pentagon said.

British Royal Marines slid down onto the tanker from ropes from helicopters

while U.S. Navy and Coast Guard forces used small boats to pull alongside the moving tanker and board it.

Pentagon spokesman Pete Williams said the tanker's pilot said he was headed to the Iraqi port of Basra, its home base.

The ship was diverted by the boarding party, however, when an inspection showed it to be carrying seven tons of rice and flour and 50 gallons of cooking oil, Williams said.

Later, a Pentagon spokesman said the markings on the bags of rice indicated that the rice had been grown in the United States and shipped to Jordan.

U.S. forces had intercepted the Tadmur once before, when it was approaching the Jordanian port of Aqaba. It was empty at the time and it was allowed to go on its way.

The Jordanian government has said it would abide by the U.N. sanctions against Iraq. The sanctions include all goods except food and medicine approved by the United Nations for humanitarian reasons.

The Pentagon declined to say where the U.S., British and Australian forces were taking the Tadmur.

Wiliams said there have been 2,060 interceptions of commercial vehicles in the region since the United States began enforcing U.N. sanctions against Iraq Aug. 17. Most of those were by radio contact.

There have been 218 boardings by all naval forces, and 172 of those were by the United States, he said.

ANCHORAGE, Alaska (OCT. 9) UPI - Alaska oil producers announced plans Tuesday for a $1 billion project to increase production from America's biggest crude oil reservoir at Prudhoe Bay on Alaska's arctic coast.

The project will result in a 100,000-barrel a day increase in production by 1995 - equivalent to discovering a sizeable new oil field.

The announcement comes six weeks after the oil companies - responding to requests from the Bush administration in the wake of the Iraqi invasion of Kuwait - said they would increase Alaska North Slope oil production by approximately 175,000 barrels a day by early next year.

The new plan for increased production - on top of what already was announced - comes at a time when North America's largest oil field was beginning a decline in production, mirroring the nationwide decline in crude production.

The announcement was made by British Petroleum and Arco, the two operators of the Prudhoe Bay field, and four other owners of Prudhoe Bay oil: Exxon, Phillips, Mobil and Chevron.

The $1 billion project will construct another natural gas handling plant at Prudhoe Bay. As the field ages, more gas comes up with the oil, but existing gas handling facilities already are operating at capacity.

With increased gas handling capability, the oil companies also will be able to reinject this gas into the ground, further pressurizing the reservoir and creating conditions that allow more oil to be pumped to the surface.

The August announcement of increased production was attributed partly to a gas handling plant just being completed when Iraq invaded Kuwait. That facility was designed to increase in production by 90,000 barrels a day by year's end.

But responding to Energy Department requests for even greater production, the companies said they would begin employing a drilling method known as ''fracturing'' to break apart deep oil-bearing rocks, freeing up another 50,000 barrels a day. Production also was being increased by about 25,000 barrels daily by bringing two other North Slope fields, Endicott and Kuparuk, up to capacity.

However, because the $1 billion gas handling plant construction announced Tuesday is a long-term project, it will offer no immediate relief in increasing the nation's oil supply or lowering gasoline prices.

Over the life of the Prudhoe Bay field, the gas handling project may increase recoverable oil by up to 450 million barrels.

The Prudhoe Bay field, the largest ever discovered in North America, holds about 22 billion barrels of oil, but oil companies have said they will be able to recover about half of that oil at best. By the start of this year, 6.5 billion barrels had been pumped out of Prudhoe Bay since oil began to flow down the 800-mile trans-Alaska pipeline to Valdez in 1977.

#90282u1826 10/09/1990 ~United Press International

SANTA ANA, CA (OCT. 9) UPI - A doctor testified Tuesday that a woman hired by an infertile couple as a surrogate to carry their embryo should be considered the child's natural mother, despite genetic evidence to the contrary.

Dr. Michelle Harrison, a surrogate expert, told a Superior Court judge she counseled surrogate mother Anna L. Johnson via telephone on a number of occasions before and after Johnson gave birth to the child.

Johnson, 29, is seeking custody of the boy, born Sept. 19. She was paid $10,000 to carry the child for Mark and Crispina Calvert.

Harrison, an associate of the University of Pittsburgh's Center for Medical Ethics, was the first witness to testify at Tuesday's hearing, held before Orange County Superior Court Judge Richard Parslow to determine whether Johnson or the Calverts should rear the baby.

Since his birth, the boy has been living with the Calverts while Johnson, a single mother and licensed vocational nurse, has been granted visitation rights.

At the start of the hearing Tuesday, the Calverts' attorneys submitted DNA and blood tests as evidence that the couple is ''99.99 percent'' the boy's genetic parents, the lawyer, Christian Van Deusen, said.

But when asked to define a natural mother in medical terms, Harrison testified: ''A woman who gives birth, and that includes whether or not the child is of the same genetic origins.''

Harrison, who is an unpaid consultant for the National Coalition Against Surrogacy, also counseled Mary Beth Whitehead, the surrogate mother whose legal battle to keep the child she was paid to bear led to a landmark New

Jersey court decision in the so-called Baby M case.

However, that was a case in which Whitehead, who was eventually given visitation rights to the baby, had her own egg fertilized with the sperm of William Stern.

Johnson's case is also likely to make legal history because the judge will have to decide, in effect, whether a woman who gives birth to a child unrelated to her can call herself its mother.

Johnson filed her suit seeking parental rights while still pregnant. She claims the Calverts breached their contract with her by making late payments, and failing to adequately care for and buy life insurance for her and the baby.

Under questioning by one of Johnson's attorneys, Harrison said she and Johnson ''discussed her feelings of attachment and closeness for the baby she was carrying.''

Harrison, who has written on the psychological ramifications of surrogate motherhood, said that usually surrogates are torn between their devotion to the couple they are helping to have a child and the maternal feelings they have for the child they are carrying.

In Johnson's case, Harrison testified, her maternal feelings grew stronger after she felt abandoned by the Calverts.

But Van Deusen read part of a letter that Johnson wrote to the Calverts in July in which he said the surrogate gave the couple ''an ultimatum.''

''Once the baby is born, I'm free of this deal,'' Johnson's letter said. ''This situation can go two ways. One, you pay me the final sum early so I don't have to live on the street, or two, forget about helping me out, call it a breach of contract and not get the baby.''

Van Deusen argued that Johnson decided to keep the baby, and thereby became more attached to it, after failing to get a response from the Calverts.

When the baby was born slightly premature on Sept. 19, Johnson named the boy Matthew. The Calverts named him Christopher Michael.

The hearing was expected to continue into the week.

Last month, Johnson lost the right to have daily visits with the baby after the judge ruled that tension during her visits to the Calvert's home was harmful to the infant. The judge reduced Johnson's visits to twice weekly.

MIAMI (OCT. 9) UPI - Former pilots and flight attendants from bankrupt Braniff Inc. have been recruited by the company that bought Braniff's name to staff charter flights from Miami to Central America, according to a former flight attendant, a union official and others.

The crews are being hired to operate flights under the authority of another bankrupt carrier - Emerald Air Inc. of Houston - using two Boeing 727 jets, said flight attendant Jerrie Holden and an employee of Emerald Air.

The connection between BN Air Inc., the company that bought Braniff's trademark, and Emerald Air was not clear, although a union official said he understood the same investors own both companies.

Ben Elliott, a bargaining representative at the Association of Flight Attendants, said Tuesday the new Braniff recruited 18 former Braniff pilots, and would need at least 30 flight attendants for the charter operation.

Although the AFA claims the right to represent attendants hired at the new Braniff, the union has no jurisdiction over non-union Emerald, Elliott said.

BN Air bought the Braniff trademark and other property in April for $313,000 with the intention of launching Braniff International Airlines Inc. Officials at the new Braniff did not respond to requests for comment.

The airline, based in Dallas, is seeking a certificate to operate from the Federal Aviation Administration, said O.D. Brown, manager of the FAA office at the Dallas-Fort Worth airport.

The company also is seeking to amend Emerald's certificate to allow the use of Boeing 727s, according to Brown and other FAA officials.

''There is work afoot here to add airplanes to Emerald's certificate. ... We are right in the very beginning of (that process),'' said John Fodermaier, an FAA official in San Antonio. ''They are training pilots and flight attendants right now.''

Refresher classes for flight attendants began Thursday in Texas, said Holden.

Pilot classes began earlier. ''They were calling everybody,'' said Holden. ''We were called back with an invitation to go back to work for Emerald.''

Jim Exum, a flight inspector for Emerald, said Tuesday that charter flights could begin later this month from Miami. Likely destinations include the Bahamas, El Salvador and Guatemala, although ''there is nothing in marble,'' he said.

The new Braniff - the third airline to use the Braniff name - is headed by executives from bankrupt Braniff Inc. of Orlando, Fla..

Braniff Inc., the successor to Braniff International, the Dallas airline that filed for bankruptcy in 1982, filed for Chapter 11 bankruptcy protection itself on Sept. 28, 1989. At the time, Braniff employed about 4,800 people.

BN Air was formed by Jeffrey Chodorow, a Philadelphia developer who was a vice president and major stockholder of Braniff Inc. Scot Spencer, the airline's president, served as a consultant to Braniff Inc.'s parent company.

Elliott said he understood that Chodorow and Arthur Cohen, a director of the new Braniff, had purchased Emerald, which was operating in bankruptcy.

Officials at the new Braniff previously said the company planned domestic service at Dallas-Fort Worth, Washington, New York, Los Angeles, San Francisco Las Vegas and St. Louis. The status of those plans was not known.

Braniff Inc. operated hubs in Orlando and Kansas City, Mo.

#90282u1905 10/09/1990 ~United Press International

CHICAGO (OCT. 9) UPI - Directors of UAL Corp. Tuesday unanimously rejected two scaled-down buyout proposals by United Airlines employees and terminated their merger agreement with the employee group.

A UAL spokesman said the merger agreement was terminated because the employee group - United Employee Acquisition Corp. - failed to arrange financing for the original $4.4 billion, $201-a-share buyout.

''We firmly believe that the interests of both UAL shareholders and employees would be well-served by the company aggressively moving forward with its highly successful strategic plan and taking advantage of its position of strength in a time of difficulty for the airline industry,'' the board said in a statement.

The company said the employee group presented a revised acquisition proposal but that the value, while uncertain, was considerably below the $4.4 billion offer accepted by the board last April.

UEAC said it presented two alternative proposals to the board. The employee group set the value of one at $205 a share and of the other at $203.

But both alternative proposals reduced the amount of cash to paid to stockholders.

The $205-a-share offer included just $70 in cash, and the $203-a- share proposal provided no cash at all. The $201-a-share offer accepted by UAL directors in April provided $150 a share in cash.

The board, facing potential labor problems with its three unions as a result of the buyout's failure, asked federal mediators to resume expedited mediation of new contracts for pilots and flight attendants.

Directors also said UAL is prepared to resume negotiations with the International Association of Machinists.

All three unions have been working under expired contracts while pursuing the buyout - which would have made UAL the world's largest employee-owned company. The unions - and particularly the Air Line Pilots' Association - have indicated they will seek major improvements in wages and benefits.

''Since pilots are further along in negotiations, we are offering to have any issues remaining unresolved at the conclusion of expedited mediation with ALPA resolved by a neutral and independent arbitrator,'' the board statement said.

Tha board also instructed UAL management to proceed with the company's previously announced plan for a major order of new widebody jets - a contract to be worth $10 billion to $15 billion.

UAL was prepared to award the widebody contract earlier this year but agreed to delay the order at the request of UAEC Chairman Gerald Greenwald, who hoped to use the lucrative contract as leverage in efforts to get suppliers to help finance the buyout.

UAL stock was up more than $2 at around noon Tuesday when the New York Stock Exchange halted trading in UAL in anticipation of the board's announcement. The stock reopened sharply lower and closed at $88 - down $3.25.

Directors Tuesday expressed unanimous support for UAL management and for Chairman Stephen Wolf, whom the employee group planned to replace if the buyout succeeded.

''This is a time of unique opportunity to continue to build United Airlines - to build our fleet, to build market share, to build domestic and international presence, to build jobs and job security and, fundamentally, to build real value for shareholders,'' Wolf said after Tuesday's board meeting.

The board statement said the employee buyout was doomed by current economic conditions despite extraordinary efforts by eveyone involved, but that future offers by UEAC or others would be considered.

Greenwald expressed regret at the board's decision.

''Our latest proposals - and the valuable employee concessions to finance them - will remain available briefly for consideration,'' Greebwald said.

''The three unions are working under open contracts and must now return to traditional tade union activities while continuing to pursue employee ownership,'' Greenwald said.

The UAL board accepted the $4.4 billion, $201-a-share buyout bid from UEAC April 9, giving the employee group until Aug. 9 to get financing and until Dec. 9 to complete the buyout.

The financing deadline was extended until Tuesday after Iraq's invasion of Kuwait, but the impact of soaring oil prices on the airline industry made financing unavailable at the $4.4 billion price. An attempt to put together a revised offer at $3.7 billion - also with about $150 a share in cash -

collapsed last weekend when the four lead banks withdrew support.

Analysts said it was unlikely any third party would mount a bid for UAL anytime soon.

-30- 4826

#90282u1920 10/09/1990 ~United Press International

NEW YORK (OCT. 9) UPI - Surging oil prices and interest rates combined with more saber-rattling from Iraq to drag the Dow industrials to their second-biggest loss of the year Tuesday.

The Dow Jones industrial average, which rose 13.12 Monday, plunged 78.22 to 2445.54 - a drop of over 3 percent. The selloff was even more pronounced in the over-the-counter market, where a key index hit its lowest close since January 1988.

The Dow's loss was the biggest loss of the year after a 93-point tumble on Aug. 6 and the 11th-worst day ever, after an 86-point slide Sept. 11, 1986.

Analysts said a late bout of computerized program selling exacerbated the fall - despite a triggering of the exchange's rule curbing program selling when the Dow falls more than 50 points. They said investors were lured to buy relatively underpriced stock-index futures, prompting the sale of the underlying issues.

Among broad market gauges, the New York Stock Exchange composite index sank 4.24 to 167.41 and Standard & Poor's 500-stock index plunged 8.38 to 305.10. The price of an average share tumbled 74 cents.

Declines pummeled advances 1,308-289 among the 1,979 issues crossing the NYSE tape. Volume was 145,610,000 shares, up from 99,470,000 traded Monday.

Stocks fell steadily from the opening bell, taking their cue from declines in the London and Tokyo markets. But analysts agreed the New York market's downfall Tuesday was sparked by a surge in oil prices spurred by renewed threats from Iraqi leader Saddam Hussein. His remarks also served to spark asharp rise in interest rates and a resulting selloff in the bond market.

Saddam, saying his forces are armed with a new missile capable of striking ''evil targets'' hundreds of miles away, warned Israel Tuesday to evacuate occupied Arab lands or face retaliation for the slayings of Palestinians in Jerusalem. The news sent the benchmark U.S. crude soaring to a record high of $40.40 a barrel, up $1.45 on the day.

Since oil prices are an indicator of inflation, the record prices for crude sent bond prices tumbling 1 23/32 points and pushed interest rates on them bakc up to near 9 percent, again making Treasury bonds a very attractive

alternative to stocks, analysts said.

''This has refocused the financial markets on the Mideast from the budget follies,'' said Hugh Johnson, chief economist at First Albany Corp. in Albany, N.Y. ''The decline in bonds was particularly acute. They weren't in a free fall but looked close to it.''

Johnson said the combination of concerns about the Mideast and declines in bonds was just too much for stocks to manage, especially after an attemptedrally Monday sputtered.

''It looked yesterday like we had the conditions to rally, but the failure of the rally yesterday was really demoralizing,'' he said. ''Investors thought this (the recent rise in the market) was a tradeable rally but now they've moved to the sidelines. The light volume shows a move into things like cash and bonds.''

Days like Tuesday only serve to solidify what Johnson called investors' ''disenchantment with the market. It's becoming tougher with every day to interest investors in the market. Nobody wants to touch it, it's like a hot potato and it's hard to see what could turn it.''

On the trading floor, Motorola was the most active issue, plunging 7 to 52 3/4 after reporting third-quarter earnings sharply below analysts' estimates.

Travelers followed, down 1 3/8 to 13, on persistent worries about the company's finances. The insurance company unveiled a plan Monday designed to preserve its capital and shore up its real estate portfolio.

Philip Morris was third, down 1 7/8 to 45 5/8.

Among other blue chips, AT&T lost 3/4 to 31 7/8 and IBM plunged 4 1/8 to 105 3/8 after reports saying the company doesn't plan to introduce a new laptop computer until next year.

In addition, General Electric sank 1 5/8 to 52 7/8 and Eastman Kodak tumbled to a 52-week low, down 2 3/4 to 35 1/4. Merck skidded 3 1/4 to 75 1/8, Sears slumped 1 1/4 to 24 1/4, General Motors sank 2 to 35 5/8 and Coca-Cola gave up 1 3/4 to 41.

Kidder, Peabody was said to cut earnings estimates for Sears, citing higher casualty losses at its Allstate unit.

Elsewhere, UAL closed down 3 1/4 to 88 after a trading halt at midday, when the company announced that directors had unanimously rejected a scaled-down buyout bid by United Airlines employees and terminated their merger agreement with the employee group. The board did say, though, future offers by the employees or others would be considered.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 175,997,170 shares, compared with 123,622,700 shares traded Monday.

Prices were sharply lower in moderate trading on the American Stock Exchange.

The Amex Market Value index sank 3.46 to 303.05. Declines led advances 401-158 among the 770 issues traded. The price of an average share lost 11 cents. Composite volume was 13,543,900 shares vs. 9,764, 200 traded Monday.

OMI Corp. led the Amex issues, off 1/8 to 5 7/8.

The National Association of Securities Dealers composite index slid 9.03 to 339.11, its lowest level since January 1988.

-30- 5523

#90282u1924 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - Saudi Foreign Minister Saud Al-Faiaal met with President Bush Tuesday and said they both deplored the killing of 21 Moslems in Jerusalem.

Wearing the traditional Arab robes, Saud, who conferred with Bush for 30 minutes in the Oval Office, told reporters afterward, ''We reviewed the situation in the (Persian) gulf and the deplorable incident that happened in in Jerusalem.

''I can say that both our countries deplored this incident and also that this increases our resolve to work together and cooperate in finalizing and ending the crisis in the gulf so that the international community can turn and both our countries can turn to the issues of peace and stability in the Middle East and by that I mean resolving the Palestinian question,'' he declared.

During a picture taking session, Saud said the gulf problem can be settled diplomatically if Iraq withdraws from Kuwait and the legitimacy of that government is restored.

After the Arab leader departed, White House press secretary Marlin Fitzwater said in a written statement that Bush asked Saud to convey to King Fahd U.S. assurances of ''continued commitment to ending Iraq's occupation of Kuwait and the restoration of the legitimate government of Kuwait.''

In turn, Fitzwater conveyed Saudi Arabia's pleasure with the support it has received from the United States and the international community in opposing Iraqi aggression.

He said both Bush and Saud agreed ''on the importance of economic sanctions as

a means of achieving a peaceful solution of the crisis.''

''They also shared their concern over Iraq's brutal behavior against Kuwait and the Kuwaiti people,'' he added.

-30- 1873

#90282u1950 10/09/1990 ~United Press International

NEW YORK (OCT. 9) UPI - The dollar moved mostly lower in New York trading Tuesday in an increasingly bearish atmosphere created by the inability of the White House and Congress to move decisively on budgetary reforms.

Foreign-exchange traders said the market also was roiled by volatile dealings in the British pound, which was still trying to find its own level following the currency's entry Monday into the European exchange rate grid.

One dealer called the dollar's fall a ''psychological response to the fact that the (Bush) administration is losing prestige'' because of its inability to bring a deficit-reduction package intact through Congress.

''It's not even a wait-and-see attitude right now,'' the trader said, referring to deep market scepticism about the budget situation in Washington.

Late in the New York session, the dollar traded at 1.5230 German marks, down from 1.5320 Monday, setting yet another in a series of new postwar lows. The dollar was fetching 130.20 Japanese yen, off from 130.40.

John Lyman, a Bank of Tokyo senior customer dealer, said a ''damned- if-you-do damned-if-you-don't syndrome'' was gripping the currency market.

He meant that credible budget legislation, which would likely bring down short-term U.S. interest rates, would weaken the dollar. But another failure of the budget talks, causing m,ore economic disarray, would also hurt it.

Barry O'Sullivan, mark dealer with Union Bank of Switzerland, said the market was focused heavily on the pound, still testing its strength as a new member of the European Monetary System's exchange rate mechanism, or ERM.

''In sterling, it's a real crapshoot,'' Sullivan said. ''Anything could happen here.'' Against the key German currency, sterling was quoted at 3.00 marks, off from 3.0150 Monday. The ERM par rate is 2.95.

Other New York dollar rates: 1.2735 Swiss francs, off from 1.2790; 5.0990 French francs, off from 5.1300; and 1,143.50 off from 1,147 Italian lire.

The pound slipped to $1.9725 from $1.9760.

In Europe, the dollar weakened against all key currencies on expectations of

lower U.S. interest rates and on renewed Persian Gulf tensions.

The stopgap measure to end the U.S. budget crisis could well pave the way for a Federal Reserve cut in short-term rates, analysts said. The dollar was also hurt by President Saddam Hussein's Iraqi radio broadcast, in which he demanded Israel leave Arab lands. This helped send the price of oil past $40 a barrel.

Euphoria over the pound's entry into the European Community's ERM evaporated. Predictions the pound would rise to the ceiling of its ERM band, 3.13 German marks, were disappointed.

The pound closed slightly higher at $1.9720 vs. $1.9705 Monday.

Pound rates were ''quite stable,'' said Alan Chase, head of strategic dealing at National Westminster Bank. ''I suppose that's ultimately what the government was hoping for when we went into the ERM.''

Chase said that the dollar would head lower, sinking below 1.50 German marks, and that the pound would soon top the $2 level.

Other analysts said there was hesistation about whether the pound should be pushed higher within the ERM. ''Now that it's over and done with, people don't know what to do,'' said Mike Holland of Barclays de Zoete Wedd.

The U.S. unit declined in Frankfurt, to 1.5255 German marks vs. Monday's 1.5340, and in Zurich, to 1.2760 Swiss francs vs. 1.2850.

The dollar also fell in Paris, Brussels and Milan, to, respectively: 5.1185 French francs vs. 5.1375, 31.38 Belgian francs vs. 31.55 and 1, 146.56 lire vs. 1150.

Earlier in Tokyo, the dollar lost just 0.10 yen against Japan's currency but closed below 130 yen for the first time since March 15, 1989, ending at 129.95 yen vs. 130.05 Monday.

Gold moved up in both Zurich, to $395.50 an ounce vs. $392.50, and London, to $395 an ounce vs. $392.25.

Republic National Bank in New York closed cash gold at $390.50 an ounce, off from $395.25 Monday. The New York Commodity Exchange settled contract gold at $389.70 an ounce, down from $394.90.

Silver closed higher in Zurich at $4.70 an ounce vs. $4.65 but was lower in London at $4.68 an ounce vs. $4.69.

Republic closed cash silver at $4.615 an ounce, off from $4.69. Comex silver closed at $4.593 an ounce, down from $4.67.

#90282u1969 10/09/1990 ~United Press International
FAIRFIELD, Conn. (OCT. 9) UPI - New York Yankees outfielder Mel Hall faces possible fines for keeping two wild cougar cubs at his suburban home.

But animal rights activists Tuesday demanded Hall be charged with cruelty to animals and made an example of to halt the national trade in exotic pets.

Police and agents from the Connecticut Department of Environmental Protection confirmed Hall was arrested last Saturday on a warrant. He was charged with two counts each of possessing potentially dangerous animals and importing wild animals without a permit.

DEP Sergeant Thomas Daniels says the animals were seized from Hall in July following an anonymous tip. He says they were in good condition and taken to a children's zoo. Daniels says the animals were shipped from Florida and federal officials are investigating the breeder.

Daniels says Hall will eventually appear in Bridgeport Superior Court and pay unspecified fines unless he fights the charges.

#90282u2013 10/09/1990 ~United Press International
(OCT. 9) UPI - President Bush says he might allow some tax rates to rise if Congress agrees to cut capital gains taxes. Bush and Congress have long been at odds over capital gains, but they came together today to pass a stop-gap spending bill that ended a three-day government shutdown.

Searchers found floating debris from two U-S Marine helicopters that disappeared in the North Arabian Sea yesterday with eight crewmen aboard. A Pentagon official says rescuers recovered the helmet of one of the crewmen. It's unlikely any of them survived the crashes.

The Marine Corps has declared Lieutenant Colonel William Higgins dead and scheduled a memorial service for November 4th at Quantico, Virginia. Higgins was kidnapped by Moslem extremists in Lebanon in February 1987. He had been officially listed as missing in action after his Moslem kidnappers released a

videotape in July 1989 of a hanged man they said was Colonel Higgins.

Iraq's Saddam Hussein says his country has developed a new rocket that could strike targets several hundred miles away. Saddam also warned Israel to leave occupied Arab lands or face quick vengeance for the slayings of 21 Arabs in Jerusalem.

In the Philippines, the Congress today approved a bill increasing penalties for rebellion and making a coup attempt a crime punishable by life in prison. The swift action came on the heels of an uprising on Mindanao that was crushed last week.

10 truck loads of emergency food supplies arrived in drought-stricken areas of southern Angola today. The shipments are part of an unprecedented international relief operation to aid civilians caught in the long-running civil war.

A circuit court judge in Broward County, Florida, today refused to disqualify the judge hearing the obscenity case against the rap group 2 Live Crew. Judge June Johnson had refused to remove herself from the case because she is a former student of the rap group's head attorney. Jury selection is under way.

Composer Leonard Bernstein is retiring from conducting because of progressive emphysema that has made it too strenuous for him to continue. A spokeswoman for the 72-year-old Bernstein says he was advised to give up both conducting and performing at the piano by his doctor. Bernstein was a heavy smoker for many years.

-30- 2470

#90282u2022 10/09/1990 ~United Press International

OAKLAND, Calif. (OCT. 9) UPI - Willie Randolph, playing because of an injury to Walt Weiss, delivered two RBI singles Tuesday and Terry Steinbach scored a run by knocking the ball out of catcher Tony Pena's glove, moving the Oakland Athletics within one victory of a third straight World Series with a 4-1 decision over the Boston Red Sox.

Randolph capped a two-run fourth inning and prolonged a two-run sixth, rallying Oakland to a 3-0 lead in the best-of-seven American League playoff. With a victory in Game 4 Wednesday (3:15 p.m. EDT), Oakland can wrap up its second playoff sweep of Boston in three years.

Mike Moore, who lost three of his last four regular-season decisions, allowed one run in six innings, shrugging off Tom Brunansky's second- inning sacrifice fly to notch his fourth triumph in as many postseason starts. Mike Boddicker took the loss.

Dennis Eckersley pitched the ninth for his second save of the series and his

sixth in Oakland's last seven playoff victories over Boston.

Never has a major-league club rebounded from a 3-0 deficit to take a postseason series. Such a rally seems all the more improbable against Oakland, which has outscored Boston 17-3 in the three games.

Oakland has set a major-league mark with 20 league championship series victories. It has also won nine straight postseason games, while Boston has lost a record seven straight in the playoffs.

Randolph's contributions illustrated the club's depth, while Steinbach's charge symbolized the beating that Boston has absorbed.

Randolph, whose first playoff experience came 15 years ago with the Pittsburgh Pirates, started neither of the first two games. But with Weiss out at shortstop with a knee injury, he played second base with Mike Gallego switching to short.

The adjustments made virtually no difference. For the third straight game, Boston took a 1-0 lead, only to be overtaken and then buried in the later innings. Oakland even managed to turn a Red Sox defensive gem into an edge.

With Oakland holding a 2-1 lead in the sixth, Boston shortstop Luis Rivera committed an error on Harold Baines' grounder to the hole. Left fielder Mike Greenwell leapt against the left-field wall to rob Mark McGwire, but Baines alertly tagged and took second.

Dave Henderson was hit by a pitch and Steinbach forced Henderson. Randolph singled in Baines and, with Gallego batting, Oakland attempted a double steal. Though beaten by five feet and with Pena in position to defend the plate, Steinbach ran over the catcher.

Another embarrassment occurred in the eighth when, with Henderson on first, Boddicker pitched from a windup, leading to an easy steal of second.

Boston took a 1-0 lead in the second. With one out, Greenwell walked and Dwight Evans lined a hit-and run single. Brunansky lifted a sacrifice fly.

Oakland failed to capitalize when Boddicker hit McGwire to lead off the second. But Boddicker walked Jose Canseco opening the fourth and, this time, the A's pounced for a 2-1 lead.

Baines singled to right, moving Canseco to second. With the runners moving, McGwire struck out on a full count and the Red Sox should have had a double play. But Pena threw low to third and Wade Boggs could not come up with the ball.

Instead of having two out and a runner on second, the A's had second and third

with one out. Dave Henderson used the extra out to lift a sacrifice fly to right, and Randolph followed by singling home Baines.

#90282u2029 10/09/1990 ~United Press International

SAN SALVADOR, El Salvador (OCT. 9) UPI - El Salvador will produce the same amount of coffee this year as it did in 1989, despite being on the down side of the crop's two-year cycle, the Salvadoran Coffee Council's director said Tuesday.

''The harvest will be the same as last year,'' said Ruben Ernesto Pineda, head of the country's coffee council.

Pineda said coffee's natural two-year cycle typically creates a variation of about 10 percent from one harvest to the next. ''If we can maintain last year's harvest, then we are doing well,'' Pineda said.

El Salvador produced 2.7 million sacks, each weighing 60 kilograms, in the 1989-1990 harvest.

The council's estimate for the 1990-1991 harvest is based on a survey of coffee growers.

Pineda said that he did not have a firm figure for the increased acreage planted with coffee this season but that bank reports show increases of 52 percent in credit for the purchase of fertilizers and 40 percent for certified seed.

Deputy Agriculture Minister Jaime Salazar recently told reporters he thought the coffee crop could be restored within a few years to the levels of production that existed before the nation's bloody civil war began in 1979.

El Salvador, which produces about 2.5 percent of the world's coffee, harvested a record 3.4 million sacks in 1977-1978.

Coffee brings in close to 60 percent of the country's foreign exchange and accounts for close to a quarter of tax revenues.

NEW YORK (UPI-FNNPRO) - A depressed market environment and lack of fresh news about merger talks between MCA Inc. and Matsushita Electric Industrial Ltd. teamed up to depress the stock of the California-based entertainment conglomerate, analysts said Tuesday.

''It is a difficult market climate and in this contest no news is bad news,''

said Edward Hatch, an analyst at Nomura Research Institute. ''The stock went up quickly last week and now is is retreating on the absence of new developments.''

On the New York Stock Exchange, MCA closed down $2.50 to $56.375 a share. MCA's stock soared above $64 a share a week ago when the two companies confirmed they were involved in negotiations.

Analysts have said the MCA stock could trade in the $75- to $90-a- share range if the merger, whose value was estimated between $6 billion and $7.3 billion, goes through. Some analysts have placed a value of more than $8.5 billion on the deal because glamorous entertainment stocks often carry a premium.

In Universal City, Calif., MCA executives declined to comment on the current status of the negotiations with Japan's largest electronics concern.

''The last thing we said was that talks were taking place. We are not releasing any other information,'' an MCA spokesman said.

The two companies had said they will not issue any news until the negotiations reach a conclusion - either way.

''The longer the talks take place with no news being released, the more nervous investors are,'' said David Presson, an analyst at Edward D. Jones. ''The longer the talks, the more questions investors have about the possible stumbling blocks for the deal to actually take place.''

One of the main obstacles is the diversity of MCA's businesses, spanning real estate to record production to movies and broadcast. Beside making the deal more complex, the array of MCA's businesses has weakened the company's performance this year amid a sluggish economy.

''This year is not a very good year for MCA,'' said Harold Vogel, analyst at Merrill Lynch Research.

''The earnings projection for the year is about $2.45, down from $2.62 last year,'' he said. ''What pushed the stock up was merger speculation and the market now has its doubts.''

Vogel pointed out that MCA's Cineplex movie division has not been doing as well as expected.

''The daily bet on the market is that investors are not very confident,'' he said.

#90282u2050 10/09/1990 ~United Press International
LOS ANGELES (OCT. 9) UPI - A federal judge convicted former FBI agent Richard Miller Tuesday of passing secrets to his Soviet lover in a case involving the only FBI agent ever charged with espionage.

In convicting Miller, U.S. District Court Judge Robert Takasugi said the former agent had been duped by the woman, a KGB operative, in a maverick plot to pose as a double agent that backfired.

''Mr. Miller did at one time intend to use (Svetlana Ogorodnikova) as an asset of the FBI and retire from the FBI in a blaze of glory,'' Takasugi said.

But Ogorodnikova ''dangled money (and) provided sex at a time when she was fully aware that Mr. Miller was plagued with pressing and immediate problems relating to his personal finances, his weight, ... his employment, his crumbling marriage and his ex-communication from (the Mormon church),'' Takasugi said.

''In a battle of wills, Mr. Miller finally succumbed, begrudgingly perhaps, ... (and) eventually compromised his obligations to the FBI'' and betrayed the United States, the judge found.

Miller, 53, was found guilty of all six espionage and bribery counts against him. He now faces a maximum of life in prison when he is sentenced Jan. 7. Takasugi permitted him to remain free on bail, against the recommendation of prosecutors.

The heavy-set Miller appeared shocked by the verdict and said he was ''dumbfounded.''

''I didn't expect this outcome. I really didn't,'' Miller said.

The verdict came at the end of Miller's third trial on charges he passed classified documents to the Soviets through Ogorodnikova.

The case has been an embarrassment to the FBI.

''It was a sad day for me (when Miller was arrested in 1984) and it's a sad day for me now,'' Lawrence Lawler, head of the FBI office Los Angeles, said. ''I'm not gleeful we have a conviction.''

Lawler said the FBI, in assessing the harm done to national security by Miller's actions, found that ''there was damage done'' and that ''the potential for continuing damage was incalcuable.''

Consistent with portrayals of Miller in the earlier trials, prosecutors in the past seven weeks have characterized him as a bumbler who was smitten by Ogorodnikova.

Miller's own attorneys portrayed him as a Ralph Kramden, the bus driver in the once-popular television series, ''The Honeymooners.''

In closing arguments Tuesday, defense attorney Leonard Levine said, ''My client is not a perfect man. He was probably more or less a bad agent.''

Levine, however, said Miller was not a spy.

The lawyer said no decision had been made on whether to appeal the conviction.

Assistant U.S. Attorney Adam Schiff said the long prosecution was ''worth the effort and the expense of doing it.''

During the trial, Schiff attempted to show that, in 1984, Miller passed an FBI intelligence manual to Ogordonikova, with whom he was having an adulterous affair and who he believed was an agent of the Soviet KGB.

Much of the prosecution's evidence stemmed from Miller's own admissions to FBI agents during several days of interrogations following his arrest.

Lust, boredom and the desire to make a ''quick buck'' to provide for his wife and eight children motivated Miller to betray his country, Schiff said at the outset of trial.

Schiff said Ogorodnikova promised Miller $50,000 in gold, $15,000 in cash and a Burberry trenchcoat - none of which he apparently received - for the secret information and other valuable material he could provide the Soviet Union.

Miller, who claims he is innocent, has never testified as his trials.

He has long maintained that he became involved with Ogorodnikova in an attempt to revive his failing FBI career by infilitrating the KGB. He has also said he never gave secret documents to the Soviets during his 20 years at the FBI, despite his admissions to the contrary.

His defense in the latest trial presented evidence that Miller suffers from physical disorders that could have affected him during the intense interrogation period.

One of the disorders is auditory dyslexia, a hearing impairment that affects one's ability to understand verbal and other communications. Miller also suffers from apnea, a condition that disrupts the sleeping patterns of overweight people.

After his first trial ended with a hung jury in 1985, Miller was convicted by a second jury in June 1986, but the conviction was reversed by the 9th U.S. Circuit Court of Appeal, which ruled that U.S. District Court Judge David Kenyon permitted too much testimony about lie detector tests that Miller failed.

Miller was jailed for five years until being released on bail after his

conviction was overturned. He requested that his third trial be without a jury.

In rare interview last year, Miller said that sexual indiscretion and his ''own stupidity'' was his personnal and professional downfall.

''The thing I tried to do with Svetlana ... was probably the stupidest thing I've ever done,'' he said.

Ogorodnikova pleaded guilty to espionage conspiracy in 1984 and was sentenced to 18 years in prison. Her husband was convicted of lesser charges and served five years.

#90282u2058 10/09/1990 ~United Press International

DALLAS (OCT. 9) UPI - More than one-third of U.S. family doctors report they have treated at least one patient infected with the deadly AIDS virus, a survey showed Tuesday.

''In many ways, AIDS is just another disease as the family physician approaches it,'' Dr. Ronald Goldschmidt, director of Family Practice Inpatient Service at San Francisco General Hospital, told a meeting of the American Academy of Family Physicians.

A recent survey of the medical society's members found 40 percent of those questioned currently are treating at least one person infected with the AIDS-causing human immunodeficiency virus, or HIV, he said. Some are the patient's only physician, others are part of a team of doctors.

''By next year, I trust these figures will be substantially greater,'' Goldschmidt said.

Goldschmidt warned the doctors to be particularly alert to the growth of the disease in the heterosexual population and in babies.

Although the rate of HIV-infection in the homosexual population has slowed due to increased awareness and use of safe sex practices, the opposite is true in the heterosexual population.

''AIDS is not an equal opportunity disease, it's hitting members of the poor and minority communities in an unequal and potentially devastating way,'' he said.

A person can be infected by the HIV virus long before contracting the opportunistic infections of AIDS, he said. Researchers believe that the time between infection and full-blown AIDS averages 11 years.

''The good news is that if one is infected, one has a long time before illness

occurs,'' he said. ''On the other hand, it means there is a long time when people may be asymptomatic and pass on this disease.''

HIV is spread through sexual and blood-to-blood contact, such as intravenous drug users sharing needles. The virus can also be passed on from an infected woman to her baby.

Although AIDS is regarded as a fatal disorder, drugs can delay the onset of the opportunistic infections associated with AIDS and prolong patients' lives.

In addition to risk factors like drug use or multiple sex partners, Goldschmidt said doctors shouldo be aware that the high-risk group includes people who received blood transfusions between 1978, when HIV is thought to have entered the nation's blood supply, and 1985, when a test to detect HIV became widely available for routine screening.

#90282u2083 10/09/1990 ~United Press International

CAMBRIDGE, Mass. (OCT. 9) UPI - Students at Harvard Law School rallied Tuesday in support of a growing boycott of 17 law firms which have been denounced by the AFL-CIO for ''union-busting'' activities.

Several dozen sign-carrying protesters set up a picket line outside Pound Hall as one of the firms arrived on campus to begin recruiting students from the nation's most prestigious law school.

The demonstrators urged fellow students to sign cards pledging not to join any of the 17 firms, which they said specialize in advising companies on ways to decertify existing unions and prevent workers from joining new ones.

''At its heart, this campaign is about a people's right to organize for rights '' said Marta Wagner, a member of the Harvard Labor Law Project, which organized the demonstration.

The protest is part of a national campaign by pro-labor law students which began last month at Georgetown University in Washington.

''In contrast to other firms who represent management, these firms rarely negotiate contracts,'' the Labor Law Project said. ''Instead, they act to prevent workers from forming unions or they seek to destroy exisitng unions.''

Harvard Law Professor Derrick Bell, who has previously criticized the lack of female and minority faculty members at the school, is supporting the boycott.

Bell, Harvard's first tenured black law professor, said in a letter to law students nationwide that the 17 firms ''represent a serious threat'' to the process of collective bargaining and urged them not to interview with

recruiters for ''union-busting law firms.''

In a separate demonstration Tuesday, about 150 Harvard law students rallied on campus and then marched to the nearby Charles Hotel to protest the presence of a recruiter for Chicago-based Baker & McKenzie, one of the nation's largest law firms.

The protesters, who were objecting to alleged racist remarks by members of the firm during job interviews with law students at the University of Michigan and the University of Chicago, also urged fellow students to boycott the firm.

#90282u2105 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - President Bush signed an emergency spending bill Tuesday that allowed the federal government to get back into full-scale operation, but he flip-flopped on the possiblity of raising tax rates on the rich.

Speaking at a morning news conference, Bush expressed a willingness to consider negotiating an increase in the tax rate for wealthy Americans if it was accompanied by a reduction in capital gains taxes.

''If it's proper and can be worked, balanced between the capital gains rate and the income tax changes, fine. But I don't think it's fruitful here (in public) to negotiate the details,'' the president said.

But later in the day, following a hurriedly called meeting with Senate Republicans who voiced opposition to any increase in income tax rates, Bush dropped the possible deal.

The president and Congress have long been at odds over capital gains rates, but they came together early Tuesday on an emergency spending bill that ended a three-day government shutdown.

The president signed the measure just after 7 a.m. EDT, only hours after Congress gave final passage to the bill that will keep the government in full operation through Oct. 19.

By then, the White House and Congress hope to agree on a fiscal 1991 budget and a plan to reduce the federal deficit by $500 billion over the next five years. The deficit reduction for this year is supposed to be $40.1 billion.

A White House official said Bush told GOP leaders Tuesday that he did not want to raise income taxes on the wealthy unless he could also get a cut in the capital gains tax rate.

''You're not going to get it,'' the official quoted Republicans leaders

telling Bush. ''Then,'' the official said Bush replied, ''forget it.''

Sen. Robert Packwood, R-Ore., told reporters after the session, ''Our uniform position was that we will not go up on the rates - not 1 percent, not 2 percent, not one-tenth.''

Bush met with Republican leaders shortly after word spread that Sen. Lloyd Bentsen, D-Texas, chairman of the Finance Committee, would propose a plan to eliminate the so-called tax bubble with an across-the-board top rate of 33 percent.

The ''bubble'' refers to taxable income between $78,400 and $208,690 for a family of four. At $78,400, the tax rate rises from 28 percent to 33 percent, but when it reaches $208,690, it drops back to 28 percent. Eliminating the bubble would leave the rate at 33 percent from $78,400 upward and would only affect those with $200,000-plus in taxable income.

In exchange for the change, Bentsen's plan calls for reducing the capital gax tax rate and reducing a proposed hike on gasoline from 12 cents to nine cents per gallon, and dropping a 2-cent tax on heating oil, congressional sources said.

A White House official, asking that he not be identified by name, insisted that reporters misunderstood Bush's earlier remarks about possibly raising the tax rate for the wealthy.

''We don't want to change the rate,'' the official said. ''Nothing has changed.''

Regardless, Bush's comments made a lot of Senate Republicans edgy, and they came to the White House saying an overhaul of the tax rates would push congressional efforts to develop a new budget into chaos.

''We do not have time to recover from any major surgery, like adjusting rates '' said Sen. John Warner, R-Va.

''We put capital gains to rest - it's just dead,'' said Sen. Ted Stevens, R-Alaska.

Earlier, Bush told his news conference, ''We've been pulling and tugging at this framework agreement for nearly five months and it's been difficult because the whole underlying problem is difficult.''

He assured Americans ''that I will do everything in my power to encourage Congress as it struggles'' to fill in the blanks of a sketchy budget outline, also passed by Congress early Tuesday.

The new plan maintains the framework of a bipartisan proposal defeated by the

lawmakers last week. That one included $135 billion in new taxes and fees and deep cuts in federal services, particularly Medicare.

The new spending blueprint eliminates many specific tax increases and spending cuts, leaving it up to congressional committees to make those tough choices.

The House Ways and Means Committee is expected to reduce the size of the Medicare cut from the $60 billion over five years to about $42 billion.

Bush and Congress have drawn plenty of heat from the public for their collective failure to reach a budget accord by Oct. 1, start of the fiscal year.

Last week, the House, responding to complaints from an outraged public, rejected pleas from Bush and defeated the bipartisan budget proposal as unfair to the poor, middle-income earners and to the elderly.

Much of the ire was directed at Bush, who was elected president with a promise of ''no new taxes.''

''I don't think the American people gave the back of the hand to the budget agreement,'' Bush told reporters. ''But listen, I can understand the frustration. I feel it myself at times.''

A new CBS poll showed Tuesday that a majority of Americans blamed Bush and Congress equally for the budget debacle, although a poll by the Washington Post and ABC pinned most of the fault on lawmakers.

The Post-ABC poll also found that Bush's approval rating had slipped 11 percentage points in the past month. But it still remained at a robust 65 percent.

Asked about the polls, Bush said: ''What it says is, we're not doing too bad. Like to be doing better. And I think there's still pretty strong support.''

''But I guess I learned that you can't do it exactly my way when we get down to something like the deficit,'' he said.

-30- 5929

#90282u2111 10/09/1990 ~United Press International

NEW YORK (OCT. 9) UPI - The Washington budget imbroglio, heightened fears of Mideast war, higher oil prices and a weaker dollar hammered the bond market Tuesday and pushed the 30-year U.S. Treasury bond's yield almost to 9 percent.

Bond investors who bought securities before the weekend in the expectation of congressional action on a budget package initially proposed by White House and key bipartisan leaders were disappointed, analysts said.

Timely passage of the legislation not only would have opened the way for the Federal Reserve to lower short-term interest rates - a move which could have helped bond prices - but would have reassured credit markets.

Instead, the House rejected the package early Friday morning and President Bush closed down the government over the Columbus Day weekend. The House then passed a ''fill-in-the-blanks'' budget and a temporary spending bill - but further wrangling loomed.

The benchmark 30-year bond, the 8 3/4 of 2020, ended at 97 26/32 to yield 8.96 percent, vs. 99 17/32 and 8.79 percent Friday - a loss of 1 3/4 points, or $17.50 per $1,000 face value. The U.S. market was closed Monday.

Analysts said there was not so much actual bond selling as the marking down of security prices to produce more attractive yields. Yields - market interest rates - and prices move in opposite directions.

Dean Witter Reynolds money-market analyst Kevin Flanagan pointed to a ''lack of any real movement on this budget situation.''

The market took little encouragement from Bush's Monday morning news conference or from Congress's counterproposal, pointing to the few specifics on spending reductions and tax hikes currently in place.

''Even if (they) do come up with an accord, how credible and meaningful is it going to be?'' Flanagan asked.

''The longer it drags out, the less confidence one has in anything credible coming out,'' said Samuel Kahan, chief economist for Fuji Securities Inc. ''Add to that a heavy dose of concern about a possible war.''

Iraqi President Saddam Hussein demanded Tuesday that Israel withdraw from occupied Arab lands or face retaliation for the deaths in Jerusalem of at least 21 Palestinian demonstrators Monday at a Moslem holy site.

Bonds decline on war fears because an outbreak in the Persian Gulf could push oil prices higher and accelerate inflation, which erodes the fixed return on government securities and makes them less valuable.

In the U.S oil market, the benchmark West Texas Intermediate crude for November delivery surged to close at a new record of $40.40 a barrel, up $1.45 on the news.

A weakening dollar gave foreign investors another reason not to buy Treasury bonds, Flanagan said, as they face foreign-exchange losses when they cash them in without enjoying yields that beat those of overseas bonds.

Another factor driving down bond prices were an expected heavy supply of new U.S. government securities in coming weeks, with Treasury auctions and issues of U.S.-backed bonds to finance the savings and loan bailout due for sale.

#90282u2156 10/09/1990 ~United Press International

ST. LOUIS (OCT. 9) UPI - Executives of Chicken of the Sea announced Tuesday it would become the first U.S. tuna brand to abandon completely the use of tuna from the Eastern Tropical Pacific.

Dolphins and tuna often swim and are caught together in the area of the Pacific Ocean known as the ETP.

''Chicken of the Sea does not purchase fish from vessels in the Eastern Pacific,'' said Paul Krampe, executive vice president-resourcing for Van Camp Seafood Co. of St. Louis, which markets Chicken of the Sea brand tuna.

''Chicken of the Sea practices dolphin protection without exception,'' said Krampe. He said the brand has been endorsed as dolphin-safe by Earth Island Institute, the environmental organization that led the campaign to stop fishing practices that endanger dolphins.

Van Camp officials said they believed Chicken of the Sea becomes the only tuna processor in the United States to withdraw from the Eastern Tropical Pacific, the primary source of dolphin deaths from tuna fishing.

The brand now obtains all its tuna from vessels in waters where tuna do not follow dolphins, including the Western Pacific, as well as the Indian and Atlantic oceans, Krampe said. He said Chicken of the Sea also has closed its processing facility in Puerto Rico, which canned tuna from the ETP.

''By completely rejecting tuna caught in the ETP and refusing to purchase tuna caught with drift nets worldwide, Chicken of the Sea tuna is verifiably dolphin-safe,'' Krampe said. ''We urge all other tuna processors to accept the same standard.''

Chicken of the Sea began reducing its dependence on the ETP as early as 1981, company officials said. Last October, the brand became the first to stop buying tuna caught in the ETP by foreign vessels responsible for the majority of dolphin deaths.

On April 12, the company announced it no longer would purchase any tuna from any vessel fishing in the ETP unless a trained government observer provided written certification of dolphin-safe fishing practices during the entire trip. Chicken of the Sea officials also announced their rejection of drift-netted tuna at that time.

Jose Munoz, president of Van Camp, appeared before a subcommittee of the U.S. House of Representatives last May and endorsed legislation banning the sale of tuna caught with dolphins. He also announced his support for a bill that would mandate labeling of tuna as either dolphin-safe or unsafe.

A redesigned label for Chicken of the Sea tuna, identifying it as dolphin-safe is now in distribution and is slated to be in stores nationwide by November.

Van Camp Seafood Co., a $320 million concern, is one of the world's largest tuna processors. Besides albacore and chunk light tuna, it markets canned clams and oysters, crab meat, shrimp and salmon under the Chicken of the Sea label. The company also markets mackerel under the Van Camp label.

#90282u2201 10/09/1990 ~United Press International

(OCT. 9) UPI - Casting aside their differences on the Persian Gulf crisis, Arab nations united in the U-N Security Council today to condemn yesterday's killing of 21 Palestinians in Jerusalem. 14 government representatives spoke out strongly against the actions of Israeli security forces at the Temple Mount. U-S Ambassador Thomas Pickering declined to comment on the U-S position.

In an emotional ceremony at the Justice Department, the United States today formally apologized to Japanese-Americans nearly a half century after they were rounded up and put in internment camps during World War Two. Attorney General Thornburgh handed the recipients checks for 20- thousand dollars along with letters of apology from President Bush. The group ranged in age from 73 to 107. The ceremony marks the beginning of a one-point-two-BILLION-dollar program to compensate Japanese-American internees.

German and Soviet officials signed a bilateral agreement in Bonn today under which Germany will help pay for the cost of withdrawing Soviet troops from what used to be East Germany. Germany will pay seven- point-six-BILLION dollars toward the cost of withdrawing and resettling some 380-thousand Soviet troops.

The U-S Supreme Court will decide whether a limit can be placed on the number of unions that represent doctors, nurses and other health care workers at acute-care hospitals. The American Hospital Association claims that the National Labor Relations Board acted illegally in 1987 in issuing a directive limiting to eight the number of bargaining units for the hospitals.

Senator Daniel Moynihan is pressing for a cut in Social Security taxes. The New York Democrat today urged the Senate to approve legislation making the cut saying that the surplus in the trust fund, now above 100-BILLION dollars, should NOT be used to finance other government programs.

-30- 2035
#90282u2210 10/09/1990 ~United Press International
BOSTON (OCT. 9) UPI - Nike Inc., the nation's No. 1 sports shoemaker, Tuesday sued Etonic Inc. in U.S. District Court charging it with patent infringement, false advertising and unfair competition.

Nike claims Etonic's newly marketed StableAir category of athletic shoe infringes on patents for the Nike-Air cushioning system used in products that represent about 60 percent of Nike's $1.4 billion in U.S. sales.

The suit says the six new models in the StableAir category infringe on Nike patents.

Also, the Nike suit alleges Etonic ads ''create the false impression that the Nike-Air cushioning system is unstable ....'' Both the alleged patent infringements and false advertising are included in unfair competition claims.

Nike, based in Beaverton, Ore., first marketed its ''air'' technology in 1979 and has been an aggressive defender of its patents. In February it sued L.A. Gear, the nation's No. 3 athletic footwear maker, on a similar infringement complaint.

In its latest suit, Nike said it had spent millions of dollars developing its air technology and had steadily increasing sales to prove its success. The complaint said Nike sold 29 million pairs of athletic shoes using the technology in the latest fiscal year.

Nike's corporate counsel, Lindsay Stewart, said Etonic's new shoes are ''just now finding their way into the distribution channels.'' The suit does not specify alleged damages but asks that Etonic, of Brockton, Mass., be enjoined from selling its StableAir products and continuing its ads.

The suit is not the first clash between the two companies over the rival products. In February, at an industry trade show in Atlanta, Nike Chairman Phil Knight termed Etonic's patented air technology a ''flat tire.'' Etonic responded with advertising tweaking Nike with the implication the Oregon company was resisting advancing technology.

Etonic, part of Etonic Tretorn Puma and owned by European footwear makers, could not be reached for comment on the suit.

-30- 2203
#90282u2224 10/09/1990 ~United Press International
OAKLAND, Calif. (OCT. 9) UPI - Oakland is likely headed for the Fall Classic and Boston has helped by taking a classic fall.

Showing their depth and exploiting blunders Tuesday, the Athletics moved

within one victory of their third straight World Series berth with a 4-1 triumph over the Red Sox.

Seldom has any club flopped the way Boston has in this series. The Red Sox have been outscored 17-3, are hitting .198, and have made four errors to Oakland's one. Catcher Tony Pena committed two defensive lapses Tuesday, leading to three runs. Red Sox starter Mike Boddicker added to the embarrassment by using a windup with a man on base.

''We gotta' be going bad, the (security) guard wouldn't even let me in here,'' Boston Manager Joe Morgan said in the post-game interview room. ''Do you believe that? He wanted to stop me.''

Somebody should stop something, namely this series. That should take care of itself Wednesday at 3:15 p.m. EDT, when four-time 20-game winner Dave Stewart opposes Boston ace Roger Clemens.

Stewart said Morgan's choice for Game 4 starter is another blunder. Clemens has made just two starts since Sept. 4 because of tendinitis and fluid buildup in his pitching shoulder.

''I was surprised,'' Stewart said. ''He's not the Roger Clemens who pitched this year. He's tired. Physically, his arm is not strong. I would think they would be more careful with a pitcher of his calibre and let him concentrate on letting him get well for next year.

''They're down 3-0 and they do not have the kind of team that can beat us four straight.''

Willie Randolph, playing because of an injury to Walt Weiss, delivered two RBI singles and Terry Steinbach scored a run by knocking the ball out of catcher Tony Pena's glove.

''I've been in postseason play,'' Randolph said. ''Every at-bat is important.''

Randolph capped a two-run fourth inning and prolonged a two-run sixth, rallying Oakland to a 3-0 lead in the best-of-seven American League playoff. With a victory in Game 4, Oakland can wrap up its second playoff sweep of Boston in three years.

Oakland Manager Tony La Russa resisted an invitation to say that there might not be a fifth game.

''Anybody who asks me about Game 5, I wouldn't answer it,'' La Russa said.

When told that Morgan had called the A's the best team in the world, he said, ''If you don't have confidence in your club, forget about it. We've got one more win for the ALCS. We're going to be ready.''

Mike Moore, who lost three of his last four regular-season decisions, allowed one run in six innings, shrugging off Tom Brunansky's second- inning sacrifice fly to notch his fourth triumph in as many postseason starts.

''Once you get to this point in the season I want to go out and contribute any way I can,'' Moore said. ''Tony had confidence in me.''

Dennis Eckersley pitched the ninth for his second save of the series and his sixth in Oakland's last seven playoff victories over Boston.
 more x x x Boston.

Never has a major-league club rebounded from a 3-0 deficit to take a postseason series. Such a rally seems all the more improbable against the A's.

Oakland has set a major-league mark with 20 league championship series victories. It has also won nine straight postseason games, while Boston has lost a record seven straight in the playoffs.

''The bats are kind of silent as you know,'' Morgan said. ''That's the way we go, up and down. Bad time to be going the other way, though.''

Randolph's contributions illustrated the club's depth, while Steinbach's charge symbolized the beating that Boston has absorbed.

Randolph, whose first playoff experience came 15 years ago with the Pittsburgh Pirates, started neither of the first two games. But with Weiss out at shortstop with a knee injury, he played second base with Mike Gallego switching to short.

''I wouldn not consider it an insult,'' Randolph said of not starting Games 1 and 2. ''I was a little disappointed.''

Randolph arrived from Los Angeles in a May 12 trade.

''Not playing every day is an adjustment but I was able to get a feel for it after about a month.''

Oakland's lineup changes made virtually no difference. For the third straight game, Boston took a 1-0 lead, only to be overtaken and then buried in the later innings. Oakland even managed to turn a Red Sox defensive gem into an edge.

With Oakland holding a 2-1 lead in the sixth, Boston shortstop Luis Rivera committed an error on Harold Baines' grounder to the hole. Left fielder Mike Greenwell leapt against the left-field wall to rob Mark McGwire, but Baines alertly tagged and took second.

Dave Henderson was hit by a pitch and Steinbach forced Henderson. Randolph singled in Baines and, with Gallego batting, Oakland attempted a double steal. Though beaten by five feet and with Pena in position to defend the plate, Steinbach ran over the catcher.

Another embarrassment occurred in the eighth when, with Henderson on first, Boddicker pitched from a windup, leading to an easy steal of second.

''That's the first thing you learn in Class A ball,'' Henderson said. ''The pitcher goes into a windup, that's a free base.''

Boston took a 1-0 lead in the second. With one out, Greenwell walked and Dwight Evans lined a hit-and-run single. Brunansky lifted a sacrifice fly.

Oakland failed to capitalize when Boddicker hit McGwire to lead off the second. But Boddicker walked Jose Canseco opening the fourth and, this time, the A's pounced for a 2-1 lead.

Baines singled to right, moving Canseco to second. With the runners moving, McGwire struck out on a full count and the Red Sox should have had a double play. But Pena threw low to third and Wade Boggs could not come up with the ball.

Instead of having two out and a runner on second, the A's had second and third with one out. Dave Henderson used the extra out to lift a sacrifice fly to right, and Randolph followed by singling home Baines.

#90282u2310 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - U.S. farm programs may be remolded to take an aggressive, export-oriented edge if world trade reform talks fail, Agriculture Secretary Clayton Yeutter warned Tuesday.

Agricultural trade is one of the thorniest issues in the negotiations, due to conclude in early December. The United States wants to see large-scale removal of trade barriers and unfair subsidies while the European Community considers the only sensible course to be a smaller level of action.

During a satellite broadcast, Yeutter prodded the EC to agree to specific cuts in export subsidies while his EC counterpart, Raymond MacSharry, blamed low wheat prices, which have followed on the heels of a huge crop worldwide, on U.S. overproduction.

''We would need to quickly reappraise our farm policy to see if it fits the confrontational'' situation that would prevail if the talks fail, Yeutter told reporters afterward.

The review, he said, could include a restructuring of crop support programs to emphasize exports - ''much more market-share oriented'' - and put less emphasis on financial support.

''In the absence of a substantive agreement in December, we will completely reassess our commitments in the United States,'' he later reiterated.

Since 1985, the United States has spent $2.87 billion to subsidize the sale of $10.9 billion worth of grain, vegetable oil, eggs, poultry, dairy cattle and poultry feed. Although sizable, the export subsidy and market development programs are much smaller than farm subsidies, which totaled nearly $78 billion in the past five fiscal years.

During an impromptu session with reporters, Yeutter emphasized that any change in U.S. programs should flow from policy goals, not simply be a restoration of spending cuts.

Exports are a vital issue to U.S. agriculture because they account for 20 percent of cash farm receipts. Nearly half of the U.S. wheat crop is exported, as is a third of the soybean crop and one-fourth of the corn crop.

#90282u2319 10/09/1990 ~United Press International

WASHINGTON (OCT. 9) UPI - Tunisia purchased 125,000 metric tons of wheat at subsidized prices from U.S. exporters and an unidentified buyer took 111,760 tons of soybeans, the Agriculture Department reported Tuesday.

The wheat was worth about $12.8 million and the soybeans $26 million, based on Chicago prices.

There are 36.7 bushels of wheat and soybeans in a metric tons, so the sales called for delivery of the equivalent of 4.6 million bushels of wheat and 4.1 million bushels of soybeans.

Tunisia's purchase included 75,000 tons of hard red winter wheat and 50,000 tons of northern-dark northern spring wheat. The wheat will be delivered in February and March.

By law, exporters must report sales of 100,000 tons or more of a commodity within 24 hours. Some sales, such as the soybean sale, are listed as going to unidentified buyers because it sometimes can take a few days to learn who bought the goods.

Under the sale to Tunesia, four exporters will be given bonuses worth $55.07 a ton, or $1.50 a bushel, for making the deal.

#90282u2380 10/09/1990 ~United Press International
(OCT. 9) UPI - A federal judge in Los Angeles today convicted the only F-B-I agent ever accused of espionage. Richard Miller was found guilty on all six counts of bribery and espionage. It was Miller's third trial on charges that he passed classified documents to his Soviet lover in 1984. Prosecutors say Miller was motivated by lust, boredom and the desire to make a ''quick buck.'' He faces a maximum of life in prison when he is sentenced January 7th.

Debris from two U-S helicopters missing since yesterday has been recovered by searchers in the North Arabian Sea. The choppers and their eight crew members disappeared while flying a routine night mission from the amphibious assault ship U-S-S Okinawa . A defense official says the helmet of one of the crew members was also found among the debris. The official says it's unlikely any of the eight survived the crashes.

President Bush says he'll do everything in his power to encourage Congress to come up with a budget package he can accept. At a news conference today, Bush appeared to show a new willingness to support higher taxes for the rich. He said- quoting here- ''If it's proper and can be worked, balanced between the capital gains rate and the income tax changes, fine.'' Bush earlier signed a stop-gap spending bill... and re-opened the federal government.

#90282u2387 10/09/1990 ~United Press International
PITTSBURGH (OCT. 9) UPI - Now that the Pittsburgh Steelers' offense has ended its scoring drought, the next task is to learn how to bring in the offensive plays.

The 2-3 Steelers, who play Sunday at Denver, have been trying to learn the new system installed by offensive coordinator Joe Walton, who always has used the messenger system to send his plays into the game.

Before Walton arrived, the Steelers had used hand signals to get the plays in from the sideline.

''We've got a few things to work on so that we can cut out some of the confusion,'' said Coach Chuck Noll at a news conference Tuesday at Three Rivers Stadium. ''Some of our (messengers), when they got the formation and then got the play, they forgot what the formation was. So they're going in with the play but without the formation.''

That exact scenario cost the Steelers a 5-yard penalty for delay of the game in the first quarter of Sunday's 36-14 win over the San Diego Chargers. Eric Green's 8-yard touchdown catch early in the second quarter ended a 17-quarter scoring drought for the Steeler offense.

''It's like you telling him something and then him telling someone else and him telling someone else, and by the time it finally gets to me, it's almost a lie,'' said quarterback Bubby Brister. ''It like, we don't have that play. It's something we can correct.''

The Steelers plan to do that by signaling the formation into Brister on the sideline, and then having the messenger bring only the play.

''It's not a compromise,'' said Noll, who originally resisted any change to Walton's preferred method. ''It's to help the guys who don't work on the thing. The quarterback is constantly in the thing the whole way.

''You take a wide receiver or running back or tight ends, and you give them all that terminology, and by the time they get in there they forget one end.

''It's like the old Boy Scout trick. You'd tell the story in the beginning, and then see what it was like by the time it got to the end of the line. We're having a bit of that problem right now.''

According to Brister, one of the typical plays brought in from the sideline might sound like this: deuce-split-right-tight two-short-motion short-sprint-left 49-Z-hide-Y-go, on two.

''Go ahead, you repeat that,'' said Brister, ''and I'm no brain surgeon either.''

#90282u2393 10/09/1990 ~United Press International

(OCT. 9) UPI - Isolated incidents of rock-throwing and tire-burning were reported in Israel today, but the occupied West Bank and Gaza Strip were relatively quiet. Three Arabs in Gaza were injured in clashes that came one day after Israeli police shot and killed 21 Arabs in Jerusalem. Israeli Prime Minister Yitzhak Shamir today accused Palestinian leaders of exploiting the deaths, and said violence would NOT alter Israeli policy.

Tropical Storm Klaus weakened to a depression today and forecasters say it's about to be gobbled up by a Cuban storm front. The combination is whipping up surf along Florida's Atlantic Coast and could bring as much as 10 inches of rain to the drought-stricken peninsula. At Cape Canaveral, NASA moved the leak-plagued Columbia off the launch pad and back to the Vehicle Assembly Building to protect the shuttle from the remnants of Klaus.

.

At last report, Klaus was about 115 miles southeast of Nassau in the Bahamas, and was moving northwest at nearly 15 miles-an-hour.

#90282u2433 10/09/1990 ~United Press International

MILWAUKEE (OCT. 9) UPI - The Pettit family, which donated $72 million to build an arena in hopes of bringing an NHL team to Milwaukee, cited economic reasons Tuesday for withdrawing their application for an expansion franchise.

However, the Pettits said they still would seek to buy an existing franchise and move it to the city.

Lloyd Pettit, who heads Wisconsin Ice Hockey Inc., the group trying to bring an NHL team to Milwaukee, said league rules for expansion franchises made it economically unfeasible.

''The way it's set up now, I would say it's not feasible for any market,'' said Pettit, who owns a Milwaukee minor-league hockey team. ''We met yesterday and came to the conclusion it was just not in the books.''

The NHL, scheduled to award two expansion teams in December, said it would cost $50 million for a franchise. Milwaukee's exit leaves nine cities vying for the franchises.

The NHL has already accepted the San Jose Sharks as an expansion team for the 1991-92 season.

Pettit said after an indemnity to the Chicago Blackhawks due to proximity of the cities and other fees are added, the cost of the expansion franchise would be $60 million to $65 million.

He said an expansion draft would give new teams the 23rd best player on NHL rosters and research showed it would take five to 10 years for an expansion team to be competitive.

''If you are dealing with five to 10 years as a losing club, you don't get attendance and you don't make it financially,'' Pettit said.

NHL President John A. Ziegler was notified of the decision about midday Tuesday, according to a brief statement.

''Although we do not agree with some of the reasons or conclusions indicated by Milwaukee representatives relating to the withdrawal,'' Ziegler said, ''we certainly respect their right to do so and appreciate their continued support of hockey in the Milwaukee area.''

Lloyd and Jane Pettit, philanthropists who donate to many causes in Milwaukee, gave $72 million to the city to build the Bradley Center, which opened in 1988.

''You currently are looking at a very dejected and depressed and sometimes

more than a little less enthusiastic man,'' Lloyd Pettit said. ''From the very beginning, my inclination was to believe in a dream. And that dream, unfortunately, is not going to come true.''

Lloyd Pettit believed the Milwaukee application would have been approved.

''We had received information that our application was possibly the best application of them all,'' he said. ''I don't know how those other clubs are going to do it.''

In addition to Seattle and Tampa-St. Petersburg, Milwaukee was considered a favorite for the next wave of growth in the NHL.

The 17,000-seat Bradley Center hosts the Milwaukee Bucks of the NBA, the Marquette Warriors collee basketball team, the Milwaukee Admirals of the International Hockey League and the Milwaukee Wave, a minor league indoor soccer team.

#90282u2523 10/09/1990 ~United Press International

(OCT. 9) UPI - President Bush apparently has changed his mind on the possiblity of raising tax rates on the rich. At a morning news conference, the president expressed a willingness to consider negotiating an increase in the tax rate for wealthy Americans if it was accompanied by a capital gains tax cut. But Bush later dropped the possible deal... after meeting with Senate Republicans who voiced opposition to any increase in income tax rates.

At the United Nations, the United States and the other four permanent members of the U-N Security Council are preparing to condemn the Israeli slaying of 21 Palestinians in Jerusalem yesterday. A senior State Department official says the United States, the Soviet Union, Britain, France and China have agreed on the text of an agreement that would condemn the killings. But the official says the five powers reject an Arab demand to send an investigative team to Jerusalem.

The Pentagon said today that multi-national forces turned away an Iraqi tanker carrying flour and rice in the Arabian Sea. The tanker Tadmur was shadowed and boarded by U-S, British and Australian forces yesterday when it refused to stop for inspection. A Pentagon spokesman says the markings on the bags of rice indicate it was grown in the United States and shipped to Jordan.

In Los Angeles, former F-B-I agent Richard Miller today was found guilty on all six counts of espionage and bribery. In convicting Miller, U-S District Judge Robert Takasugi says Miller was duped by his Soviet lover... a K-G-B operative... in a maverick plot to pose as a double agent that backfired. The heavy-set Miller appeared shocked by the verdict and said he was ''dumbfounded.'' He now faces a maximum of life in prison when he is sentenced

January 7th.

#90282u2537 10/09/1990 ~United Press International
CULVER CITY, Calif. (OCT. 10) UPI - MGM/UA Communications announced Tuesday that it has been forced to make a $35 million settlement to shareholders to dismiss a class-action suit stemming from its 1986 sale to Turner Broadcasting.

The company also said it has sued its insurers for a ''bad faith'' settlement they made in the case last month.

Damages in the case, which went to trial two weeks ago, could have been as high as $200 million and doomed the pending sale of the studio to Italian financier Giancarlo Parretti's Pathe Communications. Pathe had agreed to indemnify MGM/UA, which is controlled by financier Kirk Kerkorian, for damages.

Pathe, which has paid more than $350 million in down payments already, has until Oct. 23 to complete the deal.

In its announcement, MGM/UA said the settlement had been forced upon it by its insurers. Those four insurers reached an agreement three weeks ago, over MGM/UA's strenuous objections, to a separate settlement worth up to $20 million with the plaintiffs in the suit.

That settlement left Kerkorian and his holding company, Tracinda Corp., as the sole defendants in the suit.

In announcing its suit against the insurers, MGM/UA cited bad faith actions taken by the insurers - Harbor Insurance Co., Forum Insurance Co., Associated International Insurance Co. and National Union Fire Insurance Co.

''While the bad faith actions of our insurers have forced us to advance the $35 million, we fully expect to recover these funds, plus punitive damages,'' said Terry Christensen, attorney for MGM/UA.

Christensen said the insurers' settlement with plaintiffs had been reached ''behind our backs.'' That settlement called for shareholders to pay the insurers up to $3 million if they won more than $20 million in the trial.

The shareholder suit claimed Kerkorian had undervalued the United Artists part of the company when he sold the entire company to Turner for $1.5 billion. Kerkorian then bought back United Artists and the MGM name for $470 million.

#90282u2679 10/09/1990 ~United Press International
(OCT. 9) UPI - This morning, President Bush expressed a willingness to raise

tax rates for the rich in exchange for a cut in capital gains taxes. Later, he reversed himself on the income tax hike. A White House official says reporters misunderstood Bush. In the official's words- ''We DON'T want to change the rate. NOTHING has changed.''

The way has been cleared for a U-N Security Council vote on a measure to condemn the Israeli killing of Palestinians during yesterday's riot in Jerusalem. A senior U-S official says the council's five permanent members, including the United States, agreed on a text that would condemn the killings.

Another scheduled airlift of Americans from Iraq. The State Department says a U-S-chartered 747 will leave tomorrow for Basra, Iraq, to pick up an estimated 400 U-S citizens and their foreign- born family members. The plane will fly to London and then to Raleigh- Durham, North Carolina, on Thursday.

Lawyers for former F-B-I agent Richard Miller say they have NOT decided whether to appeal today's espionage conviction. A federal judge in Los Angeles found Miller guilty of passing secrets to his Soviet lover in 1984. He faces up to life in prison.

David Souter took his seat as the 105th justice of the U- S Supreme Court today after taking an official judicial oath inside the marble-columned courtroom on Capitol Hill. He then heard oral arguments on his first case, which involves securities law.

NO jurors were seated and the selection process will continue tomorrow in the Fort Lauderdale, Florida, obscenity trial of three members of 2 Live Crew. The Miami rappers are charged with performing lyrics from their album ''As Nasty As They Wanna Be'' two days after a federal judge declared the music obscene.

White supremacist Tom Metzger lost his bid today to disqualify more than 20 potential jurors at his trial in Portland, Oregon. The former Ku Klux Klan leader is being sued for 10-Million dollars for allegely inciting three so-called ''skinheads'' who killed a black man in 1988.

#90283b0010 10/10/1990 ~Business Wire
SAN JOSE, CA (OCT. 10) BUSINESS WIRE - Tekelec Wednesday announced the ChameLAN 100, a specially designed test system which provides complete monitoring and statistical analysis for high-speed FDDI (Fiber Distributed Data Interface) networks.

The ChameLAN 100 is the first FDDI test system to ensure continuous network testing regardless of traffic loads (up to 100 percent) or problems in the network.

FDDI product developers can use the ChameLAN 100 to test and diagnose problems in their products, evaluate network performance and resolve interoperability issues in a network environment. Network managers can use the new tester to evaluate, install and maintain FDDI products.

The ChameLAN 100 includes system software and specially designed hardware for real-time statistical analysis, filtering and triggering of network data. Real-time analysis helps developers view the overall ''health'' of their networks. Filtering and triggering capabilities enable them to capture specific network data based on user-defined events.

The ChameLAN 100 also includes an intelligent statistics package, with bar and line graphics, which summarizes network information and helps isolate problems on the network. Developers can also use the ChameLAN 100 to interpret FDDI protocols such as MAC and SMT, and higher level protocols like TCP/IP and OSI.

The system is an independent passive solution which does not affect network activity. It is connected to the FDDI network using standard connections (Single Attached Stations - SAS, and Dual Attached Stations DAS) and operates

as an FDDI repeater (PMD relay).

The ChameLAN 100 was designed with high-performance power to meet FDDI requirements and those of future technologies. It features an easy-to-use industry standard user interface, MOTIF, which runs over X-Windows and UNIX. Its state-of-the-art hardware design includes an Intel 80386 processor, and a front-end RISC Transputer with a 5 MB or optional 20 MB capture buffer. It also includes a 100 MB or optional 200 MB built-in hard disk for system files and network data storage.

Recognized as a leading test equipment manufacturer, Tekelec's product line encompasses testing of data protocols (ISDN, X.25, OSI), FDDI Local Area Networks, transmission services and equipment (T1, Fractional T1, DDS, T3), signalling (SS7), and emerging intelligent network applications. Its products are marketed worldwide with subsidiaries in Japan and the United Kingdom.

#90283b0011 10/10/1990 ~Business Wire

SAN JOSE, CA (OCT. 10) BUSINESS WIRE - Micro Technology Inc. (MTI) Wednesday announced the introduction of MIB Manager, a software tool now included in the company's LANCE network management system (NMS), which makes it easier for network managers to get information about different vendors' devices on a network.

Because devices in a network are often made by different vendors, using different management information bases (MIB), a software program such as MIB Manager is necessary to get the different network devices to send their information to a network management system.

MIB Manager, using the industry-standard Simple Network Management Protocol (SNMP), implements both standard and proprietary MIBs to allow corporate network managers to access, query and control all SNMP devices on their networks via LANCE.

Increasingly, computers are connected together in networks. Today, the local-area network (LAN) market is one of the fastest growing segments of the overall PC and workstation market in the United States, with a 33 percent compound annual growth rate through 1993, according to Forrester Research. And says a recent issue of LAN Magazine, ''Once a novelty, the LAN is now a centerpiece.''

With increasing use of LANs comes the need to manage networks in terms of preventing and tracking problems, increasing network productivity, ensuring security, and helping managers plan for future network needs. Until recently, this was a job requiring several different computer monitors and software programs because of proprietary hardware protocols. With MIB Manager, several monitoring consoles can be combined into a single monitor with a single user interface, providing both a truly integrated look at the whole network and consolidated management reports of network activity.

According to DataPro, the SNMP network management market is in its infancy, with 1990 estimated revenues of $5 million. Micro Technoloy believes this is low, because the company projects revenues of nearly that amount for its own SNMP-based products.

MIB Manager lets LANCE users view a device's MIB and easily query or change any supported MIB variables, using a simple point-and-click user interface. Without MIB Manager, a network manager would have to write complex software programs to get network information from each device.

Established in 1979, Micro Technology is a proven leader in the design, manufacture and marketing of quality enhancement products in networking, storage subsystems and system software for the VAX/VMS and UNIX environments. A privately held company, for the fiscal year ended in March 1990, MTI had revenues of $55 million, and anticipates 1991 revenues of $80 million. The company supports its customers through 45 sales and service locations in the United States, Canada, Australia and Europe.

#90283b0015 10/10/1990 ~Business Wire

COLUMBUS, IN (OCT. 10) BUSINESS WIRE - Cummins Engine Co. Inc., has elected James K. Ashford, president and chief executive officer of the J I Case subsidiary of Tenneco Inc., Edward E. Hagenlocker, vice president of Ford Motor Co. and general manager of Ford Truck Operations, and J. Lawrence Wilson chairman and chief executive officer of Rohm and Haas Co., to its board of directors.

Ashford assumed leadership of J I Case in 1987 after serving as president and chief executive officer of Tenneco Automotive. He first joined Walker Manufacturing Co., a division of Tenneco Automotive, in 1958 and served in various accounting and management positions before becoming vice president of long range planning and development of Tenneco Inc. in 1981.

A graduate of the Harvard School of Business Advanced Management Program, Ashford received a B.S. in accounting from Mississippi State University in 1958. He is a member of the board of directors of the Farm and Industrial Equipment Institute.

Hagenlocker was named vice president-Ford Truck Operations in 1986, prior to which he held the post of director-president, Ford of Brazil. After joining Ford as a research scientist in 1964, Hagenlocker held engineering management positions for a variety of Ford component operations and joined Truck Operations in 1978.

He received B.S. and M.S. degrees in engineering physics from The Ohio State University in 1962 and a Ph.D. degree in physics in 1964. Hagenlocker was awarded an M.B.A. degree in business administration from Michigan State University in 1982.

Wilson was appointed chairman and chief executive officer of Rohm and Haas in 1988. He joined the company in 1965 as an operations research analyst and held positions throughout the company before becoming treasurer and chief financial officer and later, vice chairman. Wilson has been a director of Rohm and Haas Co. since 1977.

He graduated from Vanderbilt University with a B.S. degree in mechanical engineering in 1958, and received an M.B.A. in finance from Harvard University in 1963.

Wilson is a member of the board of directors of Vanderbilt University, the Vanguard Group of Investment Cos., and of the Chemical Manufacturers Association where he serves on the Executive Committee.

The election of Ashford and Hagenlocker to the company's board of directors was part of agreements reached with Tenneco Inc. and Ford Motor Co. in connection with their equity investments in Cummins in July of this year.

Cummins is a major producer of diesel engines, components and power systems for trucks and industrial equipment.

SAN JOSE, CA (OCT. 10) BUSINESS WIRE - Proteon Inc. Wednesday announced that its internetworking products will support the emerging Frame Relay standard and DECnet Phase V, reaffirming the company's commitment to key internetworking standards.

The announcement follows Proteon's recent introduction of the industry's first multi-protocol router support for the IEEE 802.6 Metropolitan Area Network (MAN) standard.

Proteon is working closely with U.S. Sprint to ensure that its Frame Relay Implementation meets all specifications, and will participate in the industry's first Frame Relay testbed, to be staged by U.S. Sprint in the first quarter of 1991. Initial product support for the standard will be made available by Proteon in the second half of 1991, in conjunction with the general availability of the service by U.S. Sprint.

As the first internetworking vendor to deliver support for DECnet Phase IV on its multi-protocol bridging routers, Proteon has demonstrated consistent interoperability with this important standard. The company will provide support for DECnet Phase V in the second half of 1991 upon general availability of the standard.

Proteon: Providing the Network Infrastructure for the '90s

Today's commercial environments, predominantly token ring-based, require a reliable network infrastructure to support critical applications. Its distinct blend of token ring and internetworking expertise enables Proteon to provide dependable, high-performance physical network infrastructures comprised of bridge/router access points, token ring adapters, smart hubs and wiring strategies, and integrated network management.

From its ProNET-4/16 LAN family and JitterBuster technology to its internetworking routers and FDDI support, Proteon is the single physical network solution for today's global businesses.

WOBURN, MA (OCT. 10) BUSINESS WIRE - Rand Technologies, the leading Preferred System Provider for advanced CAD/CAM/CAE systems, and CAD/CAM Integration Inc. (CCI) have announced a strategic marketing agreement under which Rand Technologies will sell CCIs Distributed Numerical Control and Machine Tool Monitoring Systems.

Under the agreement, Rand Technologies will provide direct sales and support for the manufacturing applications in the northeast and central domestic U.S. and Canadian discrete manufacturing markets. CCI will continue to develop and enhance the products, and supply technical training and support.

Distributed Numerical Control (DNC) provides electronic communications between computer aided design and manufacturing systems (CAD/CAM) and computer controlled machine tools on the manufacturing floor. Additional software applications are available to monitor the DNC-networked machine tools for production, maintenance and quality control reporting. The DNC application runs in standard MS-DOS and UNIX operating environments and includes engineering and manufacturing system interfaces.

Rand Technologies is a Preferred System Provider (PSP) of automation and application services for companies that require computer-aided design and manufacturing (CAD/CAM) systems, systems integration and support, and advanced applications training. Rand is uniquely positioned as a PSP of automation products, providing significantly better customer service, support and applications knowledge than the technology supplier.

Rand Technologies, based in Mississauga, Ontario, is part of Randvest Inc., a Canadian corporation with interests in engineering services and real estate. Rand Technologies has sales and support offices in Chicago, Detroit, Rochester Cincinnati, and Hartford that provide regional CAD/CAM/CAE services to companies like Northern Telecom, Motorola, TRW, Kodak, Chrysler, Bell Northern Research and Dupont.

CAD/CAM Integration Inc. (CCI), founded in 1983, is headquartered in Woburn,

Mass. CCI provides manufacturing data networks, communications systems and interfacing products for distributed numerical control of corporate, product management and shop floor manufacturing systems. These products provide a means to network, monitor, collect and validate manufacturing information from existing manufacturing systems.

CCI manufacturing communications systems are supported and available on standard operating environments including: UNIX, VMS, MS-DOS, and NetWare operating systems using standard personal computers, workstations and networking platforms. CAD/CAM Integration is the only vendor which supports a standards-based product strategy for all communications, networking and interfacing products.

NORTH STONINGTON, CT (OCT. 10) BUSINESS WIRE - Analysis & Technology Inc. (NASDAQ:AATI) has purchased the Panama City Beach, Fla. assets of Matrix Corp. a private company headquartered in Vienna, Va., A. T. Mollegen Jr., president and chief executive officer of A&T, and Robert Kossan, president of Matrix Corp., jointly announced Wednesday.

The purchased assets include a multi-year U.S. Navy contract for marine engineering services including diving, salvage, and ocean engineering, plus other smaller contracts. All 41 former Matrix employees located in Panama City Beach became A&T employees.

Financial Terms were not announced.

''This purchase,'' Mollegen said, ''strengthens A&T capabilities and market position in a special U.S. Navy business area which we believe will continue

to grow in importance in this decade.''

Analysis & Technology Inc., a professional and technical services company, provides submarine and antisubmarine warfare services to the U.S. Navy and specialized training services for commercial and military markets.

#90283b0035 10/10/1990 ~Business Wire

BOSTON (OCT. 10) BUSINESS WIRE - Buying a $20 energy efficient light bulb for $3 is a great buy, but when you also lower your electric bill, protect the environment and help the Lions Clubs raise a half a million dollars for eye research, it's a fantastic buy.

It's called ''Lite for Sight'' and it's Boston Edison co. and the Lions Clubs of eastern Massachusetts teaming up between October 15 and November 15 to sell energy efficient light bulbs to raise money for eye research. Lions will sell the bulbs, which normally retail for about $20, for $3, with $2 of that going for the Lions' eye research charities.

The ''Lite for Sight'' promotion is sponsored by the Lions Clubs of Massachusetts and the Demand Side Management Settlement Board which consist of Boston Edison Co.; Attorney General James M. Shannon; The Commonwealth of Massachusetts Division of Energy Resources, Paul W. Gromer, commissioner; The Massachusetts Public Interest Research Group (MASSPIRG); and Senator Bill Golden on behalf of certain named rate payers.

Local Lions Clubs have supported programs for 75 years to prevent blindness and for the past 25 years they have sponsored the annual sale of light bulbs to raise money for the prevention and cure of eye disease. The 1990 campaign will have a new look thanks to Boston Edison's Energy Fitness Program.

This year the Lions will offer new compact fluorescent light bulbs manufactured by OSRAM Corp. of Montgomery, N.Y. The 15 watt DULUX EL bulb replaces a 60 watt incandescent bulb, lasts 10 to 13 times longer and uses 75 percent less electricity and that means good news to your electric bill. Each bulb has an average 10,000 hour life expectancy.

The offer is for Boston Edison residential customers only and those customers were mailed an order form in the September billing. There will be a limit of four bulbs per household at the $3 price offered by the Lions Clubs. People buying the bulb through the Lions Club will save $17 off the retail price of each bulb and about $46 in energy costs over the life of the bulb.

Boston Edison's ''Lite for Sight'' program administrator Alice Quirk says

there are only winners in this program. According to Quirk, ''If 300,000 of the 60 watt incandescent bulbs are replaced with 15 watt OSRAM DULUX EL compact fluorescent bulbs, about $13.8 million in total energy costs will be saved.'' She added, ''electricity not needed means less electricity to be generated and that is good for our environment.''

''The 'Lite for Sight' program makes Boston Edison a national leader in improving residential lighting efficiency. In addition to reducing our dependence on imported oil, the program could actually reduce air emissions that cause acid rain and smog by over 1100 tons and prevent the release of over 100,000 tons of carbon dioxide -- the primary contributor to the greenhouse effect and global warming,'' said Alan Nogee, MASSPIRG Energy Program director.

Quirk said there are thousands of other winners in the program also and they are the people who benefit from the advances in the prevention and cure of eye disease. She stated, ''The concept of the program is to produce efficient light and a cleaner environment and help hundreds of thousands to visually enjoy the world they live in.''

MENLO PARK, CA (OCT. 10) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) announced that Informix-ESQL/COBOL will support the new Sun COBOL product introduced by Sun Microsystems Inc. Wednesday.

Informix-ESQL/COBOL is an application development tool that enables programmers to embed ANSI-standard SQL statements into their COBOL programs.

With Informix-ESQL/COBOL, developers can modify their existing COBOL programs to access Informix-based database applications on a wide range of Sun platforms.

Informix products that support Sun platforms include Informix-OnLine, the first database engine to combine fault tolerant support for on-line transaction processing performance (OLTP) with support for multimedia database applications, Informix's family of fourth generation programming tools and Wingz, Informix's graphical spreadsheet for multiple desktop platforms.

Informix software is available for all major Sun workstations, including the leading SPARCstation line of RISC-based workstations, the Sun-3 family and the Sun386i family. Wingz for Sun operates in the SunView windowing system or the compatibility mode of Open Windows.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems, robust application development tools, and graphical-and character-based productivity software for delivering information to every significant desktop platform.

Informix is headquartered in Menlo Park, with European headquarters in London, and Asia/Pacific headquarters in Singapore.

#90283b0053 10/10/1990 ~Business Wire
SAN DIEGO (OCT. 10) BUSINESS WIRE - Telios Pharmaceuticals Inc. Wednesday announced it was awarded a Phase II-Small Business Innovation Research (SBIR) grant for $500,000 from the National Institutes of Health to help support development of the company's first product, a topically administered agent designed to speed the healing of chronic and severe wounds.

According to James W. Polarek, Ph.D., Telios' director of wound healing research, the funds will be used for clinical-safety testing and manufacturing scale-up of the product called Telio-Derm.

Animal tests have shown the product acts as a temporary scaffold to which new cells can attach and grow until healing is completed. Human testing has been under way since late 1989, and is aimed at three wound indications -- serious thermal burns, skin ulcers and surgical wounds resulting from skin-cancer surgery of the head and neck.

''For nearly 4 million Americans, wounds of this type can fester for months or not heal at all,'' said Polarek. ''These funds will add to our aggressive program to develop products for this persistent problem.''

The wound-healing market worldwide is estimated at more than $4 billion annually. Telios is initially targeting the burn and chronic ulcer segments of this market, which is estimated at about $700 million a year.

To date, Telios has received more than $22 million in private funding, and receives additional support under a multimillion-dollar product development agreement with Ono Pharmaceutical Co. Ltd., of Osaka, Japan.

The company is developing other products, including treatments for ''dry eye'' (the corneal damage that results from inadequate production of tears), TGF-beta inhibitors to prevent abnormal tissue scarring of fibrotic diseases, products to control blood-clotting and biocompatible coatings for artificial implants such as vascular grafts, joint replacements and other orthopedic devices.

The SBIR program provides funds to qualified companies in order to accelerate basic research toward product development. In addition to the Phase II wound-healing grant, four Phase-I grants of approximately $50,000 each have been awarded to Telios.

Founded in 1987, Telios Pharmaceuticals is developing therapeutic products based on the company's proprietary technology.

Studies by its scientists have shown that the extracellular matrix -- a network of molecules that surrounds all cells in the body -- is critical to the way the body heals itself and combats disease. At the heart of Telios' technology is the ability to control how cells interact with this matrix.

TEMPE, Ariz. (OCT. 10) BUSINESS WIRE - UDC Universal Development L.P. (NYSE:UDC) Wednesday reported third quarter closings, sales and backlog.

New home closings for the third quarter ended Sept. 30 were $78 million, compared with the record $94 million posted a year ago.

Gary A. Rosenberg, chairman and chief executive officer, said ''UDC's results reflect further weakness in the national home building market in the third quarter.

''The demand for new homes, combined with lack of available product in California, have impacted UDC,'' he said. ''However, sales activities in other markets are relatively comparable to last year and fourth quarter California sales, reflecting our new products, should show an improvement compared with last year.''

UDC will announce third quarter and nine-month revenues and earnings in early November.

UDC builds quality, upscale family and adult residential communities in six Sun Belt states, with operations in Arizona, California, Florida, Georgia, North Carolina and South Carolina. Its common and preferred shares are traded on the New York Stock Exchange.

SAN DIEGO (OCT. 10) BUSINESS WIRE - Cipher Data Products Inc., a leading designer/manufacturer of half-inch reel-to-reel and cartridge tape drives, Wednesday announced that it recently completed a restructuring program in its direct and technical distributor sales channels.

The changes were prompted by recent shifts in marketplace opportunities.

To balance its sales efforts between traditional OEM customers and the newer computer system aftermarket, the company strengthened its regional distributor network, reduced its direct sales force by 5 percent and closed its direct sales offices in Philadelphia and Irvine.

As a result of these actions, Cipher today has a strong network of 10 regional distributors across the United States and one national distributor, Arrow Electronics Inc. Regional distributors include Applied Digital Systems, Cranel Inc., Datalink, Digidyne, First Computer, Gentry Associates, Group III,

Mesa Technology and U.S. Data. Cipher's direct sales force continues to service OEM customers.

Cipher Data Products Inc. is a leading supplier of removable information storage solutions. Founded in 1968, the company designs, manufactures and markets a broad range of half-inch magnetic tape and cartridge drive systems providing interchange, data backup and storage solutions for a variety of computers.

Cipher is the choice of the world's leading computer companies and supplies tape drives to 17 of the top computer companies in the world. The company is located in San Diego, and is a wholly owned subsidiary of Archive Corp. of Costa Mesa.

TUSTIN, CA (OCT. 10) BUSINESS WIRE - Luther Medical Products Inc. (NASDAQ:LUTH), which devlops innovative medical devices, Wednesday announced it has been awarded a $250,000 loan from Johnson & Johnson Finance Corp.

The loan will be used to bring new neurological and intravenous devices to market.

Under terms of the agreement, the loan is secured by Luther's first of two contracts with Critikon Inc., a Johnson & Johnson Co. in Tampa, Fla. The contract grants Critikon rights to market Luther's stickless catheter, now sold as Critikon's PROTECTIV.

''Our initial contract with Critikon has been one of the company's hidden financial strenghts that remained untapped until now,'' stated Tate Scott, president of Luther Medical. ''Luther Medical has a reserve of products that are ready for market. With the funding in place, we can begin to reap the benefits of those new product sales as early as this fiscal year.''

Luther Medical developed the first catheter to protect healthcare workers from infectious diseases such as AIDS and hepatitis. The company went on to develop a second line of catheters, a tiny neonatal device, which Critikon contracted to market in 1989.

In August, Luther Medical Anounced its first profitable year following a three-year restructuring. Sales for the year ended June 30, 1990 were $3,058,497 with positive net income at $16,000, up from a loss of $124,186 for the prior year.

Based in Tustin, Luther Medical Products has designed and manufactured unique catheter systems since 1980. The company's founder, Ronald B. Luther, is credited with holding more patents involving catheter technology than any individual in the world today. In 1987, the company acquired NDI, a manufacturer and distributor of high-technology human nervous system testing equipment.

#90283b0090 10/10/1990 ~Business Wire

BELLEVUE, WA (OCT. 10) BUSINESS WIRE - Puget Sound Power & Light Co. filed an innovative rate reform package Wednesday with the Washington Utilities and Transportation Commission (WUTC) that would modify the present regulatory system to make it practical for the utility to invest more resources in conservation.

In conjuction with this package, the company is also asking the WUTC for a $19.2 million increase in revenues to recover the costs of recent investments in conservation and power supply contracts needed to serve its growing customer base.

The request amounts to a 2.9 percent overall rate increase for the company's customers. The impact of the increase for the average residential customer will be offset by residential and small farm exchange credits Puget Power receives through the Bonneville Power Administration (BPA). These exchange credits will reduce the impact of the proposal to an increase of approximately six-tenths of a percent, or 33 cents per month.

''Growth in the Puget Sound area over the past year has put pressure on Puget Power to acquire additional resources,'' said Gary Swofford, vice president of Rates and Customer Programs at Puget Power. ''Conservation has the least environmental impact of any new resource,'' Swofford added, ''and both conservation and power contracts represent the least costly options available to the company today. They do, however, involve some added costs.''

The proposed rate reform package encourages conservation by providing a way for Puget Power to recover its costs for conservation on an annual basis and to maintain the revenues needed to provide utility services to its customers. Under current regulations, a utility's revenues are reduced as it pursues conservation.

The WUTC questioned the current regulatory approach because it appeared to conflict with the conservation ethic in Washington state. In May, the WUTC asked Washington utilities and interested parties to review current regulatory practices and to suggest reforms that would provide more incentives for

utility investment in conservation and other ''least-cost'' resources.

The proposal also provides ways for the company to annually recover costs associated with purchasing power from other entities and to adjust rates for factors, such as variations in rainfall, which are beyond Puget Power's control.

#90283b0136 10/10/1990 ~Business Wire

SOUTH SAN FRANCISCO, CA (OCT. 10) BUSINESS WIRE - The Liberty Network Station Series G was introduced by Liberty Electronics at InterOp Wednesday in San Jose.

The Network Station features compatibility and connectivity under Novell, DOS, OS/2, UNIX and X-Windows operating systems and environments. It operates at up to 25MHz and offers expandable memory up to 16Mb.

The flicker-free, high resolution display, compact ergonomic features, uncomplicated maintenance, data security, industry-standard Ethernet connectivity, quiet operation, and worldwide service and support are what make the Liberty Network Station a standard by which all other network stations will be judged.

Keith A. Orser, president of Liberty, summed up the importance of the Network Station this way: ''We looked at the user's needs and carefully developed a product to meet those varied needs. Our experience over the past decade in this industry allowed us to design a product that gives each user an edge.''

The Liberty Network Station offers the latest surface mount technology -- providing speed and power in a compact package requiring less than 91-square inches of deskspace.

There are also ports for a mouse, a parallel printer, and a modem. All of this combined with advanced VGA graphics capabilities and competitive pricing, makes the Liberty Network Station the all-purpose answer when it comes to networking.

The Network Stations will be sold to OEMs and through Liberty's existing distribution network. Liberty has national and regional distribution in the United States, as well as major distributors in Europe and other parts of the world.

Liberty supports its products through a worldwide service network. Liberty Electronics has come to be known as a company offering quality, reliability and support...all at very affordable prices.

Liberty has been providing high quality ASCII/ANSI terminals since 1982. Combining all of that experience with a leading-edge research and development team, Liberty created this new integrated Network Station which offers an

''all in one'' solution to networked computing needs.

WACO, TX (OCT. 10) BUSINESS WIRE - ASK Corp. (NASDAQ: ASKC) said Wednesday that it has moved closer to a decision to re-enter the solar thermal market through its American Solar King Corp. subsidiary.

ASK had previously announced that it was considering reactivating American Solar King Corp. pending a study of market conditions and discussions with various investment advisors.

ASK said continuing price increases in world oil markets, the probability of sustained high oil prices and increased public support for solar and alternative energies have strengthened market potential for solar products.

ASK also said various investment sources have expressed enthusiasm for reactivating solar manufacturing and market operations. The company said, however, a complete study has not been finalized and a firm decision has not yet been made.

ASK said it has broken off negotiations with the Sheet Metal Workers' National Pension Fund and another institution regarding a previously announced infusion of capital because, as previously announced, the capital would be primarily used for the acquisition of certain technologies and the equity of another company.

In view of current circumstances, ASK now believes such an investment would not be in its long term best interests.

#90283b0141 10/10/1990 ~Business Wire

LOS GATOS, CA (OCT. 10) BUSINESS WIRE - Caere Corp. (NASDAQ:CAER) announced 1990 third-quarter revenues of $7,056,000, up 37 percent from third quarter 1989 revenues of $5,148,000.

Net income was $1,442,000, an increase of 35 percent compared with $1,066,000 in the third quarter of 1989, despite an increase in tax rates from 14 percent in 1989 to 39 percent in 1990 due to the full utilization of net operating loss carryforwards.

Net income per common share was 28 cents for the quarter compared with 30 cents in 1989, achieved despite both the increase in tax rates and the 49 percent increase in shares outstanding due to the company's initial public stock offering in October 1989. Pre-tax income increased 85 percent from $1,251,000 in 1989 to $2,319,000 in 1990.

The increase in revenues resulted from increased sales of the 386 version of OmniPage and from sales of Caere's newest product, The Typist, that began shipping in September 1990. Revenues from the OmniPage family of products amounted to $4,571,000 for the third quarter of 1990 compared with $3,104,000 in 1989, an increase of 47 percent.

OCR and bar code net revenues were $2,485,000, an increase of 22 percent from the comparable quarter in 1989. This increase was consistent with quarterly sales fluctuations experienced in the past.

Caere designs, develops, manufactures and markets information recognition software and systems products that provide a low cost, accurate means of converting text, numeric, and bar code data into computer usable form.

ENGLEWOOD, CO (OCT. 10) BUSINESS WIRE - Intercontinental Enterprises Inc., (NASDAQ:ENTI) announced Wednesday that its wholly owned subsidiary, Toplus Development Ltd., has signed a letter of intent with Tianjin Trust and Investment Co. Ltd. (''Tianjin Trust''), to found the People's Venture Capital

Fund (''the Fund'').

Tianjin Trust is a financial services company involved in domestic and international investments, fundraising, leasing and securities activities; and also provides financial consulting and trust services in the People's Republic of China (''PRC'').

The People's Venture Capital Fund will invest operating capital in Chinese companies and will be located in Tianjin, a major city located in PRC. ENTI and Tianjin Trust have each committed to invest one million dollars to found the open-ended Fund, and intend to raise additional capital through the sale of equity securities to the public in PRC. ENTI and Tianjin Trust will jointly manage the Fund. ENTI believes this to be the first investment of its kind in PRC.

ENTI reports consolidated revenues of $2,321,000 for the second quarter ended July 27, 1990. Consolidated revenues for the second quarter of 1989 were $4,720,000. The consolidated net loss for the quarter was $3,975,000 (5 cents per share), as compared to a net loss of $1,575,000 (2 cents per share), in the second quarter of the prior year. These losses include recorded losses on the discontinuance of the company's subsidiary, Blinder Robinson & Co. Inc., of $3,241,000 and $2,024,000 for the second quarters ended July 1990 and 1989 respectively.

The company's results of operations excluding the discontinued operations of Blinder, Robinson were a net loss of $734,000 and a net income of $448,000 for the second quarters ended July 1990 and 1989 respectively. The results of operations for the second quarter of 1989 were restated to exclude the operations of Blinder, Robinson which filed bankruptcy in July 1990.

SEATTLE (OCT. 10) BUSINESS WIRE - Burlington Resources Inc. (BR) announced today that Thomas H. O'Leary has been elected Chairman of the Board replacing Richard M. Bressler, who has retired as Chairman but will continue to serve as a Director of the company.

In addition to his new responsibilities as Chairman, Mr. O'Leary will continue to serve as President and Chief Executive Officer of BR, a position he has held since January 1989.

Mr. O'Leary, 56, has been with BR and its predecessor company, Burlington Northern Inc. (BNI), since 1982 when he was elected a Vice Chairman of BNI. Prior to that, Mr. O'Leary was President of Missouri Pacific Corporation. He graduated from Holy Cross College and has an MBA from the Wharton School of Finance. Mr. O'Leary is also a Director of The Kroger Co.; Interco, Inc.; B.F. Goodrich, Co.; and Burlington Northern Inc. He is a resident of Seattle, Washington.

BR also announced the election of S. Parker Gilbert to its Board of Directors.

Mr. Gilbert, 56, has been Chairman of Morgan Stanley Group Inc. since 1984. He also serves as a trustee for a number of institutions, is a member of the Yale Investment Committee and a Director of the New York Stock Exchange. Mr. Gilbert is a resident of New York City.

SEATTLE (OCT. 10) BUSINESS WIRE - Burlington Resources Inc. (BR) announced today that George E. Howison has been elected Senior Vice President and Chief Financial Officer, effective November 1, 1990.

He replaces Luino Dell'Osso, Jr. who has been elected Executive Vice President and Chief Operating Officer with the El Paso Natural Gas Company, a wholly owned subsidiary of BR.

Mr. Howison, 45, has been with the company since 1983 and most recently served as Vice President, Planning and Treasurer of BR. He graduated with a BS in engineering from MIT and has an MBA from Dartmouth College. Mr. Howison resides in Bellevue, Washington.

H. Brent Austin was elected to the position of Vice President, Planning and Treasurer to replace Mr. Howison. Mr. Austin, 36, joined the company in 1986 as Director, Planning and was promoted to Assistant Vice President, Planning in 1989. He is an alumnus of the University of Texas, where he earned a BA in economics and an MBA. Mr. Austin is a Mercer Island, Washington resident.

Everett D. DuBois has been promoted to the new position of Assistant Vice President, Planning and Treasury. An employee of BR and its predecessor companies since 1969, Mr. Dubois, 46, most recently served as Assistant Treasurer. He holds both a BS and an MS in economics from South Dakota State University. Mr. DuBois is a resident of Bainbridge Island, Washington.

#90283b0268 10/10/1990 ~Business Wire
LOS ANGELES (OCT. 10) BUSINESS WIRE - Teledyne Inc. Wednesday reported that income of continuing operations was $9.1 million, or 17 cents per share, for the three months ended Sept. 30, 1990, compared with $43.5 million, or 79 cents per share, for the same period in 1989.

Operating profit has decreased in each quarter of 1990 from the comparable quarters of 1989. The aviation and electronics segment continued to experience cost overruns on certain defense contracts. The economic slowdown in the steel and automotive industries contributed to the decline in operating profit in the specialty metals segment.

Operating profit also declined from 1989 due to continued strikes at certain engine manufacturing locations in the industrial and aviation and electronics

segments. In addition, income for the third quarter of 1990 was adversely affected by strengthening aircraft product liability reserves. Sales were $846.4 million for the third quarter of 1990, compared with $875.8 million for the third quarter of 1989.

Income of continuing operations for the nine months ended Sept. 30, 1990, was $68.4 million, or $1.24 per share, compared with $111.5 million, or $2.01 per share, for the same period in 1989. Sales were $2.57 billion for the nine months ended Sept. 30, 1990, compared with $2.65 billion for the same period in 1989.

Income of continuing operations for the nine months ended Sept. 30, 1990, includes a reversal of a $7.7 million provision for income taxes which is no longer necessary as a result of the spin-off of Teledyne's insurance and finance subsidiaries at March 31, 1990.

Teledyne's former insurance and finance subsidiaries are presented as discontinued operations. Net income for the third quarter of 1990 was $9.1 million, or 17 cents per share, and does not include any amount for discontinued operations. Net income for the same period of 1989 was $78.7 million, or $1.42 per share, including $35.2 million for income of discontinued operations.

Net income for the nine months ended Sept. 30, 1990, was $94 million, or $1.70 per share, including $25.6 million of income of discontinued operations reported in the first quarter. Net income for the nine-month period of 1989 was $196 million, or $3.53 per share, including $84.5 million of income of discontinued operations.

A cash dividend for the quarter ended Sept. 30, 1990, of 20 cents per share was paid on Aug. 21, 1990, to shareholders of record Aug. 7, 1990.

#90283b0295 10/10/1990 ~Business Wire

COOS BAY, OR (OCT. 10) BUSINESS WIRE - Western Bank (NASDAQ:WSBK) maintained a pattern of sound profitability in the third quarter 1990, reporting a 22 percent rise in net income.

Net income for the third quarter 1990 was $1,194,000, or 50 cents per share fully diluted, up from $982,000, or 46 cents per share, earned in the same period of 1989. For the first nine months of the year net income of $2,968,000, or $1.30 per share fully diluted, compared with $2,632,000, or $1.23 per share, earned during the first nine months of 1989.

An 18 percent boost in net interest income during the current quarter reflects increasing deposit totals and the investment of those funds, particularly in the growing loan portfolio. Net interest margin remained favorable.

Non-interest income was up 15 percent with a rise in deposit account fees and other service charges and a strong gain in trust department income over the third quarter 1989.

Total loans made a 16 percent jump to $219,212,000 for the third quarter 1990 over third quarter 1989, and total deposits were up 19 percent to $448,100,000.

''Oregon's economy continues to perform well, contributing to the substantial increases in our loan portfolio and to deposit growth,'' said Georges C. St. Laurent Jr., chairman and chief executive officer. ''We are alert to every opportunity to reinvest in our communities and want to make all the good loans we can. We will carry on with our conservative approach to lending, placing foremost emphasis on the security and soundness of the bank.''

Western Bank total assets are at a record $488,716,000 on Sept. 30, 1990, up 20 percent from the year-ago figure. Shareholder equity, convertible debentures and loan loss reserves for the 31-branch institution stand at $37,099,000.

SAN DIEGO (OCT. 11) BUSINESS WIRE - In a 10-minute court hearing on Oct. 3, U.S. Bankruptcy Judge James W. Meyers dismissed a motion to liquidate Kaypro Corp.

The Chapter 7 motion, originally filed by creditors and the U.S. trustee, was reversed after a comprehensive review of the company's recent financial records.

After experiencing significant financial difficulties, in March the computer manufacturer sought creditor protection under Chapter 11. Kaypro creditors supported Chapter 7 conversion during June, citing a lack of financial progress. The case was then continued, pending the installation of new upper management.

In August, the decision on the motion was continued until Oct. 3, which gave the newly appointed president and chief executive officer, Geoffrey W. Soule', time to take control.

''We view the court's decision as a vote of confidence in Kaypro's future,''

said Soule'. ''Kaypro generated some encouraging sales numbers during August. What's more, I feel the company has the potential to maintain that positive trend.''

Kaypro reported gross sales of $821,000 and a net operating profit of $63,000 for August, the first profitable month in nearly seven years. Those sales figures more than doubled July sales of $406,000, while June sales totalled $84,000. Soule' attributes Kaypro's recent financial progress to streamlined operations and a new emphasis on sales.

''We have reduced our overhead significantly through lowering the rent payments and subcontracting much of the manufacturing,'' explained Soule'.

''Also, we have increased our sales volume on three fronts: 1) through shipping a sizable order backlog in the instrument division (Non-Linear Systems), 2) through an ongoing revitalization of Kaypro's retail dealer network, and 3) through exploring new distribution channels such as mass merchandisers.''

Soule' also noted that Kaypro is preparing its formal plan of reorganization, which will be presented to the court on Jan. 31.

With nearly four decades of experience in the high-tech/electronics industry, Kaypro is an internationally recognized brand name. Currently, Kaypro Corp. enjoys a user base of more than a half-million computer systems worldwide and markets a full line of microcomputers for businesses and individuals.

SUNNYVALE, CA (OCT. 10) BUSINESS WIRE - Identix Inc. (NASDAQ:IDXX; PSE:IDX), a manufacturer of electronic finger scanning systems for identity verification and security applications, Wednesday announced results for the fourth quarter of fiscal 1990, ended June 30.

Revenues were $358,000 for the quarter with a net loss of $679,000, or 7 cents per share, compared with revenues of $413,000 and a net loss of $575,000, or 6 cents per share, for the like quarter of 1989.

Revenues for the fiscal year ended June 30, 1990, were $1,241,000, compared with $1,872,000 for the previous year. The net loss for fiscal year 1990 was $2,845,000, or 30 cents per share, compared with a net loss of $2,543,000, or 29 cents per share, for fiscal year 1989.

According to Identix President Randy Fowler, the company expects the contract

it recently received from the State of California, which is worth up to $40 million over the next five years, to contribute significantly to the company's growth in 1991. The contract, which is the largest in the industry to date, calls for Identix to provide law enforcement authorities with up to 600 of its TouchPrint systems.

''The combination of this contract and anticipated sales in other market segments puts us in a strong position for growth over the next several years '' said Fowler.

Identix Inc., with headquarters in Sunnyvale, designs, manufacturers and markets a family of identity verification systems that combine high accuracy with ease of use. Identix systems are used in a wide range of security applications in the public and private sectors.

#90283b0615 10/10/1990 ~Business Wire

LOS ANGELES (OCT. 10) BUSINESS WIRE - Argonaut Group Inc. (NASDAQ/NMS:AGII) Wednesday announced consolidated net income after tax of $21.7 million ($2.38 per common share) on total revenue of $172.3 million for the quarter ended Sept. 30, 1990, and $63.0 million ($6.80 per common share) on total revenue of $459.3 million for the nine months ended Sept. 30, 1990.

For the third quarter last year, net income was $22.7 million ($2.36 per common share) on total revenue of $149.6 million. For nine months ended Sept. 30, 1989, net income was $63.4 million ($6.36 per common share) on total revenue of $404.4 million.

Consolidated operating income after tax (excluding gains on the sale of investments) was $21.5 million for the quarter ended Sept. 30, 1990 compared to $22.6 million for the third quarter of 1989. For the nine months ended Sept. 30, 1990, operating income after tax was $60.9 million, compared to $62.8 million for the like period last year.

Total revenue includes a net gain on sales of investments of $300,000 for the current quarter, and a net gain of $3.1 million for the nine months ended Sept. 30, 1990.

In 1989, gains on sales of investments were $200,000 for the third quarter, and $900,000 for the nine months ended Sept. 30. Current year gains resulted primarily from the sale of investments in Earle M. Jorgensen Co. in response

to a tender offer. The company cannot anticipate when or if similar gains may occur in the future.

Investment income for the current quarter and nine-month period includes a dividend of $12.8 million received on shares of Curtiss-Wright Corp. held for investment.

On July 27, 1989, the Argonaut Group board of directors authorized the repurchase of up to 2 million shares of its outstanding common stock.

The company reacquired 269,191 shares during the third quarter of 1990 for a total to date of 672,275 shares. In July 1990, the board of directors authorized a program to purchase shares from holders of less than 50 shares.

Argonaut Group is a holding company whose subsidiaries are primarily engaged in the selling, underwriting, and servicing of workers compensation and other lines of property-casualty insurance. Argonaut Group is traded on NASDAQ's National Market System.

SAN JOSE, CA (OCT. 10) BUSINESS WIRE - Phillip R. Boyce, chairman of Pacific Western Bancshares Inc. (ASE:PWB), Wednesday commented on the Tuesday, Oct. 9, announcement by Alpha Capital Co. that it has increased its holdings to 841,558 shares, or 6.8 percent of the common stock of the company.

''As we have stated in the past, we continue to view Alpha Capital as a friendly investor in the company and we appreciate its continued confidence in our future growth,'' said Boyce.

''Over the past two months, we have announced two stock repurchase plans totalling up to 1 million shares, demonstrating our belief that our common stock is an excellent investment opportunity at current price levels,'' continued Boyce. ''Pacific Western's stock, in our opinion, is undervalued when our returns and capital ratios are considered.

''We continue to experience strong earnings growth as marked by our 1990 second quarter, which was the 10th consecutive quarter in which earnings exceeded the same period a year earlier.''

Alpha Capital Co. is a private investment company in Oakland. In May 1990, Alpha Capital announced it had increased its holdings in Pacific Western to 623,828 shares, or 5.1 percent of the common stock.

Pacific Western Bancshares Inc. is a bank holding company with headquarters in San Jose. Through its subsidiaries, the company offers trust and asset management services. The holding company's subsidiary, Pacific Western Bank, has $1.3 billion in assets and is one of two major independent banks in Northern California. The bank operates 28 locations in Santa Clara, Santa Cruz and Monterey counties.

#90283b0617 10/10/1990 ~Business Wire

GREENWICH, CT (OCT. 10) BUSINESS WIRE - Stolt Tankers and Terminals (Holdings) S.A. (NASDAQ:STLTF) Wednesday reported results for the third quarter and first nine months of fiscal 1990, ended August 31, 1990.

Net income from operations for the third quarter was $12.4 million, or $0.46 per share on net operating revenue of $147 million, compared to $15.3 million, or $0.56 per share on net operating revenue of $140 million for the same three month period in 1989. In addition to net income from operations, a nonrecurring gain of $0.4 million, or $0.01 per share from ship sales increased total net income to $12.8 million, or $0.47 per share for the quarter ended August 31, 1990. A $7.2 million, or $0.26 per share gain from a distribution from a former partner in the Stolt Tankers Joint Service increased total net income to $22.5 million, or $0.82 per share for the same quarter in 1989.

Net income from operations for the nine month period ending August 31, 1990 was $38.8 million, or $1.44 per share on net operating revenue of $439 million compared to net income from operations of $43.6 million, or $1.60 per share on net operating revenue of $387 million for the same period in 1989. Total net income for the nine months of 1990 was $59.4 million, or $2.20 per share, including nonrecurring gains of $20.6 million, or $0.76 per share from ship sales. Total net income for the same nine month period in 1989 was $55.8 million, or $2.05 per share, including nonrecurring gains of $12.2 million, or $0.45 per share from an insurance settlement and a gain from a distribution from a former partner in the Stolt Tankers Joint Service.

Although revenues for the third quarter and first nine months of 1990 were ahead of 1989, net income from operations for the respective periods was slightly below last year. The share of revenue after voyage expenses which the Company receives from the Stolt Tankers Joint Service has been reduced because of the sale of six ships to Stolt Partner S.A. during the second quarter of 1990.

The crisis in the Middle East since early August has not directly affected the Company's tanker trading patterns and revenues, but higher bunker fuel prices resulting from the invasion have had an impact.

Operating costs have increased due to the weaker U.S. dollar, inflation and rising ship repair costs. Management feels that this increase may be passed along through bunker fuel price clauses in contracts and higher spot freight rates due to the strengthening of the parcel tanker market.

During the quarter, the Company continued to expand the services offered to its customers by ordering two more all stainless steel 5,000 deadweight ton coastal parcel tankers in Japan, for a total of four -- all for operation in the Stolt-Nielsen Inter Europe Service; and by forming Stolt-Nielsen Leasing as a new division of Stolt Tank Containers.

Since the end of the quarter, two 39,000 deadweight ton parcel tankers, which had been on time-charter and are ideally suited for certain of the Company's tanker trades, were purchased at auction; and the management of Van Ommeren Ceteco, with whom Stolt has an agreement to operate its Owner's Berth in Rotterdam, has agreed to the sale of its 825 tank container fleet to Stolt-Nielsen subsidiaries. All of these moves are being made to strengthen the Company's position as the leader in bulk liquid distribution.

Stolt Tankers and Terminals (Holdings) S.A. is an international transportation company specializing in the distribution of bulk liquids both by land and sea. The Company operates worldwide with 21 offices in 12 countries. Stolt-Nielsen provides distribution services among most maritime countries with its combination of transoceanic and coastal parcel tankers; door-to-door intermodal tank container service throughout the world, combined with tank container leasing; five regional storage and distribution centers in the United States, Northwest Europe and Brazil; as well as barges, railcars and tank trucks.

#90283b0621 10/10/1990 ~Business Wire

BEVERLY HILLS, CA (OCT. 10) BUSINESS WIRE - ''I am pleased to report that, based upon operating earnings, the third quarter of 1990 was the second strongest quarter in our history,'' stated Bram Goldsmith, chairman of the board and chief executive officer of City National (NYSE:CYN).

''Operating earnings for the quarter amounted to $14.2 million, or 44 cents per share, compared with $13.9 million, or 43 cents per share, for the third quarter of 1989.''

For the first nine months of 1990, City National reported operating income, excluding non-recurring income, of $41.5 million, or $1.28 per share. That figure is slightly less than the record $41.6 million, or $1.29 per share, earned during the same period last year.

Total net income, including non-recurring net income, amounted to $42.5 million, or $1.31 per share, 5 percent lower than the $44.7 million, or $1.38 per share, earned during the first nine months of 1989. Non-recurring net income amounted to $1 million for the first nine months of 1990, compared with $3.1 million for the same period in 1989, which was largely from the sale of the two desert branches.

City National's operating return on equity averaged 18.1 percent during the first nine months of 1990, compared with 21.4 percent during the same period last year. Operating return on average assets was 1.22 percent, compared with 1.36 percent last year. These performance measures exclude the effects of non-recurring income and, as usual, are among the strongest of banks with more

than $1 billion in assets.

Loan growth continued strong throughout the first nine months of 1990. At Sept. 30, loans were up 14 percent compared to a year ago. Total deposits were up 9 percent, with most of the increase resulting from interest-bearing deposits.

Asset quality remains very strong. During the first nine months of 1990 City National's loan loss reserve averaged 1.35 percent of total loans, increasing from 1989's 1.31 percent average. Non-performing loans, although up, averaged a low .87 percent of total loans during the quarter. City National does not own any foreclosed real estate properties.

City National is the parent company of City National Bank, a $4.9 billion commercial bank with 23 regional offices and headquarters in Beverly Hills.

SAN JOSE, CA (OCT. 10) BUSINESS WIRE - Ungermann-Bass, the information processing industry's leading open enterprise network systems supplier, Wednesday announced its intention to participate in a Pacific Bell trial of the new Switched Multimegabit Data Service (SMDS).

SMDS is a high-speed communication service that can be used, among other things, for the interconnection of local area networks.

The trial will include the interconnection of several locations via Pac Bell's internal SMDS test bed using a prototype interface inside of the Ungermann-Bass Access/One intelligent hub. The objective is to validate the technology and to evaluate potential advanced applications of SMDS in a customer environment. It is expected that most enterprises which have geographically separate facilities will benefit significantly from the application.

Initially, SMDS will provide instantaneous 1.544-megabits-per-second (DSI) or 44.736-Mbps (DS3) access to a high-speed switched fiber-optic network. Eventually, the service will offer higher transmission rates such as 150 Mbps.

The Pac Bell trial is scheduled to run until spring 1991 and focus on a number of online applications such as medical, engineering and financial services that currently use LAN technology. When elements of these systems are geographically separated, they require high-speed, internetwork communication services. SMDS will meet these requirements in metropolitan areas and potentially across longer distances.

Pacific Bell is a subsidiary of Pacific Telesis Group, a diversified worldwide telecommunications corporation based in San Francisco.

Founded in 1979, Ungermann-Bass pioneered enterprise networking -- the sharing of data resources among dissimilar computer systems throughout an organization. Today, Ungermann-Bass is a leading international designer and supplier of standards-based networking hardware and software data communications systems.

Ungermann-Bass, World Headquarters, 3900 Freedom Circle, Santa Clara, Calif., 95054. Telephone: 800/999-3236.

SAN JOSE, CA (OCT. 10) BUSINESS WIRE - ln response to user demands to combine online transaction processing (OLTP) with the ability to share data throughout an organization, Ungermann-Bass and Tandem Computers Inc. (NYSE:TDM) have announced a joint development effort to significantly improve the network connection between Tandem systems and Ungermann-Bass' Access/One intelligent wiring platform.

The joint development will focus on enhanced networking of end user devices, such as PCs, Macintosh computers and terminals in the Tandem environment, over Transmission Control Protocol/lnternet Protocol (TCP/IP).

A prototype of one of the key cooperative projects, a TCP/IP-based Tandem 6530 terminal connectivity software package expected to be available in the first half of 1991, is being demonstrated at the trade show in both Tandem's (1322) and Ungermann-Bass' (936) booths.

According to Roger Bertman, vice president of marketing for Ungermann-Bass, joint development of networking products is part of an on-going effort to provide seamless connectivity between the two companies product lines.

The Access/One is a smart wiring hub which uses a number of plug-in system modules that support an array of end-user devices ranging from terminals and PCs to LocalTalk-based Macintosh computers and integrates them into an Ethernet, broadband or Fiber Distributed Data Interface (FDDI) backbone.

Bertman added that other joint development products will also be based on the Access/One platform.

Tandem manufactures and markets computer systems and networks for online transaction processing, large database applications, and the UNIX system marketplace. Company headquarters are located at 19333 Vallco Parkway, Cupertino, Calif. 95014, 408/285-6000.

Founded in 1979, Ungermann-Bass pioneered enterprise networking -- the sharing of data resources among dissimilar computer systems throughout an organization. Today, Ungermann-Bass is a leading international designer and supplier of standards-based networking hardware and software data communications systems.

#90283b0627 10/10/1990 ~Business Wire

SAN JOSE, CA (OCT. 10) BUSINESS WIRE - Ungermann-Bass Wednesday introduced a 10BASE-T standard-compliant concentrator and Twisted-Pair Access Unit (TPAU) for the Access/One intelligent wiring platform.

Both provide backward-compatibility for pre-10BASE-T standard devices with the flip of a single switch.

The company is debuting the Access/One 10BASE-T Concentrator and TPAU at the Interop trade show in San Jose.

The concentrator, a managed active repeater, provides signaling for up to twelve 10BASE-T ports at 10 megabits per second (Mbps) over twisted-pair (telephone) wiring. The TPAU is an external transceiver which provides 10BASE-T signaling for an Ethernet device. Both products comply with the recently approved Institute of Electrical and Electronics Engineers (IEEE) 802.3 10BASE-T standard.

As part of the Access/One system, the new 10BASE-T products are easily integrated into multiple protocol, multiple-media and multiple-site networks. In an optional mode the concentrator supports device distances exceeding 150 meters on unshielded twisted-pair wiring -- significantly farther than comparable products.

For users with IBM Type 1 and 2 cabling, even longer device distances are supported.

The Ungermann-Bass Access/One 10BASE-T Concentrator and 10BASE-T TPAU are available immediately.

Founded in 1979, Ungermann-Bass pioneered enterprise networking -- the sharing of data resources among dissimilar computer systems throughout an organization. Today, Ungermann-Bass is a leading international designer and supplier of standards-based networking hardware and software data communications systems.

#90283b0629 10/10/1990 ~Business Wire

INCLINE VILLAGE, NV (OCT. 10) BUSINESS WIRE - U.S. Leisure Inc. announced the appointment of Robert J. McLaughlin as acting chief executive officer to guide the company and its subsidiaries through a financial restructuring.

McLaughlin, credited with the successful restructurings of a series of companies, said, ''Within six months we expect to identify a course of action that will lead to successful emergence of U.S. Leisure and its subsidiaries from Chapter 11 of the U.S. Bankruptcy Code.''

U.S. Leisure Inc. and its subsidiaries, U.S. Leisure International Inc., Little Lake Industries Inc. and Muskin Inc., filed for reorganization Aug. 6, under Chapter 11 of the bankruptcy code.

McLaughlin was given full operating responsibilities by the management committee of the board of directors of the privately held corporation.

In announcing the appointment, Dennis Meyer, senior vice president of finance, said that McLaughlin brings ''successful history, judgement and skills of an elite order to a company with all the requisite elements to advance and thrive.''

Meyer said that he was confident that by streamlining procedures and eliminating redundant operations the company would expeditiously resolve cashflow problems caused by overly optimistic sales forecasts, weather and sluggishness in the economy.

The announcement of McLaughlin's appointment was greeted with approval by Security Pacific Business Credit, which agreed in September to provide $61

million in financing, subject to approval of the U.S. Bankruptcy Court. A hearing on the matter was scheduled for Oct. 12.

''We are pleased with the announcement of Bob McLaughlin's appointment to help carry out this transition,'' a Security Pacific Business Credit spokesman said.

The announcement followed the recent death of Miles F. Sullivan, who was the owner and president of U.S. Leisure Inc. and who had participated in the search and had approved of McLaughlin's selection. Sullivan was known for his highly successful development of U.S. Leisure Inc. into a company with approximately $95 million in sales. He had been president of the company since 1981.

U.S. Leisure Inc. manufactures above-ground swimming pools and quality leisure furniture. The company has headquarters in Incline Village. Little Lake Industries Inc. has headquarters in Willits, Calif., and Muskin Inc. is headquartered in Wilkesbarre, Pa.

The company also has facilities in Calhoun, Ga., near Atlanta; Alexandria, Ind.; Watsonville, Calif.; Pottstown, Pa.; Candler, N.C.; Cedar Lake, Mich.; and Cicero, Ind.

McLaughlin is president of the Sutter Group of Greenbrae, Calif., a management consulting firm which specializes in turning around financially troubled companies and was most recently credited with the successful restructuring of AWD Technologies.

#90283b0630 10/10/1990 ~Business Wire

SAN JOSE, CA (OCT. 10) BUSINESS WIRE - As part of an on-going strategy of offering standards-based support to key systems within an enterprise network, Ungermann-Bass Wednesday introduced the Net/One LAT/TCP Protocol Enhancement for the Access/One intelligent wiring platform.

Ungermann-Bass is the first intelligent hub vendor to provide terminal services for Transmission Control Protocol/lnternet Protocol (TCP/IP) and Local Area Transport (LAT) resources from a single hub.

Net/One LAT/TCP, which is being demonstrated at the Interop trade show in San Jose, provides efficient and cost-effective terminal access to Digital Equipment Corp. systems using Digital's native LAT protocol.

Net/One LAT/TCP is software downloaded to the Access/One Asynchronous Interface Module (ASM-100), leveraging the investment customers have made in

their existing modules and providing the most complete terminal server solution available today.

Because Net/One LAT/TCP is part of the Access/One wiring hub, network managers can take advantage of centralized management functions from the Network Management Console (NMC). Comprehensive configuration, performance and fault management information can be monitored, reviewed and modified through easy-to-use, full-screen network management tools. Net/One LAT/TCP also supports Simple Network Management Protocol (SNMP) and Digital's Terminal Server Manager (TSM).

Ungermann-Bass' Net/One LAT/TCP will be available in December 1990. The ASM-100 Asynchronous Interface Module is available immediately.

Founded in 1979, Ungermann-Bass pioneered enterprise networking -- the sharing of data resources among dissimilar computer systems throughout an organization. Today, Ungermann-Bass is a leading international designer and supplier of standards-based networking hardware and software data communications systems.

#90283b0633 10/10/1990 ~Business Wire

SAN JOSE, CA (OCT. 10) BUSINESS WIRE - Ungermann-Bass Wednesday announced a multimillion dollar agreement with the Chicago Board of Trade, in which the Santa Clara, Calif.-based networking manufacturer was named the primary vendor in a major trading floor network installation.

The network revamp is an integral part of a strategic technology plan developed by the Chicago Board of Trade to ensure that the largest commodity trading organization in the world maintains a competitive advantage.

Roger Bertman, vice president of marketing for Ungermann-Bass, said that the installation, which includes more than 75 of the company's Access/One structured wiring enclosures, a network delivery system which transports data over standard telephone wire, will support more than 2,000 end-user devices including PCs, terminals and printers, as well as provide Tandem 6530 connections on the trading floor.

He noted that this network installation illustrates that Ungermann-Bass is the vendor of choice in financial markets where preserving existing equipment

investments, network management and fault-tolerance are key concerns.

The Chicago Board of Trade and Ungermann-Bass have developed an aggressive network design which will be implemented in several phases. The first stage, underway in late September, involved the pulling of more than 400,000 feet of fiber and Ethernet cable in the two trading floor buildings.

Initially, all data will be transferred on the fiber optic cable using Ethernet technology with an eventual upgrade to Fiber Distributed Data Interface (FDDI). To ensure complete redundancy in the network configuration, four separate backbones have been designed and will be installed with dual connections to each location on the trading floor.

The Tandem systems are an integral component of the network and will be connected directly to the backbones.

Founded in 1979, Ungermann-Bass pioneered enterprise networking -- the sharing of data resources among dissimilar computer systems throughout an organization. Today, Ungermann-Bass is a leading international designer and manufacturer of standards-based networking hardware and software data communications systems.

#90283b0642 10/10/1990 ~Business Wire

MOUNTAIN VIEW, CA (OCT. 10) BUSINESS WIRE -SynOptics Communications Inc. (NASDAQ, NMS:SNPX) Wednesday announced the election of John C. (Jack) Lewis, 54, to the SynOptics board of directors.

Lewis joined Amdahl Corp. as its president in 1977. He became chief executive officer in 1983 and was appointed chairman of the board of Amdahl in 1987. Prior to joining Amdahl he spent seven years with Xerox Corp., where he held positions including vice president of marketing for Xerox Data Systems and president of Xerox Business Systems.

He began his corporate career in sales for IBM's Service Bureau Corp. (SBC) in 1960. When he left IBM in 1970, he was responsible for SBC product planning.

In addition to being chairman of Amdahl's board of directors, Lewis is a director of Vitesse Semiconductor Corp., is on the advisory board at Santa Clara University's graduate school of business, is a member of the American Business Conference, and serves on the boards of directors for the California Chamber of Commerce, the Bay Area Council, and the Santa Clara County (Calif.) Manufacturers Association.

With annual sales in excess of $2 billion, Amdahl is a major supplier of powerful mainframe computers, data storage subsystems, and data communications products. The company also develops systems software and provides educational and consulting services.

SynOptics Communications Inc. designs, manufactures and markets local area networking products based on its Network Utility Architecture, a value-added product strategy which incorporates network connectivity, internetworking, and network management solutions into an integrated networking system.

Revenue of $77.3 million was reported for the fiscal year ended Dec. 31, 1989. Earnings for the same period were $9.4 million or 61 cents per share (adjusted for July 20, 1990 stock split). The company is headquartered at 501 E. Middlefield Road, Mountain View, Calif. 94043.

#90283b0644 10/10/1990 ~Business Wire

MOUNTAIN VIEW, CA (OCT. 10) BUSINESS WIRE - Strengthening its support of industry and de facto standard network management platforms, SynOptics Communications Inc. (NASDAQ/NMS:SNPX) Wednesday announced it will extend its network management strategy to integrate LattisNet Network Management with UNIX management station platforms.

The company will demonstrate working prototypes of management applications based on Sun Microsystems' SunNet Manager and additional UNIX platforms at the INTEROP 90 show held in San Jose, Calif. Wednesday to Friday (Oct. 10 to Oct. 12).

SynOptics chose SunNet Manager as the first platform for development of UNIX-based network management applications because of its status as a market leading technology.

The SunNet Manager platform offers a robust set of tools that are provided as part of the application. When combined with advanced LattisNet Network Management this provides customers with powerful and comprehensive management and control capabilities, while protecting their investment in installed systems and trained technicians.

The combination of LattisNet Network Management and SunNet Manager will result in powerful new applications in the near-term.

SynOptics' support of existing global management platforms such as SunNet Manager and NetView allows customers to integrate the powerful management

capabilities provided by LattisNet Network Management into their enterprise-wide management systems.

This approach is complementary and consistent with the management system architectures of leading systems vendors. Customers get the dual benefit of the support, insight and infrastructure of a large systems vendor, in addition to the value-added applications of SynOptics and other third parties that also reside on their networks.

In combination with extending LattisNet Network Management support in UNIX environments SynOptics plans to enhance the capabilities of all of its network management offerings by developing a variety of value-added applications. Initial applications will build on existing LattisNet architectural capabilities including Expanded View and automatic topology mapping.

SynOptics Communications Inc. designs, manufactures and markets local area networking products based on its Network Utility Architecture, a value-added product strategy which incorporates network connectivity, internetworking and network management solutions into an integrated networking system.

SynOptics' common stock is traded on the NASDAQ National Market System. Revenue of $77.3 million was reported for the fiscal year ended Dec. 31, 1989. Earnings for the same period were $9.4 million, or 61 cents per share (adjusted for July 1990 stock split). The company is headquartered at 501 E. Middlefield Rd., Mountain View, Calif. 94043. #90283b0651 10/10/1990 ~Business Wire

CHARLOTTE, NC (OCT. 10) BUSINESS WIRE - Verbatim Corp. Wednesday introduces its new 5-1/4 inch rewritable optical disks.

This new product comes just days after the introduction of Verbatim 4MB floppy diskettes.

Verbatim's rewritable optical disks operate in Mitsubishi disk drives as well as in other 5-1/4 inch optical drives.

A tough, protective layer makes these disks virtually impervious to moisture, dirt, air pollution and extreme temperatures, and the media is structured for more than 100 million write/erase cycles. Optical disks have all the advantages of floppy diskettes - removability, portability, and fast access to data - yet one optical disk stores enough data to fill more than 21 30MB hard

drives.

Additionally, optical disks are much more durable than hard drives. This durability means that stored data is expected to last at least 10 years, and perhaps as long as 100 years, on a Verbatim optical disk.

The capacity, random accessibility and durability of Verbatim optical disks make them ideal for unattended back-up; archival storage; document management; external memory for mainframes, minis, micros, word processors and local area networks; text and graphics filing systems; financial database storage; and desktop publishing and CAD libraries.

Suggested retail price for each disk is $353.43. Verbatim Corp., headquartered in Charlotte, is a world leader in computer information storage products, including optical disks, floppy diskettes, reel tape and data cassettes and cartridges.

For more information about optical disk technology, write or call Verbatim Corp., 1200 W.T. Harris Blvd., Charlotte, N.C. 28213; 800/538-8589.

     #90283b0659 10/10/1990 ~Business Wire
LOS ANGELES (OCT. 10) BUSINESS WIRE - Medco Reserch Inc. (MEDCO) (NASDAQ:MEDR/BSE:MRE.B) was the subject of an article in the Oct. 8, 1990 issue of Barron's.

Normally, Medco does not comment on Barron's views.

However, since Barron's stated that it has written ''on a couple of occasions in the last three years,'' about ''a little drug company called Medco Research''; and since Medco is quite puzzled why Barron's continues to exhibit such keen interest in Medco, out of a universe of many thousands of small public companies, Medco decided to review the previous articles to see if it could detect some traits that are common to these stories.

Medco discovered that these articles contained one-sided analyses which provided a negative bias and background for predictions of future financial viability and events concerning Medco.

For instance, in July 1987, Barron's stated that, ''At the end of May, Its (Medco's) third fiscal quarter, all it had to show for nine years of existence was a cumulative loss of $1.9 million, barely 30 cents a share in book value and less than $800,000 in cash, which at the latest quarterly rate of outgo, won't last more than six months.''

Obviously Barron's prediction of Medco's impending financial shutdown did not come to pass.

In October 1990, Barron's referred again to Medco's financial condition and this time stated, ''As its uninterrupted flow of red ink suggests, so far anyway, this approach, while cutting down on costs, hasn't yielded a bonanza in sales and has yet to return as much as a thin dime in profits.''

It is ironic that Medco, which Barron's predicted would run out of money back in 1987, is now being faulted in 1990 for not yet having produced a ''bonanza'' in sales.

Nonetheless, while Medco has not generated any profits to date, it has accomplished the next best thing. Namely, Medco commenced generating royalty revenues from U.S. sales of its first product and significantly decreased its net loss.

What Barron's did not tell its readers is that Medco has generated $898,000 of total revenues, derived primarily from royalties, for fiscal year 1990, a four-fold increase compared with fiscal year 1989, while at the same time reduced its net loss to $690,000, which represents a decrease of about 32 percent vs. fiscal 1989. (These figures are still preliminary and subject to final audit.)

In addition, Medco still has no long-term debt. Furthermore, as described in detail in prior public reports, Medco is developing several new drugs in addition to Adenocard and Adenoscan.

JACKSON, MS (OCT. 10) BUSINESS WIRE - KLLM Transport Services Inc. (NASDAQ/NMS:KLLM) Wednesday reported results for the third quarter and first nine months of 1990.

For the three months ended Sept. 30, 1990, revenues increased 7 percent to $31,823,000 from $29,754,000 reported for the third quarter of 1989. Net income increased 41 percent to $985,000, compared with $700,000 in the like period a year ago. Earnings amounted to 38 cents per share, up 39 percent from 28 cents per share in the comparable 1989 period.

For the nine months ended Sept. 30, 1990, revenues increased 8 percent to $93,955,000, compared with $86,637,000 in the first nine months of 1989. Net income rose 40 percent to $2,472,000, or 96 cents per share, compared with $1,764,000, or 69 cents per share, in the like period a year ago.

William J. Liles, Jr., chairman and chief executive officer, commented: ''We are pleased to report on continued improvement in our results. In the third quarter, the operating ratio improved to 91.6 percent, compared with 92.6 percent in the same period last year.

KLLM Transport Services Inc. is an irregular-route common carrier that specializes in temperature-controlled transportation of various commodities throughout the United States.

NEW YORK (OCT. 10) BUSINESS WIRE - Information Management Technologies Corp. (''IMTECH'') (NASDAQ: IMTKA (Class A Common), IMTKU (Units), IMTKW (Class A Warrants)) Wednesday announced that it has expanded the services it provides to Barclays Bank PLC, Oppenheimer & Co. and American Express.

IMTECH's management expects these expanded services to further contribute to revenues in the current quarter which ends Dec. 31.

Pierce Lowrey, chairman and CEO of IMTECH, and long-time micrographics industry leader, commented, ''Expanding the services we provide to our current customer base remains as a key element to our strategy for continued growth. We have expanded the scope of mailroom and duplicating services that we offer to Barclays and have assumed all printing services for Oppenheimer.

''In addition to the printing duties we now perform for American Express, IMTECH will also handle the daily production and dissemination of their in-house news briefing, 'The Daily News.' With an established customer base of over 300 corporate clients and the expansion of the services we offer to these and other clients, we continue our substantial penetration of the industry.''

IMTECH provides on-site and off-site ''outsourcing'' of a wide range of back office services to firms in the services sector. These services include an optical data storage system - Computer Output INformation System (COINS), electronic publishing, fulfillment, printing, reproduction and general mail room operations.

IMTECH's information facilities management (''IFM'') capabilities provide companies with the ability to contract out ancillary services to reduce operating costs and improve productivity, thereby allowing management to focus on its primary corporate objectives.

PHOENIX (OCT. 10) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL; PSE:AWA) reported September 1990 traffic at 885.5 million revenue passenger miles, an increase of 51 percent over September 1989.

Available seat miles for the month rose 42.5 percent to 1.6 billion compared with 1.1 billion during 1989. America West reported a passenger load factor for September 1990 of 55.3 percent, up 3.1 points from September 1989.

The airline also reported third quarter 1990 traffic increased 49.9 percent over the same period in 1989 to 3 billion revenue passenger miles. Available seat miles grew 40.2 percent over 1989 to 4.9 billion while load factor rose 4 points over 1989 to 61.6 percent.

America West again was the nation's leader in on-time performance in August with 84.8 percent of its flights arriving within 15 minutes of schedule. The carrier is the national champion in on-time performance for 1989, 1988 and since the Department of Transportation began mandatory reporting in 1987. America West serves 60 cities from coast to coast and across the Pacific to Honolulu, utilizing a fleet of 96 Boeing aircraft including 747s, 757s, 737s and de Havilland Dash 8s.

#90283b0678 10/10/1990 ~Business Wire

JOHNSON CITY, TN (OCT. 10) BUSINESS WIRE - Vance W. Cheek, chairman of the board and chief executive officer of Home Financial Corp. (NASDAQ/NMS:HFET) Wednesday announced results for the third quarter of 1990, which included a 13 percent increase in net interest income and higher earnings before investment transactions, compared with the like period last year.

The company's results also reflected continued growth in savings deposits and an increase in total capital to more than $100 million vs. $98.6 million at the end of 1989.

In a related matter, Cheek also reported that the Office of Thrift Supervision recently completed its review of the company's wholly owned subsidiary, Home Federal Savings and Loan Association of Upper East Tennessee. This examination resulted in no material adjustments to Home Federal's total loan loss reserves or significant comments on its mortgage lending policies.

''Because of Home Federal's traditionally conservative lending practices, we naturally believed that our loan classifications and total loan loss reserves were adequate, even considering today's economic environment,'' said Cheek.

''We, therefore, were very pleased to have this assessment affirmed by regulatory reviewers. We believe their suggested increase in our reserves of approximately $200,000 is immaterial compared with our already existing reserves of $5.3 million.''

Regarding the company's third quarter results, Cheek noted that net interest income rose to $5,778,000 from $5,109,000 in the like period last year and reflected a provision for loan losses of $361,000 vs. $141,000 last year. Included in the provision this year was both the company's normal quarterly addition to reserves and the addition suggested by the Office of Thrift Supervision.

Net income for the quarter totaled $2,261,000, or 52 cents per share, compared with $2,370,000, or 53 cents per share last year. Third quarter results for 1989 included a pre-tax gain on the sale of investment securities totaling $564,000.

For the first nine months of 1990, net interest income increased 7 percent to $17,162,000 from $15,991,000 in the year-earlier period. Net income was $6,709,000, or $1.52 per share vs. $6,870,000, or $1.54 per share in the like period last year. The year-earlier results included pre-tax gains on the sale of investment securities totaling $939,000; these gains have not recurred in 1990.

Cheek pointed out that the company repurchased approximately 114,000 shares of common stock during the third quarter of 1990, increasing to nearly 171,000

the total number of shares repurchased since the company's stock repurchase program was initiated in May 1990. A total of 400,000 shares are authorized under this program.

''Obviously, we are quite pleased with the company's performance thus far this year,'' said Cheek. ''At a time when many other financial institutions are having to boost loan loss reserves substantially and thereby suffer lower earnings, Home Financial continues to report moderate and sustained growth in its operations according to a conservative philosophy, underscored by $100 million in total capital.''

Home Financial Corp. is the holding company for Home Federal Savings and Loan Association of Upper East Tennessee, which is the leading financial institution headquartered in the region. Federally chartered in 1934, the Association offers a broad line of lending and financial services through eighteen offices strategically located across the Upper East Tennessee area.

NORWOOD, MA (OCT. 10) BUSINESS WIRE - Phoenix Technologies Ltd. has announced new products and a joint development agreement with Intel Corp. that the company says should have a major impact on growth of the small form-factor PC market: laptops, notebooks, and handhelds.

Phoenix announced the industry's first family of ''merchant'' systems software products that can help new and established vendors cut product development costs and get to market quickly.

The company also announced the first product of a joint development effort with Intel, an off-the-shelf system design kit, the VIP 8000SX Express Notebook Design Kit, using the new Phoenix system software and Intel's 82340 laptop/notebook chip set.

The BIOS (basic input/output system) is a necessary component in every computer because it maintains communications management -- and assures basic compatibility -- between software applications and hardware.

Manufacturers of small form-factor PCs have had to overcome some fundamental design barriers -- the need for ''small-footprint'' packaging and battery-power operation, for instance -- and have had to use custom-designed integrated circuits to provide power-management and other processor-support functions.

The new products announced include BIOS (basic input/output system) software tailored for laptops and ''LCD'' graphical displays; plus new Phoenix-designed

power management software -- called Miser(TM) -- that extends battery life by controlling processor and peripheral activity and by providing ''suspend/resume'' features.

The joint development agreement with Intel Corp. calls for BIOS, power management and other systems software to be tuned to Intel processor and support chip sets.

Phoenix Technologies Ltd. designs, develops and markets systems software products for personal computers and laser printers. Its products allow OEMs to offer their customers computers and printers that are compatible with industry standards. More than 300 of the major personal computer and peripherals manufacturers rely on Phoenix for its system-level software and hardware compatibility expertise.

NEW YORK (OCT. 10) BUSINESS WIRE - BizMart Inc. (NASDAQ: BZMT), one of the nation's leading office product superstore retailers, will open its first two or three BizMart Office Products Supercenters in the Central Valley and Bay area of northern California before the end of the company's current fiscal year ending in April 1991.

Ron Stegall, president and chief executive officer of BizMart, told a group of investors during a meeting today in New York that the northern California area has the potential of 15 to 20 stores over the next year or so.

The company will also be entering Oregon and Washington this fiscal year, with the first store opening in Portland this coming week.

BizMart Inc., operates a chain of high-volume office products superstores in 15 markets in Texas, Missouri, Kansas, Colorado, New Mexico, Arizona, Nevada, Utah and Oregon.

Over 7,000 brand-name, high-quality products are sold to small and large businesses at everyday low prices that are discounted 40 to 60 percent from manufacturers' suggested retail prices.

#90283b0684 10/10/1990 ~Business Wire

DAYTON, OH (OCT. 10) BUSINESS WIRE - Mead Corp. (NYSE:MEA) Wednesday reported third quarter net earnings of $45.8 million, or 72 cents per share, which included an extraordinary gain of 9 cents per share resulting from the repurchase of debt, and a one-time 5 cents per share charge to cover settlement of a long-standing patent infringement suit with Unisys Corp.

Net earnings for the same period in 1989 were $69.7 million, or $1.06 per common share, which included a non-recurring gain of 23 cents per share from the sale of Mead Release Products.

Third quarter earnings from operations, excluding the extraordinary and non-recurring items mentioned above, were 68 cents per share, down 18 percent from 83 cents per share in the third quarter a year ago.

Mead's net earnings for the first three quarters were $131.4 million, or $2.07 per share, vs. the previous year's total of $184.5 million, or $2.83 per share for the same nine months.

Sales for the quarter were $1.27 billion, up slightly from 1989 sales for the period, which were $1.20 billion. Sales for the first three quarters of 1990 were $3.64 billion, compared to sales of $3.53 billion for the same period of 1989.

The company also reported that the start-up of its new coated paperboard mill near Phenix City, Ala., is ahead of schedule and proceeding smoothly. The expanded mill, representing an investment now expected to total $580 million, will add more than 1,000 tons per day of coated paperboard capacity for use in beverage packaging and folding cartons.

The company also reported that it is making good progress in addressing the temporary operating problems which adversely affected several of its pulp and paper mills in the second quarter. Mead's mill at Escanaba, Mich., had an outstanding quarter, with operations returning to customary levels. A planned shutdown at the Chillicothe, Ohio, mill for electrical system improvements penalized earnings, but should pave the way for greater reliability in operating performance in the future.

Among the company's distribution and consumer businesses, Zellerbach and Mead School & Office Products posted modest sales gains, but earnings were off due to margin pressures and lower volume of value-added products, respectively.

Continuing retrenchment among large law and financial firms in the U.S. which use electronic information services slowed Mead Data Central's growth rate and reduced earnings in those markets. However, usage of Mead's NEXIS news retrieval service among corporate clients and the news media continues to grow at a good pace. The company continued its investment during the period in database quality improvements and new technology.

The company reported that 1,698,600 common shares had been repurchased during the first three quarters at prices ranging from $31-1/2 to $23 per share.

LOS ANGELES (OCT. 10) BUSINESS WIRE - MagneTek Inc. (NYSE:MAG) Wednesday announced the acquisition of Officine Elettro Meccaniche Marinato (OEMM), Milan, Italy, a manufacturer of lighting components, in a transaction valued at over $10 million.

The announcement was made by Frank Perna Jr., MagneTek's president and chief executive officer.

Founded in 1949, OEMM is one of Europe's leading manufacturers of lighting transformers, such as fluorescent lamp ballasts. The company also makes a variety of transformers for outdoor and emergency lighting applications, including high-intensity-discharge and halogen lighting systems.

MagneTek OEMM will operate as part of MagneTek Europe, the company's rapidly growing European strategic business unit. With headquarters in Bonn, Germany, MagneTek Europe offers a wide variety of electrical equipment throughout the continent and the United Kingdom.

In addition to MagneTek OEMM and MagneTek Germann, MagneTek Europe now includes electric motor plants in the United Kingdom and Hungary, a service organization in the United Kingdom and a power products operation in Germany.

Founded in 1984, MagneTek Inc. manufactures Energy Engineered(TM) lighting ballasts, transformers, motors, generators, drives and controls, and provides electrical equipment repair and rebuilding srvices to utilities and industrial customers. The company operates more than 50 manufacturing and service facilities in North America and overseas, and employs some 15,000 associates. MagneTek reported sales of $1.1 billion for its fiscal year ended June 30, 1990.

LOUISVILLE, KY (OCT. 10) BUSINESS WIRE - H. David Hale, chairman and president of The Cumberland Federal Bancorporation Inc. (NASDAQ/NMS:CMBK), Wednesday announced that net income for the quarter ended Sept. 30, 1990, was $1.25 million (50 cents per share).

As a result, the bank's net loss for the first nine months of 1990 was reduced to $.53 million (21 cents per share).

Stated Hale: ''Third quarter earnings, while not outstanding, are solid. Furthermore, fourth quarter earnings are anticipated to be comparable to those of the third quarter, returning the bank to profitability for the year.''

The Cumberland Federal Savings Bank is a wholly owned subsidiary of The Cumberland Federal Bancorporation Inc., whose common stock trades on the NASDAQ National System under the symbol CMBK. Founded in 1886, The Cumberland has assets of $1.4 billion and is the largest federal savings bank and the third largest financial institution headquartered in Kentucky.

Corporate offices are located in Louisville with 41 offices located in 11 cities throughout the state. The Cumberland offers a full line of banking services with special emphasis on real estate and consumer lending.

#90283b0701 10/10/1990 ~Business Wire
SAN JOSE, CA (OCT. 10) BUSINESS WIRE - Data General Corp. introduced File Transfer, Access and Management (FTAM), Virtual Terminal and OSI/Platform software Wednesday at Interop '90.

These three Open Systems Interconnection (OSI) products are for Data General AViiON servers and multi-user computer systems. With this introduction, Data General offers a UNIX systems-based OSI communication product line that conforms to Government OSI Profile (GOSIP) specifications, mandatory for many U.S. and European government procurement contracts.

The new products expand Data General's existing set of OSI products, which consists of a complete seven-layer OSI implementation on Data General's AOS/VS II operating system. Data General's new OSI products comprise the following:

-- FTAM for AViiON Systems lets Data General users on an OSI-based network perform file transfer and management functions with other systems that comply with the OSI FTAM specification, over Ethernet and wide-area networks.

-- Virtual Terminal Protocol for AViiON Systems enables AViiON users to remotely log on to other GOSIP compliant systems, over Ethernet and wide-area networks. Virtual Terminal Protocol for AViiON Systems supports the Telnet and Transparent profiles as defined by the National Institute of Standards and Technology. Data General is the first system vendor to introduce a GOSIP compliant virtual terminal product.

-- OSI/Platform for AViiON Systems offers a common networking platform for current and future AViiON OSI applications, allowing user applications to

interoperate in a multivendor environment. The product, composed of OSI layers two through seven, includes a programmatic interface that lets users develop custom applications that access OSI transport services.

Data General OSI/Platform for AViiON Systems uses X.25 for AViiON Systems, announced last February, for wide-area connectivity. The OSI/Platform for AViiON Systems will also coexist with other Data General networking applications such as DG TCP/IP and NetWare for AViiON Systems, Data General's version of Novell's Portable NetWare.

Data General is demonstrating how these products interoperate with other major information vendors' products at Interop '90 (Booth 1922). For example, users of FTAM for AViiON Systems are transfering files to other OSI users operating on IBM, DEC, Hewlett-Packard, NCR, Unisys Corp., Sun Microsystems, Retix, and The Wollongong Group Inc. computer systems.

Data General is participating in the Interop '90 OSI Demonstration, the Fiber Distributed Data Interface (FDDI) Demonstration and Simple Network Management Protocol (TCP/IP network) Demonstration.

Interop '90 with over 10,000 people attending, represents one of the leading U.S. trade shows focusing on networking and multivendor communications. Data General is a manufacturer of computer and communication systems for business, industry, education and government.

#90283b0704 10/10/1990 ~Business Wire

NEW YORK (OCT. 10) BUSINESS WIRE - Data Communications, a McGraw-Hill magazine, Wednesday introduced the fourth edition of ''McGraw-Hill's Compilation of Open Systems Standards'' at Interop '90 Exhibition and Solutions Showcase, held through October 12 in San Jose, Calif.

The six volumes offer users instant access to domestic and international standards, including new, revised, or reafirmed standards. Standards are sets of procedures that govern the interaction of computers, terminals and networks which have been formally adopted and widely accepted by manufacturers, user groups, and standardization bodies. The compendium is edited by Harold C. Folts, a pioneer in the field of open systems standards. Folts is president of Omnicom Inc., an organization he founded specifically to provide information and education to industry on specific network protocols.

According to Joseph Braue, editor-in-chief of Data Communications, ''Progress in data communications and open systems hinges on the ability of diverse components of complex networks to trade information.

Because information transfer requires a common basis for communications, we have gathered in this book standards published by all U.S. and international organizations dedicated to norms in data communications, and to the development of truly open systems.''

The compendium -- cross-referenced and indexed for ease-of-use -- is designed for all organizations exploring, planning, developing, designing, or using data communications equipment or networks. It includes standards from all key organizations:

--International Telegraph and Telephone Consultative Committee (CCITT)

--Electronic Industries Association (EIA)

--National Institute of Standards and Technology (NISI)

--National Communications System (NCS)

--International Organization for Standarization (ISO)

--European Computer Manufacturers Association (ECMA)

--American National Standards Institute (ANSI)

--U.S. Government

CCITT is an organ of the Geneva-based International Telecommunications Union (ITU), which develops recommendations for communications-based technologies such as packet switching (X.25), Open System Interconnection (OSI), Message Handling Systems (MHS), ISDN, modems, and facsimile; ISO's ITC 1 ''Information Technology'' committee, along with the International Electrotechnical Commission (IEC), is the key joint technical committee in the development of Open System Interconnection standards; ANSI is a U.S. voluntary group which develops American National Standards in the area of data communications, encryption, text and office systems, and OSI; EIA is a national trade association involved in the development of standards to enhance the growth and competitiveness of the electronics industry.

The six-volume set is priced at $775.00. For additional details and ordering information, please contact Brunny Ayala at Data Communications, 1221 Avenue of the Americas, New York, N.Y. 10020; tel. 212/512-3149; facsimile 212/512-6590.

Data Communications, a monthly McGraw-Hill magazine, reaches 80,000 worldwide professionals responsible for the purchase, use, planning and design of their companies' computer networks.

NEW YORK (OCT. 10) BUSINESS WIRE - The integration of computer and television technologies to create the first video workstation for television production has resulted in an Emmy award for Pinnacle Systems Inc. of Santa Clara, Calif.

The awards dinner was held in New York Tuesday evening at the Sheraton Centre Hotel.

Pinnacle was founded in 1986 by a group of engineers with computer industry backgrounds. The industry's first Video WorkStation was delivered by Pinnacle a year later.

Today there are over 1,000 Pinnacle Video WorkStations in use in broadcast, commercial and industrial television production facilities around the world.

The company introduced its most advanced video workstation, The Prizm, last month at the International Broadcasters Convention, in Brighton, England.

Pinnacle Systems Inc. is located at 2780 Walsh Ave., Santa Clara, Calif., 95051. Telephone is 408/970-9787. Fax is 408/970-9798.

BETHESDA, MD (OCT. 10) BUSINESS WIRE - Survival Technology Inc. (NASDAQ:SURV) Wednesday announced results of operations for its fiscal year ended July 31.

As previously anticipated, the company also reported its third consecutive quarter of profitable operations, with a net income of $440,100, 15 cents per share, for the fourth quarter of its fiscal year ended July 31 on sales of $7.5 million compared to a net loss of $125,000, 4 cents per share, on sales of $4.3 million for the comparable period in fiscal year 1989.

However, profitability in each of the last three quarters of fiscal year 1990 was not sufficient to offset a previously reported first quarter loss. A portion of this loss included certain non-recurring costs incurred by the company in connection with its plan to downsize and restructure operations. As as result, the company recorded a net loss of $360,900, 13 cents per share, for its fiscal year ended July 31 on sales of $20.1 million compared to a loss of $1.4 million, 51 cents per share, on sales of $16.6 million in the prior fiscal year.

The company continues to make significant progress in the expansion of sales of its commercial products. Production and deliveries under new commercial contracts which commenced in the second quarter of fiscal year 1990 have contributed significantly to the current year sales growth and aided the company's return to profitable operations.

The company expects to report a profit in its fiscal year ending July 31, 1991 due in part to anticipated sales of its commercial products to Bristol-Myers and Syntex Laboratories Inc. and continues sales growth of the company's EpiPen Auto-Injector.

Fiscal 1991 results also will benefit from contracts aggregating $10 million received from the U.S. Department of Defense and other allied foreign governments for the production and delivery of military auto-injectors containing nerve gas antidotes. Deliveries under these contracts are expected to be completed by the end of the company's second quarter ending January 31, 1991.

The company also announced that it has signed a new three-year Revolving Credit Agreement with Barclays Bank PLC to replace its previous bank financing. The new financing structure includes a guaranty from and related agreements with the Estate of the company's late founder, Dr. Stanley J. Sarnoff. The agreements provide a credit facility of $4 million and an interest rate less than that charged under the company's previous bank arrangement.

Survival Technology Inc. provides innovative pharmaceutical delivery systems and cardiac monitoring services for the treatment of emergency medical

problems. The company's products include automatic injectors for self-administration by the military, as well as injectors such as the EpiPen auto-injector containing epinephrine for severe allergic reactions and the LidoPen auto-injector (lidocaine) for treatment of cardiac arrhythmias.

Survival provides complete sterile parenteral contract filling and packaging services for prefilled syringes, including pharmaceutical research and development services. The company also operates a transtelephonic cardiac monitoring service for high-risk heart patients and markets the CardioBeeper ECG transmitters.

#90283b0717 10/10/1990 ~Business Wire

FRAMINGHAM, MA (OCT. 10) BUSINESS WIRE - Perini Corp. Wednesday announced that its affiliate, Monenco Ltd., a Montreal-based engineering and project management company in which Perini has a 33 1/2-percent interest, is part of two groups which have been awarded two major multi-million dollar contracts covering engineering, procurement and project management service on the $4.5 billion Hibernia offshore oil project, approximately 195 miles southeast of St. John's, Newfoundland.

The first contract is through a joint venture interest in Newfoundland Offshore Contractors and covers two distinct scopes. One calls for engineering and procurement of the topsides portion of the offshore installation. The topsides consist of five large modules of plant and equipment to be erected on a concrete platform (gravity base structure) standing in 260 feet of water on the continental shelf of the Grand Banks of Newfoundland.

The topsides represent about half the capital value of the Hibernia project. Engineering and procurement will employ some 600 people.

The other scope of work covers project management services. The project will be managed by a task force drawn from the members of the Hibernia consortium and Newfoundland Offshore Contractors (a Joint Venture). The project team, working from St. John's, across Canada and at sources of supply of equipment, material or services around the world, will peak at over 200.

The second contract was awarded to ShawMont Newfoundland Ltd., a wholly owned subsidiary of Monenco Ltd., by the NODECO consortium to provide engineering support for the design of the gravity base structures.

The engineering for this project will be carried out primarily in Newfoundland by ShawMont, working in close collaboration with Doris Engineering of France,

a member of the NODECO consortium and a recognized world leader in the design of offshore concrete structures. The gravity base structure for Hibernia will be the largest in the world.

DALLAS (OCT. 10) BUSINESS WIRE - FINA has agreed to buy nine existing retail gasoline stations in Plano, Allen, and McKinney, Texas from Young Oil Co. and Cedar Crest Investments for an undisclosed amount, according to Henry J. Lartique Jr., FINA's vice president for marketing.

''With this purchase, we expect FINA to become the number two marketer in the North Dallas are in terms of volume,'' said Lartique. ''The purchase represents our first move into the Allen and McKinney markets, and the stations we plan to buy in Plano will further strengthen our position there.''

FINA currently owns and operates 41 gasoline stations in the Dallas/Fort Worth Metroplex, in addition to 195 distributor served FINA branded stations. The nine new properties, which are currently branded Shell stations, will all be converted to the FINA brand and will be operated by FINA.

Lartique said the stations will undergo a $4.7 million upgrading, with many of the stations being razed and rebuilt.

Each of the new FINA stations will feature a full-line convenience store and car wash, and will look similar to FINA's flagship station at the intersection of Preston and Frankford in North Dallas.

Many of the stations also will feature FINA's popular touch-free car wash, which can accommodate oversized vehicles, such as Suburbans and vans, as well as family sedans.

Lartique said it will take three months from the time a station is closed to the time the upgrading work is completed and the station is reopened. All stations are scheduled to be reopened by March 31, 1991.

Each station will sell FINA's unleaded regular, mid-grade, and premium-grade Genesis gasolines, which contain a second generation proprietary additve that cleans dirty engines, allowing more efficient fuel burning with fewer air emissions and increased mileage. In addition, the stations situated on North Central Expressway will offer diesel.

The sale of each station is pending completion of an environmental assessment. Completion of all the purchases is expected by the end of the year. Some of

the construction will begin this year.

Fina Oil and Chemical Co., the main operating subsidiary of American Petrofina Incorporated (ASE: APIA), engages in crude oil and natural gas exploration, production, and marketing; petroleum products refining, transportation, and marketing; and chemicals manufacturing and marketing. Organized in 1956, it is part of an international group of companies affiliated with Petrofina S.A., which is headquartered in Brussels, Belgium.

#90283b0722 10/10/1990 ~Business Wire

ORLANDO, FL (OCT. 10) BUSINESS WIRE - From its Developer Conference here Wednesday, Nantucket Corp. announced that sales of the new release of its flagship product, Clipper 5.0, have exceeded all expectations.

Although distributors Ingram Micro-D and Merisel committed to substantial quantities of the product in advance, most of it sold through to end users in the first ten days, and both distributors continue to place record-breaking orders. Nantucket's second production run is underway, as the company scrambles to meet their restocking orders.

According to Larry Heimendinger, president of Nantucket, the entire initial production run of more than 40,000 copies has been shipped, only three weeks after release. ''We filled the nearly 20,000 upgrade orders before shipping product to distributors, as promised. While we're thrilled with the new sales of Clipper 5.0, we are concerned about the increasing scarcity of the product in the channel.''

Merisel's vice president of products, Linda Kroog, calls Clipper's sales pace ''very unusual for a specialized programming product. Obviously there is a lot of demand for the programming power that the product promises for PC application developers.''

Record-breaking sales of Clipper are not just a U.S. phenomenon. Clare Winter, marketing manager for Nantucket UK Ltd., reports that most upgrade orders will be completely filled by next week, and that distributors throughout Europe have already sold their initial allocation and reordered. The initial German production run of 20,000 copies of Clipper 5.0 shipped last week, and Nantucket's German subsidiary expects sales to match the pace of the English versions.

Nantucket will ship Spanish, French and Portuguese versions of Clipper 5.0 within several weeks, and Polish and Cyrillic versions by the end of the year.

Founded in 1984, Los Angeles-based Nantucket Corp. is the leading developer of application development systems for personal computers. Nantucket products are distributed internationally through offices in the Soviet Union, subsidiaries in the United Kingdom, Germany, Japan, Belgium and Brazil, and a network of full-service distributors throughout the world.

#90283b0723 10/10/1990 ~Business Wire

BOWLING GREEN, KY (OCT. 10) BUSINESS WIRE - Trans Financial Bancorp Inc. (NASDAQ/NMS: TRFI), a bank holding company serving southcentral Kentucky, reported that its third quarter earnings were substantially the same compared with the same quarter in 1989.

The company said its third quarter earnings were $725,000 (58 cents per share) as compared with $727,000 (58 cents per share) for the same quarter in 1989. On a fully diluted, per share basis, earnings were 50 cents for both periods.

For the year to date, earnings were $2,126,000 ($1.70 per share) as compared with $2,064,000 ($1.65 per share) in 1989. Fully diluted earnings per share for the first nine months were $1.47 versus $1.41 in 1989.

Total assets for the Bowling Green-based company increased to $363 million at Sept. 30, 1990, from $345 million a year ago. Chairman and Chief Executive Officer Douglas M. Lester compared the quarters by noting that consumer and corporate loan growth and fee income generated from deposits were offset somewhat by higher operating expenses, most notably, higher FDIC insurance premiums.

The corporation's pending acquisition of First Financial of Russellville Inc. has received approval by the Federal Reserve and should be concluded in the fourth quarter of the year, subject to the approval of the First Financial shareholders, as well as other regulatory authorities.

Trans Financial, a holding company for The Citizens National Bank of Bowling Green and Citizens Bank and Trust Co., Glasgow, Ky., serves southcentral Kentucky through nine offices.

SAN FRANCISCO (OCT. 10) BUSINESS WIRE - First Indo-American Bank reported

Wednesday that net income for the nine month period ended Sept. 30 increased 211 percent compared to the like period in 1989.

For the third quarter, earnings advanced 130 percent over the comparable period last year as total assets grew 22 percent.

Nine month earnings were $134,590, or 18 cents per share, compared to $43,247, or 6 cents per share for the like period in 1989. Total assets grew to $53.8 million from $44 million at last year's nine month mark.

Net loans increased 30 percent to $39.7 million from $30.6 million in the 1989 nine month period, as deposits went up 26 percent to $46 million.

Third quarter earnings were $52,796 compared to $22,988 last year, or 7 cents compared to 3 cents per share.

Robb Evans, president and chief executive officer of First Indo-American Bank, said that he is ''very concerned about the negative economic and political signals that have been coming with increasing velocity in the past few weeks. However, we feel the bank is well positioned for these circumstances. Our capital ratios are among the strongest in the industry. Our portfolio of loans and investments is in good order and of short maturity.''

First Indo-American Bank was established in San Francisco in 1984 by leaders of the Asian-Indian population throughout the Bay area and is primarily a business bank. It is a Federal Reserve member whose deposits are insured by the Federal Deposit Insurance Corp.

LISLE, IL (OCT. 10) BUSINESS WIRE - Molex Inc. (MOLX-OTC) an international electronic components company, Wednesday reported sales of $170.6 million for its fiscal first quarter ended Sept. 30.

This compares with $143.2 million for last year's first quarter.

The lower value of the U.S. dollar compared to other currencies worldwide contributed $4.1 million in net revenue during the first quarter this year, compared to a reduction of $2.3 million due to the strengthening of the U.S. dollar last year.

Earnings for the quarter were $17.1 million compared to a year-ago first quarter tally of $14.7 million. The lower value of the U.S. dollar favorably affected earnings by $0.4 million this quarter, compared to a $0.1 million

reduction last year due to the strong dollar.

Per share earnings for the first quarter were 34 cents compared to 29 cents per share in the year earlier.

Molex's backlog at Sept. 30 totaled $122.1 million, up 25 percent over last year's $97.7 million backlog.

Molex designs and manufactures electronic components, switches and associated application tooling. It is based in Lisle, Ill., U.S.A. Its worldwide operations include 50 plants in 20 countries.

PERTH AMBOY, NJ (OCT. 10) BUSINESS WIRE - Joseph P. Gemmell, chairman, president & C.E.O. of Bankers Corp. (NASDAQ:BKCO), the parent company of Bankers Savings, reported net income of $2,927,000 for the third quarter of 1990 representing a 35 percent increase over $2,172,000 for the same quarter last year.

The recently declared 11 cent dividend payable Oct. 30, 1990 represents a 20 percent payout of the current quarter's 54 cents earnings per share.

Prior year per share comparison is not applicable in that the bank converted from mutual to stock ownership on March 23, 1990 realizing a $40.8 million net capital increase.

Stockholder equity at Sept. 30, 1990 totalled $125.4 million or $23.20 per share. This represents a 13.31 percent GAAP capital ratio relative to assets totalling $942.0 million. Deposits at Sept. 30, 1990 are $742.4 million.

Loan delinquencies of 90 days or more together with real estate owned totalled $15.6 million compared to $13.6 million at Dec. 31, 1989 or 1.66 percent of assets compared to 1.70 percent at year end.

The loan portfolio is comprised primarily of small owner occupied residential mortgages. Gemmell stated, ''Even with our lower risk portfolio, we remain concerned with the general economic conditions within our market area. Accordingly, we felt it prudent to increase the loan loss provision to $400 thousand for this quarter compared to $110 thousand for the same quarter last year.

NEW YORK (OCT. 10) BUSINESS WIRE - Cache Inc., (NASDAQ:CACH), a specialty chain of 63 exclusive women's apparel stores, reported the appointment of Michael Warner as President and General Merchandising Manager.

Warner was previously vice president of the better, bridge and designer sportswear at R.H. Macy & Co. Warner succeeds Norman Polonofsky, who resigned to pursue other interests. The company also announced the promotion of Roy C. Smith to the position of Executive Vice President-Store Operations.

Separately, Cache Inc. expects to report a loss of up to $1.5 million for the

quarter ended Sept, 29. Roy C. Chapman, chairman and chief executive officer, reported the loss was due to a combination of lower than expected sales, a direct result of the softening retail economy, as well as approximately $300,000 of expenses relating to the change in management at the company -- charges, which in the opinion of management are not normal reoccuring expenses.

For further information contact Thomas E. Reinckens, V.P., Chief Financial Officer, Cache Inc., 1460 Broadway, N.Y., N.Y. 10036, 212/840-4246.

LOS ANGELES (OCT. 10) BUSINESS WIRE - Sazale Corp., an international hospitality company, announced the formation of a new hotel management company to be known as the Bel-Air Hotel Group.

The Bel-Air Hotel Group will develop, manage and operate Sazale's international hotel properties. The new management company will also operate five-star luxury hotels and resorts located in major market centers around the world on behalf of other owners and investors.

Sazale currently owns and operates several hotels, traditional Japanese-style inns, restaurants, golf courses and travel agencies in Japan. In addition, Sazale owns the Hotel Bel-Air in Los Angeles and the Hotel du Cap-Ferrat in the south of France and has new hotel properties under development in Hawaii and Bangkok, Thailand.

In connection with the formation of the Bel-Air Hotel Group, Sazale has

appointed Eric Prevette and Carlos C. Lopes as vice chairmen of this new hotel venture, to be based in Los Angeles. Prevette and Lopes will have responsibility for day-to-day management of the company.

Prevette and Lopes collectively share more than 35 years of hotel management experience and have been associated with Rosewood Hotels, Four Seasons, Hilton International and most recently as principals of Windsor Hotel Group. The duo has been credited with the turnaround of The Biltmore Hotel located in downtown Los Angeles.

Prevette and Lopes will continue to manage the current roster of Windsor properties which include The Biltmore, Los Angeles, The Lake Arrowhead Hilton Resort, as well as continuing to provide pre-opening and marketing services for The Mission Inn in Riverside, Calif.

''We are tremendously excited about this new venture,'' said Prevette, vice chairman of the Bel-Air Hotel Group and president of Windsor Hotel Group. ''We see the Bel-Air Hotel Group competing directly with Regent International, Ritz-Carlton, Four Seasons and Mandarin.

''At the same time, we will continue to operate three- and four-star hotel properties as part of Sazale under the Windsor Hotel Group and we plan to seek additional investment and management opportunities.''

''The Bel-Air Hotel Group will establish a new benchmark in defining service levels for our guests,'' added Lopes, vice chairman of Bel-Air Hotel Group and chief operating officer of Windsor Hotel Group. ''Futhermore, it is our intent to design hotels in a manner which will compliment the architecture, environment and cultural heritage of the community in which they are located.

''We will introduce innovative and unique food concepts for each hotel and showcase the best regional cuisine to enhance the guests' overall culinary experience,'' Lopes added.

For further information or to arrange an interview with Lopes or Prevette, please call 213/826-3354.

OREM, UT (OCT. 10) BUSINESS WIRE - James R. Christie has been named vice president for marketing at Sanyo Icon according to an announcement made Wednesday by John R. Bonne, the company's president.

In announcing the appointment, Bonne said: ''Christie, who will report to me,

is a veteran professional with many years of computer industry experience in product management and marketing, sales and as a VAR. His overall in-depth knowledge will be of tremendous value to our company.''

Pior to joining Sanyo Icon, Christie was president of Triathon Business Computers, a VAR firm he founded in 1986. From 1981 to 1986 he was associated with MAI/Basic Four in a number of marketing posts including director of product marketing and national sales manager for large systems. In 1984 he was named vice president for worldwide marketing.

From 1978 to 1981 Christie served as a new products manager at Dataproducts Corp. He was also a member of the technical staff at Rockwell International for three years.

Christie earned a doctorate degree in physical chemistry at Kansas State University in 1971, a bachelor's degree in chemistry at Southwestern College in Kansas in 1967 and also attended Pepperdine University in Malibu from 1976 to 1978, where he undertook coursework in preparation for his master's in business administration.

Christie entered the U.S. Army after completing his doctorate studies in 1971 and served for three years. He is a graduate of both the Airborne and Ranger schools and served as project manager in the Army's Office of Demilitarization of Chemical Materials for two years, supervising projects for the rapid elimination of obsolete chemical munitions at the Rocky Mountain Arsenal and Dugway Proving Grounds.

He received an honorable discharge wih the rank of captain in 1974.

Sanyo Icon is an acknowledged leader in the development and manufacture of LAN server products and multi-function, multi-user networkable computer sytems with a microprocessor design enabling simultaneous use of PICK, UNIX and MS DOS. The company is a subsidiary of Sanyo Electric Co. which has annual revenues of more than $10 billion.

#90283b0798 10/10/1990 ~Business Wire

RONKONKOMA, NY (OCT. 10) BUSINESS WIRE - LOGITEK INC. (NASDAQ:LGTK) Wednesday announced that net sales increased 25 percent to a new record of $5,509,388 and that net income was $192,310, or $.06 per share, for the fiscal year ended June 30, 1990.

These results compare to net sales of $4,419,386 and a loss of $294,916, or $.09 per share, for the fiscal year ended June 30, 1989 (table follows).

Commenting on the fiscal 1990 results, Herbert L. Fischer, LOGITEK President, stated, ''We are very pleased to have achieved record net sales and a return to profitability during the latest fiscal year. The adverse effects of the federal government contract delays, which severely disrupted production during fiscal 1989, were overcome during the first half of fiscal 1990. ''The resulting increased sales volume and uninterrupted production contributed to the gross profit of $2.2 million achieved during the latest year compared to gross profit of only $1.2 million during fiscal 1989. Expenditures during 1990 that we consider sound investments for LOGITEK's future included increased research and development and an expanded sales and marketing effort.

''We have now fully completed the expansion of our manufacturing facilities. Through this expansion, LOGITEK is now poised for major growth during the current fiscal 1991 year and beyond,'' Fischer concluded.

The fiscal 1990 net income and income per share reflect the cumulative effect of a change in the method of accounting related to the company's employee stock ownership plan that resulted in a charge of $37,500, or $.01 per share (net of income taxes of $20,500). There was no change in method of accounting in fiscal 1989. All earnings per share are based on weighted average number of shares outstanding after giving retroactive effect to the 2-for-1 stock split distributed in August 1990.

LOGITEK Inc. manufactures and markets electronic power monitors and controls and electronic power supplies for use in mobile systems such as aircraft and space vehicles, aboard ships, vehicular mobile communications and radar systems, off-shore rigs, and pipeline control stations. In addition, LOGITEK is also engaged in contract manufacturing operations producing high technology finished products to customers' exact specifications.

LOGITEK Inc.

NEW YORK (OCT. 10) BUSINESS WIRE - K-III Holdings announced Wednesday that its subsidiary, Newbridge Communications Inc., has completed the acquisition of Reader's Garden Inc.

Terms of the transaction were not disclosed. Reader's Garden represents the seventh acquisition consummated by K-III since its formation in February of 1989.

The acquisition of Reader's Garden Inc., which operates The Garden Book Club and The Readers Subscription, brings the total number of Newbridge professional and special interest book clubs to seventeen.

As the largest special interest book club operation in America, Newbridge Communications also operates continuity programs for the educational and the home markets, The Fast Track and Gryphon Editions.

''These clubs are an excellent fit for Newbridge,'' said Peter J. Quandt, president of Newbridge Communications Inc. ''They both have strong memberships and a tradition of high editorial standards. We're excited about their prospects for growth.''

K-III Holdings acquired Newbridge Communications (formerly known as Macmillan Book Clubs Inc.) from Maxwell-Macmillan in July 1989. K-III, an affiliate of Kohlberg Kravis Roberts & Co., also includes Intertec Publishing Corp., a publisher of trade magazines and technical books, and K-III Press Inc., which publishes directories and other information products for the transportation industries. K-III's annual revenues exceed $200 million.

#90283b0802 10/10/1990 ~Business Wire
NEW YORK (OCT. 10) BUSINESS WIRE - American International Petroleum Corp. (NASDAQ:AIPN) announced Wednesday the results of the first month to test production of its Toqui-Toqui field in Colombia, South America which commenced on Sept. 8. 1990.

During the past 30 days of intermittent work and testing, the gross production of the four existing wells was 13,800 bbls. of 24 degrees API gravity crude oil, which netted 7,226 barrels for the company's account.

Cumulative production to date, including earlier production tests totals 37,369 barrels. The four individual wells have been tested at rates of 115 to 225 barrels per day. Additional production from the wells could be realized when more producing zones are completed pending the approval of the Ministry of Mines.

The oil is being produced for sale to the Colombian National Oil Co., Ecopetrol, at a pruchase price set monthly based on a basket of world market crude. The company may elect to receive up to 75 percent of its revenue in dollars with the remainder to be paid in Colombian pesos. Transportaion to Ecopetrol's refinery has been arranged through a pipeline owned by Texaco.

Seismic analysis of the Toqui-Toqui field indicates that up to an additional 25 wells may be drilled in the field. Applications have already been submitted for the drilling of 8 additional offset wells.

The company owns a 45 percent workng interest in the field and its wells with a 90 percent interest in one well, which will be reduced to a 45 percent interest once it achieves 100 percent payout of its costs.

The Puli contract area currently comprises about 90,000 acres of land in the Middle Magdalena River basin some 50 air miles west of Bogata. The Toqui-Toqui field covers only a portion of the contract area.

Seismic work has been undertaken in another prospect of the contract area known the Puli anticline, about 15km. northeast of the Toqui-Toqui field. The company and its partners are currently drilling an exploration well at that location.

American International Petroleum Corp. is engaged in refining, oil and natural gas production, transportation, exploration and marketing activities in Louisiana, Kentucky as well as Columbia.

NEWTON, MA (OCT. 10) BUSINESS WIRE - Marcam Corp. (NASDAQ:MCAM), a leading worldwide provider of process manufacturing software solutions for IBM midrange computers, Wednesday announced the release of Warehouse Management, a new logistics module for PRISM.

PRISM is a process manufacturing planning, control and cost accounting system for IBM midrange computers. Process manufacturers include companies in the food, chemical, and consumer goods industries.

Developed in partnership with Ralson Purina and General Foods, Wharehouse Management extends PRISM's inventory capabilities with new detailed management of inventories, warehouse space, equipment and labor, resulting in increased

warehouse space utilization, reduced damaged goods, and improved efficiency of warehouse personnel. Any inventory can be managed -- raw materials, packaging materials, supplies, intermediates, and finished goods.

Warehouse Management also provides capabilities for the putaway, picking, rewarehousing and location management of inventory. This results in more accurate tracking of all warehousing resources. In addition, Warehouse Management adds features specifically designed for process manufacturers, such as additional shelf life control, floor loading, emergency locations, cross docking and pallet tracking.

For complete support of a paperless warehouse operation, Warehouse Management includes the ability to interface to Radio Frequency (RF) terminals which route fork lift trucks in picking, putaway, and related tasks. Warehouse Management also interfaces with automated storage and retrieval systems to provide total automation of high volume warehousing activities.

In addition to the new Warehouse Management module, Marcam also announced PRISM 2.0, an enhanced version of PRISM which includes more than 30 new functions designed to provide information to end users more quicky and with greater accuracy. Enhancements include a faster schedule launch feature that enables users to enter, open and launch a production schedule as one option, thus simplifying and expediting the process of adding unplanned schedules.

A number of on-line features have been added to PRISM 2.0, including an on-line capacity analysis inquiry and an on-line lot tracking inquiry. Through the on-line capacity analysis inquiry, users can quickly identify -- in a graphical or tabular format -- resources that are over or under capacity for a specified time period. The on-line lot tracking inquiry enables users to track all schedules, sales and transactions where a lot was used, resulting in better traceability.

The Warehouse Management module and PRISM 2.0 will be available for customer delivery in first quarter 1991. Prices for the Warehouse Management module start at $18,000 and vary depending on hardware configuration.

Marcam Corp. supplies applications software as well as systems integration and education services to process manufacturers using IBM AS/400 and System/38 computers. The company is an IBM Authorized Industry Applications Specialist and Business Partner, and a member of IBM's Cooperative Software Program. Founded in 1980, Marcam has 13 offices throughout North America and Europe, and is represented in more than 25 countries. Marcam customers include Kraft/General Foods, Coca-Cola USA, Ralston Purina, SmithKline Beecham, Gillette, and Rhone Poulenc.

OAKLAND, NJ (OCT. 10) BUSINESS WIRE - The Dewey Electronics Corp. (OTC:DEWY) announced Wednesday that the Armed Services Board of Contract Appeals has denied the company's appeal of a prior decision disallowing the company's claim for reimbursement of $1,386,000 of direct contract costs incurred by the company and requiring payment by the company to the government of $166,000.

The company intends to file a motion for reconsideration by the Armed Services Board of Contract Appeals of its decision. If such motion is not granted, the company will be required to write-off $1,386,000 of direct contract costs currently carried as a long-term asset on the balance sheet.

The company currently is not in compliance with certain covenants under its long-term loan agreement and is in discussions with the bank regarding a waiver of such non-compliance.

#90283b0843 10/10/1990 ~Business Wire
STATEN ISLAND, NY (OCT. 10) BUSINESS WIRE - Gateway Bancorp Inc. of Staten Island, holding company for Gateway State Bank, announced that its consolidated net income for the nine months ended Sept. 30 was $3,344,000, or 87 cents per share, as compared to $4,311,000, or $1.12 per share, for the comparable period in 1989.

The weighted average number of common shares outstanding was 3,854,874 and 3,839,982 for the nine months ended Sept. 30, 1990 and 1989 respectively.

Consolidated net income for the third quarter of 1990 was $940,000, or 24 cents per share, as compared to $1,552,000, or 40 cents per share, for the comparable period in 1989. Where applicable, share and per share amounts have been adjusted to reflect the ten percent (10%) stock dividend declared on March 13 to shareholders of record as of April 3, paid on April 20.

The decrease in consolidated net income for the nine and three month periods ended Sept. 30 was primarily attributable to increases in the provision for loan losses, the level of nonaccruing loans, and noninterest expense.

The provision for loan losses was $877,000 and $242,000 for the nine and three month periods ended Sept. 30, 1990, respectively, as compared to $450,000 and $150,000 for the corresponding periods in 1989. Average nonaccruing loans

were $5,513,000 and $7,153,000 for the nine and three month periods ended Sept. 30, 1990, respectively, as compared to $2,053,000 and $2,129,000 for the corresponding periods in 1989.

Noninterest expense was $7,940,000 and $2,882,000 for the nine and three month periods ended Sept. 30, 1990, respectively, as compared to $6,225,000 and $2,058,000 for the corresponding periods in 1989.

Average earning assets for the nine months ended Sept. 30, 1990 were $249,112,000, representing a 9.2 percent increase over $228,128,000 for the comparable period in 1989. This increase in average earning assets was funded by an increase in the average deposit base and the retention of net income.

Total assets grew by $19,741,000, or 7.7 percent, from $256,428,000 at Sept. 30, 1989 to $276,169,000 at Sept. 30, 1990. Total deposits grew by $15,899,000 or 7.1 percent, from $223,108,000 at Sept. 30, 1989 to $239,007,000 at Sept. 30, 1990.

NEW YORK (OCT. 10) BUSINESS WIRE - Philip Morris Companies Inc. has announced that Marc S. Goldberg was elected senior vice president, corporate planning for Philip Morris Companies Inc.

He will report to Hamish Maxwell, chairman and chief executive officer.

Goldberg, 47, served as president, Latin America region of Philip Morris International Inc. since 1988. In this position, he was responsible for all of the company's business in the Caribbean and Latin America, as well as the company's investment in Rothmans, Benson & Hedges Inc. in Canada.

Previously, Goldberg had been executive vice president, Latin America/Iberia. He became a vice president of Philip Morris International in 1980.

Goldberg joined the company in 1972 as director of finance and administration, Latin America/Iberia, Philip Morris International, and was named area director of Philip Morris' business in Argentina, Brazil and Uruguay in 1977. He was appointed vice president in charge of these markets in 1978.

Prior to joining the company, Goldberg was with Coopers & Lybrand in Toronto, Canada.

Goldberg received a bachelor of science degree in business administration from Boston University in 1964 and earned his LL.B. degree from Cornell Law School

in 1967. He is a member of the New York State Bar Association and the American Institute of Certified Public Accountants.

Goldberg is a director of Rothmans, Benson & Hedges Inc., Canada; a director of the Council of the Americas; vice president of the Brazilian Cultural Foundation; director of the Brazilian American Chamber of Commerce, and a member of the Cornell University Corporate Liaison Committee.

Philip Morris Companies Inc. has five principal operating companies: Philip Morris Incorporated (Philip Morris U.S.A.); Philip Morris International Inc.; Kraft General Foods, Inc.; Miller Brewing Company, and Philip Morris Capital Corporation.

Kraft General Foods, Inc., has seven operating units: General Foods USA, Kraft USA, Kraft General Foods International, Kraft General Foods Canada, Oscar Mayer Foods, Kraft General Foods Frozen Products and Kraft General Foods Commercial Products.

Philip Morris Capital Corporation is engaged in financial service activities. Its subsidiary, Mission Viejo Company, is engaged principally in land planning development and sales in southern California and Colorado.

TAMPA, FL (OCT. 10) BUSINESS WIRE - Action Capital Corp., a subsidiary of Action Staffing Inc. (NASDAQ:ACTS) Wednesday announced that it has executed a non-binding letter of intent contemplating, among other things, the acquisition by Action Capital Corp. of certain shares of stock of J.W. Gant Financial Inc. (NASDAQ:JWGFU).

The contemplated transaction would involve the exchange of 4,752,173 restricted shares of common stock of J.W. Gant Financial Inc. held by certain individuals for 4,752,173 shares of authorized but unissued stock of Action Staffing Inc.

In addition, Action Capital Corp. will acquire from J.W. Gant Financial Inc. 3,618,340 common shares and 3,618,340 preferred shares of J.W. Gant Financial Inc. stock in exchange for 7,236,680 shares of authorized but unissued common stock of Action Staffing Inc.

Consummation of the proposed transaction is conditioned upon a number of items including the negotiation and execution of definitive documents, resolution of certain legal matters, receipt of necessary approvals from certain state and federal regulatory authorities and receipt of any requisite corporate shareholder and director approvals.

Tampa-based Action Staffing Inc. is a leader in employee leasing for business and industry with 12,000 employees under lease in 32 states. Action Capital Inc. operates as the financial arm of Action Staffing Inc.

J.W. Gant Financial Inc. is a holding company for its wholly-owned investment banking and securities brokerage subsidiary, J.W. Gant & Associates Inc. An operationally-integrated self-clearing firm, having its headquarters in Englewood, Colo., with its regional office in Boca Raton, Fla.

It is a member of the Boston Stock Exchange and the NASD. J.W. Gant Financial Inc. is currently a market-maker in the securities of Action Staffing Inc.

GROUP LED BY SUNBEAM-OSTER EQUITIES LP OWNS 10,226,338 SHARES (100.00%) OF ALLEGHENY INTERNATIONAL INC (TICKER: AG) OF PITTSBURGH, PA.

ANNOUNCEMENT:

The company acquired all of the assets of Allegheny International Inc. on Sept. 28, 1990 and succeeded to the registration of Allegheny of its equity securities under the SE Act of 1934, as amended. On July 12, 1990, the court confirmed the debtors' joint stock plan of reorganization, dated Dec. 29, 1989 as amended, and on Sept. 13, 1990, the court approved certain modifications thereto. Pursuant to the modified plan, the Company and Allegheny entered into an asset purchase agreement, dated Sept. 28, 1990. Also, pursuant to the modified plan, on Sept. 28, 1990, 10,226,228 shares of common stock were issued to SOE, in satisfaction of Allegheny secured bank claims held by SOE and, in addition, the plan provides, among other things, that the holders of certain allowed creditors claims and equity holders will be granted an election to receive in exchange for their claims either the cash amount set forth in the modified plan or newly issued common stock of the company and/or warrants to purchase common stock of the company. The election shall be made during the 45-day period commencing on Sept. 28, 1990 and the cash and securities shall be distributed within 30 days thereafter. After completion of the election, SOE reserves the right to seek to acquire the shares of common stock not then owned by SOE, through a merger of the company with an affiliate of SOE or similar transaction. SOE is governed by the agreement of limited partnership of Sunbeam-Oster Equities LP.

PURPOSE:

SOE acquired the shares of common stock for the purpose of acquiring control of the company.

LIMA (OCT. 10) - Peru is to receive a bridging loan of 2.03 billion dollars to meet debts in arrears with the International Monetary Fund, World Bank and Inter-American Development Bank, Prime Minister Juan Hurtado Miller said.

Mr. Hurtado, also economy minister, was reporting Tuesday on meetings between the government and multilateral organizations on Peru's efforts to re-join the international financial community after years of isolation.

About 1.2 billion dollars will be loaned to Peru by a group of countries that includes Canada, France, Germany, Italy, Japan, Spain and the United States, he said.

He added that the Andean Reserve Fund would loan 370 million dollars and another 450 million dollars from its drawing rights with the IMF.

Mr. Hurtado said the international loan would not increase Peru's foreign debt of about 20 billion dollars.

He announced that the government would negotiate with the Paris Club in January and with the Club's consulting group and non-affiliated creditor countries in February.

The government is to open negotiations with creditor banks in March.

LONDON (OCT. 10) - China has secretely delivered 24 main battle tanks (MBT) to the Khmer Rouge in Cambodia, marking the first shipment of heavy armour to the guerrilla forces in the 12-year Cambodian war, Janes' Defense Weekly reported Wednesday.

The tanks, delivered to Khmer Rouge forces in the past two to three months, represent "the most significant increase in firepower the resistance to the Vietnamese-installed government has ever received," Jane's said.

The tank shipment was detected by Western intelligence satellites and the article said intelligence analysts in Bangkok believed the tanks were the Chinese Type 59 model.

Twelve of the tanks were presently located at the Khmer Rouge-controlled district capital of Anduns Veng in north Cambodia, while the remaining 12 were being kept near the Khmer Rouge district capital of Pailin in the western province of Battambang, Jane's said.

Frontline guerrilla commanders said half of the new tanks were to be used in an upcoming Khmer Rouge offensive to seize the key provincial capital of Siem Riep and the ancient temples of Angkor Wat.

The tanks were delivered from China by sea to Thailand early this year but were held up for unknown reasons before being transferred to Khmer Rouge forces the article said, citing unidentified Western intelligence sources.

The delivery was made after peace talks in Tokyo, boycotted by the Khmer Rouge and their Chinese backers, failed.

The shipment "marks a shift to conventional tactics in the wake of major guerrilla gains in rural areas in the last months," Jane's said.

Jane's also reported that Khmer Rouge forces had captured at least four Soviet-built T-54 tanks in the past year, all of which were now being kept at Paililn.

Guerrilla tank crews had been trained at military bases in China and the Khmer Rouge -- the communist faction in the tripartite coalition resistance to the Vietnamese-backed government of Cambodia -- is fully operational in the use of armour, according to guerrilla sources cited in the article.

It said the offensive against Siem Riep would be launched at the end of the rainy season in December or January.

BEIRUT (OCT. 10) - Rival Christian factions have clashed northeast of the Lebanese capital, wounding five civilians in the worst fighting in the region for two weeks, security sources said Wednsday.

Troops loyal to renegade Christian military leader General Michel Aoun traded rocket and automatic weapons fire late Tuesday with the Lebanese Forces militia.

Gen. Aoun and the militia have been locked in a bitter battle for supremacy over Christian regions in and around Beirut for almost a year. More than 1,000 people have been killed since February.

The Metn region which the general controls northeast of Beirut has been under a government-imposed blockade since September 28. The measure aims to force him to recognise the Syrian-backed government of President Elias Hrawi.

BEIJING (OCT. 10) - China will shut down textile factories found to be turning out inferior quality products, Textiles Minister Wu Wenying said at the start of a quality-control campaign in the industry.

"For those producing sub-standard products, we will withdraw their licences for production and export without consideration," said Mrs. Wu, quoted Wednesday in the official China Daily newspaper.

Textiles are China's leading source of foreign exchange, accounting for 25 percent of its export earnings, and several foreign-trade experts say quality, rather than price, has been the weakest aspect of Chinese export goods.

Mrs. Wu, who worked in a textile factory before the Communist Party took power 41 years ago, said she personally would make spot checks on cotton-yarn and fabric production lines, and publish the results.

Twelve "special groups" made up of industry experts are to be sent to textile production centers around China, while similar teams are to be set up at the provincial and local levels, China Daily said.

Mrs. Wu, whose ministry has designated 1990 as "The Year of Textile Quality and Variety," said earlier efforts this year to improve quality had paid off,

with over 90 percent of cotton fabrics produced in Guangdong, Fujian, Beijing and Nanjing meeting export standards.

Luxembourg (OCT. 10) - Economics and trade ministers of the 12-nation European Community (E.C.) began a one-day review here Wednesday of the E.C.'s position for the final phase of the ''Uruguay Round'' of trade liberalisation talks under the Gatt framework.

But the ministers were lacking a major component in what is to be the E.C.'s position at the General Agreement on Tariffs and Trade talks - farm subsidies - meaning that the Community will not be able to meet Gatt's deadline for presenting its negotiating proposals.

Over 100 nations are to enter the final phase of Gatt negotiations in Geneva on October 15. Gatt secretary general Arthur Dunkel has demanded that all participants put their cards on the table then.

A spokesman for the Italian delegation, the current chairman of the E.C. ministerial council, said the trade ministers would not be drafting a position on the farm subsidy issue over the heads of the farm ministers.

The farm ministers are to meet again next week - at the same time that the

Gatt talks resume in Geneva - to debate again an E.C. Commission proposal that the E.C. should seek a 30 percent worldwide cut in agricultural subsidies for the ten-year period 1986-1996.

The economics and trade ministers will then hold a special meeting on October 18 to draft the E.C. position in the Gatt talks, the Italian spokesman said.

The final new world trade liberalisation agreement, covering 15 areas of international trade and commerce, is supposed to be concluded in December 3-7 talks in Brussels. The thorniest problem remains the issue of cuts in subsidies to farmers.

#90283d0310 10/10/1990 ~French/German News Agency

MBARARA, Uganda (OCT. 10) - At least 1,000 Rwandan villagers were massacred by the Rwandan army in an attack against rebels from Uganda on Monday, refugees at the Uganda border post of Kizinga said Wednesday.

Stephen Kabaleka, a refugee priest, said the Rwandan army accused the villagers of supplying rebel forces with food and guns.

The 500 refugees, the first to enter Uganda since the invasion of their central African nation 11 days ago, said the Rwandan army wiped out three of 10 villages in north-east Rwanda.

Father Kabaleka said each village had an estimated 400 to 500 inhabitants. "There is no way one would have escaped since the soldiers had cordoned off each village before opening fire", he said.

Feresian Rutakubana, 15, who suffered multiple leg injuries said he saw "many bodies".

"The soldiers threw a grenade inside a house where about 30 of us were hiding and I think I am the only one who survived," he said.

The majority of the refugees were women and children.

"When I ran away, my husband was lying in a pool of blood", a 25-year-old woman carrying a three-month-old baby said.

A commander in the National Resistance Army - the official Ugandan army - at the border post, Captain Samuel Kizza, said he had heard heavy shooting across the border early Tuesday morning.

The refugees have no food, water, nor medicine. Captain Kizza said he had given them one bag of maize flour for porridge.

ATHENS (OCT. 11) - The Greek consumer price index rose by 3.5 percent in September compared with August, and compared with a monthly increase of 3.6 percent a year earlier, official figures showed on Wednesday.

This took the increase in prices during the previous 12 months to 21.8 per cent, and for the first nine months of the year to 19.6 percent.

-30- 550
#90283d0440 10/10/1990 ~French/German News Agency

Colombo (OCT. 10) - Rebels of the Liberation Tigers of Tamil Eelam have relaxed restrictions on the movement of Tamil civilians out of northern Sri Lanka, unleashing a torrent of people heading south, according to refugees arriving here Wednesday.

More than 3,000 civilians began fleeing south early this week as soon as restrictions were eased, eyewitnesses said.

Restrictions had been imposed by Tamil rebels during intensified military operations about three months ago in a bid to avert a mass exodus of civilians out of the north.

Civilians arriving in Colombo Wednesday said over 3,000 people were seen at an army checkpoint in the northern town of Vavuniya while they were on their way to the capital.

The civilian population was earlier required to obtain permits from the Tamil rebels on payment before leaving the north. With the relaxation of restrictions, more were said to be planning to leave the northern peninsula to escape battle-imposed hardships.

Civilians said they had traveled mostly by night with vehicle lights switched off to prevent possible air attacks by Sri Lankan government forces. Rebels were moving freely in the Jaffna peninsula and troops were confined to the northern army camps in Palaly, Kankesanthurai and Elephant Pass, they added.

#90283d0480 10/10/1990 ~French/German News Agency

PRAGUE (OCT. 10) - The German carmaker Volkswagen appeared to be close to reaching agreement with the car firm Skoda to buy into the Czechoslovak

company, sources at both firms said Wednesday.

They said that VW chairman Carl Hahn would lead a delegation to Czechoslovakia from October 29 to November 1, visiting both Prague and Bratislava, at which time an agreement could be signed.

"The signals in VW's favor are very positive," said one VW official. A skoda official confirmed the view.

The decision for the German carmaker has apparently followed a recent tour by several ministers in the Czechoslovak government, first to the French car concern Renault, then to VW's Spanish subsidiary Seat, and finally to VW headquarters in Wolfsburg.

Skoda and VW officials said that a few obstacles toward an agreement remain, but that these could be worked out by the time of Hahn's visit. A key issue is VW's insistence that it should not be restricted to gaining only a minority share in Skoda, as demanded by the Czechoslovak side.

#90283d0490 10/10/1990 ~French/German News Agency

STOCKHOLM (OCT. 10) - The Swedish car manufacturer Volvo and France's Renault which signed an agreement on close co-operation, must continue to sell their cars under separate names, Volvo head Pehr G. Gyllenhammar said here Wednesday.

"Our trade-marks are our biggest capital," Mr. Gyllenhammar told the daily Svenska Dagbladet newspaper.

But he said that it would still be possible to sell cars under separate names on the same premises, and he did not rule out the sale of Renault vehicles through Volvo's network in the United States.

In the United States, Volvo sold cars in the middle and top ranges, but not small cars which consumed less petrol and cost less to run, he said.

The United States is Volvo's biggest foreign market and accounted for the sale of 101,000 Volvo cars in 1989.

Under the agreement with Renault, Renault will acquire 25 per cent of Volvo Car and Volvo will acquire 20 per cent of the capital and voting rights, and an option on five per cent, of Renault.

The two companies will also exchange equity holdings in their lorry businesses.

DOHA (OCT. 10) - Iraqi forces have opened fire on demonstrators protesting food shortages linked to the Gulf crisis, killing or wounding an unspecified number of people, a Qatari newspaper reported Wednesday.

Ash-Sharq daily, citing unidentified sources in Baghdad, said the shooting took place recently in Iraq's southern port city of Basra. A number of people were also arrested, the report said.

The demonstrators had been urging the Iraqi government to "avoid war because it would be a catastrophe."

Iraq has faced a U.N. economic embargo since its August 2 invasion of Kuwait and there have been reports of food shortages in the country, amid rationing on staple goods.

#90283d0690 10/10/1990 ~French/German News Agency

MOSCOW (OCT. 10) - The Soviet Communist Party has backed the privatisation of small businesses, which would allow capitalism back into the country after over half a century, a senior party official said Wednesday.

Vladimir Ivashko, the party's deputy leader, said a plenary session of the party's central committee, approved of the transition to a market economy during its two-day session here Monday and Tuesday.

Soviet President and party leader Mikhail Gorbachev is to put forward his proposals for economic reform on October 15 after being mandated to do so by the Supreme Soviet.

But Mr. Gorbachev appears not have given full details of his reforms to the central committee plenum, asking it only to approve the overall plan, according to statements made by Mr. Ivashko and other top officials at a press conference.

The central committee "gave no assessment of any (economic) programme," the deputy party leader said.

However, the Communist Party of the Soviet Union does not rule out private property over means of production," Mr. Ivashko noted.

"I think that for a long time (privatizations) will be limited to small businesses," he added, speaking of the impending economic reforms.

This privatization should be carried out in stages, he said, adding that private businesses might account for about seven per cent of the total number of such small enterprises within 10 to 12 months.

On the privatization of factories and larger firms however, Mr. Ivashko expressed the view that people would not be able to afford them.

He also rejected the idea of a free distribution of shares to workers and others, saying this would require too much legislative work. "Our time has already completely expired" for the preparation of the economic reform, he added.

Mr. Ivashko also rejected the idea of the privatization of land, saying that even writers such as Leon Tolstoi considered that "in the conditions of Russia, private property of land was a great wrong".

#90283d0750 10/10/1990 ~French/German News Agency

TUNIS (OCT. 10) - The Palestine Liberation Organisation will reject any United Nations resolution that fails to ensure the protection of Palestinians in the Israeli-occupied territories, a senior PLO official here said.

Yasser Abed Rabbo, a member of the PLO's executive commitee, also said the organization would hold the United States "responsible for the possible failure by the United Nations to reach a resolution aimed at protecting" Palestinians.

"We don't want a new resolution that will, as many others have, merely be a verbal condemnation (of Israel) because it will not have any practical power and will only encourage Israel to pursue its repression," said Mr. Abed Rabbo.

The PLO, he said, seeks a resolution that will "place the occupied territories under international supervision."

Mr. Abed Rabbo urged the Security Council to "assume its responsabilities to ensure the protection of the Palestinian people, who are subjected to daily massacres."

The Security Council was expected to resume consultations Wednesday afternoon that began Monday, hours after Israeli police shot dead 21 Palestinians in east Jerusalem and wounded 150.

Yemen and the United States have submitted separate draft resolutions asking for investigations into the bloodbath.

But while Yemen, on behalf of non-aligned countries, asked that the Security Council send a three-man mission to Israel, the U.S. request specifically called on the U.N. Secretary General to name the team.

#90283d0850 10/10/1990 ~French/German News Agency

LAGOS (OCT. 10) - Major structural changes are to be made soon in the Nigerian army in a bid to keep the military out of politics, chief of staff Salihu Ibrahim said in an article in the latest issue of the army publication Soja.

The aim was to turn out a more professional army dedicated exclusively to defending the nation, and to find a "permanent and enduring solution" to Nigeria's "perennial problem" of military interference in politics, General Ibrahim wrote.

The current military-led government is due to hand back power to civilians in October 1992.

Gen. Ibrahim said: "The solution being sought is not only aimed at ensuring that the military goes back to the barracks, come 1992, but that it remains permanently in the barracks once and for all".

That would require a "complete reorganisation" of the army, he noted.

Last month a large number of generals were retired as a preliminary step.

Military involvement in politics had been responsible for "the general falling standard of professionalism and discipline" in the military, with officers and men taking their military careers for granted, Gen. Ibrahim said.

#90283d0890 10/10/1990 ~French/German News Agency

JERUSALEM (OCT. 10) - The Israeli police went on the defensive Wednesday against mounting criticism of its handling of unrest in east Jerusalem where more than 20 Palestinians were shot dead two days earlier.

"We refuse to be the only scapegoats," Police Commander Yaacov Terner said on Voice of Israel radio.

In the latest violence, sporadic clashes were reported between Palestinian demonstrators and Israeli security forces in the Israeli-occupied West Bank and Gaza Strip, where at least five Arabs were shot and wounded.

Correspondents in the territories said a strike by Palestinians to protest Monday's bloodbath was in its second day, while the army maintained its curfew on several communities.

The police commander dismissed charges of incompetence leveled against the force by the media and several political parties after the unrest in which police killed 21 Palestinians and wounded 150.

Israeli newspapers and some political groups have accused the police of failing to foresee and prevent the events that led to the bloodbath on the Temple Mount -- an east Jerusalem site holy to both Moslems and Jews.

Yossi Sarid of the leftist Ratz movement demanded an urgent meeting of the parliamentary committee on foreign affairs and defense.

Under public pressure, Police Minister Ronnie Milo said Tuesday he would name an independent commission to investigate the Temple Mount carnage, after scrapping an earlier decision to launch an internal police inquiry.

Two independent dailies set down conditions for the inquiry.

"This independent commission must also explain how women and Palestinians fleeing the scene were shot at point-blank range," the influential Haaretz newspaper said.

The daily Hadashot said the committee to be appointed by Mr. Milo should include "representatives of the concerned party: Moslem Arabs."

#90283d0950 10/10/1990 ~French/German News Agency

CAIRO (OCT. 10) - Egyptian newspapers Wednesday warned Israel against assuming that the Gulf crisis gave it a free hand to crack down on the Palestinians.

"Israel is making a mistake if it thinks that because the Arabs and the rest of the world are preoccupied by the Gulf crisis it is free to do what it likes in the occupied territories and to profane Moslem and Christian holy sites in Jerusalem," said the pro-government newspaper Al-Akhbar.

The press here continued to react to Monday's killings of 21 Palestinians by Israeli police near Moslem and Jewish shrines in east Jerusalem.

"Perhaps there is a tacit accord between authorities in Tel Aviv and the leader of Baghdad by which the latter will allow the Israelis a free hand in occupied Palestine to commit crimes similar to those he, himself, has committed against the Arab people of Kuwait," Al-Akhbar commented.

Egypt has been among the harshest Arab critics of Iraqi President Saddam Hussein and his decision to invade and annex neighboring Kuwait last August.

Another newspaper, Al-Gumhouriya, said Israel had misunderstood the Gulf crisis by seeing it as a chance "to complete its plans to rid the holy city of its original population by terror and extermination in order to make way for the immigration of Jews from the Soviet Union and eastern Europe."

For the opposition newspaper Al-Wafd, the United States, "the only country capable of restraining Israel," must convince its ally that it is not authorized "to commit aggression against the Palestinians and the holy sites."

#90283d0970 10/10/1990 ~French/German News Agency

KARACHI (OCT. 10) - Pakistan's ousted prime minister Benazir Bhutto Wednesday pleaded not gulty before a special court trying her on charges of misconduct and abuse of power.

She accused President Ghulam Ishaq Khan of leading a campaign to smear her.

Ms. Bhutto, who was exempted from appearing in court personally, pleaded not guilty in a written statement, witnesses said.

Heavily armed police searched visitors and blocked entry to the high court building, with only those holding special passes allowed in.

The counsel for Ms. Bhutto took exception to the presence of police dogs outside the court and to police searches of lawyers.

He demanded that police be present in uniform because he said plainclothed police had been involved in "hooliganism" at the Lahore high court on October 2 when Ms. Bhutto appeared at a hearing which the interim government said was disrupted by Bhutto supporters.

Traffic outside the court moved peacefully and members of Ms. Bhutto's People's Pakistan Party (PPP) failed to turn out at the court building.

Ms. Bhutto said that under article 248 of the constitution, a prime minister was not be answerable to any court for the exercise of powers and performance

of functions.

"The special court had no jurisdiction to issue notice," she said, because the cases filed against her by the interim government pertain to her actions as prime minister.

One case against her relates to alleged irregularities linked to an Asian Development Bank-funded energy development project. The other relates to the sale of cotton bales to alleged favorites at lower than market prices.

The cases were adjourned until Thursday.

Ms. Bhutto also faces two cases in a special court at Lahore where she appeared on Tuesday.

KHAFJI, SAUDI ARABIA (OCT. 10) - Kuwaitis arriving here from the ravaged emirate said many Iraqi troops are tired and want to go home and appealed desperately to U.S. President George Bush to take action to prevent the further destruction of their homeland.

"I think the U.S. or some other country has to do something," said Faisal al-Ali, a 33-year-old civilian employee of the ministry of defense who crossed into Saudi Arabia on Monday with his wife and their two-month-old son. The boy was born on August 1, the day before the Iraqi invasion of Kuwait.

Explaining his reluctant decision to leave the emirate, Mr. Ali said: "I love Kuwait but unfortunately nobody is doing anything."

"Resistance is very slow right now because they have been checking every car and nobody's safe," he said as he sat with his wife and child in a car packed full of belongings while waiting to be processed by Saudi officials.

"If you go travel in the night you don't know if you come back to your home or not," he said.

Mr. Ali said Iraqi troops were carrying out summary executions in Kuwait City, particularly of young men.

"So many of my friends have been killed," he said. "They bring somebody who's been arrested to his family's home, ring the doorbell and when his parents come they shoot him."

A woman waiting in a Mercedes Benz with her seven-year-old daughter, five-year-old son and one-month-old baby said many Kuwaitis are frustrated.

"People want the problem to be solved even if it comes to war," said the woman who like many of the refugees declined to give her name out of fear for relatives still in Kuwait.

"We are ready to sacrifice," she said. "(Kuwaitis) are ready to die in their country and let it finish because everyday it's getting worse. The country is getting empty."

She said there had been no activity by Kuwaiti resistance fighters in her area although she had heard explosions in other parts of Kuwait City.

"The most important thing is the resistance of the people not to work with the Iraqis. They are indoors at home refusing to go to work," she said.

The woman said that many Iraqi troops were demoralized and were scrounging for food and water from house to house.

"They are tired of standing outside just checking cars every day," she said.

"Bush must push Saddam Hussein off his chair," said Adel, a 25-year-old airport worker as he sat in a white station wagon in a dusty parking lot after fleeing across the desert with his mother, sister and six-year-old brother.

He said the situation in Kuwait City was near anarchy. "There's no control. The officers are comfortable but the soldiers are tired after eight years of war (with Iran)," said Adel, who has had no contact with his wife since she crossed the border with her father several weeks ago.

Talel, a 23-year-old student who crossed into Saudi Arabia with 18 relatives in two cars, said many Iraqi soldiers were hoping to avoid a war with U.S. troops massed in Saudi Arabia.

He claimed that some of the Iraqi troops who invaded the emirate on August 2 had even hidden away white flags in case of a conflict.

"If they fight we will just surrender," he quoted an Iraqi soldier as saying.

The refugees, among the 500 or so Kuwaitis who a Saudi military officer said have been crossing the border daily for the past two weeks, said all services had been shut down in Kuwait City, streets were piled with garbage and that Iraqi troops were stealing everything from road signs to hospital supplies and shipping them back to Iraq.

The refugees said that to reach Saudi Arabia they had had to bribe and plead with Iraqi troops who stopped them several kilometers from Khafji, the only crossing point between Kuwait and Saudi Arabia, and took their passports and other identification.

SRINAGAR, INDIA (OCT. 10) - The army enforced curfew in 12 districts of Srinagar for the fourth straight day Wednesday after street fighting in and around the city overnight left 16 people dead.

An official spokesman said four Moslem militants seeking the state of Kashmir's secession from India were killed in the outlying Rainwari area of Srinagar, Kashmir's summer capital.

The violence also left four civilians and two Border Security Force (BSF) troopers dead.

In the center of the city six civilians were killed and 15 people injured, five of them BSF troopers, in running street battles between the militants and security forces, the spokesman said.

Meanwhile Kashmiri newspapers reappeared for the first time in a week and the Kashmiri Editors' Conference issued a statement here saying it had decided to resume publication.

The statement also condemned alleged harassment of newsmen by security forces and demanded the release of two jailed editors, Aijaz Ahmad Khan and Ghulam Nabi Noorami.

Sources in the city said massive search operations had been mounted in downtown Srinagar. Curfew passes were cancelled, and Kashmir police vehicles banned from the areas of the city under army control.

Officials described the situation after three days of street battles and fires in residential and commercial districts in which at least 30 people have died as "tense but under control."

Thousands of residents are reported to have fled the burned out areas of the city and taken shelter in city mosques.

Civic services in Srinagar, urban hub of the separatist campaign which India charges is aided by Pakistan, were paralysed for the 26th day by a mass strike by state government employees demanding the reinstatement of five senior colleagues.

The five were dismissed last month for signing a letter presented to human rights organisations protesting alleged atrocities by Indian security forces in Kashmir, India's only Moslem majority state which is contested by Pakistan.

TOULOUSE, FRANCE (OCT. 10) - A new factory opened here on Wednesday to assemble future wide-bodied Airbus aircraft, will also build military versions of the Airbus-340 aircraft, Aerospatiale President Henri Martre said.

Aerospatiale is the French state-owned company responsible for the French participation in the European Airbus consortium, and Mr. Martre said that the Gulf crisis had highlighted the requirements for military equipment.

He said in a radio broadcast that military versions would be assembled "soon" for the French army and airforce.

He said that "the army needs long-range aircraft", and noted that the Airbus-340 had a range of 14,000 kilometres (8,750 miles).

MONTREAL (OCT. 10) - Air Canada, struggling against an economic downturn in North America and high jet fuel prices due to the Gulf crisis, plans to dismiss 2,900 employees, cancel service to four foreign cities and sell off its headquarters in Montreal, it was announced here.

Air Canada chairman Claude Taylor said the austerity measures would also involve selling an unspecified number of its 113 aircraft, including Boeing 727's, DC-9's and Lockheed L-1011's.

The measures are to be implemented by early 1991 and will save the company 570 million dollars (490 million U.S.), he told a press conference late Tuesday.

Under the cutbacks, Air Canada, Canada's former flag carrier which was sold to private investors two years ago, will cancel air service to Bombay, Singapore, Athens and Lisbon, he said.

Air Canada's profits fell to six million dollars (5.2 million U.S.) during the first six months of the year, down from 19 million dollars (16.4 million U.S.) during the same period last year.

The company's stock has plummeted from 14.25 dollars (12.26 U.S.) per share

six months ago to 8.13 dollars (6.99 U.S.) at the close of trading Tuesday.

Mr. Taylor predicted Air Canada would lose money in 1991 but would recover the following year.

LUANDA (OCT. 10) - A multi-million dollar U.N. aid program to help civilians suffering as a result of Angola's civil war and persistent drought will allow the reopening of roads and restore peace to strife-torn regions, western sources said here Wednesday.

The 73-million dollar aid is to go to nine provinces in central and southern Angola hit hardest by the war between the leftist government of President Jose Eduardo dos Santos and rightist rebels of the National Union for the Total Independence of Angola (UNITA).

Nearly 200,000 tons of food are to be distributed by a special task force in these regions within six months, a western consultant told Agence France-Presse in the South.

Earlier, U.N. humanitarian aid was restricted because disputes between the two sides had made it difficult for assistance to reach many parts of the country, where the 15-year civil war has claimed tens of thousands of lives.

UNITA leader Jonas Savimbi approved the assistance plan on Monday, days after the government put its support behind the U.N. offer.

U.N. Assistant Secretary General Abdulrahim Farah is expected here next Monday to iron out the final details of the plan, according to a U.N. statement released in New York on Tuesday.

Roads closed to all traffic for years because of mines and the risk of ambush should be reopened and truck convoys were expected to ship food east from the ports of Luanda, Lobito and Cunene.

Sources said the railway link between Huambo, Angola's second city, the Atlantic Ocean port of Benguela and the Zairean border would also be restored. Huambo can now only be reached by air or military road convoy.

Last week, six people were killed and 12 others wounded when a major convoy was ambushed.

According to a U.N. study, one and a half million people, or a quarter of the total population of the nine provinces, are suffering from the drought whose consequences have been aggravated by the civil war.

Nearly two million people have been displaced in the 15-year-long fighting.

Non-Governmental Organizations including the International Red Cross (ICRC) and the French Medecins sans Frontieres (Doctors without borders) relief group have funneled aid to the regions.

But some Western experts in Angola cautioned that not all difficulties were due to the drought as the country was totally disorganized after 15 years of war.

NEW DELHI (OCT. 10) - The opposition-ruled southern Indian state of Karnataka was placed under federal rule Wednesday following the chief minister's refusal to step down.

Federal President Ramaswamy Venkataraman signed the proclamation here, following advice from the cabinet headed by Prime Minister Vishwanath Pratap Singh.

The crisis was triggered on Sunday when the opposition Congress (I) President Rajiv Gandhi asked Chief Minister Veerendra Patil to resign in a move. Gandhi did not explain his action. But his partymen said this was connected with communal Hindu-Moslem clashes in the state.

Patil who is recovering from a strike, refused, saying only the local party officials had powers to unseat him.

Karnataka is one of the three states ruled by the Congress Party. The others are Maharashtra and Andhra Pradesh.

#90283d1730 10/10/1990 ~French/German News Agency

MANILA (OCT. 10) - About 100 billion pesos (3.88 billion dollars) of the Philippines' proposed budget for 1991 of 10.1 billion dollars will go to debt servicing, Budget Secretary Guillermo Carague said here Wednesday.

Mr. Carague said the 1991 budget, which could go as high as 265 billion pesos (10.29 billion dollars), would take into account government attempts to shrink its growing budget deficit.

This was a sharp increase over the 245.7 billion peso (11.2 billion dollar) budget for 1990 and the 254.4 billion peso (9.88 million dollar) budget originally proposed for 1991.

Mr. Carague attributed the budget increase to growing debt servicing, forecast

at 260 billion pesos (10.1 billion dollars), and the depreciation of the Philippine peso.

Mr. Carague said the proposed budget would take into account proposed new taxes but congress leaders have said they would oppose any new taxes.

The government has been trying to slow down the growth of the budget deficit, which hit 32 billion pesos (1.24 billion dollars) as of mid-September, way above the 21 billion peso (815 million dollar) deficit targetted for the whole of this year.

A package of economic reforms, including the phase-out of an oil price subsidy and new taxes, was originally planned to shrink the deficit, but this has been derailed by the Gulf crisis, a killer earthquake that struck last July and congressional opposition.

#90283d1740 10/10/1990 ~French/German News Agency

MANILA (OCT. 10) - The Philippines will get a 125-million-dollar interest-free loan from the World Bank for development projects in southern Mindanao, Press Secretary Tomas Gomez said Wednesday.

Mr. Gomez said the loan, payable over 35 years, was processed by the World Bank in only 90 days due to the country's "honorable record" on servicing its 27-billion-dollar foreign debt despite economic problems.

President Corazon Aquino has resisted pressure from congress and left-wing groups to take unilateral action on the foreign debt and has resorted to market-based strategies to reduce the country's debt burden.

The loan will be released by next week and will cost the country only a one per cent service charge, Mr. Gomez added.

He did not specify what the World Bank loan would be used for.

#90283d1820 10/10/1990 ~French/German News Agency

STUTTGART (OCT. 10) - Ibm of Germany said here Wednesday it has established a joint venture with the Robotron Ascota company in Chemnitz to help in establishing a new informations technology infrastructure in eastern Germany.

Robotron Ascota is the former East German state-owned Robotron accounting machinery company.

The new joint venture, called Computer-Systemdienste, will be based in Chemnitz, with Robotron Ascota holding a controlling 51 percent share, Ibm

said.

Computer-Systemdienste will develop software and services to help East German enterprises and administrative structures achieve computerisation meeting western standards as quickly as possible, Ibm said. The joint venture will have 240 workers, chiefly from the Ascota parent concern.

#90283d1860 10/10/1990 ~French/German News Agency

EINHOVEN, NETHERLANDS (OCT. 10) - New Philips Group president Jan Timmer moved Wednesday to combat the "bureaucratic mentality" which he said has been stifling the giant Dutch electronics firm.

In an article in the Philips house organ, Mr. Timmer said the move, baptized "Operation Centurion", is to "change thinking within the company, create a new spirit and lead to improved performance".

He said that "First and foremost, we must fight bureaucracy. Philips' bureaucracy has been so pervasive in the past that we have subconsciously adapted our attitude to accommodate it.

"Bureaucracy is a waste of time and money. It stifles initiative and hinders anyone bold enough to stick his neck out".

When he took over the group presidency on July 2, Mr. Timmer announced a wide-ranging one-year restructuring plan costing about 2.7 billion guilders (about 1.5 billion dollars).

Restructuring of the group's loss-making sectors, especially computers and integrated circuits, will cost 10,000 jobs worldwide.

Publication last March of disastrous financial results for the first quarter, with operating profit down 26 percent from the first quarter of 1989 to 450 million guilders after the then Philips chief had said all was well, was the last straw.

The Philips stock price plunged, and is now at around 20 guilders on the Amsterdam bourse, against 35 before the crisis.

Mr. Timmer noted in his article that "the company has attracted more negative publicity in the past months than at any other period in its long history. As a result, our image has been tainted, our morale frustrated and our motivation discouraged...

"We need to thoroughly examine the way we have done things in the past and, where necessary, adjust our activities accordingly . . . The need for change and the drive for profit improvement is what Operation Centurion is about".

BELGRADE (OCT. 10) - Free multi-party elections will be held in Montenegro, the smallest of Yugoslavia's six republics, on December 9, Tanjug news agency reported Wednesday.

Democratic polls have already ended communist rule in the northern republics of Slovenia and Croatia last April and May.

Macedonia is to elect a new regional parliament on November 11, and Bosnia-Herzegovina on November 18.

Serbia, Yugoslavia's biggest republic, will vote on December 9, along with Montenegro.

Democratic elections in all Yugoslav republics have been made a prerequisite by the Strasbourg-based Council of Europe for the country's membership in the 23-member body that brings together all European democracies.

SEOUL (OCT. 10) - Riot police cordoned off Seoul's main cathedral on Wednesday and pushed back dissidents trying to stage a rally following a clash to prevent firebomb-throwing students from reaching the area.

The demonstrations capped a day of violence in which hundreds of riot police backed by teargas-firing armored vehicles stormed Korea University, triggering a violent clash with students.

As evening drew near, police fired tear gas in busy Ulchiro Street as some 500 radical students staged demonstrations after being blocked from joining dissidents at Myondong Cathedral.

Skirmishes also erupted as dissidents and members of opposition parties tried to shove their way and join other ralliers who had managed to enter the area surrounding the cathedral and were allowed to stay.

7 At least five middle-aged and elderly people who tried to join them were seen carried off by police kicking and screaming and bundled into a waiting van.

Less than 100 meters (yards) away, some 200 students played a cat and mouse game with the police in the shopping district near the cathedral, dispersing every time police charged and later regrouping.

The some 50 ralliers at the church's entrance unfolded a banner denouncing the Military Security Command (MSC) for conducting surveillance on more than 1,000 important civilians, including opposition and ruling party leaders.

The revelations that the MSC kept these files, made by a deserter last week, has thrown South Korea into political turmoil again.

President Roh Tae-Woo sacked the defense minister and the MSC commander Monday to soothe public outrage over the revelations.

On Wednesday, the new defense minister, Lee Jong-Koo, also denounced the surveillance, changing his earlier posture of blaming the turmoil on the deserter and public ignorance of the MSC's role.

Dissidents and members of the largest opposition group, the Party for Peace and Democracy (PPD), said they hoped the public indignation over the affair will galvanize anti-Roh forces.

Standing with the ralliers, PPD senior offical Moon Dong-Hwan said: "The people are very angry because the MSC has been very cruel to the people. Up to now there was no evidence, but now we have evidence."

His leader, PPD President Kim Dae-Jung, has been staging a hunger strike since Monday demanding the dissolution of the MSC and other reforms. Earlier at Korea University, police poured in through the front and back gates immediately after students started showing on campus a North Korean feature film in defiance of a government ban.

Thousands of students took shelter inside university buildings as others hurled bricks and fire bombs and wielded sticks to fight back amid pungent teargas that filled the air.

The police action came after students of Korea University and Yonsei University said they would defy a government ban and show the North Korean film to expedite private cultural exchanges with the North.

#90283d2000 10/10/1990 ~French/German News Agency
NICOSIA (OCT. 10) - An Iraqi delegation headed Wednesday for Teheran to seek an explanation for Iran's delay in completing the repatriation of Iraqi prisoners of war, the Iraqi News Agency (INA) reported.

The agency, monitored here, said "a large number" of Iraqi prisoners captured during the eight-year Gulf war were still being held by Iran despite an agreement that all prisoners from both sides would be freed and repatriated.

Iran "interrupted on September 16, despite its promises, the repatriation of

Iraqi prisoners, while Iraq has freed all the Iranian prisoners it was holding " the delegation chief, foreign ministry under-secretary Wissam al-Zahawi, was quoted as saying.

According to the International Committee of the Red Cross (ICRC), 39,174 Iranian and 38,810 Iraqi prisoners have been repatriated since Iraqi President Saddam Hussein announced August 15 that Iraq would meet Iran's conditions for a Gulf war settlement.

Mr. Hussein's initiative was seen in the West as an effort to persuade Iran to breach the international embargo imposed against Iraq after its August 2 invasion of Kuwait.

Iran has repeatedly underlined its condemnation of the Iraqi invasion and pledged to observe the sanctions despite its improving ties with Baghdad.

The ICRC confirmed that the prisoner exchange was interrupted in mid-September but there has been no official explanation for the move.

The organisation had never been allowed by either Iran or Iraq to confirm the total number of soldiers detained during the conflict, but was able to record the detention of 18,902 Iranians and 50,203 Iraqis.

Analysts believe a total of at least 100,000 soldiers were taken prisoner before a U.N.-sponsored cease-fire took effect in the Gulf war in August 1988.

Mr. Zahawi said his delegation would also discuss the reopening of embassies in the two countries' capitals as agreed during high-level talks last month.

Iran and Iraq have said they would resume diplomatic relations broken off in 1987.

The Iraqi official confirmed Baghdad had agreed to allow Iranians to visit Shiite Moslem holy sites in Iraq, but said the details would be discussed by Iranian Foreign Minister Ali Akbar Velayati during a forthcoming visit.

The Teheran Times newspaper said last month that Iran and Iraq had agreed to allow each other's citizens to visits holy Shiite sites in the two countries.

MOSCOW (OCT. 10) - Three Soviet soldiers went on a shooting spree killing eight of their comrades, including a lieutenant-colonel, and wounding a ninth man at a military depot in the Ukraine, press reports said here Wednesday.

The Defence Ministry, quoted by Tass news agency, said the three soldiers seized three submachine guns, a pistol and ammunition from the depot in the

village of Privetnoye before escaping aboard a truck on Tuesday.

Two of the men were detained after the truck broke down, while the third remained on the run Wednesday, Tass said.

-30- 755
#90283d2090 10/10/1990 ~French/German News Agency
CAIRO (OCT. 10) - Approximately 15 million Egyptians will be called to the polls Thursday to decide if parliament is to be dissolved and early elections are to be held.

The referendum became necessary after a May 19 ruling by the Supreme Constitutional Court which declared the present composition of parliament to be unconstitutional.

The electorate's verdict, widely assumed to be in favour of dissolution, is expected for Friday.

The constitution obliges President Hosny Mubarak to call an election within 60 days if parliament is dissolved.

The old electoral laws criticised by the constitutional court are to be replaced by a new mechanism. In future, only candidates standing as individuals can be elected to parliament. There will be 222 constituencies which will be represented by two deputies each.

The composition of the present parliament was mostly decided by party tickets in the last general election in 1987. President Mubarak's ruling National Democratic Party (Ndp) won 346 out of a total of 458 seats.

The strongest opposition grouping in the old parliament was an electoral alliance between the Socialist Labour Party, the Moslem Brotherhood and the Liberal Socialist Party, which gained 60 seats. The liberal New Wafd Party commanded 35 seats.

#90283d2190 10/10/1990 ~French/German News Agency
BUDAPEST (OCT. 10) - The Hungarian government offered a 10-year tax exemption to Japanese conglomerate Suzuki to build a joint venture car-assembly plant north of Budapest, local radio reported Wednesday.

Prime Minister Jozsef Antall told the Japan Federation of Economic Organizations that the gesture was designed to send a signal to other Japanese investors.

The Japanese delegation included executives of the Toyota Motor Co., Komatsu Ltd, and Showa Sekiyu Inc.

In order to offer the tax break, the Hungarian government extended to car assemblies a law that gave preferential taxation to manufacturers of car parts.

Suzuki would not be taxed on its profits for 10 years on condition it reinvested its profits in Hungary and reached an export surplus in the sixth year.

The Hungarian government's 100 million forints (1.5 million dollars) share in the joint venture's capital was taken from the re-employment fund.

The Suzuki plant will assemble 50,000 cars from 1992 with parts at least 50 percent made in Hungary.

#90283d2210 10/10/1990 ~French/German News Agency
ENTEBBE, UGANDA (OCT. 10) - Ugandan President Yoweri Museveni called Wednesday for a regional peace conference to solve the conflict in Rwanda, invaded last week by rebels from neighbouring Uganda.

Mr. Museveni, addressing an airport press conference here on his return from a foreign tour, denied that Uganda had known that armed Rwandan refugees had been planning to invade Rwanda from southern Uganda, and called for a peaceful solution to what he said was a "political problem."

He said the Rwandan army could never defeat the battle-hardened rebels, even with the help of Zairean, Belgian or French troops.

Many of the rebels, estimated by the Rwandan government to number 10,000, had

been serving in the Ugandan army. They deserted with their arms and invaded Rwanda on October 1 under the command of Major-General Fred Rwigyema, former deputy chief of the Ugandan armed forces.

Some four thousand of the 200,000 Rwandan refugees in Uganda were soldiers. Many of them had helped Mr. Museveni to win power in 1986 after his National Resistance Army surrounded Kampala. Rwandan refugees, mainly members of the minority Tutsi tribe, first poured into Uganda after ethnic massacres in 1959 when the majority Hutus ousted Tutsis from key positions.

Mr. Museveni said Uganda had been accused of being asleep, adding: "If we were asleep, why didn't they (the Rwandan authorities) also defeat them before they crossed the border?"

He said Uganda could not have kept its forces on alert at the border on the strength of unconfirmed rumours.

Uganda's role in the rebel invasion of its southern neighbour has raised many questions, according to diplomats in the region, who were left wondering how the Ugandan government could be unaware that thousands of rebels were massing on the border.

Mr. Museveni, who returned from a foreign tour that took him to Britain, the United States, Denmark and Belgium, called for a regional conference that would bring Rwanda to the negotiating table with Uganda, Zaire, Tanzania and Burundi, all of which have substantial Rwandan refugee communities.

He said he had suggested the idea to Rwandan President Juvenal Habyarimana when they met in New York on the day the invasion was launched.

He had also raised it with Belgian Prime Minister Wilfried Martens, saying that "the Belgians are involved so there is no harm in talking to them."

"I don't think a military solution is possible," he said. "These boys (the rebels) are very experienced militarily. I doubt very much whether these boys can be defeated by those troops, whether they are Rwandan, Belgian or Zairean."

Zaire has sent 500 troops to prop up the Rwandan government forces, while France has sent 300 paratroopers and Belgium 480.

Paris and Brussels have said their troops were there only to defend French and Belgian nationals and could not intervene in the conflict.

Mr. Museveni said "the origin of this problem is that the government of Rwanda has shut out of its border two million of its own people for 30 years."

He said he could "no longer allow Uganda to be used as a prison for people who have aspirations to go back to their country," adding: "this is a political

issue. It should be resolved peacefully."

Mr. Museveni said that as chairman of the Organisation of African Unity OAU), he was being blamed. "Wherever I go I am in the dock, as if I had committed a crime. But it is not our problem."

He said he had suggested talks with the rebels to Mr. Habyarimana when they met in New York, but the Rwandan leader had told him he wanted to wait until he returned home to assess the situation.

#90283d2240 10/10/1990 ~French/German News Agency

MILAN (OCT. 10) - Milan stocks lost ground on Wednesday, as the MIB index finished at 809 points, down 1.94 percent on the day.

All leading issues were losers, as Fiat lost 2.89 percent, Mediobanca 3.10, Comit 3.79, CIR 2.95, RAS 2.66, Generali 1.69, and above all STET, down 5.29 percent on the day.

Other downers included Enimont, off 0.60 percent, Olivetti 0.93, and Montedison, 0.94 percent.

Operators said the majority of sales were by foreign investors and blamed them on a general "malaise" on European markets due to recent developments in the Middle East and the difficulties of the U.S. economy.

#90283d2570 10/10/1990 ~French/German News Agency

OSLO (OCT. 10) - Norway is cutting development aid to Kenya by more than half to 75 million crowns (12.45 million dollars) in 1990 and 1991, Minister for Development Aid to Third World countries Tom Vraalsen said on Wednesday.

If President Daniel Arap Moi refuses to pass democratic reforms, Norway might further slash its assistance, he said.

Monday's arrest of Koigi wa Wamwere, a Kenyan former politician who had lived in exile in Norway since 1986, was likely to strain relations between the two countries even more, Mr. Vraalsen indicated.

Norway had not yet received an official note that Mr. Wamwere has been detained, and his case and the aid question were still being treated as separate issues, Mr. Vraalsen said.

Norwegian Ambassador to Nairobi, Niels Dahl, said by telephone that the arrest of Mr. Wamwere, for years the highest ranking person on the wanted list in Kenya, was front page news in Nairobi.

The Norwegian government has not officially protested against the arrest, but has through unofficial channels made it quite clear that Mr. Wamwere must not suffer any maltreatment, an informed source here said.

One Mr. Moi's most fervent opponents, Mr. Wamwere was forced into exile in 1986. From Norway he continued his fight against the Kenyan president, causing considerable tension between Norway and Kenya.

The Kenyan government said on Tuesday that he had been detained in the early hours of Monday morning, adding that police had impounded a substantial number of arms he had allegedly brought into the country.

It was unclear why Mr. Wamwere suddenly turned up in Kenya, running the risk of being arrested and perhaps being sentenced to death, sources here said.

His family in Norway expressed shock at the news that he had been detained together with other opposition figures, including two dissident lawyers whose arrests were reported by the Kenyan press on Tuesday. Mr. Wamwere was granted political asylum in Norway, but kept his Kenyan passport.

Until this year, Kenya has received 200 million crowns a year in aid from Norway. Further cuts depended on the contents of a Kenyan governmental report on political reforms to be ready next month, informed sources here said.

WIESBADEN, Germany (OCT. 10) - Police seized nearly a ton of cocaine in a Frankfurt backyard Friday in the biggest drug haul in German history and arrested seven suspected dealers, police said here Wednesday.

The suspects -- four Colombians, one Venezuelan, one Austrian and one man with both German and Colombian nationality, aged between 30 and 48 -- were held for questioning over possible links with the Medellin drug cartel, according to the police.

The value of the haul was estimated at nearly 200 million Deutsche marks (133 million dollars) and would have covered the needs of some 10,000 addicts for a year.

KUALA LUMPUR (OCT 10) - Malaysia's trade surplus shrank by 87 percent to 624.4 million dollars (231 million U.S.) in the first seven months of the year as imports continued to surge, Bernama news agency said Thursday.

Malaysia recorded a trade surplus of 4.75 billion dollars (1.76 billion U.S.) in the same period last year, Bernama quoted the department of statistics as saying.

Imports rose 28 percent to 41.98 billion dollars (15.55 billion U.S.), caused partly by a slightly weaker Malaysian ringgit, from 32.84 billion dollars (12.16 billion U.S.), the department said.

Exports grew 13 percent to 42.60 billion dollars (15.78 billion U.S.) from 37.59 billion dollars (13.92 billion U.S.) during the period.

The department said that the rapid growth of imports could be viewed positively as most of the import items were capital equipment and intermediate goods vital in sustaining a growing economy.

The main export items were machinery and transport equipment, inedible crude material, mineral fuels and thermionic valves and tubes and photocells.

Malaysia's major trading partners were the Association of Southeast Asian Nations, Japan, the United States and the European Economic Community, which together accounted for nearly 75 percent of total trade.

MOSCOW (OCT 10) - Soviet coastguards were towing a Greenpeace ship to Murmansk after seizing it off a nuclear testing site in the Arctic, Soviet Foreign Ministry spokesman Gennady Gerasimov said here Wednesday.

The Greenpeace ship was expected to arrive in Murmansk Wednesday evening or Thursday morning depending on weather conditions, the spokesman told a news briefing.

Speaking of Monday's interception of the Greenpeace in Soviet waters, Mr. Gerasimov noted that "some laws have to be observed whatever the mission and the noble objectives. The laws of our country cannot be violated with impunity".

The ship was boarded near the island of Novaya Zemlya, about 600 kilometres (375 miles) northeast of Norway where the Soviet Union has conducted underground nuclear tests in the past.

At the time when the ship was seized, four Greenpeace crew members had taken to the sea in a raft and they also were detained by Soviet coastguards, Mr. Gerasimov said.

The crew would probably be charged with violating Soviet borders, he added.

In London, Greenpeace said in a statement that sympathisers of the environmental pressure group demonstrated Wednesday outside the Soviet embassies in London, Stockholm, Copenhagen and Sydney against the seizure of the vessel.

Its campaign is aimed at preventing the renewed use of Novaya Zemlya as a nuclear test site after the closure of the main Soviet test site in Kazakhstan.

Seven Soviet citizens opposed to nuclear tests in their country were aboard the Greenpeace vessel, the statement said.

BONN (OCT. 10) - Germany is considering sending military equipment to Saudi Arabia, officials said Wednesday during a visit to Germany by King Faisal of Saudi Arabia.

The defence ministry is "looking into the various aspects of the question", a spokesman for the ministry said.

The issue was brought up without intervention by the Pentagon, he added. He would not elaborate.

According to a report by the Munich-based newspaper Sueddeutsche Zeitung,

Saudi Arabia has requested German assistance in shouldering the burden in the Gulf crisis.

Bonn was planning to ship 110 armoured vehicles ("Marder"), 100 troop carriers 50 armoured anti-aircraft carriers ("Gepard") and 50 carriers capable of detecting poison gas ("Fuchs") to Saudi Arabia, according to the paper.

The total value of the armament was reported to be 540 million Deutsche marks (337 million dollars).

Discussing the Gulf crisis Wednesday, Foreign Minister Hans-Dietrich Genscher and King Faisal called for "a rapid and peaceful settlement" to the conflict triggered by Iraq's invasion of Kuwait on August 2, according to an official communique.

The monarch is to meet with Chancellor Helmut Kohl and President Richard von Weizsaecker Thursday.

BRUSSELS (OCT 10) - The 12-member European Community (E.C.) Wednesday

approved four new programs worth a total of 26.5 million Ecus (35 million dollars) to further reforms in Eastern Europe.

The lion's share of 16 million Ecus was earmarked for the creation of privately owned farms in Bulgaria. Some 22 per cent of Bulgaria's workforce is employed in the agricultural sector.

A total of five million Ecus will be distributed to all reform nations to help them acquire knowhow on the Western-style free trade and on the optimal allocation of investments.

Poland will receive 1.5 million Ecus to set up a computerised system to help the country compile reliable statistics on the economy.

Four million Ecus are allotated for Czechoslovakia's university exchange programme.

Lagos (OCT. 10) - Nigeria took the first step forward Wednesday in its bid to boost oil and gas production within the next five years with the offer of 253,000 square kilometres of fields for exploration.

The Nigerian National Petroleum Corporation (Nnpc) said that the fields, divided into 136 blocks, were located in five sedimentary basins of the country's offshore and mainland.

The basins were identified as the Niger-Delta, Benin, Anambra, Chad and Benue troughs.

The Nnpc statement said five of the seven basins the country had were yet to be extensively explored. The government had decided to make the basins available for exploration to increase the country's proven oil reserves from the current 16 billion barrels to 20 billion barrels by 1995.

The statement explained that although every effort was being made by the government to diversify the economy, petroleum would for the forseeable future continue to contribute significantly to national development.

In recognition of this, it said the government would continue to review existing incentives, among which was the memorandum of understanding that guaranteed oil companies a minimum of two dollars per barrel of oil produced, as and when necessary, to ensure the attractiveness of investment in the Nigerian petroleum sector.

Nigeria's daily crude oil production peaked at two million barrels at the beginning of this month, representing an approximately 18.8 per cent rise over

the country's official daily production quota of 1.611 million barrels.

The rise in output was in accordance with the Organisastion of Petroleum Exporting Countries' (Opec) agreement reached in late August, which allowed member countries to exceed their official quotas until the IraqKuwait crisis ends.

#90283d2870 10/10/1990 ~French/German News Agency

STOCKHOLM (OCT 10) - Skandinaviska-Enskilda Banken, one of Sweden's leading banks, will take a 28 percent stake in the Skandia insurance company by acquiring the holdings of investment companies Investor and Providentia (18 percent) and of the Marieberg press group (10 percent), S-E Banken said on Wednesday.

S-E Banken will buy the shares of Providentia, Investor and Marieberg at a price of 223.80 kronor each, 60 percent more than the latest market quotation, making a total of 4.7 billion kronor (832 million dollars).

Investor and Providential belong to Sweden's Wallenberg industrial and financial group.

Stock market sources here say Investor and Providentia have to find funds for purchase by their joint subsidiary, Patricia, of shares held by Swedish financier Sven-Olof Johansson in the Saab-Scania Group, also controlled by Wallenberg. Last April, Patricia bought the Johansson shares and those of his Barkman company for nearly 4.5 billion kronor.

S-E Banken group chief Bo Ramfors commented that "Our acquisition of a stake in Skandia is related to the closer relationship that is developing between banking and the insurance sector".

JERUSALEM (OCT. 10) - Prime Minister Yitzhak Shamir on Wednesday named an independent commission to investigate the police killing of 21 Palestinians on Jerusalem's Temple Mount during a riot Monday, Israeli officials said.

The commission will be chaired by a retired general, Zvi Zamir, but the identity of the other members was not disclosed.

The naming of the commission followed the scrapping of an internal police inquiry into Monday's violence.

Officials said the government feared the conclusions of an internal investigation would not be accepted as impartial.

The independent commission, unlike a government commission of inquiry, will not have the authority to force witnesses to testify or to make them give evidence under oath, the officials said.

Mr. Shamir has asked investigators to take account of Israel's security interests and to produce their conclusions as soon as possible, they added.

Police opened fire on Palestinian demonstrators on Temple Mount -- a site holy to both Jews and Moslems in east Jerusalem -- after Arabs hurled stones at Jews praying at the adjacent Wailing Wall.

The demonstration was called to counter reported plans by a Jewish extremist group to defy a police ban and enter Temple Mount to lay a foundation stone for a religious shrine.

#90283d2950 10/10/1990 ~French/German News Agency

ADDIS ABABA (OCT 10) - Ethiopian Foreign Minister Tesfaye Dinka indicated Wednesday that the Addis Ababa government was ready for new peace talks with Eritrean People's Liberation Front (Eplf) rebels, the official news agency Ena reported.

Tesfaye, speaking after his return from New York where he attended the United Nations General Assembly session, said he discussed this possibility with U.S. Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze.

Baker and Shevadnadze could help to overcome the deadlock.

Preliminary talks on peace negotiations with the Eplf and the Tigray People's Liberation Front (Tplf) collapsed last year.

In February, the Eplf launched a major offensive. The rebels have since gained control of the northern province of Eritrea with the exception of the provincial capital Asmara.

KHARTOUM (OCT. 10) - The committee assigned to formulate a political system for the Sudan has come out with four options, it was reported here Wednesday.

The Sudan News Agency (Suna) said the first option was rule by conferences. The conferences are to be set up from village to national levels, in addition to specialised ones.

The report indicated that this system answered all the questions posed by General Omer Beshir during the opening session of the conference called to discuss the new political system in August.

The second option was the one-party system, with the sole party to be based on the principles of the National Salvation Revolution and aimed at rallying the masses behind the revolution.

The party would be open to all who believed in the principles of the revolution. But the committee expressed the fear that this system might lead to dictatorship, adding that it did not guarantee national representation.

The third alternative was described by the committee as a ''principled'' multi-party system to be accomplished in three stages. It called for the creation of a presidential system from the ruling Revolution Command Council to last for eight years. Then the president would relinquish the power to the ''principled'' multi-party system in stages.

This system would consist of two parties to be controlled by the military.

The fourth choice was to delegate the present Revolution Command Council to rule until Sudan's problems are solved.

The committee report will be discussed by the conference established in August by the government. The final recommendations of the conference will be handed to the Revolution Command Council for endorsement.

BONN (OCT. 10) - Israeli lawyer Felicia Langer, who Wednesday was awarded the "Right Livelihood Award" -- set up as an alternative to the Nobel prizes --

said that only a sovereign Palestinian state could ensure peaceful co-existence between Jews and Arabs in the Middle East.

She said in an interview that she felt the carnage in Jerusalem Monday underlined the need for a solution that would "at last allow Israelis to live like normal people".

Ms. Langer deplored "the erosion of moral values" and the "banalisation of the murder" of Arabs in Israeli society and in the media.

She said the authorities showed excessive clemency in the face of brutality by the military in the occupied territories.

She characterised herself as "the worst advocate in the world", saying she had never won a case in defence of Palestinians before Israeli military courts, which she described as a "bargaining shop".

Earlier this year, she abandoned her lawyers' career as "pointless", deciding to fight for peace in other ways. Her prize would help in this, she believed.

Born in Poland in 1930, she fled into the Soviet Union in 1939 with her parents to escape Nazi pogroms, which sent most of her relatives to die in the concentration camps.

She emigrated to Israel in 1950. Shocked by the 1967 Israeli takeover of the West Bank and Gaza Strip, she became the first Israeli lawyer to defend Palestinians before the courts.

The 120,000-dollar award was donated by Estonian-born Swede Jakob von Uexhull in 1979 and is handed out annually to ecologists and human rights activists at the same time as the Nobel prizes.

The prize is funded by donations and profits from Mr. Uexhull's stamp collection.

The five-member jury honoured Ms. Langer for her support of Palestinians standing trial before Israeli military courts.

BOGOTA (OCT. 10) - Colombian police seized account books and hundreds of pages of documents detailing business dealings of the Medellin cocaine cartel headed by fugitive drug lord Pablo Escobar, police officials announced Wednesday.

Colonel Jorge Ferrero, chief of the Medellin police, said his officers found the account books, 86 folders of documents and 27,000 dollars in cash hidden

under a sofa in a luxury apartment in Medellin, headquarters of the Escobar drug ring, Colombia's biggest.

"These documents and very valuable," Col. Ferrero told reporters, adding that the accounts included "key information" on the most recent cartel cocaine deals and money laundering operations. He declined to elaborate.

He said police raided the house after receiving a tip-off. They arrested three persons and seized weapons and communications equipment.

#90283d3300 10/10/1990 ~French/German News Agency

NAIROBI (OCT. 10) - Kenyan President Daniel arap Moi Wednesday called on foreigners to keep off Kenya's internal affairs and warned that he would not hesitate to take legal action against any Kenyan, including the clergy, who threatened the country's peace.

Adressing a rally here marking the second Moi Day, he said that although his government has often explained the true picture of events in the country, some friendly countries tended not to take that information seriously and instead went for information from disgruntled elements who falsified matters to tarnish the image of the government and the country.

Mr. Moi noted that activities of some lawyers in Kenya were a source of concern to the government and expressed concern that certain friendly countries were taking lawyers in this country to be special people.

He noted that every time the government took action on lawyers whose activities threatened peace, "these friendly countries complained".

The Kenyan president said the subversive activities of some of these lawyers were brought to light on Tuesday when a prominent member of the Law Society of Kenya was arrested after being found in possession of five guns and several rounds of ammunition.

He said that the same lawyer was close friend of the runaway human rights lawyer Kamau Kuria who, he alleged, who was was linked closely with subversive activities in the country.

Mr. Moi said "such a man could easily embarrass his misdirected hosts and wondered whether by giving him a teaching post, the Americans wanted subversion and murder taught in their schools".

Although the president did not name the arrested lawyer, observers believed he was Mirugi Kariuki, who was one two prominent lawyers to have been arrested in the early hours of Monday and spirited away to an unknown destination.

Mr. Moi termed those who have been calling for multi-party democracy in Kenya as "power-hungry self-seekers covering up for subversion and criminal activities".

Kenya is currently a one-party state under the Kenya African National Union (KANU).

The president's scathing attack on multi-party supporters comes only 24 hours after the government had announced that a leading exiled dissident and former parliamentarian, Koigi wa Wamwere, had been arrested in Nairobi and a large amount of arms he had brought into the country had been seized.

Mr. Wamwere, who fled into exile in Scandivania 1987 after the discovery and crackdown on his Libyan-backed leftwing Kenya Patriotic Front (KPF) movement by the authorities, was seized in Nairobi's Mathare Valley slums in the early hours of Monday morning and hauled in with a number of aides.

His arrest came a few hours after Kenyan security forces had arrested in a violent raid Nairobi lawyer Rumba Kinuthia and Mr. Kariuki, who was the target of Mr. Moi's attack on dissident lawyers on Wednesday.

WINDHOEK (OCT. 10) - Pretoria's pledge of 36 million rands (14 million dollars) for Namibian ex-servicemen will benefit South Africa's former enemies as well as allies, Namibian Defence Minister Peter Mueshihange said here Wednesday.

Speaking in Katima Mulilo in the Caprivi Strip, he said the money would benefit unemployed former fighters demobilised during the implementation last year of United Nations Resolution 435, which paved the way to Namibia's independence in March.

Former members of the People's Liberation Army of Namibia (PLAN), the military wing of the party that has now gone into government, the South West Africa People's Organisation (SWAPO), would benefit along with black troops who fought against PLAN on South Africa's side in the 23-year bush war, he said.

Meanwhile Namibian police said 18 Namibians had been kidnapped Monday and taken across the border into southern Angola by some 15 men wearing Angolan army uniforms.

The hostages, including women and children, were seized from Orondindi in Kaokoland, northwestern Namibia, before dawn. One man escaped and raised the alarm, claiming the victims had been beaten up by their captors, police said.

#90283d3410 10/10/1990 ~French/German News Agency
LAGOS (OCT. 10) - Two Nigerian ships bought for 132 million dollars to carry liquefied natural gas (LNG) to customers abroad have been officially named after two Nigerian towns closely connected with the nation's gas and crude oil installations, the LNG company announced here Wednesday.

The two vessels, formerly known by their hull construction numbers, 559 and 564, were named Tuesday at the Mitsubishi Heavy Industries Ship Repair Yard in Yokohama "LNG Bonny" and "LNG Finima", respectively, the company said.

Bonny is the name of the island in Nigeria's southern Rivers state on which Finima town, where the liquefied natural gas plant will be sited, is located.

The ships, each having a nominal capacity of 132,590 million m3 distributed in five cargo tanks, will carry the gas from Indonesia and Malaysia to customers in the Far East under a four-year charter agreement between Nigerian and Pertamina, the Indonesian oil company, and Malaysia LNG, until they are needed to carry Nigerian gas, the text said.

Nigeria will begin to market its LNG in 1995.

PESHAWAR, Pakistan (OCT. 10) - Four people were killed and several injured in a gunbattle Wednesday between a pro-Moscow party and supporters of deposed premier Benazir Bhutto, police said.

It was the first political killing in the run-up to the October 24 elections to national and provincial assemblies.

The fighting broke out when pro-Moscow Awami National Party (ANP) candidate Bashir Khan Umerzai was going to attend a corner meeting in his Dheri Kaka Khel constituency, 35 kilometers (22 miles) south of Peshawar, police said.

Mr. Umerzai, a former minister, is running for a provincial assembly seat.

Police sources said a group led by Munsif Bacha Khan, supporting the rival

Pakistan People's Party (PPP) blocked his way to the gathering.

This led to a shootout with automatic weapons that left four people dead, including Mr. Bacha Khan's father and son, police said.

Residents said the meeting was arranged by Mr. Bacha Khan's nephew, who was asked to refrain from supporting the ANP.

The ANP has fielded the largest number of candidates in the North West Frontier Province bordering Afghanistan.

#90283d3520 10/10/1990 ~French/German News Agency

WASHINGTON (OCT. 10) - The U.S. human rights group Africa Watch Wednesday issued a scathing report on political repression in Malawi and called for international pressure to end "more than a quarter century of gross human rights abuses" in the southern African state.

The 128-page report titled "Where Silence Rules: The Supression of Dissent in Malawi," said the most recent acts of repression included the killing of more than 20 protesters by police last March outside the capital Lilongwe.

Africa Watch, which has offices in New York, Washington and London, denounced "the systematic suppression of dissent under the 26-year rule of Life-President Kamuzu Banda," a long-standing Western ally in the region.

The report compared Mr. Banda's Malawi with Romania under the late dictator Nicolae Ceausescu and Kim Il Sung's North Korea.

But it added that "whereas totalitarian Eastern bloc regimes were regularly denounced for human rights abuses, Banda's Malawi received Western aid."

"At a moment when the Western governments are loudly proclaiming their universal attachment to human rights and pluralist democracies, they should turn their attention to poor, forgotten Malawi," it said.

While acknowledging a certain degree of economic and political stability in Malawi, Africa Watch said such calm "has been bought at a terrible cost."

"Intellectual life can scarcely survive the dead hand of the censor and political life is non-existent outside the omnipotent ruling party," it said, adding that "on occasion the government has resorted to political murder" to achieve its aims.

It noted the cases of a leading poet, Jack Mapanje, who has been detained without charges for three years, while a prominent journalist and human rights activist, Mkwapatira Mhango, was assassinated in an October 1989 bomb blast in

Lusaka which also killed his wife and children.

Africa Watch also reported that political prisoners and common criminals are routinely beaten and mistreated, sometimes being stripped naked and chained to the floor of their prison cells without food.

#90283d3530 10/10/1990 ~French/German News Agency

PARIS (OCT 10) - A massive 24-hour strike by dockers closed the freight portions of French ports on Wednesday from Dunkirk to Marseilles.

The strike, called by the communist-led CGT labour confederation, was protested insufficient work for dockers in the ports. The Ports and Docks Federation said that all of the country's 8,500 dock workers went on strike.

Passenger traffic was maintained.

The strike was also aimed at supporting Dunkirk dockers, who are starting their third strike week to protest against what they say are management plans to change working conditions in a search for greater competitiveness.

Nationally, the CGT is demanding removal of the present limit of 150 days' unemployment benefits annually for each docker.

The National Union of Port Handling Industries, an employers group, says that the dockers' jobless rate averaged close to 30 percent in the first half of the year, with peaks of 50 percent in some ports, such as Rouen and Dieppe.

#90283d3620 10/10/1990 ~French/German News Agency

VEREENIGING, SOUTH AFRICA (OCT. 10) - Neo-fascist leader Eugene TerreBlanche proclaimed "the beginning of the second rebellion" to some 600 Boer white supremacists in this town south of Johannesburg Wednesday.

He whipped supporters into a frenzy with his talk of the Boers' new fight against President Frederik de Klerk's drive to give the vote to the black majority, comparing their the cause to the epic proportions of the Boers' two unsuccessful wars of independence against the British last century.

"We have watered the thorn trees with our blood," he said. "This land is paid for."

Likeniing followers of his Afrikaner Resistance Movement (AWB) to the "bitter-enders" who fought to the last in the second Anglo-Boer war of 1899-1902, he told them: "You haven't got another land. This is your land."

After saying to reporters that the black nationalist African National Congress was not interested in power-sharing with the ruling white minority, he told the crowd: "There will be blood only if the ANC tries to take over this land. Not my blood. Their blood."

Retired police Colonel Servaas de Wet, leader of the AWB's commandos, said the return of ANC exiles meant that armed terrorists were being let loose to set up bases in squatter camps. Speaking of the WAB's force, Col. de Wet said: "It is the commando which is the Boer's strongest weapon. If guerrillas could drive the Soviets out in Afghanistan ... how much easier can the Boers drive the blacks over our borders so we never have trouble with them again."

Mr. TerreBlanche earlier Wednesday led a mounted commando and 300 footsoldiers some armed, in a march through Vereeniging, monitored by police in Casspir armoured transports and eyed by curious black onlookers.

He laid a wreath at the town hall monument to victims of the Anglo-Boer war, as the highpoint of ceremonies commemorating the Kruger Day public holiday in memory of 19th century Boer leader Paul Kruger.

Meanwhile Andries Treurnicht, leader of the far right official opposition Conservative Party, told a Kruger Day rally of some 1,000 people in Cape Town that Mr. De Klerk was playing "dangerous games".

"If it were a mere game for two Boer republics to take on a First World superpower (19th century Britain) and fight it to the death, do you think it a mere game when we resist a Third World political force?" he asked the president

"The man that is hurrying along to finish off the rights and freedoms of his own people, he is the one who is playing dangerous games," Mr. Treurnicht said.

#90283d3650 10/10/1990 ~French/German News Agency

TOULOUSE, France (OCT 10) - French President Francois Mitterrand hailed "ambitious Europe" here on Wednesday, in inaugurating Europe's biggest aircraft factory, built by the French Aerospatiale Group.

Mr. Mitterrand saw construction of the factory as a symbol of "European drive" which he contrasted with the "neglected Europe, a continent of the past, living on its cultural heritage" which he said certain people would like to have.

The factory project implemented by Aerospatiale, the French partner in the four-nation Airbus consortium, shows that "all France is ready to undertake" the efforts demanded for building this "ambitious Europe", the president said,

calling for Europe to take its place in the "forefront of world technology".

Despite violently protesting farmers near the factory site, expressing opposition to low farm prices and what they view as excessive imports, Mr. Mitterrand was not hindered in inaugurating the huge plant, 500 meters (yards) long and 46 meters high. It will assemble the future Airbus A330s and A340s.

The president noted in his speech that Airbus held a third of the world aircraft market last year, and had received more than 1,500 orders since 1970. It has delivered 600 planes.

#90283d3700 10/10/1990 ~French/German News Agency

ACCRA (OCT. 10) - Abass Bundu, executive secretary of the Economic Community of West African States (ECOWAS) on Wednesday discussed with Ghana's head of state Jerry Rawlings the possibility of a ceasefire in war-torn Liberia.

Mr. Bundu who has been shuttling around the sub-region since ECOWAS started a peace intitiative in June, told reporters that the 16-nation body should encourage the warring parties to start peace talks now that they are talking of a ceasefire.

"We have to explore the ceasefire opportunity," he said. Charles Taylor, leader of the National Patriotic Front of Liberia (NPFL) rebels, announced a unilateral ceasefire September 22. It lasted eight days.

Mr. Bundu said he and the Ghanain leader also discussed new diplomatic initiatives to bring about peace in Liberia.

In August, ECOWAS sent in a peacekeeping force comprising soldiers from Ghana, Nigeria, Guinea, Sierra Leone and the Gambia to try to impose a ceasefire.

The multinational force, known as ECOMOG and which has been reinforced to over 6,000 men, last week launched a fresh offensive against the NPFL on three fronts around the Liberian capital Monrovia.

On the possibility of boosting the size further, Mr. Bundu said this "would be considered at the appropriate time," adding that an increase might be effected

if it becomes necessary for the force to cover other parts of Liberia.

The NPFL has rejected the ECOWAS peace plan which includes the installation of an interim government chosen by Liberian politicians in August in the Gambian capital of Banjul.

Mr. Taylor has said he is ready for talks with Liberian political groups, government troops and dissident rebels led by Prince Johnson. He said the talks could take place in the Ivory Coast, Senegal or any country which has not contributed troops to ECOMOG.

Meanwhile, sources in Abidjan in radio contact with resident of Monrovia said automatic weapons and artillery fire could be heard several kilometers (miles) north of the capital Wednesday.

They could not say which groups were fighting.

On Sunday, ECOMOG launched an attack on against NPFL positions at White Plains 30 kilometers (18 miles) from Monrovia where the capital's water purification plant and power station are located.

Donald Petterson, the director of the U.S. State Department's Liberia task force, arrived in Abidjan Monday at the start of a tour of West African countries during which he is to meet parties involved in Liberia's bloody nine-month civil war.

He met Ivory Coast President Felix Houphouet-Boigny on Monday.

RIYADH (OCT. 10) - Saudi authorities on Wednesday asked newspapers here to tone down their attacks on the Palestine Liberation Organization and Jordan, editors said Wednesday.

The directive from the information ministry came two days after Israeli police shot dead 21 Palestinians in disturbances in east Jerusalem, triggering widespread outrage in the Arab world.

The Gulf Cooperation Council, of which Saudi Arabia is a key member, on Tuesday denounced the killings and appealed to the international community "to stand by the Palestinian people."

Newspapers here have been harshly critical of the PLO and Jordan in the past several weeks, accusing them of failing to condemn the Iraqi invasion of Kuwait.

The Saudi press has also been irked by PLO and Jordanian opposition to the

presence in Saudi Arabia of foreign troops, who have been deployed at Riyadh's request to defend the kingdom against a feared Iraqi attack.

#90283d3740 10/10/1990 ~French/German News Agency

STRASBOURG, France (OCT 10) - The president of the European Economic Communities Commission, Jacques Delors, rejected on Wednesday the British proposal to make the European Currency Unit (ECU) a parallel currency to EEC national currencies.

He told the European Parliament here that the proposal "multiplies uncertainties about the future" and "entails serious risks of competition between currencies and of competitive use of interest rates" within the Community.

He said the Commission he heads, the executive arm of the EEC, wants the Community to choose the ECU as the future sole currency. It must give the unit "political support", because it cannot be "simply the bastard child of the European Monetary System" -- the exchange rate mechanism of which sterling has just joined.

He also insisted on the importance of succeeding in the first phase of EEC economic and monetary union, which was launched on July 1 and calls for greater convergence of national economies within the Community.

"You can write the world's finest treaty, but if the first phase does not succeed, there will be no economic and monetary union", he said.

KIGALI (OCT. 10) - Rwandan President Juvenal Habyarimana on Wednesday said that 14 people had been killed and 30 wounded across the country since a rebel incursion from Uganda early last week, and he denied reports by villagers than 1,000 people had been massacred by his army in the north of the central African country.

The president put the number of arrests at about 3,000.

Major-General Habyarimana also told a press conference here that he had requested French and Belgian military assistance to put down the rebellion, but explained that the reply had been negative "because that is not their philosophy".

Belgium and France have sent troops to the east central African nation with the avowed aim of protecting their nationals in the former Belgian colony. The low death toll he presented notwithstanding, the president said he had asked

for reinforcements, but did not say when.

He confirmed, however, that Zairean troops were operating alongside his government forces.

"Two units of the Rwandan army are in contact with the rebels in the Gabiro region" in the northeast of the country, Maj.-Gen. Habyarimana said. Diplomatic sources said Gabiro, on the edge of the Akagera national park, had been retaken from the rebels with the help of the Zairean soldiers.

Major Karangwa (eds: one name) meanwhile said Wednesday that some 3,500 people had been detained since the start of the "troubles" on October 1 and presented journalists with 32 prisoners, including four women, who were largely of Ugandan origin and whom he said were suspected of an attack here overnight last Thursday.

All the detainees will go before a special commission comprising the public prosecutor, the police and Kigali prefecture and state security officials, the chief of staff said. Those found guilty would then appear before a war council.

The head of state said that some 3,000 people had been picked up and were held in conditions "that are not ideal".

The French government on Wednesday called for a peaceful settlement and expressed concern about the reported detention of some 1,500 people in a Kigali stadium, including women and children, according to a reliable source in Paris.

"When the Pope (John Paul II) visited (early in September) I promised pardons " Maj.-Gen. Habyarimana said. "I'm going to speed that up in order to improve conditions for the suspects".

He added that three members of the general staff had been arrested "because they have been in contact with the enemy".

The Rwandan leader denied reports that 1,000 civilians had been killed by regular army troops in the northeastern Mutara region, close to the border with Uganda.

"Why would you think the Rwandan army would kill Rwandan civilians?" he asked rhetorically. "In any case, the inhabitants of Mutara are in the hands of the enemies who control the region."

Reports from refugees reaching the border were that Rwandan troops had killed more than 1,000 people in an assault on 10 villages Monday, accusing them of helping the rebels and lobbying hand grenades into their homes.

The Rwandan conflict began around October 1 with a major incursion of rebel forces from Uganda, including army deserters from the Tutsi people who are in a

minority in Rwanda. Since 1959, three years before independence, scores of thousands of Rwandans have fled as refugees to Uganda, following massacres among the Tutsis and the Hutu majority.

CAIRO (OCT. 10) - British Foreign Secretary Douglas Hurd has warned Iraq that it would be completely destroyed if it carried out an attack with chemical or biological weapons, the cairo newspaper Al-Ahram reported in Thursday's editions.

In an interview, Mr. Hurd said such an attack by Iraq would "provoke a response that would completely destroy that country."

He said "this should be made very clear, without any possible ambiguity."

On the Palestinian issue, the British foreign secretary said it was not "realistic" to present any new proposals at the current time.

He said this was due to the position of the Palestine Liberation Organisation in the Gulf crisis. The PLO, Mr. Hurd said, had made a "big mistake" by refusing to condemn the Iraqi invasion of Kuwait.

Mr. Hurd also said Britain wanted to resume diplomatic relations with Syria but ruled out any move in the near future.

ERLANGEN, Germany (OCT. 10) - A U.S. soldier stationed in Germany killed one of his colleagues and wounded another in an apparent fit of madness Wednesday, then shot himself dead through the head, police said.

The 22-year-old man burst into the canteen of the U.S. base at Grafenwoehr in southern Germany with an automatic rifle and opened fire on the cook, wounding him fatally.

Leaving the building, he shot at another soldier who tried to intervene, wounding him in the leg. The young man, whose name was not disclosed, then shot himself and died soon after in a hospital.

#90283d3930 10/10/1990 ~French/German News Agency

RANGOON (OCT, 10) - The National League for Democracy (NLD) said it would leave all options open for a dialogue with military authorities because discussions are "vital to the long- and short-term interests of the nation."

But any attempt by the NLD to seek dialogue is bound to be rejected, analysts said.

The decision to leave the door open for dialogue with the ruling State Law and Order Restoration Council (SLORC) came Tuesday at the end of a four-day session of the NLD's 44-member central committee.

The committee also decided to form an "affairs committee" to deal with issues regarding the party's 392 elected parliamentary candidates, spokesman Khin Maung Swe said Tuesday.

The 68-member affairs committee would also work together with the central executive committee towards the eventual convening of parliament, he said.

"We continue to firmly believe that a dialogue between NLD as the leading political party and the SLORC is absolutely essential if the interest of the nation is to be served," Mr. Khin Maung Swe said.

The junta recently rejected another NLD overture for a dialogue on grounds that it would "not discuss politics outside the framework of law."

But the NLD spokesman said the objective of seeking a dialogue was not for the sake of gaining power by one political party but in the interest of "national reconciliation."

The SLORC's official rejection of the NLD's latest overture for a dialogue was made known Friday at the regular Defence Ministry press conference.

Military spokesman Colonel Aung Thein, deputy chief of SLORC's Information Committee, said then that no discussions with political parties were forthcoming until post-election procedures -- such as submitting campaign expenses and objections against elected candidates -- were cleared up.

NLD leaders maintain that these post-election procedures should not hinder the convening of parliament, which is a natural process following elections.

Military authorities who say future consultations would be essentially based on "national" and not "political" objectives have clearly said the SLORC would not hold discussions "if it is for the sake of one party coming into power."

They have charged that the NLD's Ghandi Hall declaration on July 28 was motivated towards gaining power and as such was directly opposed to SLORC's objective of "consolidating national solidarity."

The military promised to meet with candidate-representatives of all 27 parties who won parliamentary seats during the May general elections once post-elections procedures were over, but did not specify the date.

Apparently very much opposed to one-party domination of the future Burmese political scene, the NLD's role as the leading political party, despite its landslide victory, has been largely downplayed by military authorities here.

BAGHDAD (OCT, 10) - An Iraqi Airways Boeing 747 with 400 Western women and children on board, including 350 Americans, was expected to leave Baghdad late Wednesday for London and Washington, airline officials said.

The plane, the officials said, was Wednesday evening still in the southern city of Basra. It was expected to stop in Baghdad before flying off with 25 Canadians and Japanese, 25 Britons and 350 Americans aboard.

Most of the 400 were taken from Kuwait to Basra by bus.

The officials said that the plane has 440 seats and could take other foreigners.

The plane was chartered by the U.S. Embassy in Baghdad.

STRASBOURG, FRANCE (OCT. 10) - No precise decision can be taken on the question of European Economic Community aid to the Soviet Union before the end of the year, European Commissioner for Foreign Trade Relations Frans Andriessen said Wednesday.

An EEC summit meeting on Rome on October 27 would therefore not be in a position to take any decision on the matter, contrary to what the 12 decided at their last summit in Dublin in June. Then, they agreed in principle on such aid, pending studies by the European Commission.

"The present state of progress of reform and (inter-Soviet) Union treaty are hardly likely to be implemented well before the end of the year," Mr. Andriessen said. This "implies that conclusions regarding aid must for the moment remain general and exploratory".

After the Dublin summit, the July summit in Houston of the leading industrial nations asked the Commission, as well as the International Monetary Fund and other bodies, to study the question of aid to the Soviet Union before the end of the year.

Since then, several European Commission officials have gone to the Soviet Union, where "several reform programmes are being studied", Mr. Andriessen

said.

A new compromise programme drawn up under the guidance of Soviet President Mikhail Gorbachev is to be submitted to the Supreme Soviet or parliament around mid-October.

Mr. Andriessen stressed that proposed financial support should so far as possible be "in the form of direct investment", and cited sectors such as raw materials, energy and communications. An accord signed by the EEC and the Soviet Union "constitutes a point of departure", he said.

Even if the Soviet Union was going to take advantage of the rise in oil prices due to the Gulf crisis, the commissioner said, that "hardly suffices to compensate for the loss of production and structural problems".

#90283d4200 10/10/1990 ~French/German News Agency

NEW YORK (OCT. 10) - The 45th session of the United Nations General Assembly ended here Wednesday after a two-and-a-half-week debate dominated by the Gulf crisis.

Angolan Foreign Minister Pedro de Castro van Dunem gave the final speech in the debate which had seen 155 speakers, including 27 heads of state, 15 premiers and 86 foreign ministers take the podium.

Assembly president Maltese Foreign Minister Guido de Marco, who was elected last September 18 when the session got underway, said ''virtually every speaker'' had demanded the restoration of Kuwait sovereignty following Iraq's invasion of the oil-rich sheikdom August 2.

Addressing the Iraqi leadership, de Marco said it ''was no loss of face for any nation to adhere to the United Nations charter'' and give Kuwait back its sovereignty.

Other major issues facing the chamber during its session were Third World debt change in central and eastern Europe, drugs, environmental pollution and poverty.

#90283d4530 10/10/1990 ~French/German News Agency

DUBLIN (OCT 10) - Iraqi President Saddam Hussein has granted "special status" to certain staff of an Irish hospital in Baghdad, allowing them to leave the country freely, the company that manages the hospital said Wednesday.

The management of the Park Hospital, run by a subsidiary of the Irish national airline Aer Lingus, said the status would allow temporary staff or those whose

contract was ending to obtain exit visas, whatever their age or sex.

The number concerned by the dispensation is 59, of whom 49 are Irish and four British, the hospital management said.

In total, the hospital employs 430 foreign staff, of whom 185 are Irish and 45 British.

The company said that it had also received an assurance from the Iraqi health ministry that staff members currently on vacation outside Iraq could obtain an exit visa if they returned to Baghdad.

#90283d4610 10/10/1990 ~French/German News Agency

WELLINGTON (OCT 11) - New Zealand's central Reserve Bank on Thursday forecast higher inflation and sharply lower economic growth over the next two years.

A number of recent developments have worsened the economic outlook since the last forecast in May, Grant Spencer, the chief manager of the bank's economic department, said in a statement.

"Lower disposable incomes and a continuing lack of confidence have depressed consumption spending over 1990," he said.

"Oil price rises in the wake of the Gulf crisis have worsened the outlook for inflation, growth, and the balance of payments. Interests rates have moved higher due to increasing world rates and also the worse fiscal outlook.

"Furthermore, the world downturn and adverse developments in New Zealand's particular export markets have steepened the decline in New Zealand's real export prices."

Mr. Spencer said the factors would hamper the emergence of a significant economic recovery over the next 18 months.

The bank said it was forecasting gross domestic product (GDP) growth for this year of 0.5 percent, compared to the earlier forecast of two percent. GDP growth for 1991-92 is forecast at two percent rather than the three per cent earlier predicted.

With weaker activity and continuing net inward migration, unemployment was forecast to remain at or slightly above its present level of 7.5 percent.

Mr. Spencer said that despite strong growth in export volumes over the forecast period, real export earnings were expected to remain weak as a result of lower real export prices and higher domestic inflation.

While import growth slows down, the terms of trade decline were expected to generate large current account deficits of about five billion New Zealand dollars (three billion U.S. dollars) this year and next.

"With the price of oil assumed to remain around 30 dollars U.S. per barrel, (consumer price index) inflation is expected to reach 6.8 percent in the year to March 1991, before falling to 3.4 percent by March 1992," the statement said.

-30- 2272

#90283d4730 10/10/1990 ~French/German News Agency

NEW YORK, United Nations (OCT 10) - The U.N. General Assembly Wednesday granted a request by the Hatian Government to send a U.N. observer group to the politically-troubled Caribbean island nation to assure free and fair elections.

The United Nations plans to spend 9.4 million dollars on the Haiti project, putting an end to a bitter debate -- mainly carried by Colombia and Cuba and other non-aligned countries -- in the Security Council.

But Colombian Ambassador Enrique Penalosa said Wednesday that several Latin American countries could send security teams to help monitor the voting process.

Those countries had argued that sending a monitoring team to Haiti for the December 16 elections would set a precedent involving the world body in a country's internal affairs.

Haitian provisional President Ertha Pascal Trouillot had asked for the assistance.

Wednesday's decision marks the third time a U.N. group would monitor elections following Nicaragua and Namibia, but it is the first time it has done so in a country unaffected by regional conflict.

A first group of 50 observers is to be sent to Haiti to keep an eye on voter registration and is to stay until after the elections and a reinforcement group of 50 others are to be sent in the days just before voting.

An unspecified number of specialized observers will be sent to help Haitian officials organize security plans.

#90283d4980 10/10/1990 ~French/German News Agency

MANAMA (OCT 11) - The struggle between Good and Evil takes center stage on Iraqi television these days, with the former incarnate in President Saddam Hussein and the latter manifest in Zionism, American imperialism and Arab

leaders said to be their agents.

Mr. Hussein's battle, in which there is no middle ground, targets two Arab notables in particular: "the desecrator of the two holy mosques" and "Hosni."

The first is a reference to King Fahd of Saudi Arabia, who outraged President Hussein by calling on U.S. and Western forces to help defend the kingdom aganst a feared Iraqi attack.

King Fahd's title is actually "custodian of the two holy mosques" located in the Saudi cities of Mecca and Medina and which, according to Mr. Hussein, have been sullied by the presence of foreign invaders.

"Hosni" is Egyptian President Hosni Mubarak, one of the Arab world's sharpest critics of the Iraqi invasion of Kuwait on August 2.

But television authorities, well aware that their viewers prior to the Gulf crisis were just emerging from the trauma of a devastating war with Iran, are trying to leaven the daily fare with romantic comedies -- usually Egyptian.

The tough talk is also softened by love songs from famous Arabic female singers such as Warda of Algeria and Latifa Arfawi of Tunisia.

One program, Hayyakoum Allah (God Help You), each night reports on the state of morale of Iraqi troops deployed along the border with Saudi Arabia.

"We're anxiously awaiting the signal to liberate Mecca," soldiers reply in unison to an interviewer's question.

When invited by the interviewer to send greetings to his friends and family,

each soldier begins by hailing "Mr. President, the members of the Revolutionary Command Council (the country's highest decision-making body) and the regional leadership of the Baath party."

#90283d5340 10/10/1990 ~French/German News Agency

JAKARTA (OCT. 11) - A consortium of one Indonesian and three Japanese firms will build Indonesia's first inter-island bridge, the Antara news agency said Thursday.

An agreement for the construction of the four-kilometre (2.5 mile) bridge linking East Java with the small island of Madura is expected to be signed in Tokyo on November 20, Antara said.

Mitsubishi Corp., C. Itoh and the Long-Term Credit Bank of Japan will cooperate with P.T. Dwipa Madura Pradhana, a private Indonesian company,

consortium head Basroni Rizal told Antara at East Java provincial capital Surabaya.

The bridge will cost 100 million dollars while additional 300 million dollars will go for the development of residential, industrial, business and recreational facilities on 500 hectares (1,235 acres) of land at both ends of the bridge, Mr. Rizal said.

#90283d5440 10/10/1990 ~French/German News Agency

CANBERRA (OCT. 11) - Official figures released Thursday confirm unemployment is on the rise in Australia, with women in the economically depressed eastern state of Victoria bearing the brunt.

But the increase of the national unemployment rate to 7.4 percent in September from 7.3 in August and 6.1 percent a year ago was not as marked as many had feared.

About 13,000 of the total 14,300 jobs lost last month were lost by women, mostly in Victoria. Employment rose marginally or remained static in most other states.

A dramatic fall in the Australian dollar coincided with the release of employment statistics, but market analysts attributed the drop to hopes of a further cut in interest rates reported by a financial newspaper.

But Industrial Relations Minister Peter Cook said the government would not reduce interest rates because the increase in unemployment was marginal and reflected budget predictions.

Seasonally adjusted employment fell by 14,300 from 7.89 million in August and compared with 7.81 million in September last year.

Markets generally had expected a fall in employment of about 15,000 and an unemployment rate of 7.5 percent.

-30- 1374

#90283d9260 10/10/1990 ~French/German News Agency

WELLINGTON (OCT. 10) - A record 7.9 percent of New Zealand's workforce or 126,300 people were unemployed at the end of August, the Statistics Department said here Wednesday.

Its household labor force survey, instituted in 1985, was the last before October 27's general elections.

The unemployment rate in July was 7.3 percent and 7.6 percent in June.

Deputy Government Statistician Len Cook said total unemployment had been rising since early in 1989 and showed no signs of abating.

The unemployment rate for men in August was 8.4 percent and for women 7.3 percent.

#90283d9310 10/10/1990 ~French/German News Agency

TOKYO (OCT. 10) - Japan is to extend nuclear power plant operation technology to China which will start up its first nuclear reactor next year, industry sources said Wednesday.

They said the Japan Atomic Industrial Forum, Inc., set up by Japanese electric power companies and nuclear-related firms, agreed with China's National Nuclear Industry Corp. (CNNIC) to offer know-how on safe operation of nuclear plants at the sixth Japan-China regular meeting on nuclear power held in Beijing late last month.

The No. 1 Qinshan pressurized light-water reactor, China's first nuclear power plant, situated in Zhejiang province 120 kilometres (75 miles) southeast of Shanghai, will have a power generation capacity of 300 megawatts when it start operations at the beginning of next year, according to the CNNIC.

Qinshan, which is entirely Chinese-designed, will be followed by the 1,800 megawatt Daya Bay plant in southern China, which is under construction with input from British and French firms.

The sources said China requested Japanese technology on nuclear power plant operation technology because of Japan's low accident occurrence rate at plant sites.

Details of the planned assistance will be worked out when a Chinese nuclear official visits Tokyo on October 20, they said.

During the meeting, China also proposed selling several hundred tons of uranium octoxide, or yellow cake, used as a material for nuclear fuel, to Japan, they said.

Japan imported 65 tons of yellow cake from China from 1982 to 1985 but now buys uranium for nuclear fuel mainly from Australia and Canada.

The Japanese electric power industry is expected to study the possibility of accepting the Chinese offer as it could lead to the diversification of uranium supply sources, the sources said.

#90283d9470 10/10/1990 ~French/German News Agency

BEIJING (OCT. 10) - Beijing authorities have decided to slash by more than half the amount of cabbage supplied to the Chinese capital this year, to avoid repeating a fiasco that saw tons of it go uneaten in 1989.

The China Daily reported Wednesday that local farmers would produce 300,000 tons of cabbage this year instead of 650,000 tons in 1989, to adapt to "changes in local tastes."

Kang Shuping, an official of Beijing's Agriculture Bureau, told the daily that 1,200 hectares (3,000 acres) less of farmland would be used for cabbage this year. Mr. Kang acknowleged that a large quantity of cabbage was wasted last year.

Beijing authorities had until now strongly denied that there was an excess supply of cabbage last year.

Cabbage is a staple winter vegetable for Beijing's 11 million residents. Convoys of trucks dump the state-subsidized cabbage on the streets of the capital in early November, transforming the city into a huge open air market.

The government, eager to restore stability in the capital last year after the pro-democracy crackdown, urged local farmers to produce the maximum amount of cabbage.

As a result, nearly 200,000 tons rotted in the fields, while 80,000 of the 380,000 tons supplied to the capital went unsold despite Mayor Chen Xitong's exhortations to city residents to buy cabbage as a "patriotic gesture."

The cool response to his appeal was seen at the time as a form of passive resistance, five months after army troops and tanks crushed the pro-democracy movement in the streets of Beijing, killing hundreds.

Mr. Kang said last year's cabbage output was "too much for the city to consume.

"As a result work units were persuaded to buy and store cabbage and many cabbages rotted and were finally thrown away."

In order to avoid public discontent, the government has decided to keep the price of cabbage about the same as last year, and has guaranteed a minimum price to growers.

Chinese sources said Wednesday's news on the drastic cutback in cabbage output could be due to troubles with this year's harvest.

#90283d9500 10/10/1990 ~French/German News Agency

MELBOURNE, AUSTRALIA (OCT. 10) - Animal rights activists protested here Wednesday after the government-sanctioned slaughter of about 17,000 kangaroos began.

Peter Preuss, president of the Australian Wildlife Protection Council, said that animal lovers would not stand by and watch the government of the south eastern state of Victoria "blow away" the kangaroos.

Conservation Minister Steve Crabb said that the state government would continue to control kangaroo numbers in the state by shooting them.

Professional shooters began shooting the kangaroos in the Hattah-Kulkyne National Park, in Victoria's northwest, on Tuesday night.

In protest, about 30 people rallied outside the Department of Conservation and Environment, conducted a mock funeral and delivered a petition condemning the cull to officials.

"We are angry," Mr. Preuss said. "People are prepared to be arrested over this."

After the protest the demonstrators would head to the national park and expected to clash with police and shooters, he said.

Mr. Crabb has said the plan to cull the kangaroos was unfortunate but necessary because excess numbers of kangaroos threatened other animals and plant life.

#90283d9550 10/10/1990 ~French/German News Agency

BEIJING (OCT. 10) - China's economy is idling in neutral after being frozen 25 months ago by a draconian austerity program, economic analysts here say.

Although inflation has been brought under control, economic growth will likely fall far short of the six percent target this year and the government has had to pump billions of dollars into industries previously earning a profit.

Observers here are cautious about predicting the policy of China's next five-year plan from 1991 to 1995, which will be decided at a communist party plenum expected later this month or in November.

But there is little doubt that the policy of "economic rectification" will go on for at least two more years.

"They will not announce the end of austerity as long as they have not reached their objectives for production," a Western diplomat said.

Conservatives and reformers in the leadership disagree on the degree of economic reform needed as well as the speed with which to apply them. But all appear to agree on the need to pursue the austerity program, even if it is somewhat toned down.

In a speech published here Tuesday, Premier Li Peng insisted on the need for moderate growth and for continuing economic reform, saying that errors of the past should not be repeated.

Emphasis will continue to be placed on infrastructure, including the transport energy and communications sectors, as well as on agriculture, with cotton and edible oil farming to be developed, Mr. Li said.

But no wide-ranging reforms are expected to emerge, and the authorities will give priority to maintaining moderate growth in order to avoid a repeat of the inflationary spiral of 1988 that caused panic and led to the austerity program.

The open-door policy of attracting foreign investment to China's coastal provinces will be continued.

"It's a way for Li Peng to attract technology," another diplomat said.

#90283d9610 10/10/1990 ~French/German News Agency

MANILA (OCT. 10) - The main business group in the Philippines urged businessmen Wednesday to make sacrifices in a time of economic crisis by assuming the burden for the higher cost of domestic fuel prices.

The Philippine Chamber of Commerce and Industry also urged companies to support its proposal for the granting of emergency allowances to workers in lieu of salary hikes.

The call was made after President Corazon Aquino raised local pump prices by 29 percent late last month in the wake of the Gulf crisis, sparking calls for a 38-peso (1.48-dollar) increase to the minimum wage of 89 pesos (3.5 dollars) per day.

"The times call for sacrifice from every sector. The recent hike in oil prices and the lingering effects of the adverse developments in recent months have made life a bit harder for everyone," the chamber said in a statement.

"Businessmen must be willing to absorb part of the increased cost, and not pass on all the burden to the consumer, even if it means a leaner bottom line for them," the statement said.

It said those who can afford it must consider offering employees emergency

allowances to help them with the higher cost of living, instead of wage adjustments which would only benefit minimum wage earners.

It urged workers to "settle for an amount that their employers can afford to give them," saying unreasonable demands could lead to retrenchments, or worse, the folding up of companies.

#90283d9650 10/10/1990 ~French/German News Agency

SEOUL (OCT. 10) - Hundreds of riot police, backed by tear gas-firing armored vehicles, stormed a university here Wednesday to stop the showing of a North Korean feature film, triggering a violent clash with students.

Several riot policemen were injured by fire bombs and rocks and at least four students were detained during the raid.

The police poured into the Korea University campus through the front and back gates immediately after students started showing the film in defiance of a government ban.

Thousands of students took shelter inside university buildings as others fought back with bricks, fire bombs and sticks amid pungent tear gas that filled the air.

The police action came after students of Korea University and Yonsei University said they would defy a government ban and show the film "Salt" to expedite private cultural exchanges with the North.

The students declined to say from where they obtained the North Korean film, which the police apparently failed to seize. Under the anti-communist National Security Law, North Korean films are banned here.

The police raid was an apparent bid to preempt a massive anti-government protest planned in downtown Seoul later Wednesday.

Student radicals and dissident groups called for a rally at Myondong Roman Catholic Cathedral in a busy commercial section to press their demand for the disbandment of the Military Security Command (MSC).

President Roh Tae-Woo sacked the MSC commander and his defense minister to soothe public outrage over revelations that the command has been spying on important civilians including politicians.

Dissidents and opposition politicians say the MSC has been acting as a secret police force.

#90283d9680 10/10/1990 ~French/German News Agency
BEIJING (OCT. 10) - Municipal firms in Beijing have called for foreign investment to help fund more than 200 industrial projects, the official China Daily said Wednesday.

The English-language newspaper said the money was needed for companies whose activities included machine-building, electronics, car making, chemicals, textiles, steel and light industry.

Beijing's vice-mayor, Zhang Jianmin, was quoted as telling 500 foreign business people and diplomats that Beijing's investment appeal, made Tuesday,

followed the Asian Games, which "greatly improved every service facility as well as the quality of service".

China Daily said the funds required ranged from 300,000 dollars for a chewing gum factory to 56.3 million dollars to launch a motorcycle factory and 88.5 million to make high-strength cement.

Beijing has more than 6,000 industrial enterprises, with a total workforce of 1.8 million, the newspaper said.

#90283d9730 10/10/1990 ~French/German News Agency
AUCKLAND, NEW ZEALAND (OCT. 10) - A 1940 Tiger Moth biplane crashed into the sea near here Wednesday, killing its woman passenger and badly injuring the pilot.

The Tiger Moth, part of Auckland's War Birds Squadron, was doing a scenic flight when it hit the sea 100 metres (yards) off Takapuna Beach.

Earlier this year another plane in the squadron, a World War II Harvard trainer, was involved in a midair collision which killed its pilot.

Eighteen 18 months ago one of the world's few surviving Spitfire fighters ran out of fuel and crashed. It has since been rebuilt and is flying again.

#90283d9870 10/10/1990 ~French/German News Agency
SINGAPORE (OCT. 10) - Petrol prices in Singapore have gone up by about 38 percent and diesel by 60 percent since the Iraqi invasion of Kuwait on August 2.

Premium grade gasoline went up to a record 154.2 Singapore cents (87.6 U.S. cents) per litre compared with 58.8 cents (33.4 U.S. cents) and diesel rose to

69.8 cents (39.6 U.S.) from 43.7 cents (25 U.S.) two months ago.

The previous record high price of 151.3 cents (86 U.S. cents) was in March 1985, when the government raised the ad valorem duty from 50 to 60 percent.

Shell, Mobil, Caltex, British Petroleum and Singapore Petroleum Company announced the increase in the course of the week.

A spokesman for Esso, the other major oil company in the island, said it would follow suit shortly but declined to reveal details.

The oil companies attributed the higher pump prices to an increase in wholesale prices.

Some two-thirds of Singapore's daily oil consumption of 250,000 barrels is imported from the Gulf. The rest comes from Malaysia, Indonesia and China.

#90283d9910 10/10/1990 ~French/German News Agency

ACCRA (OCT. 10) - The West African state of Ghana will need an extra 50 to 60 million dollars to meet its oil bill for the rest of the year as a result of the increase in oil prices, following the Gulf crisis, the Ghana News Agency Gna reported Wednesday.

Gna quoted finance secretary Kwesi Botchwey as saying the situation would be "very difficult".

Ghana spends about 20 percent of its foreign earnings on oil imports. Retail prices of fuel have gone up by about 50 percent since the Gulf crisis sparked a sharp increase in oil prices.

-30- 739

#90283d9940 10/10/1990 ~French/German News Agency

ANCHOARGE, ALASKA (OCT. 10) - Six major oil companies have joined forces in a 1.1-billion-dollar project to boost oil production in Prudhoe Bay, the largest U.S. oilfield.

The agreement was announced Tuesday by British Petroleum Co., Atlantic Richfield Co., Exxon Corp., Phillips Petroleum Corp.

The project involves building a huge centralized natural gas handling facility that would boost production in Prudhoe Bay by 100,000 barrels a day to 1.5 million barrels a day, officials said.

The facility, which was expected to be completed by 1995, would separate natural gas from oil and reinject the gas into wells to raise the pressure and

increase the oil flow.

BP and ARCO also agreed to reduce overlapping services on the North Slope and in Anchorage by 1991, a move that will mean lost jobs for Alaskan workers.

"At a time of American concern about long-term oil supplies, this project will make a welcome contribution and shows Alaska's potential to add significant domestic reserves," BP and ARCO said in a statement.

Prudhoe Bay provides about 20 per cent of domestic oil production.

#90283k0003 10/10/1990 ~Japanese News Agency

WARSAW (OCT. 10) KYODO - A HIGH-POWERED JAPANESE BUSINESS MISSION AGREED WITH POLISH GOVERNMENT LEADERS TUESDAY TO SET UP FOUR JOINT VENTURES, INCLUDING ONE FOR MACHINE TOOL PRODUCTION, JAPANESE OFFICIALS SAID.

THE OTHER THREE CONCERN ALIMINUM ROLLING, PRODUCTION OF HEAT-INSULATING MATERIALS, AND POTATO PROCESSING, THE OFFICIALS SAID. THE FOUR JOINT VENTURES WOULD COST A TOTAL OF 31 BILLION YEN, THEY ADDED.

THE AGREEMENT WAS REACHED BY THE 19-MEMBER MISSION AND POLISH LEADERS, INCLUDING PRESIDENT WOJCIECH JARUZELSKI AND PRIME MINISTER TADEUSZ MAZOWIECKI.

THE MISSION IS LED BY EISHIRO SAITO, CHAIRMAN OF THE FEDERATION OF ECONOMIC ORGANIZATIONS (KEIDANREN). IT IS TOURING FIVE EUROPEAN COUNTRIES IN TWO GROUPS, WITH THE OTHER GROUP VISITING CZECHOSLOVAKIA AND HUNGARY BEFORE REJOINING IN GERMANY.

THE PROPOSED JOINT VENTURES WILL BE JAPAN'S FIRST FULL-FLEDGED BUSINESS COOPERATION WITH POLAND. JAPANESE PRIME MINISTER TOSHIKI KAIFU PLEDGED FINANCIAL HELP FOR POLAND'S ECONOMIC REFORM DURING HIS VISIT LAST JANUARY.

JAPAN LAGS FAR BEHIND OTHER INDUSTRIAL COUNTRIES IN INVESTMENT IN POLAND. IT HAS SO FAR SET UP ONLY TWO JOINT VENTURES IN POLAND COMPARED WITH ABOUT 500 BY GERMAN COMPANIES.

THE FOUR ADDITIONAL JOINT VENTURES ARE BEING ARRANGED BY THE JAPAN INTERNATIONAL DEVELOPMENT ORGANIZATION (JAIDO), JOINTLY ESTABLISHED BY THE BUSINESS COMMUNITY AND THE GOVERNMENT-RUN OVERSEAS ECONOMIC COOPERATION FUND.

DURING HIS MEETING WITH THE MISSION, MAZOWIECKI URGED PRIVATE-SECTOR HELP TO FINANCE A 500-KILOMETER EXPRESSWAY PROJECT LINKING THE BALTIC SEA AND CZECHOSLOVAKIA, AND TO PROMOTE INVESTMENT IN POLLUTION PREVENTION, THE OFFICIALS SAID.

HE WAS QUOTED AS SAYING HE HAS ASKED FOR JAPANESE OFFICIAL CREDITS IN A LETTER

TO KAIFU AND THAT HE WANTS THE JAPANESE BUSINESS COMMUNITY TO OFFER A HELPING HAND.

POLISH ECONOMIC MINISTERS, INCLUDING FINANCE MINISTER LESZEK BALCEROWICZ, TOLD THE MISSION THE GOVERNMENT WILL SOON START NEGOTIATIONS WITH JAPAN TO CONCLUDE AN INVESTMENT PROTECTION TREATY.

THEY SOUGHT JAPANESE COOPERATION IN IMPROVING INFRASTRUCTURE SUCH AS TELECOMMUNICATIONS AND ROAD NETWORKS, THE OFFICIALS SAID.

THE MISSION URGED THE POLISH LEADERS TO IMPROVE THE CLIMATE FOR INVESTMENT AND LENDING, INCLUDING LEGAL ASPECTS, THEY SAID.

#90283m0001 10/10/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 10) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

World stock markets are lower. ... In London, the FTSE is off more than 20 points at midday. ... Tokyo is closed for holiday. ... The dollar is stronger across the board, but bonds are in a selloff with the long yield up to 9.01%. ... Brent North sea crude is up 45 cents to $40.75. ... The SUPREME COURT has let stand a lower court ruling that could permit regional telephone companies to compete in the information services market. ... UAL rejects an employee group's offer to buy UNITED AIRLINES. ... CARTER HAWLEY HALE says it is selling its THALHIMERS department store chain to MAY DEPARTMENT STORES for $325 million.

WHAT'S AHEAD:

PRESIDENT BUSH departs for political fundraising trips to North Carolina, Florida and Georgia. ... SEN. ROBERT DOLE (R. - KAN.) addresses a financial executives institute. ... GOV. STEVE COWPER of Alaska discusses opening of the Arctic National Wildlife Refuge for oil exploration. ... The SECURITIES AND EXCHANGE COMMISSION considers allowing Canadian foreign private issuers to register securities and report them on the same basis as other foreign private issuers. ... The House Banking Subcommittee is scheduled to hold hearings today to examine the impact of the Thrift bailout law on the Federal Home Loan Bank System. ... The primary owners of PRUDHOE BAY plan to invest more than $1 billion in Alaska's north Slope in hopes of boosting oil production there by 100,000 barrels a day by 1995. ... CHRYSLER and the UNITED AUTO WORKERS begin contract talks tomorrow. A UAW council has accepted a tentative contract settlement with FORD, but officials say workers may strike against Chrysler.

FROM THE BEARS:

"Give it a couple of years and [the Dow] will get toward 1000," says Utah based money manager JOHN BLEWER, president of PACIFIC AMERICAN INVESTORS. "The big moves take a long time and this will be a big move." Blewer says the tremendous amount of debt to be serviced by corporations and government will make the recession feel like a depression. "We could even see government default," says Blewer. Says CNN's STUART VARNEY, "That's the worst case scenario I've ever heard on this program." (CNN "Business Morning", 10/10)

H. ERICH HEINEMANN, chief economist for the investment firm of LADENBURG, THALMANN & COMPANY, has been bearish on stocks for months. He says that investors have been "very slow to recognize the scope of the economic downturn" and were "now coming face to face with economic reality." He notes, "... weakness will beget weakness for a while. The economy's in a recession, and in a recession stock prices normally reflect prospects for lower earnings." (NYT, 10/10

"The earnings show there's no light at the end of the tunnel," says FRANK CAPPIELLO, president of McCULLOUGH, ANDREWS & CAPPIELLO, a money management firm. The "tunnel" is the bear market that many on Wall Street have been hoping would be brief. "Everyone knew we were in a bear market," says Cappiello who says that yesterday investors seemed to be saying they now look for a bear with lots of stamina. (WSJ, 10/10)

"Right now it's easier for people to be on the side of the bears than on the side of the bulls," says NED COLLINS, head of U.S. equity trading at DAIWA. He blames some of Wall Streets concerns on Washington and says, "I think it's basically total disappointment in the lack of any leadership in Washington." (Reuters, 10/9)

"We're in a bear market, plain and simple," says BRAD WEEKES at DONALDSON LUFKIN JENRETTE. He sees the Dow headed for 2300 and, if it can't hold there, perhaps down to 1800. ("USA Today", 10/10)

STOCK MARKET:

"It was a disappointing day for the bulls," says RICKY HARRINGTON of MARION BASS SECURITIES. "The stock market doesn't like uncertainty and the major uncertainty now is the possibility of a war in the Middle East." He says the market could fall to 2200. ("Investor's Daily", 10/10)

"The market is being driven by a new case of jitters on top of the old case of jitters," says DANIEL USLANDER of HILLTOP TRADING. (FNN "Marketwrap", 10/9)

"The market got a three-way punch" on Tuesday, notes GENE JAY SEAGLE of GRUNTAL & CO. Most analysts say ballooning oil prices, the latest budget proposal and program selling all hurt the market yesterday. Seagle says the

negative sentiment is a bullish sign, as "it spells closeness to a turn." ("Investor's Daily", 10/10)

"The price of oil has skyrocketed, which ... is going to affect us with inflationary pressures," says PETER DaPUZZO of LEHMAN BROS. He says with inflation up, interest rates will have to remain high, which will lead, in turn, to "a very significant impact on the stock market." (CNN "Moneyline", 10/9)

"The 52-week low we've put in place, at 2427 on the Dow, is not too far away, but my sense is that we bounced off those levels very quickly on that bounce eight trading days ago, and we could easily come back and test [that level]. And my work shows me that the test won't be successful," says MARK DIBBLE of MORGAN STANLEY. (CNBC "Market Wrap-Up", 10/9)

"The idea of higher taxes on an already vulnerable economy makes for a very poor investment climate," says TIM SCALA of SEQUOR GROUP. (FNN "Marketwrap", 10/9)

"All this notion of a technical bounce, which everybody was talking about, proved to be what technical talk usually is: not too good," says BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC." "The budget has come totally apart. The president has lost a biggie on this one." (CNBC "Market Wrap-Up", 10/9)

"The third quarter looks bad and the fourth quarter won't be any better," says HOWARD BERL at MONTGOMERY SECURITIES. "We're cutting earnings estimates across the board." ("USA Today", 10/10)

"There's a perception that the economy is slowing down and the risk of recession is high," says MICHAEL MORAN, chief economist for DAIWA SECURITIES AMERICA INC. "The stock market, being forward looking, tries to take that into account." ("The Washington Post", 10/10)

STOCK TIPS:

"This market has discounted a lot, maybe too much," says the editors at "United & Babson." "We urge long term investors to stay the course." They like retail stocks at this deflated level, recommending DAYTON HUDSON, MELVILLE and DILLARD. Among energy stocks, they emphasize PHILLIPS and UNOCAL for further accumulation. They call EMERSON ELECTRIC an attractive long term buy. (CNBC "World Business", 10/10)

McDONALD & CO. recommends stock in PREMIER INDUSTRIAL CORP., a Cleveland-based distributor of electronic and industrial hardware products. The brokerage predicts the company's earnings should grow an average of 14% a year for the next five years as it continues to expand in Canada and Europe and broaden its product line. ("USA Today", 10/10)

"Will the Greenspan recession actually materialize?" wonders BILL MATTHEWS of the "Cheap Investor." Matthews says it is up to Greenspan and his economic decisions. Meanwhile, Matthews says the 500 point drop in the Dow is due solely to the Gulf crisis and has created "very undervalued stocks." He likes GALACTIC RESOURCES, saying the company is on the verge of becoming a world class gold producer. Bicycle maker HUFFY has been hammered down to an unrealistically low stock price, says Matthews. (CNBC "World Business", 10/10)

"Labor-management relations at UNITED [AIRLINES] are going to get very hot, very tense, very quick," says JOSEPH BLASI, a professor at RUTGERS UNIVERSITY who is an expert on employee ownership and closely follows United. ("USA Today", 10/10)

"With MOODY'S saying they might downgrade the commercial paper [of FIRST BOSTON], it'll make it more expensive for them to go out and borrow through that means," says SMITH BARNEY brokerage analyst ALISON DEANS. That means "paying higher interest rates because there's a higher risk received." MERRILL LYNCH and SHEARSON LEHMAN also face similar problems according to some analysts. (CNN "Moneyline", 10/9)

-30- 8448

#90283m0002 10/10/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 10) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"Currency markets are trying to price a view that the U.S. economy is indeed very weak," says LISA FINSTROM of SHEARSON LEHMAN BROTHERS. "We're waiting for some kind of change in U.S. interest rate policy "Moneyline", 10/9)

According to RONALD HOLZER of HARRIS TRUST AND SAVINGS, the outlook for the dollar is decidedly bearish "given the problems with the budget as well as the economics we've seen with a recession scenario building here." ("Investor's Daily", 10/10)

"If the weak dollar makes it harder for the Fed to ease policy, it will have a potentially damaging effect on the stock market in the U.S., which is hoping that rates will come down again," says GEOFFREY DENNIS, chief international economist at JAMES CAPEL & CO. in London. "One of the reasons for the bad news at the long end of the bond market is that they see bad news coming from all sides, and the dollar is part of that." (WSJ, 10/10)

"I think we're going to see two things: a return to the dollar, because oil is priced in dollars and dollar exports are going to become much more attractive

relative to other European commodities, and ... we're going to see a flight to quality," says PHILIP GATTHELF, president of EQUIDEX. "We've seen a flight to T-bills already, government guarantees. If people start to lose confidence in that guarantee, of course, then gold, silver, platinum and palladium become the next best bets." (CNBC "Market Wrap-Up", 10/9)

"Confidence ... in the ability of the government to function has been badly eroded," says MICHAEL METZ of OPPENHEIMER. "Whatever budget accord we get now may not be enough for the Fed to ease." He says even if the Fed does ease, it may be too little too late, and we will not be able to "avoid a drastic slowdown in the economy." (CNN "Moneyline", 10/9)

"The belief in the marketplace that the Federal Reserve will do nothing until after we get something you can put your hands on, in terms of the budget; the fact that oil prices are above $40 again; All of these things are catalysts," for failing bonds says DAIWA SECURITIES AMERICA's WILLIAM BRACHFELD. (CNN "Moneyline", 10/9)

"I was sort of at a loss to explain why people were buying [securities] so strongly on Friday, so I can't say that I'm surprised the market is getting killed right now," says one government bond trader. "And even though we have given back half of the gains that were made in the last week or so, I wouldn't be a buyer here either, particularly of bonds. With the dollar and oil acting the way they are, that is not a good trade." (NYT, 10/10)

Recent economic problems have created "extremely tenuous market conditions" for bonds, says STEPHEN LESLIE of M.R. BEAL & CO. "None of our concerns have been resolved with regard to a lasting budget agreement." He says bond yields may move back up to the recent high of 9.17%, "although it probably would require yet another jolt of bad news. ("Investor's Daily", 10/10)

"The bond market is inundated with supply," says TIM SCALA of SEQUOR GROUP. "Regardless of which way interest rates and the investment climates go, there's enough bonds to be financed out there." (FNN "Marketwrap", 10/9)

"With the dollar weak and confidence in Washington at a low ebb, it will be very difficult to auction seven-year and 30-year debt," says WARD McCARTHY, a managing director at STONE & McCARTHY RESEARCH ASSOCIATES, a Princeton, N.J. research concern. "It will take more rate concessions to get these securities sold." (NYT, 10/10)

THE ECONOMY:

"I'm increasingly concerned that this could turn into much more than just a mild recession," says DAVID BOSTIAN JR., chief economist of JESUP, JOSEPHTHAL & CO.. The economy probably began retrenching in June, Mr. Bostian estimates, and "with each new statistic from Washington and the pileup of debt in all economic sectors, I grow more and more concerned that we could be entering a

long, deep slump on the order of 1973-75 or 1981-82." (WSJ, 10/10)

"We're encouraged to look for only a rather mild recession largely because we don't detect the sort of excessive inventory building that typically deepens and prolongs a recession," says NANCY LAZAR, an economist at C.J. LAWRENCE, MORGAN GRENFELL INC. "It's only in the past couple of weeks, in fact, that we changed from a forecast containing no recession at all. We still don't think a recession is a sure bet." (WSJ, 10/10)

Banks are focusing on consumer lending as credit demand from such big borrowers, as builders, falls. "It's the only bastion left for banks," says FRANK ANDERSON, bank analyst for STEPHENS INC. in Little Rock. "They have no alternatives." ("USA Today", 10/10)

The FEDERAL RESERVE reported that consumer credit rose a modest 3.4% annual rate in August. "It shows that consumers are spending very, very cautiously, particularly for credit-related items, [but] they are not panicking," says SANDRA SHABER, vice president and consumer analyst with FUTURES GROUP INC. (WSJ, 10/10)

SAL ILAQUA of ROTHSCHILD says that if we do go to war the price of a barrel of oil could be "anywhere from $50 to $60." He says prices of even $100 per barrel "are a possibility, depending on what happens to production facilities." Ilaqua calls the environment "pretty grim." (FNN "Marketwrap", 10/9)

The crisis in Iraq and the killings in Israel "keeps tensions high, keeps people on edge and it keeps the fear in the market that a month from now ... we'll be looking at crude prices around $60 or $70 a barrel," says TOM BENTZ of UNITED ENERGY. He says prices may rise another $3 to $4 over the next week. ("Investor's Daily", 10/10)

"SADDAM HUSSEIN is dictating upward [oil price] pressure right now," says THOMAS BLAKESLEE at PEGASUS ECONOMETRIC GROUP. He says the price jump yesterday could prompt PRESIDENT BUSH to further open the STRATEGIC PETROLEUM RESERVE to try to reverse price pressures. ("USA Today", 10/10)

"The volatility has been very high in crude [oil]," says GORDON RUTLEDGE of J. TAFARO BROKERAGE. But he adds, "we have seen, today, a bit more buying." Many think oil could test $45 per barrel. ("Nightly Business Report", 10/9)

"I would say generally the [oil] industry is of the opinion that the ultimate military solution to this thing [in the Middle East] is near at hand and as long as that belief continues to persist, it's difficult to find people who are willing to sell," says MICHAEL McDERMOTT, an oil trader at PAINEWEBBER. ("The Washington Post", 10/10)

IN WASHINGTON:

"I think that the stakes were so high that to not do something [meaningful on the budget] was unfathomable," says AL GOLDMAN at A.G. EDWARDS. "It creates a sense overseas that our country is ungovernable." ("USA Today", 10/10)

"There may be some minor modifications along the way [in a new budget agreement], but there really isn't time for them to go back to the beginning and start the negotiations from zero and try to come up with a whole new plan " says STAN COLLANDER, who follows the federal budget for PRICE WATERHOUSE. "Instead, they're going to have to figure out what kind of minor changes they can attract the support they need to get this passed." (CNBC "Market Wrap-Up" 10/9)

"This budget is a total farce at this point," says BILL WOLMAN of "BusinessWeek" and "CNBC." "There is no way we're going to cut the federal deficit, and the deficit this year is going to be at least $300 billion. And it's going to be that next year, too, despite this program. So, there's no cheer yet." (CNBC's "Market Wrap-Up", 10/9)

#90283p3058 10/10/1990 ~PR Newswire

ENGLEWOOD CLIFFS, NJ (OCT. 10) PR NEWSWIRE - CPC International Inc. (NYSE: CPC) and Milwaukee Seasonings, Inc. today jointly announced an agreement for the sale of Milwaukee Seasonings to CPC for an undisclosed cash sum.

Milwaukee Seasonings, Inc. is a privately-owned, Wisconsin processor of custom-formulated food ingredient systems for the foodservice and food processing industries. Its total sales in 1990 are expected to be in excess of $40 million. Milwaukee Seasonings has plants at Germantown, Wis., and Irving, Texas, and has 185 employees.

CPC International, with sales in 1989 of $5.1 billion, ranks as one of the largest and most international food companies in the U.S. Best- known among its U.S. products are: Hellmann's and Best Foods mayonnaise, Mazola corn oil and margarine, Skippy peanut butter, Thomas' English muffins, Arnold breads, Mueller's pasta products, Karo and Golden Griddle syrups, and Knorr soups, sauces and bouillons. CPC has operations in 47 countries, including 112 plants, and has 32,500 employees.

Robert J. Gillespie, president of CPC's North American consumer foods business Best Foods, and a vice president of CPC International, said, "The acquisition of Milwaukee Seasonings is an important step for Best Foods, marking our entry in the custom-formulated food ingredient systems business in the U. S. - a business our company entered in Europe some time ago. We view this business as a growth area closely related to the changing demands of the foodservice and food processing industries. We believe our experience in these industries of nearly a century will be beneficial to Milwaukee Seasonings, and

similarly that their technology and know-how will be beneficial to Best Foods and other operations of CPC abroad."

D.L. Gruber, chairman and founder of Milwaukee Seasonings, Inc. said, "The sale of Milwaukee Seasonings to CPC will enable us to serve our customers even better utilizing CPC technology and facilities. We believe this action will lead to further enhancement of the reputation of MSI products as well as CPC's brands. As in the past, the MSI team of employees will continue to maintain its high standards of consistently high quality products and excellent service to the industry."

With sales in 1989 of $5.1 billion, CPC International Inc. ranks as one of the largest and most international food companies in the U.S. CPC's worldwide consumer foods business accounts for approximately 80 percent of the company's total sales, and its products are household favorites throughout North America Europe, Latin America, and Asia. Best-known among its U.S. brands are: Hellmann's and Best Foods mayonnaise, Mazola corn oil and margarine, Skippy peanut butter, Thomas' English muffins, Arnold breads, Mueller's pasta products, Karo and Golden Griddle syrups, and Knorr soups, sauces and bouillons. CPC is also one of the largest corn refiners with operations in North America and Latin America. Worldwide CPC International has operations in 47 countries including 112 plants.

#90283p3059 10/10/1990 ~PR Newswire

READING, UK (OCT. 10) PR NEWSWIRE - X/Open Company Ltd., the worldwide open systems organization, today announced six new volumes of advanced specifications that will form the foundation of an extended industry-wide open system platform for the 1990s.

X/Open also announced a new, "open" policy that changes the way the specifications are released. In addition to the traditional XPG volumes of formal specifications, X/Open is introducing early release levels to allow the growing open systems community to have access to the latest interface definitions and technical directions, and to give feedback to X/Open.

In addition to the initial volumes released today, further specifications will be published regularly. The new specifications will significantly extend the scope and value of the internationally-supported XPG open systems environment.

The advance specifications cover the following: -- Protocols for X/Open PC Interworking, or (PC)NFS. This first volume recognizes how important it is to facilitate interworking between personal computers and X/Open-compliant

systems in a standardized way.

-- Distributed Transaction Processing, or the XA Specification. This is the first of a new breed of specifications aimed at allowing a broad industry participation in the development of specifications. Developed from scratch, in close collaboration with major suppliers of database management systems, and in accordance with the X/Open reference model, it will encourage the development of compliant products and will evolve along with technology.

-- Byte Stream File Transfer (BSFT). BSFT provides a command line interface to the OSI FTAM service, based on the widely used "ftp" commands, allowing those familiar with existing tools to migrate to open systems.

-- Comparison Study of OSI Profiles. This document compares the main features and philosophy of the most important OSI profiles, with conclusions on trends and developments.

-- Structured Query Language (SQL). This is an enhanced version of the XPG specification, which extends exisiting capabilities to include dynamic embedded SQL capabilities.

X/Open Company Ltd., founded in 1984, is an independent, non-profit corporation made up of international computer system vendors who are investing business, technical and marketing resources in the specification of the X/Open Portability Guide (XPG), a vendor-independent, open operating environment based on de facto and international standards. Specification of the XPG is achieved through close cooperation with users, independent software vendors and standards organizations worldwide.

SAN DIEGO (OCT. 10) PR NEWSWIRE - Infrasonics Inc. (NASDAQ: IFRA) announced today that sales for its first quarter, ended Sept. 30, 1990, increased 40 percent to $1,853,200, compared to $1,325,100 for the same quarter last year. The profit for the first quarter was $119,100 or $.01 per share, compared to $81,500 or $.01 per share for the previous year.

Jim Hitchin, Infrasonics' president, said, "Revenues are increasing rapidly due to our expanding market share for each of our major products in both the neonatal and adult ventilation markets. I expect this trend to continue in subsequent quarters."

Infrasonics is a public company with its common shares traded Over-the-Counter under the NASDAQ symbol IFRA. The company manufactures

ventilators (respirators) for infants, children and adults as well as other respiratory care products for use in hospitals and the home.

#90283p3064 10/10/1990 ~PR Newswire

SAN JOSE, CA (OCT. 10) PR NEWSWIRE - Banyan Systems today announced VINES support for the Simple Network Management Protocol (SNMP), the network management standard that has gained industry-wide support. The company also announced the availability of the VINES SNMP Management Information Base (MIB) which developers can use to write SNMP Managers that can access information from a VINES network. Banyan will offer a VINES SNMP Agent, enabling the communications of VINES network and systems management information to any SNMP compliant management node.

Together, the VINES SNMP Agent and VINES SNMP MIB provide the tools to integrate the management of VINES networks into any SNMP compliant management station. Banyan will demonstrate VINES support for SNMP at INTEROP/90 in booth No. 1908. In addition, NetLabs and Cabletron will demonstrate management products at INTEROP/90 that provide support for VINES SNMP.

By incorporating SNMP support in VINES, the entire corporate-wide PC network can be managed through SNMP, not just the TCP/IP connected portions of the network. SNMP management stations that incorporate the VINES SNMP MIB can now collect all the system and network management data that is currently available to VINES system and network administrators. VINES network and system management options provide performance information on individual servers, services, connections and network topology and allow global management of network services such as File, Print and Mail services.

Banyan's support of the VINES SNMP Agent and the announced availability of the VINES SNMP MIB underscore Banyan's continuing commitment to deliver standards-based networking products. Banyan is committed to working with third parties to help incorporate the management of VINES networks into their SNMP management products.

Banyan's SNMP MIB is available now to all developers of SNMP Manager products.

About Banyan Systems

Banyan is the leader in corporate-wide PC networking. Its flagship product, VINES, is a standards-based distributed network operating system for local or global internetworking of personal computers, minicomputers, and mainframes. VINES is recognized for its ability to make multivendor networks of any size easy to use and manage. Banyan products are marketed worldwide through a network of authorized value- added resellers (VARs) and country partners.

Banyan and VINES are registered trademarks, and StreetTalk and VANGuard are trademarks of Banyan Systems.

CONTACT: Jennifer Jester of Banyan Systems, 508-898-1000; or Cynthia Stirling of Regis McKenna, 415-494-2030, for Banyan Systems.

UPPER SADDLE RIVER, NJ (OCT. 10) PR NEWSWIRE - Western Union Corporation (NYSE: WU) today announced it has extended the period of its current exchange offer, which had been scheduled to expire at 12:00 midnight on Oct. 9, to 12:00 midnight on Thursday, Oct. 25, 1990.

In the exchange offer, which is a key component of the company's recapitalization plan, Western Union is proposing to issue new notes and common shares in exchange for up to $530 million of its presently outstanding 16 percent notes and 19-1/4 percent senior secured notes. The reclassification of Western Union preferred shares into common shares, which is the other major component of the recapitalization plan, was approved by the company's shareholders on Aug. 16.

Preliminary figures indicate that as of midnight on Oct. 9, $1,421,000 aggregate principal amount of Western Union 16 percent notes and $346,339,000 aggregate principal amount of its 19-1/4 percent notes had been tendered in the current exchange offer (including securities as to which delivery has been guaranteed).

#90283p3070 10/10/1990 ~PR Newswire

DANBURY, CT (OCT. 10) PR NEWSWIRE - Union Carbide Chemicals and Plastics Company Inc. announced today that it has licensed its UNICARB(TM) System technology to BASF Corporation. Under the license, BASF will develop, manufacture and market UNICARB System coating formulations.

The UNICARB System replaces up to 80 percent of the solvents normally used in spray coating formulations with carbon dioxide. Unlike other VOC (volatile organic compound) abatement systems that generate carbon dioxide, the UNICARB System uses carbon dioxide that has been emitted from other industrial processes.

UNICARB System formulations developed by BASF will allow coating applicators to meet the environmental regulations proposed for the Clean Air Act amendments. Terry Anderson, director of research for BASF, says, "Manufacturers are looking for cost effective solutions to lowering VOC

emissions without sacrificing quality and appearance. For many coating applications, the UNICARB System technology could be the answer."

BASF Corporation, headquartered in Parsippany, N.J., is a major supplier of coatings to the automotive OEM manufacturing and refinishing markets.

"Union Carbide has invested many years in developing products that could help lower VOC emissions for spray applied coatings," says Tom White, business manager for the UNICARB System. "We feel the UNICARB System technology is the solution. We see our investment starting to pay dividends in early 1991 as the first UNICARB System spray coating operations are commercialized. We anticipate rapid acceptance in several major markets as the Clean Air Act amendments are legislated."

BASF joins UNICARB System licensees who will supply coatings and spray coating equipment to the automotive, wood and metal furniture, heavy equipment, appliances, aerospace, and truck and bus markets.

SECAUCUS, NJ (OCT. 10) PR NEWSWIRE - An ultra-compact personal hand-held cellular phone, Model HP600, has been introduced by the Panasonic Communications & Systems Company.

Measuring a mere 2-1/6" (width) by 6-9/16" (height) by 7/8 (depth), the HP600's handset was built to the specific height of 6-9/16"; the minimum length considering the distance between the ear and mouth.

As a result of the Panasonic Battery saving mode, the HP600 offers an outstanding 90 minutes (typically) of talktime (16 hours stand-by time) with its standard battery pack.

The HP600's user-friendly features include dual selectable telephone numbers that permit two phone number capability for subscriber versatility; Any Key Answer that allows a user to push any key, with the exception of Power and End Keys, to answer a call; and a 100 number alphanumeric memory that includes alpha tagging of stored numbers and nine special memories for pauses dialing.

The phone also offers a backlit keypad and LCD that automatically shuts off after 10 seconds to save battery life, scratch pad dialing that allows input of a number while you are still speaking, a function menu guide that helps users view correct key-in operations and automatic repeat dialing.

The phone's stay alive function maintains connection for five seconds to permit changing the battery, and it has a visible and audible low battery

warning. It features a three-level electronic lock; the Full Lock setting locks all incoming and outgoing calls; the Dial Lock setting transmits only memorized numbers; and the Send Lock setting allows a user to only receive calls.

The HP600 weighs 13.4 ounces and will be available in November at a suggested list price of $1,200.

LOUISVILLE, KY (OCT. 10) PR NEWSWIRE - Earnings per share of Humana Inc. (NYSE: HUM) increased 17 percent in the year ended August 31, as the company's strategy of vertical integration involving hospitals and health plans continued to gain ground.

Net income advanced to $309,639,000 or $3.00 per share from $255,987,000 or $2.56 a year ago. Revenues rose 19 percent from the previous year, to $4,851,958,000 from $4,087,994,000.

Humana's health plans ended the year with an operating profit of $49,072,000, up from $3,940,000 in fiscal 1989 as revenues increased to $1,494,084,000 from $1,088,114,000. Hospital operating income increased to $636,680,000 from $587,721,000 the year before as revenues grew to $3,597,945,000 from $3,153,537,000. Hospital revenues paid by Humana health plans, eliminated in consolidation, increased to $240,071,000 from $153,657,000.

Hospital admissions, computed on a same-hospital basis, gained 4.8 percent. Humana health plan members accounted for 19 percent of Humana's hospital admissions, up from 16 percent last year.

For the three months ended August 31, Humana earned $85,122,000 or 78 cents per share, compared with $66,730,000 or 66 cents a year ago. Revenues grew to $1,280,257,000 from $1,078,792,000.

Humana owns and operates 83 hospitals and provides a variety of health benefit plans for employee groups and Medicare beneficiaries.

CHICAGO (OCT. 10) PR NEWSWIRE - Soft Warehouse, the Computer Superstore, today began offering a broad range of Dell Computer Corp. products in a decision that significantly expands the company's PC product line and marks a

novel service arrangement with the PC manufacturer.

Soft Warehouse, the exclusive retail source for Dell Computers, will offer Dell desktop and laptop systems based on the Intel 286, 386, 386SX and 486 microprocessors. Each system will be supported by Dell's unlimited toll-free technical support and a one-year, on-site service contract provided through the manufacturer -- an arrangement unique to Soft Warehouse. The service contract can be extended for an additional four years.

"We are excited to be able to offer a full range of premium-brand Dell products and expect our customers to benefit from the alliance between Soft Warehouse and Dell," said Tim White, general manager of the Soft Warehouse store in Chicago. "No other computer superstore chain offers free, manufacturer-direct technical support with the purchase of a PC. We believe the combination of quality products and Dell-provided technical support will be very attractive to our customers." White added that the quality and accessibility of Dell's technical support has been consistently cited in eight consecutive PC WEEK polls of customer satisfaction won by Dell.

Soft Warehouse has been established in Chicago since July 1990 and currently employs about 66 individuals in the retail operation. Located at 1057 E. Golf Road in Schaumburg, the store maintains an inventory of more than 5,000 computer and computer-related products in a 20,000-plus square foot showroom. Soft Warehouse is best known for its quality selection, service and discount savings of up to 80 percent on brand-name products.

IRVINE, CA (OCT. 10) PR NEWSWIRE - Gateway Communications Inc. (NASDAQ: NMS/GWAY) has been awarded "Editor's Choice" for its G/EtherTwist local area network products. The prestigious award is published in the Oct. 16 issue of PC Magazine ("Building Workgroup Solutions: 10BaseT LANs"), one of the computer industry's foremost end-user/dealer computer publications.

Gateway's G/EtherTwist follows the award-winning tradition of its sister product, G/Ethernet, which is the current "Editor's Choice" for coaxial Ethernet products. G/EtherTwist outperformed an impressive field of competitors including Hewlett-Packard, 3Com and many others.

Gateway's G/EtherTwist Hub was also used as the central foundation piece throughout the testing of all 12 UTP Ethernet adapters.

First introduced in February 1990, G/EtherTwist is Gateway's family of IEEE 802.3 10Base-T LAN adapters and hubs designed for use with unshielded twisted pair telephone wire. Gateway is one of the industry leaders in this emerging

market.

Gateway Communications Inc. designs, manufactures, and markets a full range of networking and communications products for IBM and compatible personal computers. Gateway products are sold in more than 70 countries worldwide. Corporate and international headquarters are located at 2941 Alton Ave., Irvine, Calif., 92714, telephone 714-553-1555; fax: 714-553-1616.

FORT LAUDERDALE, FL (OCT. 10) PR NEWSWIRE - Sports-Tech International, Inc. (NASDAQ: STXL) today announced results for the fiscal year ended Aug. 31, 1990. Revenue increased 35 percent to $6,048,233 from $4,467,693 in the prior year and net earnings increased 179 percent to $618,405 ($.45 per share) from $221,402 ($.26 per share) in the prior year.

Many leading professional, college and high school teams have chosen Sports-Tech's computerized video duplicating and editing systems for their sports programs.

14 NFL teams, including the San Francisco Forty-Niners, Los Angeles Raiders and Chicago Bears.

Nine NBA teams, including the Los Angeles Lakers, Portland Trailblazers and San Antonio Spurs.

93 College Football teams, including Notre Dame, Virginia, Auburn, Oklahoma, Tennessee, Florida, Florida State, Illinois, Washington and Texas A&M.

12 College Basketball teams, including UNLV, Kansas and Michigan State. - 36 High School teams in five states.

Continued growth is expected to result from expansion of the company's sales efforts to the college and high school markets and from the introduction of new, economical editing systems with professional features and capabilities.

Michael Levy, chairman, stated that "Sports-Tech's success is due to the dedication, abilities and enthusiasm of our employees and the continued satisfaction of our customers. The company is a prime player in the high profile, rapidly growing and generally recession-resistant sports market, and management is absolutely committed to building a profitable and successful business."

#90283p3096 10/10/1990 ~PR Newswire

CINCINNATI (OCT. 10) PR NEWSWIRE - John G. Smale announced today that he plans to retire as an officer and employee of The Procter & Gamble Company (NYSE: PG) effective Jan. 1, 1991, after more than 38 years of service with the company.

Smale served as chief executive officer of Procter & Gamble from 1981 to 1990 and has been a director of the company since 1972. Smale will continue to serve as a member of the board of directors and will continue as chairman of the executive committee of the board.

Edwin L. Artzt, chairman of the board and chief executive of Procter & Gamble, said, "We will greatly miss John Smale as a fellow employee of P&G, but we are gratified that he has decided to stay on as a director and provide the company and its shareholders the continued benefits of his great wisdom and immense business experience."

Smale, 63, has been an officer of Procter & Gamble for 23 years -- serving as vice president, executive vice president, president, chairman of the board and chairman of the executive committee. He joined Procter & Gamble in 1952.

Smale's first job with Procter & Gamble was as an assistant brand manager. He rose in responsibility within the company's Advertising Department, where he became, in 1963, manager of the Advertising Department of the then Toilet Goods Division.

He was elected vice president-Toilet Goods Division in 1967 and a vice president-group executive in 1970. He was elected to the board of directors in 1972. In 1974, he became president, in charge of Procter & Gamble's operations in the United States, a position he held until 1981 when he was also elected chief executive officer. In 1986, he became chairman and continued as chief executive officer.

When Smale first became the chief executive in 1981, Procter & Gamble's sales were $11.5 billion and earnings were $668 million. On Jan. 2, 1990, when he stepped aside as chief executive, the company's sales exceeded $21.4 billion and earnings were in excess of $1.2 billion.

Smale has received honorary degrees from a number of colleges and universities including Xavier University, DePauw University and his alma mater, Miami University.

Mr. and Mrs. Smale will continue to reside in Cincinnati for the foreseeable future.

DALLAS (OCT. 10) PR NEWSWIRE - J.C. Penney Company, Inc. (NYSE: JCP), announced today that it will provide free packaging and shipping for Christmas parcels of JCPenney merchandise sent to Operation Desert Shield APO/FPO zip codes.

Purchases made through Nov. 15 are eligible, but parcels shipped after Nov. 3 to Desert Shield APO/FPO zip codes cannot be assured of delivery before Christmas.

Gifts may be purchased at any JCPenney store or ordered through the catalog by calling toll-free 1-800-222-6161. If customers do not have a JCPenney Christmas catalog, they should go to the catalog department in a JCPenney store where copies of the catalog will be available.

"This is a stressful time for family and friends of military personnel stationed in the Persian Gulf," said W. R. Howell, chairman of the board of JCPenney. "We hope that our free Christmas shipping service can help in some small way to lighten the burden of separation during the Holiday Season."

ST. PAUL, MN (OCT. 10) PR NEWSWIRE - Carl B. Drake Jr., vice chairman of the Ordway Music Theatre's board of directors, today announced the appointment of Bill Conner as its president. Conner has served as executive director of The Children's Theatre Company (CTC) for the past four years.

During Conner's tenure at CTC, the Theatre has eliminated a $500,000 deficit, balanced CTC budgets in four consecutive years, created the Theatre's cash reserve of $450,000, increased CTC's annual attendance from 200,000 to 280,000 and the subscription base from 11,000 to over 29,000. In addition, Conner managed the Theatre's touring programs, strengthening the national touring program as well as developing successful exchange programs between CTC and the Central Children's Theatre of Moscow and the upcoming exchange with the Children's Art Theatre in Shanghai.

Conner, who came to The Children's Theatre Company from Chicago where he served as founding producer of the first International Theatre Festival in Chicago, as well as managing director of the Court and St. Nicholas Theatres, will assume his position at the Ordway on Monday, Oct. 15, 1990.

Locally, Conner has served as a board member for Ballet of the Dolls, the Penumbra Theater Company, and for ASSITEJ, the International Association of Theatres for Young People.

Carl Drake stated that, "The board and staff are enthusiastic about having Bill as part of our team at the Ordway, and we feel confident in his leadership abilities."

#90283p3104 10/10/1990 ~PR Newswire

NASHVILLE, TN (OCT. 10) PR NEWSWIRE - Service Merchandise Company, Inc., (NYSE: SME) today announced sales and earnings for the third quarter ended Sept. 30, 1990.

Net sales for the third quarter of 1990 were $657,905,000 compared to $621,956,000 for the third quarter of 1989, an increase of $35,949,000 or 5.8 percent. Comparable store sales increased 2.4 percent over the prior year. The Company has added a net of 14 stores since the third quarter of last year.

The net loss for the three months ended September 30, 1990 was $(7,306,000), or $(.14) per share, compared to $(11,690,000), or $(.22) per share for the same quarter last year. The decrease in the net loss is primarily due to a reduction in selling, general and administrative expense as a percentage of net sales.

Gross margin for the third quarter of 1990, after taking into account buying and occupancy expense, was 24.6 percent of net sales, or the same as last year. Hardlines merchandise margins increased during the quarter but were offset by a decline in jewelry merchandise margins.

Selling, general and administrative expenses as a percentage of net sales decreased to 19.4 percent for the third quarter from 20.4 percent for the third quarter of 1989. The decrease in the expense as a percentage of net sales was attributable primarily to decreases in payroll in 1990 and to one-time recapitalization expenses incurred in the third quarter of 1989.

Total long-term debt decreased to $821 million at September 30, 1990 from $889 million at September 30, 1989. The decrease in the total long-term debt is a result of both scheduled payments and prepayments which demonstrate the Company's ability and desire to repay debt associated with the recapitalization as soon as possible.

Interest expense on debt and capitalized leases increased $852,000, or 2.7 percent in the third quarter to $32,432,000 in 1990 from $31,580,000 in 1989. The Company's interest expense increased due to the increase in average outstanding debt in 1990 when compared to 1989, substantially offset by the favorable impact of a reduction in market interest rates on variable rate debt. Because the recapitalization debt incurred on July 25, 1989 was outstanding only 65 of the 92 days in the quarter, the interest expense from debt incurred as a result of the recapitalization was $11,900,000 in 1989 and increased to $15,260,000 in the third quarter of 1990.

The Company's Credit Agreement, entered into in connection with the recapitalization in July 1989, provided for (a) $360 million in a Secured Term Loan of which $55 million was repaid by the first quarter, (b) $140 million in a Real Estate Bridge Loan, and (c) approximately $475 million in revolving credit loans. Of the $55 million repaid by the first quarter, the Company utilized excess cash flow to prepay approximately $35 million of the Term Loan. $90 million of the Real Estate Bridge Loan was converted to First Mortgage Secured Notes due in the year 2000 with a current cost to the Company of 9.5 percent. The remaining $50 million of the Real Estate Bridge Loan was converted on July 25, 1990 to a term loan due in 1995 at a current variable

rate of 12.5 percent, but is refinancable at any time at the Company's option.

For the nine-month period ended September 30, 1990, the Company incurred a net loss of $(21,615,000), or $(.41) per share, compared to a net loss of $(2,250,000), or $(.04) per share, for the comparable period last year. The increased net loss was attributable primarily to the higher interest expense from the recapitalization. In the first nine months, recapitalization expense including interest totalled $60 million and reduced net earnings by $.72 per share in 1990, compared to $22 million in the comparable 1989 period which reduced net earnings by $.27 per share in 1989, a difference of $38 million or $.45 per share.

Raymond Zimmerman, President and Chairman stated, "I am pleased with the progress we have made since the recapitalization. Earnings and cash flow have exceeded our expectations. We are looking forward to the important Christmas Season."

Service Merchandise Company, Inc., "America's Leading Jeweler," operates 337 catalog stores and one Service Jewelry Store.

RICHMOND, VA (OCT. 10) PR NEWSWIRE - Circuit City Stores, Inc., (NYSE: CC) today announced the appointment of three new officers.

Bernard W. Andrews has been named to the newly created position of executive vice president of marketing. He was most recently president-marketing for Montgomery Ward & Company.

Andrews joined Montgomery Ward in 1983 as vice president-home furnishings. He was named senior vice president-advertising in 1985, president-hardlines in 1986 and president-marketing in 1990. Prior to joining Montgomery Ward, Andrews spent 20 years at Sears, Roebuck and Co. Mr. Andrews holds a bachelors degree in business administration from Marshall University.

"Bernie is a strong and experienced addition to our management team," said Richard L. Sharp, Circuit City's president and chief executive officer. "We are confident that his extensive background in hard goods retailing will contribute to the development and implementation of Circuit City's long-range marketing strategy."

The company also promoted two associate controllers. Keith D. Browning, who joined Circuit City in 1982, was named corporate controller. Philip J. Dunn was appointed treasurer. Dunn joined the company in 1984.

Circuit City Stores, Inc is the nation's largest specialty retailer of brand-name consumer electronics and major appliances. With headquarters in Richmond, Va., it operates 138 Superstores, 16 Circuit City stores and eight Impulse mall stores in the eastern, midwestern and western United States.

ARUBA, DUTCH CARIBBEAN (OCT. 10) PR NEWSWIRE - Divi Hotels N.V. (AMEX: DVH) announced today that its exchange offer on its two outstanding issues of debt securities will be extended until midnight, Eastern Daylight Time, on Nov. 9, 1990.

The exchange offer was initiated on April 27, 1990, and is being made to security holders qualified to participate in a private placement regarding

Divi's $60,000,000 of 14-1/2 percent senior debentures due 1998 and $50,000,000 of 12-3/4 percent subordinated notes due 1996. It was originally scheduled to expire at midnight, EDT, on May 24, 1990, and was previously extended until midnight, EDT, on Oct. 10, 1990.

Through Oct. 10, 1990, only a nominal amount of the outstanding debt securities covered by the exchange offer had been validly tendered. The company is continuing negotiations with a committee of the holders of the two issues of debt securities and hopes to reach agreement with the committee as to revised terms for the exchange offer by the end of November.

PHILADELPHIA (OCT. 10) PR NEWSWIRE - Rohm and Haas Co. (NYSE: ROH) announced today that it has reached an agreement to sell its Triton surfactant and alkylphenol business to Union Carbide Chemicals and Plastics Co. Inc. (NYSE: UK).

Rohm and Haas announced in April that the business was for sale. The Triton surfactant and alkylphenol business has worldwide sales in excess of $100 million.

"The sale will result in a good fit. Union Carbide has an existing surfactant business which complements our line of specialty surfactants," said David T. Espenshade, business unit director for Formulation Chemicals. "I am confident that Rohm and Haas customers -- both external and internal -- will continue to be well served by the new management."

Rohm and Haas is selling the inventories, technology and Triton trademarks associated with the surfactant business. No manufacturing facilities are included in the transaction. Rohm and Haas will continue to manufacture both surfactant and alkylphenol products for Union Carbide at its plants in Philadelphia and Houston for up to four years. Manufacturing eventually will be integrated into Union Carbide's plants.

Rohm and Haas expects the transaction, which requires government approval, to be completed by the end of the year.

The financial terms of the agreement were not disclosed.

ATLANTA (OCT. 10) PR NEWSWIRE - Scientific-Atlanta (NYSE: SFA) and V-Crest Systems Inc., a wholly owned subsidiary of Volkswagen of America Inc., have signed a contract valued at more than $12 million to design, install and service an extensive VSAT (Very Small Aperture Terminal) satellite network.

The new network will replace Volkswagen's existing terrestrial private-line network, and link up to 835 Volkwagen and Audi dealers across the United States with V-Crest's headquarters.

The use of Scientific-Atlanta's SkylinX.25(TM) VSATs will make possible new applications for auto industry that were not feasible with terrestrial technology. These include broadcast video transmission for training and corporate communications, low-cost credit card approval, and on-line check approval.

Other benefits of the network will be increased speed, network capacity, and system availability for existing applications. These applications include general accounting, sales, parts and service functions.

Scientific-Atlanta's SkylinX.25 is a full-featured VSAT network characterized by a high degree of software definition and an industry-standard X.25 packet switch architecture. The SkylinX.25 system provides greater flexibility and more connectivity options.

In addition to providing the network hardware and software, Scientific-Atlanta will be providing on-going maintenance and support, including network hub management with on-site personnel on Scientific-Atlanta's shared hub in Warren Mich.

V-Crest is planning an aggressive rollout of the Volkswagen network, and expects to have most dealers connected by January 1991. Once upgraded to the VSAT system, dealers will obtain the additional features and capabilities at about the same monthly charges as they now incur for the terrestrial system.

Scientific-Atlanta Inc. is a leader in cable television electronics and satellite-based communication networks, and is a key supplier of electronic instrumentation for industrial, telecommunications and government applications worldwide.

TALLAHASSEE, Fla. (OCT. 10) PR NEWSWIRE - CMS/DATA (NASDAQ: LAWR) is pleased to announced that CLO 2 (Comprehensive Law Office), its industry-leading law

office management package, is now available on the IBM RISC System/6000 system units under AIX (a form of the UNIX operating system). By providing CLO 2 on this platform, CMS/DATA is able to expand its offering of law practice management applications to a much wider market.

Alan Tripp, vice president of Sales & Marketing for CMS/DATA, stated that, with UNIX as an industry standard, it was a logical step to make their legal applications available on these systems. Additionally, with IBM's endorsement of UNIX, the impact on the market could be similar to the effect IBM's support of MS DOS had to the PC market. "The RS/6000 is a cost competitive high-powered platform," stated Tripp, "and with IBM's reputation for commitment to quality and service, we believe them to be an ideal partner."

Developed specifically for law offices, CLO 2 provides law practive management applications such as Time & Billing, General Ledger and Accounts Payable, and is designed for high system performance and reliability. CLO 2 is integrated with industry-standard WordPerfect word processing which allows for easier training for those operators with word processing experience, and increased operator productivity within a shorter period of time.

HOUSTON (OCT. 10) PR NEWSWIRE - Allwaste, Inc. (NASDAQ: ALWS) announced today that its board of directors has authorized the purchase of up to 500,000 shares of its common stock in the open market or in privately-negotiated transactions during the period through August 31, 1991. The company currently has approximately 34,800,000 shares of common stock outstanding.

Clayton K. Trier, president and co-chief executive officer, stated, "Allwaste's balance sheet is very strong, and we believe that recent market conditions make the purchase of the company's common stock a sound financial investment for the company." Trier added, "These purchases will be made at prices which will not be dilutive to earnings per share for the current year."

Shares of common stock repurchased under the program will be held in the company treasury and will be available for use in connection with business acquisitions by the company, requirements under employee benefit programs or other general corporate purposes. Because of restrictions associated with pooling-of-interests transactions made earlier this year, the company is limited to purchasing up to about 100,000 share through Nov. 15, 1990.

Allwaste, Inc. is a Houston-based environmental services company with over 90 operating locations throughout the United States and Canada.

ZEELAND, MI (OCT. 10) PR NEWSWIRE - Gentex Corporation (NASDAQ-NMS: GNTX) today announced the receipt of a purchase order from Chrysler Motors Corporation for its new Electrochromic Headlamp Control Mirrors (EH Mirrors). The mirrors will be offered in option packages on select 1992 model Chrysler luxury vehicles.

The new EH Mirror is a standard Gentex interior electrochromic mirror with an extra feature: A special sensor monitors daylight conditions and automatically turns the vehicle's headlamps on and off in response to the amount of light observed.

"This is the industry's first application for this new product and numerous other vehicle models are considering adapting it in the future," said Kenneth LaGrand, Gentex executive vice president. "Gentex is building partnerships with the automakers who are telling us what their customers want, and we are developing more sophisticated products to meet the auto industry's needs by incorporating more features within the housing of the mirror." The EH Mirror is the first of several advanced-feature electrochromic mirrors Gentex plans to introduce in the next year.

Gentex officials anticipate that the new Chrysler purchase order will generate an estimated $1 million in additional revenue for the company during the first full year of production.

"We expect to sell more of the EH Mirrors than the original Electrochromic Mirror because of the added headlamp feature. Consumers can purchase the EH Mirror for about $60 more than the standard electrochromic mirror," said LaGrand.

Gentex Corporation develops, manufactures and markets proprietary electro-optical products: patented electrochromic and motorized automatic mirrors for the automotive industry and an extensive line of fire-protection products for commercial applications. Shares of Gentex common stock are traded publicly in the NASDAQ National Market System under the symbol GNTX.

DALLAS (OCT. 10) PR NEWSWIRE - EDS (NYSE: GME) announced today that it has signed a five-year agreement to provide computer and communication systems, as

well as other management system services, for the Marine Spill Response Corporation (MSRC). MSRC has been created in order to quickly organize and deploy necessary resources during catastrophic oil spills.

EDS will work with the MSRC to define, analyze, design and implement the information and communication systems the MSRC needs in both spill- crisis situations and day-to-day business activities. MSRC will use EDS' support to develop knowledge-based systems for coordinating oil spill response efforts and integrating tide, current, weather, spill trajectory and environmental data.

As a result of the Oil Pollution Act of 1990, oil shippers and others responsible for offshore oil transportation are required to show that they can contain and clean up any oil spill they might cause. MSRC, the largest response organization of its kind, will be the resource that most marine petroleum transporters will use in responding to catastrophic spills.

"EDS is proud to be able to play a role in this unprecedented mobilization effort by the energy industry and proud to bring 28 years of information technology experience to the environmental arena," said EDS' Energy Division president, Ken Scott. "EDS looks at this relationship as an opportunity to contribute its expertise to the entire energy industry."

"In the energy business, properly managed technology and information systems provide a powerful management tool and contribute to an operation's success. The same is true of MSRC where EDS-managed communication and information systems will arm MSRC with effective tools in its battle to combat major oil spills in U.S. waters," Scott added.

MSRC will be headquartered in Washington and will have five regional response centers located in the Northeast, southern Florida, Louisiana, southern California and the Northwest. There will also be 23 staging areas organized under the regional response centers. These staging areas will house response equipment and, in some cases, vessels and response personnel.

John D. Costello, retired Coast Guard vice admiral and president of MSRC, said that the new company's geographic dispersion and comprehensive response and cleanup roles will make effective use of technology a must.

"Accuracy, speed and timing are going to be crucial to our organization if we are going to do the job that the oil industry and the public expect of us," said Costello. "Our partnership with EDS will provide us with the systems management expertise to help ensure we use technology to our best advantage."

Dallas-based EDS has operations in 27 countries and is the leader in providing information technology solutions to customers in a variety of industries. EDS' Energy Division serves the oil, gas, mining, utility, chemical and pharmaceutical industries worldwide and has more than $1 billion in energy

business under contract.

#90283p3129 10/10/1990 ~PR Newswire

DEERFIELD, ILL. (OCT. 10) PR NEWSWIRE - Walgreen Co. (NYSE: WAG) achieved its 16th consecutive year of record sales and earnings in fiscal 1990.

Sales for the fiscal year ended Aug. 31 advanced 12.4 percent to $6.05 billion and net earnings increased 13.2 percent to $174,577,000 or $2.83 per share, compared to $2.50 per share last year. The company again reduced selling, occupancy and administration expenses to counteract ongoing competitive pressure on gross margins.

Fourth quarter sales of $1,492,331,000 were up 11.3 percent from last year's $1,341,069,000. Net earnings were $40,401,000 or 65 cents per share for the quarter, compared with $33,713,000 or 54 cents per share last year.

This fiscal year, Walgreens opened 104 drugstores and two RxPress (pharmacy-only) stores; 165 units were remodeled. In October, the company acquired Lee Drug, a nine-unit drugstore chain in New Hampshire and Massachusetts. The Lee stores will be converted to the Walgreen format in early 1991.

"Since 1983, we've improved market share in each of our top 10 markets," said Charles R. Walgreen III, chairman. "We'll continue that strategy of market penetration, with more than 100 new stores slated for fiscal '91. We plan 600 new drugstores over the next five years...we're also looking at new markets."

Pharmacy continues to pace Walgreens sales growth. During the fiscal year, prescription sales advanced 21.3 percent to $2 billion. This marked the ninth consecutive year of 20 percent-plus sales gains for pharmacy, which now comprises 33 percent of overall sales.

"The U.S. prescription market is expected to grow by about $13 billion by 1995 " noted L. Daniel Jorndt, president. "To better serve those patients, we remodeled 131 pharmacy departments this year -- putting in waiting rooms where possible. We'll redo 200 pharmacies in fiscal 1991. We're also rolling out a computerized inventory reorder system to reduce the paperwork our pharmacists do...and testing several new layouts to improve work flow and make pharmacists more accessible to their patients."

LONDON (OCT. 10) PR NEWSWIRE - SCM Chemicals, a unit of Hanson PLC (NYSE: HAN), announced today that production at its Stallingborough, England, titanium dioxide plant will be reduced in January 1991 by 20 percent (or 24,000 tons) to 95,000 tons per annum. This planned reduction in capacity will be made entirely from sulphate-process production. Chloride-process production is scheduled to run at its full rated capacity of 85,000 tons. SCM Chemicals also confirmed that, as announced three years ago, its 34,000 tons per annum sulphate-process plant at Bunbury, Western Australia will be closed at the end of this month. This plant has been replaced there by a new 70,000 tons chloride-process plant.

The changes at Stallingborough are the result of recent European Community environmental regulations requiring producers to decide whether to invest significant capital in their older, less-efficient sulphate-process plants or to reduce or eliminate such production. SCM Chemicals' U.K. plants are in full environmental conformity and will continue to be after the December 1992 EC deadline. The Australian plant closure will fulfill commitments made to the Government of Western Australia when permission was granted for the new Bunbury plant which was commissioned in early 1989. European markets are strong for SCM Chemicals' preferred "chloride" product, while its U.K. based "sulphate" material will continue to serve market needs for specialty anatase and ceramic grades.

After these changes, SCM Chemicals' worldwide 1991 annual capacity will be 316,500 tons of "chloride" and 75,800 tons of "sulphate" titanium dioxide from its seven plants in the United States, the United Kingdom, and Australia. SCM Chemicals is the third largest producer in the world of this essential, non-hazardous opacifying white pigment used widely in the paint, plastics, and paper industries.

Hanson PLC is a British-American industrial management corporation. In the U.S., Hanson Industries' operations include SCM Chemicals, Peabody Coal, Jacuzzi Whirlpool Bath and Spa Products, Grove Crane, Ames Tools, Universal Gym, Endicott Johnson and Frye Footwear, Hanson Lighting Group, Kaiser Cement, Weber Aircraft, Farberware Cookware, and Gold Fields Mining, among others.

In the United Kingdom, Hanson's holdings include Imperial Tobacco, Ever Ready Batteries, ARC Aggregates, London Brick, Butterly Brick, and Smith Meters.

#90283p3151 10/10/1990 ~PR Newswire

METAIRIE, LA (OCT. 10) PR NEWSWIRE - Chemfix Technologies Inc. (NASDAQ: CFIX) today reported net earnings of $2 million, or 28 cents per share, on revenues of $25.4 million for fiscal year ended Aug. 31 as compared to $220,000, or 3 cents per share, on revenues of $23.8 million for the prior fiscal year.

Earnings per share for fiscal year were computed on 7,762,874 shares outstanding for 1990 and 6,793,475 shares outstanding for 1989.

The fourth quarter net earnings for the period ended Aug. 31 were $753,632, or 10 cents per share, on revenues of $6.1 million as compared to $170,516 or 2 cents per share, on revenues of $5.6 million for the like period last year. Earnings per share for the fourth quarter were computed on 7,740,016 shares for 1990 and 6,805,467 shares for 1989.

Daniel N. Silverman III, president and chief executive officer, attributed the strong fourth quarter performance to the company's western region oil and gas treatment operations which performed exceptionally well in the fourth quarter. Oil & Gas revenues for the year posted a significant increase from $3.7 million in fiscal year 1989 to $8.6 million in fiscal year 1990.

Silverman further noted that during fiscal year 1990, stockholder's equity increased 88 percent to $10.9 million, from $5.8 million in the prior fiscal year. The exercise of the common stock purchase warrants during the fourth quarter contributed approximately $3 million to equity.

Chemfix Technologies Inc. is an environmental services company that provides analysis and treatment of hazardous and nonhazardous waste materials for industry and government. The Chemfix(R) process chemically fixates and solidifies sewage sludges, oil and gas waste, and other types of sludge, thereby converting them into reusable environmentally safe solid, clay-like materials.

SOUTHFIELD, MI (OCT. 10) PR NEWSWIRE - Lear Seating Corporation, a leading producer of automotive seating systems, has completed an agreement with Saab Automobile Company of Sweden for production of complete seating systems for Saab cars.

Kenneth L. Way, chairman, said the agreement with Saab will become effective Jan. 1, 1991, and will include the supply of finished trimmed seating for the Trollhattan and Malmo, Sweden, assembly plants.

Lear Seating Corporation is a leading global supplier of automobile and light truck seating systems and components. In fiscal year 1990, it had almost 40 percent of the North American seating systems market. Worldwide sales totaled $1.3 billion, including joint ventures. Lear is GM's largest seating system supplier in the United States. It has 10,500 employees, including 1,300 in Europe.

In Europe, Lear owns four plants in Germany and France that supply seat frames seat tracks, recliners, headrests, etc. Headquarters of Lear Europe are in Kronberg, Germany. Lear also has a seat system Technical Center for prototype design and development programs. Lear also will expand its research and design efforts in Trollhattan.

Way said Lear's strategy is to become one of the leading suppliers of seats in Europe, and the agreement with Saab will be a major effort in reaching this goal. "This key program gets us off the launching pad," he said.

#90283p3159 10/10/1990 ~PR Newswire

CHARLOTTE, NC (OCT. 10) PR NEWSWIRE - First Union Corporation (NYSE: FTU FTUpr) today reported $75 million, or 70 cents per common share, in net income applicable to common stockholders for the third quarter of 1990.

This was a 7 percent increase over net income applicable to common stockholders of $71 million, or 66 cents per common share, in the third quarter of 1989.

For the first nine months of 1990, net income applicable to common stockholders was $225 million, or $2.09 per common share. In the same period

of 1989, net income applicable to common stockholders was $217 million, or $2.03 per common share.

The operations of First Union National Bank of Florida and Florida National Bank were integrated this quarter, essentially completing the conversion process that began with the purchase accounting acquisition of Florida National on January 29, 1990. With this conversion -- the largest in First Union's history -- branches throughout the First Union network now use standardized products and common procedures. This has laid the groundwork for further efficiencies.

First Union's third quarter average net loans increased 30 percent from a year ago, or 7 percent after adjustment for growth related to the acquisition of Florida National. Since the end of the first quarter of 1990, loan growth has remained essentially flat.

Average deposits in the third quarter of 1990 increased 29 percent from a year ago, and remained flat after adjustment for growth related to Florida National.

Tax-equivalent net interest income, the largest component of First Union's earnings, increased 26 percent to $356 million from $282 million in the third quarter last year. As First Union employees continued to focus on pricing as well as volume of loans and deposits, the net interest margin of 4.16 percent increased from 4.06 percent in the second quarter of 1990; 3.97 percent in the first quarter; and 3.96 percent in the fourth quarter of 1989. The margin also improved from 4.06 percent in the third quarter a year ago. Although effects of a further weakening of the economy could affect the margin, it is currently expected to remain above 4 percent for the rest of 1990.

First Union's third quarter 1990 net charge-offs as a percentage of average net loans were .56 percent on an annualized basis, or $37 million. Excluding Florida National-related net charge-offs of $12 million, net charge-offs were $25 million, or .45 percent. For the third quarter a year ago, First Union's net charge-offs were .31 percent of loans, or $16 million.

In the third quarter of 1990, the loan loss provision was $35 million, compared with $16 million a year ago.

First Union's third quarter 1990 nonperforming assets were $684 million, or 2.55 percent of net loans and foreclosed properties. This was a $68 million increase over the June 30, 1990 amount. Nonaccrual and restructured loans were $554 million at September 30, 1990.

At the end of the third quarter a year ago, First Union had nonperforming assets of $227 million, or 1.09 percent of net loans and foreclosed properties. At the same time a year ago, Florida National had nonperforming assets of $190 million, or 4.36 percent of net loans and foreclosed properties.

Compared with a year ago, First Union's third quarter 1990 noninterest income increased 29 percent, or 4 percent after adjustment for Florida National. The growth came primarily from service charges and income from mortgage banking and capital management.

Common stockholders' equity at September 30, 1990, was $2.243 billion, compared with $2.063 billion a year ago. Total stockholders' equity was $2.560 billion compared with $2.063 billion a year ago.

First Union's other intangible assets increased $13 million from June 30, 1990 as a result of final purchase accounting adjustments related to the Florida National acquisition. A portion of this amount related to an increase in the loan loss allowance, and the balance related to other merger-related accruals.

As of September 30, 1990, First Union Corporation had assets of $39.1 billion and operated 764 statewide banking offices in North Carolina, South Carolina, Georgia and Florida, one banking office in Tennessee and 277 nonbanking offices in 36 states.

STERLING, VA. (OCT. 10) PR NEWSWIRE - Radiation Systems, Inc. (NASDAQ-NMS: RADS) today announced that the board of directors authorized the Employee Stock Ownership Plan to borrow and the company to guarantee repayment of up to $1 million for the purchase of shares of the company's common stock on the open market.

Richard E. Thomas, chairman and chief executive officer, stated that the board believes that at current prices, RSI's stock is an excellent investment. The company has experienced rapid growth recently, and several large contracts currently in the bid stage give the company reason to expect continued growth. The shares will be used for supplemental ESOP contributions that are necessary due to the recent and anticipated growth of Radiation Systems.

The board has also authorized the company to purchase up to 150,000 additional shares on the open market as conditions warrant. These shares will be placed in Treasury for general corporate purposes, which may include ESOP contributions.

Radiation Systems, Inc. designs, manufactures and installs a broad range of antenna systems for radar, air traffic control, tactical military, satellite earth stations, terrestrial microwave and other specialized uses throughout the world.

#90283p3164 10/10/1990 ~PR Newswire

HUNTINGDON VALLEY, PA (OCT. 10) PR NEWSWIRE - Healthcare Services Group Inc. (NASDAQ-NMS: HCSG) today reported revenues for the three months ended Sept. 30 1990, of $17,054,000 compared to $14,247,000 for the same 1989 quarter, representing a 20 percent increase.

Net income for the three months ended Sept. 30, 1990, was $1,624,000 or $.31 per share compared to $1,051,000 or $.22 per share for the same 1989 quarter, representing 54 percent and 41 percent increases, respectively.

Revenues for the nine months ended Sept. 30, 1990, was $48,362,000 compared to $40,848,000 for the same period of 1989, representing an 18 percent increase. Net income for the nine months ended Sept. 30, 1990, was $4,187,000 or $.82 per share compared to $3,009,000 or $.62 per share for 1989, representing 39 percent and 32 percent increases, respectively.

During the third quarter, the company's marketing efforts resulted in additional service agreements with approximately 115 new facilities. A large number of these new facilities were obtained from national chains of nursing homes that the company had been servicing during the second quarter of 1990 under a pilot service program.

During the quarter ended Sept. 30, 1990, the company's service agreements with respect to 105 facilities which were part of the 1988 acquisition of American Services Co. were cancelled. Most of these cancellations took place on the last few days of the quarter and became effective Oct. 1, 1990. The company said it believes that these cancellations resulted from changes in control or management of the affected facilities. The cancellation provisions of such agreements were satisfied by assignment to the company and subsequent cancellation of an aggregate of 395,841 outstanding shares of its common stock.

The company is currently servicing approximately 40 facilities that represent the remaining agreements that were part of the company's 1988 acquisition of American Services Co. which now represent less than 10 percent of the company's revenues.

The new service agreements allow the company to immediately replace the revenues lost from the cancelled facilities. The company said it anticipates continued revenue growth by providing its services to national and regional nursing home chains as well as to local facilities.

The company said it believes that it is the largest provider of contractual housekeeping and laundry services to the long-term care industry, rendering as

of Oct. 1, 1990, such services to approximately 425 facilities in 34 states.

NEW YORK (OCT. 10) PR NEWSWIRE - British Airways (ADS - NYSE: BAB) today issued the Preliminary traffic and capacity statistics for September:

British Airways traffic growth in September remained strong, with passenger traffic in terms of scheduled revenue passenger miles (RPMs) up by 9.3 percent compared with the previous year. Capacity in terms of scheduled available seat miles (ASMs) increased by 10.1 percent, with passenger load factor marginally down at 76.5 percent.

Growth on intercontinental services dominated volume increases, with traffic up by 10.3 percent. Whilst more modest than intercontinental, the 5.4 percent increase in shorthaul traffic was better than the 4.3 percent increase in capacity, producing a 0.8 point increase in passenger seat factor. Total scheduled passengers carried in September increased by 5.7 percent, with cargo traffic up by 10.0 percent compared with the previous year.

For the first half of the financial year, British Airways has achieved buoyant traffic growth. Passenger traffic (RPMs) increased by 12.3 percent in the six months to Sept. 30, 1990. With capacity up by 10.5 percent, scheduled passenger seat factor increased by 1.1 points to 75.0 percent. The number of passengers carried on British Airways scheduled services increased by 10.7 percent in the first half year.

HIGHLIGHTS OF THE MONTH British Airways announced that it had concluded an agreement with Thomas Cook for the disposal of its "Four Corners"

chain of travel stores. The airline will retain and continue to operate its 10 UK sales and ticketing shops, including the flagship store in London's Regent Street.

A major assault on leisure travel was launched by the airline, aimed at securing a larger share of the booming overseas leisure travel market in the 1990s. It centers on the creation of the "British Airways Leisure Traveller" brand, which will incorporate the existing Speedbird, Poundstretcher and Stopovers programs, and provide a complete range of products and services based on the British Airways scheduled network.

British Airways announced that options on three B757 aircraft are being converted to firm orders. The airline currently operates 36 B757s and has six on order (including the three converted options) plus options on a further five aircraft.

BOCA RATON, FLA. (OCT. 10) PR NEWSWIRE - SK Technologies Corporation (NASDAQ: SKTC), announced today that the company has signed a marketing agreement with North American Credit Card Association (NACCA). Pursuant to the agreement, StoreKare, SK's point-of-sale software system, will be marketed by NACCA to merchants and retailers.

The agreement further provides that StoreKare will be the software package of choice that NACCA will recommend to its customer base and NACCA will be responsible for all aspects of marketing and distributing the combined package.

Wade Reece, vice president of NACCA, said the Company had been looking for a point-of-sale system to complement NACCA's services for quite awhile. He further stated that in his opinion, "The StoreKare system far out-performs any of the other systems that we looked at. StoreKare meets our needs and we feel the combined package will give us a leading edge over other companies in our industry.

Randy Selman, president of SK, stated, "This is yet another step towards achieving our strategic goal of aligning ourselves with large and/or rapidly growing companies within our industry niche. NACCA is a rapidly growing firm in the credit card services industry. We are hopeful of being able to derive substantial revenues from this agreement, and in fact, NACCA has already provided us with sales opportunities."

In addition, SK will receive a commission from the use of NACCA's services by customers who are recommended by the SK sales force.

SK Technologies Corporation is a developer and marketer of point-of- sale and data communications software specifically designed for use by fast food and retail operations as well as other franchise businesses.

#90283p3170 10/10/1990 ~PR Newswire

SPRINGFIELD, IL (OCT. 10) PR NEWSWIRE - Springfield-based Marine Corporation (NASDAQ: MCOR) today reported record net income for the third quarter and nine months ended Sept. 30, 1990.

Net income for the third quarter was a record $3,388,000, up 43.5 percent from the $2,361,000 earned in the comparable 1989 period. Third-quarter earnings per share were 53 cents on 6,395,577 shares outstanding, an increase of 35.9 from 39 cents on 6,027,192 shares outstanding last year.

For the nine months ended Sept. 30, 1990, record net income was $8,916,000, an increase of 28 percent over $6,966,000 in the 1989 first nine months. Earnings per share for the 1990 nine months were $1.39 on a larger number of shares outstanding, up 19.8 percent from $1.16 a year earlier.

Willard Bunn III, chairman and chief executive officer, attributed record third-quarter earnings primarily to an increase in net interest income and a 21.3 percent rise in non-interest income.

He said based on nine-month results and the continued buoyant economy in central Illinois, he expects 1990 will be the sixth consecutive year of record income for Marine Corporation.

Non-performing loans, non-accruals and those 90 days past due, as a percent of loans, declined to 0.82 percent on Sept. 30, 1990, from 0.93 percent at June 30, 1990, and 1.22 percent at year end 1989. The reserve for loan losses at the end of the third quarter represented 1.44 percent of loans and 176 percent of non-performing loans.

Bunn noted that management's active efforts to maintain a high level of credit quality have kept loan losses at moderate levels. "The majority of Marine Corporation's loans are made to customers within a one-hour drive from one of our banking offices, an area served by Marine for more than 100 years and one of the most economically stable in the country." There are no foreign loans in the bank's portfolio.

He emphasized that Marine's exposure to speculative real estate lending is minimal. "We don't see signs of the accelerating vacancy rates in residential and commercial properties exhibited in other parts of the country."

Record third-quarter earnings represent a record return on average assets of 1.21 percent, up from the 1990 second-quarter record of 1.09 percent. The ROA for the 1990 nine months was 1.11 percent vs. 1.03 percent in the 1989 nine-month period.

Total assets were $1.130 billion at Sept. 30, 1990, compared to $926 million a year earlier.

Bunn said Marine Corporation's primary capital ratio was "a solid 9.61 percent on Sept. 30, 1990."

Marine Corporation is a multibank holding company. It is the parent of Marine Bank of Springfield, Marine Bank of Champaign-Urbana, Marine Bank of Bloomington-Normal, Marine Bank of Monticello, and Marine Investment Management Company, an investment advisor.

#90283p3171 10/10/1990 ~PR Newswire

INDIANAPOLIS (OCT. 10) PRNEWSWIRE - INB Financial Corporation (NASDAQ: INBF) today reported third quarter net income totaled $14,843,000 or 82 cents per share, fully diluted. This compares to record third quarter 1989 net income

of $15,607,000 or 84 cents per share, fully diluted. Thomas M. Miller, chairman of INB Financial Corporation, noted that return on assets averaged 1.00 percent for the 1990 third quarter while return on average equity was 13.90 percent.

Nonperforming assets totaled $104.6 million on Sept. 30, 1990 versus $108.0 million on June 30, 1990 and $56.1 million on Sept. 30, 1989. Nonperforming assets as a percent of loans and other real estate owned were 2.56 percent on Sept. 30, 1990 and 2.71 percent on June 30, 1990. On Sept. 30, 1990, nonperforming real estate loans totaled $53.5 million, of which $51.8 million were construction and commercial mortgage loans. Reserves as a percent of nonperforming loans were 73.4 percent on Sept. 30, 1990 and 70.6 percent on June 30, 1990. Accruing loans past due 90 days or more totaled $15.3 million on Sept. 30, 1990, which included $9.5 million of U.S. government-guaranteed student loans. On June 30, 1990, accruing loans past due 90 days or more totaled $13.8 million of which $8.5 million were U.S. government-guaranteed student loans.

The allownace for credit losses totaled $75.7 million or 1.85 percent of loans on Sept. 30, 1990 compared to $74.4 million or 1.87 percent of loans on June 30, 1990 and $56.1 million or 1.43 percent of loans on Sept. 30, 1989. Net charge-offs totaled $6.1 million for the 1990 third quarter versus $8.4 million for the same quarter in 1989.

For the first nine months of 1990, net income was $30,813,000 or $1.69 per share, fully diluted, compared to $44,199,000 or $2.41 per share, fully diluted, for the same period in 1989. During the 1990 second quarter, the corporation strengthened its reserve position with an additional $20.0 million provision for credit losses.

For the 1990 third quarter net interest income on a fully taxable equivalent (FTE) basis totaled $55.8 million and net interest margin was 4.20 percent. This compares favorably to 1990 second quarter net interest income (FTE) of $54.4 million and net interest margin of 4.10 percent. Net interest income (FTE) for the 1989 third quarter totaled $55.7 million and net interest margin was 4.36 percent. For the first nine months of 1990, net interest income (FTE) totaled $167.4 million compared to $166.8 million for the same period in 1989. Net interest margin was 4.23 percent and 4.35 percent for the first nine months of 1990 and 1989, respectively.

Noninterest income, excluding investment securities transactions, increased 4.5 percent and totaled $25.2 million for the 1990 third quarter versus $24.1 million for the 1989 comparable quarter. Service charges on deposit accounts increased 8.1 percent, primarily in personal accounts, while credit card fees were up 6.7 percent and trust fees and commissions increased 6.1 percent. For the first nine months of 1990, noninterest income totaled $75.3 million compared to $73.7 million for the same period in 1989. Investment securities gains were $12,000 for the first nine months of 1990 compared to $1.2 million

for the same period of 1989.

Noninterest expense for the 1990 third quarter totaled $48.8 million, essentially unchanged from the 1990 second quarter. Noninterest expense for the 1989 third quarter totaled $47.4 million. Noninterest expense for the first nine months of 1990 totaled $145.5 million compared to $141.2 million for the same period of 1989. Adjusting for a change in the state tax law effective Jan. 1, 1990, noninterest expense increased 6.3 percent over the 1989 third quarter and 6.6 percent over the first nine months of 1989. The 1990 third quarter included approximately $500,000 of expenses related to the termination of a pending merger agreement.

Total assets on Sept. 30, 1990 were $6.09 billion compared to $5.99 billion a year ago.

Loans totaled $4.09 billion on Sept. 30, 1990, compared to $3.93 billion on the same date in 1989.

Deposits totaled $4.58 billion on Sept. 30, 1990 compared to $4.52 billion on the same date in 1989.

Shareholders' equity totaled $424.2 million on Sept. 30, 1990 compared to $415.5 million on June 30, 1990 and $433.9 million on Sept. 30, 1989. The decrease from one year ago can be attributed to the addition of an Employee Stock Ownership Plan feature to the corporation's existing 401(k) plan in February 1990. As of Sept. 30, 1990 the trustee had completed its acquisition of approximately $33 million of the corporation's common stock.

INB Financial Corporation is a multi-bank holding company based in Indianapolis. The corporation's bank affiliates provide a full range of banking and trust services to individuals, businesses, other institutions and government agencies located primarily in Indiana and the central Midwest. Through its bank-related affiliates, the corporation also provides a diverse portfolio of financial services, including mortgage banking, insurance and brokerage services.

BETHESDA, MD (OCT. 10) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) has received a contract valued at up to $37 million from McDonnell Douglas Corporation (NYSE: MD) to produce lightweight graphite composite tail cones for the U.S. Air Force's new C-17 transport aircraft.

The structures, which will be produced by Martin Marietta Aero & Naval Systems at Baltimore, employ a combination of advanced materials that provide great strength along with significant weight savings.

The C-17 project represents continued aerostructure work at Martin Marietta Aero & Naval Systems, which has produced sections of the Air Force's B-1B bomber and continues to produce jet engine thrust reversers for commercial airliners.

DALLAS (OCT. 10) PR NEWSWIRE - Fina Oil and Chemical Company has agreed to buy nine existing retail gasoline stations in Plano, Allen, and McKinney, Texas from Young Oil Company and Cedar Crest Investments for an undisclosed amount, according to Henry J. Lartique Jr., Fina's vice president for marketing.

"With this purchase, we expect Fina to become the number two marketer in the

North Dallas area in terms of volume," said Lartique. "The purchase represents our first move into the Allen and McKinney markets, and the stations we plan to buy in Plano will further strengthen our position there."

Fina currently owns and operates 41 gasoline stations in the Dallas/Fort Worth Metroplex, in addition to 195 distributor served Fina branded stations. The nine new properties, which are currently branded Shell stations, will all be converted to the Fina brand and will be operated by Fina.

Lartique said the stations will undergo a $4.7 million upgrading, with many of the stations being razed and rebuilt.

Each of the new Fina stations will feature a full-line convenience store and car wash, and will look similar to Fina's flagship station at the intersection of Preston and Frankford in North Dallas.

Many of the stations also will feature Fina's popular touch-free car wash, which can accommodate oversized vehicles, such as Suburbans and vans, as well as family sedans.

Lartique said it will take three months from the time a station is closed to the time the upgrading work is completed and the station is reopened. All stations are scheduled to be reopened by March 31, 1991.

Each station will sell Fina's unleaded regular, mid-grade, and premium-grade Genesis gasolines, which contain a second generation proprietary additive that cleans dirty engines, allowing more efficient fuel burning with fewer air emissions and increased mileage. In addition, the stations situated on North Central Expressway will offer diesel.

The sale of each station is pending completion of an environmental assessment. Completion of all the purchases is expected by the end of the year. Some of the construction will begin this year.

Fina Oil and Chemical Company, the main operating subsidiary of American Petrofina, Incorporated (AMEX: APIA), engages in crude oil and natural gas exploration, production, and marketing; petroleum products refining, transportation, and marketing; and chemicals manufacturing and marketing.

HOUSTON (OCT. 10) PR NEWSWIRE - The Western Company of North America (NYSE: WSN) announced today that its wholly-owned subsidiary Western Oceanic, Inc. has purchased for $12.5 million the 50 percent interest of Exxon Corporation (NYSE: XON) in North Star Drilling Company, a limited partnership, which owns

the semisubmersible drilling rig Alaskan Star. Upon dissolution of the partnership Western Oceanic will become the sole owner of the Alaskan Star.

Since 1976, Western has operated the Alaskan Star, as general partner of North Star Drilling Company, offshore Alaska, Brazil, the United States East Coast, and in the Gulf of Mexico. The rig is currently working offshore West Africa for Elf Aquitaine Angola.

The Western Company of North America is an oilfield service company providing pressure pumping services through Western Petroleum Services and Western Petroleum Services International Company and contract drilling services worldwide through Western Oceanic, Inc. Pressure pumping principally involves the acidizing, fracturing and cementing of oil and gas wells. Offshore contract drilling services are provided with a fleet of 13 mobile rigs.

FORT WORTH, TEXAS (OCT. 10) PR NEWSWIRE - Robert H. McLean, chairman of the board and president of Buffton Corporation (AMEX: BFX), announced today that the company's aircraft instrumentation subsidiary, B&D Instruments and Avionics, Inc., has received Federal Aviation Administration ("FAA") approval of its recently designed Cockpit Voice Recorder.

In making the announcement, McLean stated, "Federal aviation regulations now mandate that all aircraft seating six or more passengers and requiring two pilots be equipped with an approved cockpit voice recorder by Oct. 11, 1991. At the time of adoption of this regulation, the FAA estimated that approximately 6,000 aircraft would be affected. Our Cockpit Voice Recorder was designed to service this retrofit market, as well as the new aircraft market."

McLean further stated, "B&D Instruments and Avionics, Inc.'s Cockpit Voice Recorder is the lightest and least expensive cockpit voice recorder available to the market. With FAA approval now in hand, B&D is beginning to fill its backlog of orders for the CVR. The company anticipates a significantly favorable impact on the profitability of B&D should it meet its sales forecasts for the Cockpit Voice Recorder."

Buffton Corporation is a diversified group of companies engaged in the manufacture of avionic, electronic, and plastic products.

GRAND RAPIDS, MICH. (OCT. 10) PR NEWSWIRE - Consumers Power Company and the Boy Scouts of America have teamed up to offer something never done before -- home energy conservation audits, conducted by Boy Scouts with special training.

Working together, the Grand Rapids-based West Michigan Shores Council of the Boy Scouts of America and Consumers Power recently provided energy conservation training to more than 3,000 Boy Scouts, ages 11 to 17. Eleven hundred Scouts at Camp Gerber received training that included fundamental energy conservation principles, including how to block door and window drafts, how to turn down a water heater thermostat, and how to determine adequate home insulation.

Each Boy Scout will conduct at least two home energy audits, in addition to writing a 500-word essay on energy conservation, as part of his work toward earning an Energy Merit Badge. The Boy Scouts represent 100 separate troops in 12 counties which comprise the West Michigan Shores Council.

"Teaching Scouts the importance of conserving energy, and in turn, training Scouts to provide conservation tips to others, is part of our overall stewardship of the environment," said Paul Bongiovanni, director of finance and public relations for the West Michigan Shores Council.

"We are pleased to join with the Boy Scouts of America in this unique project. Providing solid information on wise energy use is an important objective of Consumers Power Company," said Frederick W. Buckman, the utility's president and chief operating officer, himself a former Boy Scout.

Scouts conduct the audit as part of a community service project developed by their troop. Following a review of energy conservation principles by troop leaders, Scouts contact relatives, neighbors and other interested persons to schedule a home audit. Homeowners requesting additional energy conservation information are referred to Consumers Power Company.

Customers who participate in the Scout audit program will receive a free energy conservation kit. Scouts participating in the program will receive a decal and letter from Consumers Power upon completion of two audits.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

BRIDGEPORT, CONN. (OCT. 10) PR NEWSWIRE - Remington Products, Inc., today announced that fall-season sales of its men's and ladies' shavers, grooming products and travel aids have exceeded company forecasts and that steps have been taken to increase production.

The company said it was trying to arrange additional deliveries of materials from its domestic suppliers in an effort to meet the unexpectedly heavy demand and that its factory in Bridgeport, Conn., is operating 56 hours per week on a six-day schedule to fill orders from its retail customers.

"Our U.S. suppliers have had to react quickly to help us maintain this rapid rate of growth," said Bruce Gold, Remington's vice president and general manager.

The fall season, in anticipation of holiday gift giving, is Remington's busiest.

Remington, whose global sales increased 500 percent between 1980 and 1989, is also enjoying a excellent year abroad, the company reported, with record sales in the U.K., Japan, Australia, New Zealand, the Philippines, Singapore, China, Hong Kong, Thailand, Indonesia, Uruguay, Chile, Mexico, Colombia, Costa Rica, Puerto Rico, Hungary, Poland, Saudi Arabia, Lebanon, Morocco and Qatar.

"Our export success is testament to the quality and productivity of our U.S. workforce," Gold said. "We expect further growth worldwide from our core product line of men's and women's shavers, and are delighted with the positive balance of trade that these products provide for our country."

Bridgeport-based Remington, the only electric shaver manufacturer in the United States, sells men's and ladies' models starting at $19.99, value priced for the current economic environment.

WASHINGTON (OCT. 10,) PR NEWSWIRE - Marriott Corporation (NYSE: MHS) said today that it had agreed to sell its Chicago area Wags restaurants to Chicago-based Lunan Family Restaurants, Inc. Terms were not disclosed.

Marriott said the sale, which is expected to close in the next few months, was in keeping with its previously announced strategy to exit the family restaurant business and concentrate on lodging and contract services. The agreement covers 29 existing Wags units and one undeveloped site, all of which are in the Chicago area. Marriott acquired Wags in 1988.

Lunan Family Restaurants is headed by Michael Schulson, chief executive officer, and Robert Blessing, chief operating officer. The company, a franchisee of Shoney's, Inc., has agreed to convert the Wags locations to Shoney's within three years and to build a 30th restaurant on the undeveloped site.

Marriott said that negotiations are continuing on the sale of its remaining family restaurants. The company expects to complete those sales sometime in 1991.

Marriott Corporation is a diversified hospitality company involved in lodging and contract services.

ATLANTA (OCT. 10) PR NEWSWIRE - Gwinnett Bancshares Inc. (NASDAQ: GBSI), parent company of Gwinnett Federal Bank, FSB, Lawrenceville, Ga., had income of $497,000 or 30 cents per share, for the second quarter ended Sept. 30, a 9 percent increase compared with $458,000 a year earlier.

For the first six months, Gwinnett Bancshares had net income of $1,100,000 or 56 cents per share, a 15 percent increase compared with $953,000 for the same period last year. There is no comparable per share data prior to May 1990 when the bank converted from a mutual to a stock-owned corporation. Total assets were $273.6 million, up 14 percent from $239.0 million at Sept. 30, 1989.

Gwinnett Bancshares' President James F. Pack said: "We are extremely pleased with our 15 percent increase in earnings despite a weakening economy and additions to our loan loss reserves. The strong earnings are the result of improvement in interest margin and continued diversification."

Gwinnett Federal was established in 1931 and has seven offices in Gwinnett County.

WOODLAND HILLS, CALIF. (OCT. 10) PR NEWSWIRE - Brajdas Corp. (NASDAQ: BRJS) today reported significant reductions in the magnitude of its losses despite lower sales volumes in its second fiscal quarter and first half.

For the three months ended Aug. 31, 1990, the company's net loss was reduced to $61,638, or $.02 per share, from a net loss of $422,930, or $.15 per share, for the corresponding second quarter a year ago.

Sales for the current second quarter were $11,963,850 compared with $15,904,600 for the fiscal 1990 second period.

For the six months ended Aug. 31, 1990, Brajdas' net loss equalled $180,702, or $.06 per share, on sales of $24,275,603. In the year-earlier first half, Brajdas incurred a net loss of $416,402, or $.14 per share, on sales of $31,546,873.

Allan Klein, corporate vice president, operations and administration, attributed the quarter's results to an improvement in gross profit margins and lower interest costs. He noted that the lessened loss picture was an improvement over the most recent first quarter results, as well.

"The cumulative success of our efforts to reduce overhead and curtail sales of products that do not afford acceptable profit margins is reflected in the improved results we produced this quarter," Klein said. "The outlook for the electronics industry remains tough, as evidenced by our lower sales volume and reports of layoffs and reduced earnings among our customers. Consequently, we will continue to maintain our scaled back profile in an effort to restore

Brajdas to profitability."

Brajdas Corp. is primarily engaged in the wholesale distribution of electronic components through its principal division, Cypress Electronics, which is based in Santa Clara, Calif.

WEST PALM BEACH, FLA. (OCT. 10) PR NEWSWIRE - Humana Hospital-Palm Beaches will celebrate the opening of its $1.5-million expanded Cardiac Care Unit with a heart-healthy lunch for leaders of the Zipper Club and the Humana Seniors Association (SM) at noon on Friday, Oct. 12, at the hospital, 2201 45 St., West Palm Beach.

The Zipper Club is a support group for open-heart surgery patients. Humana Hospital-Palm Beaches recently agreed to host all regular meetings of the Zipper Club.

The Critical Care Unit provides intensive care for patients with acute heart disease, including those who are stricken with heart attacks, congestive heart failure and pulmonary edema.

"In the winter, there are times when critical care beds are at capacity," said Ruth Schwarzkopf, nursing director. "Our expanded Cardiac Care Unit is an important resource we can now offer to our community."

The expanded unit will offer advanced technology, including the modern Hewlett-Packard monitoring system. The unit's high-tech Stryker beds can weigh patients, accommodate fluoroscopy without the need of moving patients, and convert into "cardiac chairs" that prevent overloading of the circulatory system. The unit will also utilize recent medication advances, including, when needed, Tissue Plasmogen Activator (TPA), Streptokinase and other cardiac medications.

Planning, design and construction of the expanded unit took two years. The 10-bed unit will employ 20 health professionals. A team of independent cardiologists, led by Chief of Staff Mike Ravitsky, D.O., and Cardiac Care Committee Chairman Dennis Hanney, D.O., will offer advanced medical care.

The hospital is also working to prevent heart disease with important community health programs. The Humana Seniors Association, a national nonprofit organization devoted to meeting the needs of those 55 and up, co-sponsors a fitness walking program at Palm Beach Mall with the American Heart Association Palm Beach Division.

After a tour of the new unit, Zeff Ross, executive director of Humana Hospital-Palm Beaches, will present a $500 check to Francis J. McMahon, chairman of the board, American Heart Association, Palm Beach Region. The hospital plans to expand educational programs on heart disease and offer a wellness program for employees called "Heart Smart."

#90283p3217 10/10/1990 ~PR Newswire

NEW YORK (OCT. 10) PR NEWSWIRE - The global competitive battle of the 1990s, "the toughest business decade in history," will be fought in the office, said Richard W. Miller, chairman and chief executive officer of Wang Laboratories, Inc. (AMEX: WAN). "Improving the effectiveness of office workers is the key productivity challenge of the 1990s, and will require a radical reorganization in the way work is done in offices," he said.

"Integrated image processing -- the ability to integrate images with voice, data and text -- can give us the strength we need to raise the paper anchor on productivity. With it, we can revolutionize the office. Without it, too many resources -- too many people -- will continue to spend too much time chasing information instead of using it," Miller said in a keynote address at the Imaging '90 Conference in New York today.

Miller said the problem of sagging U.S. productivity "lies in the office -- with government, the financial and professional service industries and the manufacturing sector being the prime victims. In these areas, there have been virtually no productivity improvements in well over a decade."

Citing several examples, Miller said that:

-- In the U.S. alone, about $100 billion is spent on paperwork each year;

-- The average executive -- at a six-figure annual salary -- spends three hours a week looking for lost information;

-- 75 percent of all phone calls miss their target;
-- 95 percent of all business information is still on paper and locked out of corporate information management systems.

The good news, according to Miller, is that the technology necessary to help fuel productivity gains in the typical office of the '90s is now available. Integrated imaging offers the promise of dramatic productivity improvements, he said.

The gains made on the shop floor in the '70s and '80s can serve as an example for current white-collar environments, Miller asserted. Such techniques as total quality, reduced cycle times, autonomous work teams, delayering of organizations, broadening of job content and training, supplemented by improved technology nad increased automation, were causes of such productivity gains.

"And so it will be in the office," Miller said. "Before we can take a quantum leap forward in productivity, we must first create and deliver a new, a different understanding of how to change workflow, integrate document management and build business process applications around customer needs," Miller said.

GREEN VALLEY, CALIF. (OCT. 10) PR NEWSWIRE - Brush Creek Mining and Development Co. Inc. (the "Company") (NASDAQ: BCMD) announced today that its indicated gold reserves are estimated to be in excess of 700,000 ounces for those four mines for which previous data was available. By limiting the projected oreshoot projections at depths strictly to the depth of the deepest actual working known in the area, the gold mineral potential is well in excess of 6,000,000 ounces as an estimate.

At all these mines production was discontinued for external reasons, generally as a consequence of the 1942 War Production Order L-208. The real potential of the gold bearing veins, which are all open at depth and along strike, have remained mostly unexplored until now.

It should be noted that in all the mines the company controls, $20 million of development work has been expended by previous operators and the company. This figure is today's cost to properly develop the same underground infrastructure.

The company also announced that effective Oct. 16, 1990, it will appear daily in The Wall Street Journal under the heading, "NASDAQ Bid & Asked Quotations," and The New York Times under the heading, "NASDAQ Supplemental List." In addition, the company will continue to appear daily in Investor's Daily and weekly in Barron's.

CLEVELAND (OCT. 10) PR NEWSWIRE - National City Corporation (NYSE: NCC) today announced that Paul R. Cowgill has been elected chief investment officer of its Florida affiliate, National City Trust Company.

Richard E. Beeman, chairman of National City Trust, said, "Paul Cowgill adds a depth of experience to our capabilities in Florida. With Cowgill's 20 years of trust portfolio management experience we can continue to provide quality service to our customers who have relocated to Florida from Ohio and Kentucky." Beeman explained, "Trust services are a growth business in Florida and the three offices of National City Trust Company are well positioned to service that market."

Cowgill, who will be assigned to the Naples office, joined National City Bank, Cleveland, in 1971 as a vice president in the trust investment division. In 1986, he was promoted to senior trust investment officer and was responsible for the management of more than 400 personal trust portfolios.

A native Ohioan, Cowgill and his wife Elaine will be moving to Naples Nov. 1, 1990. Cowgill received his B.A. from Ohio State University and an M.B.A. from the University of Cincinnati.

Cowgill has been an active member of the Cleveland community. His current and past memberships include Cleveland Society of Security Analysts, Downtown Cleveland Toastmasters, North Olmsted Republican Club and the John Knox Presbyterian Church.

"Because of Cowgill's long-standing Midwest trust relationships, he will continue to manage many of them from Florida," Beeman added. "And now Midwesterners who have moved to Florida can enjoy the service they have become accustomed to in the past."

In addition to the election of Cowgill, Ellen J. Abrams was promoted to vice president and senior trust officer at West Palm Beach, and Donald A. Jones was appointed manager of the Naples office.

Established in 1982, National City Trust Company has account assets of over $110 million and has offices in West Palm Beach, Naples and Vero Beach for the convenience of former Midwest residents who have relocated to Florida.

VINEYARD, UTAH (OCT. 10) PR NEWSWIRE - Geneva Steel (NYSE,PSE: GNV) announced today that it has filed a registration statement with respect to a public

offering of 2,325,000 shares of Geneva's Class A common stock. All of the shares are being sold by the Federal Deposit Insurance Corporation, Benefit Capital Management Corporation and Boettcher & Company, Inc., as selling stockholders. The selling stockholders have granted the underwriters an option for 30 days to purchase up to an additional 211,781 shares solely to cover over- allotments.

Neither Geneva nor its management will sell shares in the offering and Geneva will not receive any of the proceeds from the sale of shares in the offering.

Geneva owns the only integrated steel mill operating west of the Mississippi River and manufactures hot-rolled sheet, plate and other steel products for sale primarily in the western and central United States.

The offering is being managed by Merrill Lynch Capital Markets, PaineWebber Incorporated and Salomon Brothers, Inc.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation of sale would be unlawful prior to registration or qualification under the securities laws of any such state. Copies of the prospectus for the offering may be obtained from any of the underwriters named above.

ORLANDO, FLA. (OCT. 10) PR NEWSWIRE - Public opinion research by a nationally known independent research organization indicates that Orlando seniors who joined the Humana Gold Plus Plan, a Medicare HMO plan, are overwhelmingly satisfied with their health care coverage.

"We are pleased that the Gold Plus Plan is meeting its potential to expand access to health care to thousands of seniors who would otherwise be unable to afford the care they need and deserve," said David Laird, vice president of market operations for Humana in Central Florida.

The report suggests that elderly consumers believe the Humana Gold Plus Plan saves them money while meeting their health care needs. Gold Plus offers full medical coverage at little or no charge to Medicare beneficiaries.

The study results included the following:

-- Of the sample, 82 percent indicated they were satisfied or very satisfied with the plan.

-- The predominant reason for becoming a member of the Gold Plus Plan cited by those surveyed was the low cost offered by the plan. Other reasons for joining included "good plan benefits" and "better benefits than Medicare."

-- Of those sampled who had used a Humana hospital, 94 percent were satisfied or very satisfied with the hospital care they received.

-- Of those surveyed, 92 percent said they would recommend the Gold Plus Plan to family and friends.

The Humana Gold Plus Plan, which has been available in Central Florida since 1990, currently serves 10,000 area seniors. Humana offers a wide variety of high-quality, low-cost health plans, including a Medicare supplement program, called the Humana Gold Plan, and commercial health plans. Humana also operates three hospitals in the area: Humana Hospital-Lucerne, Humana Hospital-Kissimmee and Humana Hospital-Daytona Beach.

The research was conducted by telephone on a random sample of 400 Gold Plus Plan members during June, 1990.

NEW YORK (OCT. 10) PR NEWSWIRE - Noise Cancellation Technologies, Inc., (NASDAQ: NCTI) a world leader in active noise and vibration abatement, today announced its completion of recently announced contractual arrangements with three major international corporations for developmental projects in the areas of aircraft quieting, specialty industrial mufflers and fan noise quieting. The contracts have an aggregate value of $1.2 million of which $0.5 million will be realized in 1990.

Each contract provides for substantial follow-on funding once the initial milestones are met; the milestones are expected to be reached by second quarter 1991. It is the intent of each corporation to proceed to commercial product with the resultant production prototypes.

Michael Parrella, NCT president, noted: "These three agreements, each with a multi-billion dollar corporation, represents a substantial confirmation of NCT's patented technology by recognized international businesses having a broad array of product applications."

In addition to the initial $1.2 million the estimated value of the follow-on

portions of these three contracts is $3 million in annual development funding and $50 million in NCT annual product sales within a five year period. These projections do not include any other contract revenues or any transportation sector revenues such as those that would be generated by the existing automotive muffler joint venture between NCT and Tenneco's Walker Division.

Beyond noise and vibration attenuation, NCT's products deliver the additional benefit of improved fuel economy and performance which provide important competitive advantages to the major corporations with whom NCT is partnered.

Noise Cancellation Technologies, Inc., a publicly traded company whose common stock is traded on NASDAQ is headquartered in New York City with research and development facilities in Linthicum, Md. (USA), and a European base in Cambridge, U.K.

FRESNO, CALIF. (OCT. 10) PR NEWSWIRE - Gottschalks Inc. (NYSE: GOT) announced that September 1990 sales increased 19.9 percent to $23.6 million from $19.7 million during the prior year September sales levels. Same store sales for the September period increased 7.4 percent. For the thirty-five-week 1990 period to date, total sales increased 24.1 percent to $157.8 million from $127.1 million for the year earlier thirty-five-week period. Same store sales on a year-to-date basis increased 11.2 percent over the prior year.

"September sales results were very close to plan," stated Robert Lawson, chief financial officer. "Given the calendar change and the resulting event moves from September, we're anticipating a strong October. We should achieve our planned sales of approximately $63.5 million for the third quarter given our continued strong sales results from new stores in Capitola and Palmdale. We also believe we will see some resurgence in sales during October on a comparative basis as we anniversary the 1989 earthquake," added Lawson.

Gottschalks is a regional department store chain, currently operating 22 department stores and 32 specialty apparel stores in the Central Valley and Central Coast areas of California. Gottschalks offers moderate to upper moderately priced brand-name fashion merchandise, and is in its 86th year of continuous family management.

WINSTON-SALEM, N.C. (OCT. 10) PR NEWSWIRE - First Wachovia Corporation's (NYSE: FW) net income per share fully diluted for the third quarter of 1990 was $1.07, a 16.3 percent increase from $.92 in the same period of last year, according to John G. Medlin Jr., chief executive officer.

Net income for the quarter was $75.4 million compared with $64.7 million in the prior year and, on an annualized basis, represented returns of 16.4 percent on shareholders' equity and 1.25 percent on assets.

For the first nine months, net income per share fully diluted was $3.14, a 10.7 percent increase from the $2.84 earned in the prior year. Net income for the year to date totaled $221.9 million compared with $199.9 million in 1989 and produced returns of 16.5 percent on equity and 1.25 percent on assets.

Major contributors to the earnings gains were good growth in loans and other income combined with excellent control of noninterest expense, Medlin said.

Average interest-earning assets rose $1.185 billion or 6 percent for the third quarter and $1.490 billion or 7.8 percent for the nine months in comparison with 1989 periods. Loans grew $945 million or 6.4 percent for the quarter and $1.178 billion or 8.2 percent for the year to date.

Taxable equivalent net interest income was up $19.1 million or 9.2 percent for the quarter and $32.9 million or 5.1 percent for the first nine months. Other income grew 9.9 percent for the quarter and 12.8 percent for the nine months, while noninterest expense rose 3.4 percent and 3.5 percent for the respective periods.

The provision for loan losses was $18.4 million for the third quarter and $58.5 million for the year to date in contrast with $14.3 million and $43.3 million for the comparable periods of 1989. Net credit charge-offs were $16.1 million for the quarter and $45.4 million for the first nine months.

At September 30, nonperforming assets totaled $137 million or .84 percent of total loans and foreclosed real estate. The allowance for loan losses was $180 million and represented 1.11 percent of total loans and 1.32 times nonperforming assets. The corporation's ratio of equity capital to total assets was 7.61 percent, one of the strongest among major banking companies in the country.

#90283p3239 10/10/1990 ~PR Newswire

NEW YORK (OCT. 10) PR NEWSWIRE - Construction costs for the fourth quarter 1990 will steepen according to a forecast released today by the The Turner Corporation (AMEX: TUR), the nation's leading general builder.

According to the Turner Building Cost Index, fourth-quarter construction costs will increase 1.4 percent to 449, six points above the predicted level for the third quarter of 1990. Compared to fourth quarter 1989, construction costs for the fourth quarter of this year are 3.9 percent higher, up from 432 points.

"The six-point change reflects our initial reaction to the political turmoil which started on Aug. 2 in the Persian Gulf," commented Leslie V. Shute, Turner group vice president responsible for calculating the Turner Building Cost Index. "The rise is due principally to increased material costs of petroleum-based products such as roofing and waterproofing materials, combined with the increase in fuel costs, which affects virtually all sectors in the construction industry."

Turner has made its quarterly forecast for more than 50 years. Used widely by the construction industry and federal and state governments, the building costs and price trends tracked by the Turner Building Cost Index may or may not reflect regional conditions in any given quarter. In fact, regional conditions often vary from composite trends.

Based in New York City, The Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest builder of commercial, industrial, hospital and health care, institutional, government building and multi-unit housing projects. Operating through more than 34 offices, Turner has construction projects under way throughout the United States and abroad.

During 1989, The Turner Corporation completed $3.6 billion of construction.

HAUPPPAUGE, N.Y. (OCT. 10) PR NEWSWIRE - KNOGO Corporation (NYSE: KNO) today reported a 29 percent increase in revenues for the second quarter of fiscal 1991, ended Aug. 31, 1990 or $18,096,000, as compared with revenues of $14,010,000 in the similar period of the prior year. A net profit of $130,000 ($.02 per share) for the same period was reported, versus a net loss of $1,077,000 ($.21 per share) from the three months ended Aug. 31, 1989.

Revenues increased for the six months ended Aug. 31, 1990, to $35,917,000 up from $32,329,000 in the comparable period. Net income for the first six months amounted to $754,000 ($.14 per share), versus net income of $332,000 ($.06 per share) in the similar period of the previous year.

According to management, the revenue increase during the second quarter of fiscal 1991 as compared to fiscal 1990 is due to the continued strong demand for all the company's products, particularly its Chameleon system utilized in the protection of hard goods.

Worldwide bookings for the first six months of fiscal 1991 totalled $53.4 million, up $7.9 million from a year ago, with domestic bookings reflecting a substantial increase of 32.4 percent from the comparable period of a year ago.

Worldwide backlog was reported at an all-time high slightly in excess of $30.1 million, up from $20.0 million as at May 31, 1990. Management anticipates a major portion of this backlog to be translated into revenues during the balance of this current fiscal year.

KNOGO Corporation, founder of the Electronic Article Surveillance (EAS) industry in 1966, is the world's technological leader in the design and manufacture of anti-theft systems for retailers and industry. Its Radio Frequency (RF) and Micro-Magnetic (MM) systems protect retail merchandise and business assets. KNOGO's Jensen Data Displayer, when used with KNOGO's Surveillor Closed Circuit Video Systems (CCVS), protects retailers against internal shrinkage by recording point-of-sale transactions onto permanent videocassettes making a duplicate of the transaction receipt onto a video record.

#90283p3245 10/10/1990 ~PR Newswire
MIDDLEBURY, Conn. (OCT. 10) PR NEWSWIRE - Uniroyal Chemical Acquisition Corporation (UCAC), an indirect parent corporation of Uniroyal Chemical Company, Inc. (Uniroyal Chemical), today notified the trustees of UCAC's 13.5 percent Senior Subordinated Notes Due 1997 and 14.25 percent Subordinated Notes Due 1998 that it has elected to pay its next semi-annual interest payment due Nov. 1, 1990 all in cash without the issuance of any Payment-in-Kind (PIK) notes.

This interest payment will be made to noteholders of record on Oct. 15, 1990.

Under the indentures governing the Senior Subordinated Notes and the Subordinated Notes, UCAC may elect to pay any semi-annual interest payment all in cash, at the rate of 13.5 percent per annum and 14.25 percent per annum, respectively, or partially in cash at the rate of 11.5 percent per annum and 12.25 percent per annum and partially in PIK notes with a principal amount at the rate of 2.4 percent per annum, respectively.

By not having to issue additional PIK notes, UCAC effectively reduces the interest payment by 0.4 percent per annum and benefits from the avoidance of compounding interest on the PIK notes in the future, a UCAC spokesperson said.

Uniroyal Chemical is a leading worldwide producer of specialty chemicals and high performance polymers serving the rubber, plastics, petroleum, paint and coatings, adhesives and sealants, electronics and crop protection markets.

MANHATTAN BEACH, CA (OCT. 10) PR NEWSWIRE - Fairchild Space & Defense Corporation has announced that Larry M. Calvert will join the corporation as president and general manager of Fairchild Controls.

He will report to Richard E. Brackeen, chairman and chief executive officer of the corporation.

Calvert, 50, had been general manager of Parker Hannifin Corporation in Irvine Calif. Calvert spent more than 23 years with Bertea/Parker Hannifin. He joined what was then the Bertea Corporation in Irvine, Calif., as a precision machinist in 1967, and served in progressively more responsible key management positions, the most recent of which included marketing manager in Seattle; plant manager in Ogden, Utah; and general manager in Irvine, from 1987 to the present.

Calvert was awarded a bachelor of arts degree from California State University in Fullerton in 1973. He is married and has two children.

Fairchild Controls specializes in the design, development, manufacturing, and testing of valves, quick disconnects, regulators and subsystems for aerospace applications, and is a leader in providing innovative solutions to the requirements of fluid control in space and aerospace systems. Fairchild Space & Defense Corporation, a member of the Matra Group, is a U.S. space and defense electronics company based in Germantown, Md. The company with a workforce of 2,000, has annual revenues of approximately $230 million. Matra, headquartered in Paris, is an internationally diversified company with annual revenues in 1989 of approximately $3.6 billion.

SEATTLE (OCT. 10) PR NEWSWIRE - The first Airborne Warning and Control System (Systeme de Detection Aeroporte) that will serve with the Republic of France Air Force arrived today at Le Bourget airfield near Paris, Boeing Aerospace & Electronics announced. After being outfitted with mission equipment and tested, it will be the first of four AWACS scheduled for delivery to France beginning next spring.

Its AWACS aircraft will provide France with increased airborne surveillance capability, as well as improved command/control/communication within its

military forces.

The aircraft that arrived at Le Bourget, designated E-3F, was flown to France from Seattle non-stop by a crew from Boeing, accompanied by a French Air Force flight crew. AWACS is produced by Boeing Defense & Space Group, Aerospace & Electronics Division.

The aircraft will be outfitted with mission equipment by a team from Boeing and the French company UTA, which is located at Le Bourget.

This team will install the radars, computers, consoles and communications equipment that make AWACS the premiere airborne early warning system. Flight testing of this equipment will begin next winter at Avord Air Force Base southeast of Paris, with final acceptance testing during the spring.

UTA will assume the major role in the installation and checkout of mission equipment for the remainder of the French AWACS aircraft, using a cadre of UTA employees who trained at Boeing for this purpose.

Delivery of all four French AWACS will take place at Avord, and will be complete before the end of 1991.

In addition to the French planes, Boeing is producing seven AWACS for the United Kingdom, with deliveries also scheduled to begin next spring.

Boeing has built 57 AWACS for the U.S., NATO and Saudi Arabia. Elements of these fleets are playing an important surveillance role in the current Middle East crisis.

LOS ANGELES (OCT. 10) PR NEWSWIRE - The U.S. Air Force's Strategic Air Command (SAC) has chosen Logicon Inc. (NYSE: LGN) to provide critical high-technology support services to its new underground command center near Omaha, Neb., the company said today.

The 63-month contract, which includes five option years at about $2 million each, has a total potential value of more than $10.6 million.

The recently completed command center is the focal point for directing all of SAC's forces, including aircraft, both bombers and aerial refuelers, and intercontinental ballistic missiles. The Command Center also integrates SAC's advance warning systems and other components of national defense. The new center uses large- scale projection equipment to plot worldwide activity and has computer-based work stations for members of the SAC battle staff.

Logicon experts will support SAC in the areas of software maintenance, hardware maintenance, systems engineering, and configuration management at the command center. The company will subcontract selected portions of the work to IBM, Contel, and McCallie Associates Inc.

Logicon is a leader in providing advanced technology systems and services to support national security, civil and industrial needs.

AZUSA, CALIF. (OCT. 10) PR NEWSWIRE - Optical Radiation Corp. (NASDAQ: ORCO) announced today that its Cinema Digital Sound (CDS) technology, developed jointly with Eastman Kodak Co., (NYSE: EK) is now available for theatrical films in 35mm format. The announcement was made at ShowEast in Atlantic City N.J., where motion picture industry exhibitors and distributors are currently gathered for an annual conference.

Introduced last summer at selected 70mm theaters in New York and Los Angeles featuring "Dick Tracy," CDS is a process that produces compact disc quality sound for commercial movie theaters.

Richard D. Wood, Optical Radiation's president and chief executive officer, said additional films featuring CDS are expected to be released for the Christmas season in the United States, as well as in Europe, where the technology was formally introduced earlier this month.

"The availability of CDS in 35mm format expands the market size to 23,000 theaters in the United States alone, compared with about 1,000 70mm theaters, said Wood. "CDS will add a new dimension to the neighborhood theatrical

experience."

CDS provides filmmakers with a precise ability to control the direction and movement of sound to create a more compelling illusion of reality. Five discrete channels reproduce the full tonal and frequency ranges the human ear is capable of hearing. A separate sub-woofer channel reproduces the lowest bass tones. The channels are optically encoded on the print film.

Leonard F. Coleman, vice president and general manager of marketing for Kodak's Motion Picture and Television Products division, believes that eventually scripts will be written for sound to be designed to take full advantage of CDS features. He also expects more original sound to be recorded and mixed digitally now that there is a way to release movies in digital sound format.

"We anticipate an orderly, evolutionary process," said Coleman. "Filmmakers experimenting with CDS will discover ways to enhance their art form. That will help distributors to merchandise the box office appeal of digital sound. In turn, exhibitors will be encouraged to upgrade theaters."

Wood anticipates that more than 50 theaters in the United States and Europe will be equipped for CDS in time for the Christmas holiday releases. He noted that the cost for a theater to install CDS equipment is approximately $20,000.

Optical Radiation designs and manufactures a wide variety of precision optical components and systems for medical, industrial and scientific applications.

COLUMBUS, GA. (OCT. 10) PR NEWSWIRE - Total System Services Inc. (NYSE: TSS), the Columbus, Ga.-based bankcard data processing company, today announced record revenues and net income for the third quarter and nine months ended Sept. 30.

Net income for the third quarter increased 16.0 percent to $3,242,000, or $.20 per share, up from $2,796,000, or $.17 per share, for the same period last year. Revenues for the third quarter of 1990 were $21.7 million, an increase of 31.1 percent, compared with revenues of $16.5 million reported for the third quarter of 1989.

Net income for the first nine months of 1990 rose 13.9 percent to $8,897,000 from $7,814,000 for the same period last year. Net income per share

increased to $.56 from the $.49 earned in the first nine months of 1989. Revenues for the first nine months of 1990 were $58.1 million, an increase of 21.0 percent, compared with revenues of $48.0 million for the same period last year.

Commenting on the company's performance, Richard W. Ussery, president and chief executive officer of TSYS, stated: "We are pleased with our performance for the third quarter and first nine months of 1990, particularly considering the continuing increased expenses we experienced in the third quarter in order to prepare for additional future growth. We are optimistic about the continued strong earnings potential of TSYS and anticipate record revenues and earnings for 1990."

STILLWATER, MN (OCT. 10) PR NEWSWIRE - INCSTAR Corporation (ASE:ISR) reported today that it has received Pre-Market Approval (PMA) from the U.S. Food and Drug Administration (FDA) for the company's CYCLO-Trac(R) SP radioimmunoassay (RIA) cyclosporine drug monitoring products.

The CYCLO-Trac SP products are used to monitor the level of cyclosporine in the bloodstream of heart, kidney, and liver transplant patients. The drug cyclosporine is a powerful immunosuppressant administered to prevent organ rejection. Accurate monitoring of cyclosporine is necessary to aid in the clinical management of organ transplant patients receiving the drug.

Dr. Orwin Carter, president and CEO of INCSTAR, said that the CYCLO-Trac SP products are the first internally developed products for which INCSTAR has received PMA approval. "These products have been in clinical evaluation for the past three years. Now that we have full marketing approval, we expect that, in time, new opportunities will open up for us. However, we do not expect a significant increase in units sold in the near-term."

INCSTAR is a Minnesota-based manufacturer and distributor of high quality immunodiagnostic products for health care professionals and manufacturers. The company is an affiliate of the Italian-based Fiat Group (NYSE:FIA).

NEW YORK, (OCT. 10) PR NEWSWIRE - Brigitte McCray has been promoted to director of creative services for Channel 7, it was announced today by Walter C. Liss Jr., president and general manager of the Capital Cities/ABC, Inc.-owned (NYSE: CCB) television station in New York. In this position, McCray will be responsible for directing all station advertising and promotional campaigns.

In making the announcement, Liss noted, "Brigitte's excellent track record since joining the creative services department more than four years ago makes her the obvious choice to step into the director's position. She is truly an asset to the company."

McCray joined Channel 7's creative services department in October 1986 and quickly moved to positions of increasing responsibility, most recently serving as assistant director. Prior to WABC-TV, McCray was with the promotion department of W-USA-TV, the CBS/Gannett-owned station in Washington. While there, she swiftly moved up the ranks from promotion coordinator to writer/producer, where she had been responsible for the production of major on-air promotion and station image campaigns. McCray began her broadcast career at WETA-TV, the PBS station in Washington, as a production assistant in the special projects unit.

Born in Germany, McCray graduated from Maryland University with a B.F.A. degree. She currently resides in New York City.

CHICAGO, (OCT. 10) PR NEWSWIRE - David I. Chemerow, former senior vice president of operations at Primerica Corp. and currently president of Beechwood Capital Corp., has been appointed to the new position of executive vice president, finance and operations, and chief financial officer of Playboy Enterprises, Inc. (NYSE: PLAA). The announcement was made this morning by Playboy Chairman and Chief Executive Officer Christie Hefner, to whom Chemerow will report.

In his new post, Chemerow will oversee the financial operations of the $168-million international publishing and entertainment company and will chair the operating review committee, working closely with publishing group president Michael Perlis and entertainment group president Robert Friedman.

In making the announcement, Hefner said, "David's extensive experience in analyzing business opportunities and in negotiating and structuring deals and relationships will be invaluable to us as we continue to capitalize on the worldwide growth opportunities for the Playboy brand and expand our base of business through start-ups and acquisitions. Coming off of a very profitable

year with a very strong balance sheet and more equity flexibility, this is an ideal time to have David join the team."

Chemerow joins Playboy from Beechwood Capital Corp., an investment company he founded with Kenneth A. Yarnell Jr., the former president and chief operating officer of Primerica. Beechwood Capital Corp. is involved in acquiring and operating businesses.

From 1975 to 1988, Chemerow held a number of executive positions with Primerica Corp., including vice president and corporate treasurer, senior vice president and corporate controller, and lastly, senior vice president of operations.

Chemerow holds a bachelor of arts degree in mathematics from Dartmouth College and a masters in business administration from the Amos Tuck School of Business Administration. He is a director of Dunham's Athleisure Corp., a Detroit-based sporting goods retailer, and is an overseer of the Dartmouth Institute at Dartmouth College.

He and his wife Doreen will move from Stamford, Conn., to Chicago, where Playboy's corporate headquarters are located.

COSTA MESA, Calif. (OCT. 10) PR NEWSWIRE - SPI Pharmaceuticals Inc. (AMEX: SPI) today reported net income in the third quarter increased 21 percent over last year's third quarter. Sales and net income were the highest of any third quarter in the company's history.

The company said net income of $3.4 million, or 28 cents a share, for the third quarter ended Aug. 31 compared to net income of $2.8 million, or 23 cents a share, in the same quarter a year ago. Net income benefited from an improved gross profit margin.

Third quarter sales increased 8 percent to $31.4 million from $29 million in last year's third quarter.

Sales growth was led by U.S. sales which benefited from strong sales of the company's prescription line of myasthenia gravis products and dermatological products, which were 64 percent ahead.

Sales of the antiviral Virazole (ribavirin) were also ahead in the quarter. Virazole is marketed in the United States for the aerosolized treatment of infants and young children hospitalized with severe respiratory tract infection caused by respiratory syncytial virus.

International sales benefited from gains in Mexico, Holland and Spain. Mexico continued to experience good demand for all its major product lines, including antibiotics and injectable multivitamins. Sales of the antiulcer medication Ranuber, and Calcitonina, used to treat osteoporosis, contributed to the performance of the Spanish operations.

For the first nine months of 1990, net income increased 11 percent to $10.2 million, or 83 cents a share, from $9.2 million, or 75 cents a share, in the comparable period a year ago. Sales were 9 percent ahead, rising to $97.1 million from $88.9 million in the first three quarters of 1989.

SPI Pharmaceuticals, listed on the American Stock Exchange, makes, markets and distributes a broad range of ethical prescription and non-prescription pharmaceuticals, principally in the United States, Latin America, Europe and Canada.

NORTHRIDGE, CA. (OCT. 10) PR NEWSWIRE - Dr. Richard James, president of JBL

Inc., today announced the appointment of Tom Jacoby to the position of president of JBL Consumer Products, Inc. JBL, Inc. is composed of three JBL companies: JBL Professional, JBL International, and JBL Consumer, and is a wholly owned subsidiary of Harman International Industries, Inc.

In this capacity, Jacoby will be responsible for all operations of JBL Consumer Products as regards the company's domestic operations including all phases of the operation from product development through to U.S. distribution. Jacoby will, additionally, establish offices in both JBL, Inc.'s Northridge headquarters and in the firm's Woodbury, N.Y., facility. Both offices will be staffed with key operational personnel. Marketing, sales, administrative, and finance functions will be divided between JBL Consumer Products Inc.'s offices in Northridge and Woodbury. In his position, Jacoby will divide his time between both offices.

Prior to this appointment, Jacoby most recently served as executive vice president for Harman America, formerly the marketing and distribution company for both Harman Kardon electronics and JBL Consumer loudspeakers. He had been involved with Harman Kardon for the last 10 years, and JBL for the last five. Prior to that, Jacoby was involved with the consumer electronics industry from a retail perspective.

"I am very pleased to announce Tom's appointment as president of JBL Consumer Products," James commented. "He brings with him a wealth of knowledge and experience regarding JBL's position in the marketplace. Dividing his time between the operations on both coasts will enable Tom to take advantage of the combined creative strength available at Northridge headquarters and will expand his expertise even further," James concluded.

"It is with great pleasure that I assume the JBL Consumer Products presidency " Jacoby stated. "I received an enormous amount of professional satisfaction during the course of my previous efforts on behalf of JBL and the opportunity now presented me is very exciting. I look forward to working with Dick as well as the two other JBL companies, JBL Professional and JBL International. By dividing my time between the two coasts, I will be better able to take advantage of the combined resources of JBL Inc., and the Harman International family of companies."

FORT WORTH, TX (OCT. 10) PR NEWSWIRE - URCARCO INC. (NASDAQ: CARS) announced today that it has signed a lease for its fourth retail used cfr lot in Houston according to Clifton H. Morris Jr., Chairman and CEO.

The new retail facility will serve the Southeast Houston area, located at 12800 Gulf Freeway (I-45 South) on "new car row." Displaying approximately 150-200 cars and light trucks on a major high-traffic thoroughfare, this new lot will also serve outlying market areas such as NASA, Clear Lake and Galveston.

The anticipated opening date has been set for Oct. 15, 1990. The company recently announced the signing of a lease for its second San Antonio lot, also scheduled to open on this same date. Based on current lot opening plans, URCARCO will have 20 retail lots in operation by Oct. 15, up from 17 lots in operation on June 30 at the company's 1990 fiscal year end.

Formerly a major new car dealership, the new Houston lot features five acres of display, showroom and full-service facilities.

"This is an important next step for URCARCO in Houston, wcto its metropolitan population of nearly 3.5 million people," stated Morris. "In addition, our shift towards large, high-profile lots, which were formerly new car dealerships, has also provided us with excellent facilities for pre-sale vehicle preparation and follow-up service."

URCARCO INC. currently operates a chain of 18 used car retail lots in Fort Worth, Dallas, Houston, Austin, and San Antonio, selling quality used passenger cars and light trucks and typically financing customer purchases.

LEXINGTON, Ky. (OCT. 10) PR NEWSWIRE - Kentucky Utilities Company (NYSE: KU) reported earnings per average share of common stock for the three and nine months ended September 30, 1990, of $.59 and $1.53, respectively, as compared to $.54 and $1.75 for the corresponding periods in 1989. Earnings for the twelve months ended September 30, 1990, were $2.11 per share as compared to $2.05 per share a year ago. Results for the nine and twelve month periods of 1989 include a one-time addition to earnings of 30 cents per share associated with the cumulative effect of an accounting change to recognize unbilled revenues.

Operating revenues for the third quarter of 1990 were $151.3 million, a 12 percent increase from the same quarter of 1989. The revenue increase reflects a 7 percent rise in kilowatt-hour sales which is primarily attributed to greater sales to other utiltiies and to continued growth in sales to commercial and industrial customers. Operating expenses and taxes of $120.2 million for the current quarter increased 12 percent from 1989.

For the twelve months ended September 30, 1990, operating revenues of $553.3 million were 6 percent above those in the corresponding period last year. Operating expenses and taxes for the twelve-month period of 1990 were $443.5 million, up 4 percent from 1989.

IRVINE, CA (OCT. 10) PR NEWSWIRE - Technology Marketing Inc. (NASDAQ: TMKT) today announced the financial results for the second quarter of fiscal year 1991. Revenues in the second quarter ended Aug. 31 were $2,072,313, resulting in a net profit of $42,580. This compares with revenues of $2,006,144 and a net profit of $18,483 for the same period a year ago. Net income per share for both quarters was $.01.

For the six month period ended Aug. 31, TMI recorded a net loss of $55,597 on revenues of $3,773,370. This compares with a net profit of $264,141 on revenues of $4,626,501 for the same period last year. Net loss per share for the six months ended Aug. 31 was (.02), compared to a net income per share of $.09 for the period ended Aug. 31, 1989.

The company returned to profitability after losses in the three previous quarters. Although revenues for the quarter were up only 3 percent compared

to the prior year, the pre-tax income improved by 44 percent from the same period. Net income for the second quarter of fiscal 1991 was not enough to offset the loss in the first quarter leaving a year-to-date loss. However, revenues improved by 22 percent from the previous quarter.

Technology Marketing Inc. (TMI) is a provider of high technology automatic test equipment, magnetic tape certification systems, and custom engineering and development services of computer-based systems to manufacturers and service providers in the electronic industries. TMI was incorporated in 1969 and issued shares to the public in 1981. Its corporate offices are in Irvine, Calif.

NEW YORK (OCT. 10) PR NEWSWIRE - For the third quarter of 1990, CBS Inc. (NYSE: CBS) today reported income from continuing operations of $43.5 million, or $1.69 per share, compared to $61.9 million, or $2.40 per share, in the third quarter of 1989. This earnings per share decrease of 30 percent principally reflected weaker results within the operations of the CBS Television Network. Income from continuing operations for the first nine months of 1990 reached $266.8 million, compared to $237 million in the prior-year period. Results for the third quarter and first nine months were as follows:

CBS INC.
(In millions, except per-share data)

Third Quarter	1990	1989	Percent Change
Income from continuing operations	$43.5	$61.9	- 30
Income from continuing operations per share	$1.69	$2.40	- 30
Net income	$43.5	$61.9	- 30

For the third quarter of 1990, CBS/Broadcast Group net sales were $661.8 million, a 12 percent increase, and operating profits were $17.8 million, a

decrease of 65 percent. The CBS Television Network reported substantially lower results mainly due to higher expenditures, in comparison to the third quarter of the prior year. Costs at the Network rose to fund new program development, first-run summer programming and the acquisition of sports rights as well as to provide hard news coverage of events in the Middle East. The Network's sales growth exceeded 10 percent and was lifted mainly be broadcasts of Major League Baseball. Profits at the CBS Television Stations rose in the quarter, led by better results at the Los Angeles and New York stations. CBS Radio reported markedly higher sales and profits due to the improved performance of both the AM and the FM station groups.

Net corporate interest income was $43.3 million in the third quarter of 1990, compared to $47.5 million in the third quarter of the prior year. At the end of the third quarter, the company's total cash and marketable securities were approximately $3 billion, while total debt was approximately $0.8 billion.

BEAVERTON, OR. (OCT. 10) PR NEWSWIRE - Mentor Graphics Corp. (NASDAQ: MENT) today announced that it has entered into a five-year agreement with General Electric (NYSE: GE). The agreement, the largest ever in the Electronic Design Automation (EDA) industry, gives Mentor Graphics preferred vendor status at General Electric.

Mentor Graphics has already entered into the first phase of the agreement with GE's Aerospace and Medical Systems divisions. As part of the agreement, Mentor Graphics will act as the prime contractor for integrating all of GE's Aerospace and Medical Systems' EDA tools into comprehensive concurrent design environments and assisting in the evaluation of new technologies to maximize design productivity. The agreement also calls for replacement of all other existing EDA vendors' products.

Mentor Graphics began installation of HP/Apollo workstations at GE sites in the third quarter of this year; Sun workstations will be installed in 1991. The initial systems will focus primarily on hardware simulation and printed circuit board design. In 1989 GE ordered Mentor Graphics products for its Medical and Aerospace divisions.

A portion of the contract involves Mentor Graphics' Consulting Services. Mentor Graphics will have dedicated Consulting Services employees on site full-time at GE's Engineering Support Center and in select Aerospace and Medical divisions. Consulting Services is an independent group within Mentor Graphics dedicated to counseling clients on planning and implementing EDA environments.

In addition, GE Medical Systems recently presented Mentor Graphics with an award for vendor excellence. As one of GE Medical Systems' strategic partners Mentor Graphics was recognized for helping GE decrease time-to-market and

product cycle time while significantly increasing design efficiency and productivity. GE bestows the vendor excellence award to only those companies that help GE realize dramatic improvements in engineering productivity.

"To improve our design processes for the 1990's, GE requires leading-edge design tools, state-of-the-art design environments, and the consulting expertise to implement our design systems," stated James Feller, vice president of technology for GE Aerospace. "We are anxiously awaiting Mentor Graphics' Release 8.0 and support for the Sun platform. As the current industry leader, with its consulting experience and R&D commitment, Mentor Graphics has the potential to help us realize maximum return from our investment in design automation."

"Perhaps the most gratifying aspect of our relationship with GE is the recognition of our Consulting Services as key to applying this technology productively," stated Thomas Bruggere, chairman and chief executive officer of Mentor Graphics. "Working in partnership with an industry leader such as GE will advance the state-of-the-art in design automation."

Mentor Graphics Corp., Beaverton, Ore., was established in 1981 to design, manufacture, market and service EDA systems. The company is the leader in worldwide EDA sales, with revenues of $437 million over the last 12 months, as restated to reflect the merger with Silicon Compiler Systems Inc. The company currently employes more than 2,500 people. In addition to its corporate offices in Beaverton, Mentor Graphics has sales and support offices in 66 locations worldwide. The company's headquarters are located at 8500 SW Creekside Place, Beaverton, Ore., 97005.

TOLEDO, OH (OCT. 10) PR NEWSWIRE - AT&T (NYSE: T) teams up today with The Walt Disney Co. (NYSE: DIS) to introduce a new Mickey Mouse telephone.

America's favorite cartoon character strikes a casual pose, leaning on an angled black base that holds a bright red AT&T Trimline(R) phone.

The telephone has a key that redials busy or unanswered numbers, and it can be muted to prevent the person on the line from hearing conversations with others in the room.

Users can increase the volume of the incoming voice if necessary, a feature that is particularly helpful in noisy locations such as a den or for people with hearing impairments. The keypad is lighted to make it easier to dial in dark rooms.

Mickey Mouse stands about 14 inches tall, and the telephone's base is about 10 inches square. It can be used with either touch tone or rotary service.

The Mickey Mouse telephone is available for $99.99 in the AT&T Phone Center located at 3301 W. Central Ave., Toledo, Ohio. It also will be available at Disney theme parks and at retail stores nationwide.

#90283p3347 10/10/1990 ~PR Newswire

SOMERVILLE, Mass. (OCT. 10) PR NEWSWIRE - Century Bancorp, Inc. (NASDAQ: CNBKA) today reported net income of $1,000 for the third quarter ending Sept. 30, 1990, after adding an additional $1 million to its Loan Loss Reserve.

Stockholders' Equity reached $36.8 million at the end of the third quarter of 1990, up 1.9 percent compared to the third quarter of 1989. Book value at Sept. 30, 1990 stood at $6.43 per share.

Century's decrease in earnings continues to be attributed primarily to non-accruing loans and other real estate owned. For the first nine months of 1990, operating expense increased just 0.6 percent over the same period last year.

Century's non-accruing loans totalled $17.2 million at the end of the third quarter which represents 4.92 percent of total loans outstanding. Century's Loan Loss Reserve amounted to $6.4 million at Sept. 30, 1990, up 57.9 percent from $4.1 million at the end of the third quarter, 1989. During the third quarter, other real estate owned increased to $7.5 million from the $7.0 million at June 30, 1990.

In view of the continued downturn in the region's economy, the bank determined the additional contribution to the Loan Loss Reserve appropriate. Century Bank's third quarter earnings were such that it was able to make the additional contribution without posting a loss for the quarter.

Citing the need to preserve strong capital during the region's economic downturn, Century's board of directors voted to reduce the bank's quarterly dividend to 2.50 cents per share on Century Class A common stock (formerly 7.50 cents) and 0.35 cents per share on Class B common stock (formerly 1.05 cents). The dividends were declared payable Nov. 15, 1990, to stockholders of record, Nov. 1, 1990.

Marshall M. Sloane, president and chairman of Century noted, "As evidenced by continued deterioration in the real estate market, employment levels, the Commonwealth's fiscal health, and with the prospect of a national recession looming, we expect the region to take several months, perhaps a prolonged period of time, to recover from its economic downturn. We must therefore take the necessary action to prepare Century Bank for the seemingly long road ahead."

Sloane said that until the economic factors that have impacted the bank's earnings begin to improve, it must reduce its dividend to help preserve its strong capital base. "Concurrently, we're committed to controlling overhead, marketing the real estate we own, and carefully managing overall asset quality " said Sloane.

Century Bancorp, Inc., with 14 offices in eastern Massachusetts has three subsidiaries: Century Bank and Trust Company, headquartered in Somerville, Century North Shore Bank and Trust Company, headquartered in Lynn and Century Bank/Suffolk, headquartered in Chelsea.

#90283p3351 10/10/1990 ~PR Newswire

EL SEGUNDO, CA (OCT. 10) PR NEWSWIRE - Hundreds of employees gathered today at Northrop Corp.'s (NYSE: NOC) Fighter Production Center to mark the completion and delivery of the 1,000th F/A-18 Hornet shipset to prime contractor McDonnell Douglas.

The unit will be transported by train across country to St. Louis, Mo., where McDonnell Douglas (NYSE: MD) will mate the center and aft fuselage with the nose section and wings to complete the aircraft. The 1,000th shipset, an F/A-18D two-seater equipped with night attack capability, will be used by the U.S. Marine Corps for tactical missions.

Since start-up 16 years ago, Northrop has continuously pursued methods to increase efficiency, improve quality and reduce costs. For example, the F/A-18 is now being built with a computerized system that virtually eliminates some 16,000 sheets of paper per shipset on the assembly line; a small parts sheet metal work cell that brings together under one roof everything needed to manufacture small sheet metal parts; and photogrammetry, a process that reduces aircraft assembly tool inspection costs and lowers average tool inspection time.

Composite materials--which make an aircraft lighter, stronger and more versatile--were used extensively for the first time on the F/A- 18. The aircraft's aerodynamic/control surfaces, including the leading edge, trailing edge, wing skin, vertical and horizontal tail skins and other surfaces are made with carbon epoxy composites.

The successful use of composites and the manufacturing technologies developed for the Hornet paved the way for the use of composites on the B-2 bomber and the YF-23 Advanced Tactical Fighter, both conceived as 21st century front-line combat aircraft.

The Hornet has amassed over one million flight hours with the U.S. Navy, Marines and the air forces of Australia, Canada and Spain. It is the safest carrier-based combat aircraft in the history of naval aviation, and the Navy's most cost-effective tactical aircraft in terms of procurement, operational and support costs.

The Republic of Korea decided last year to acquire 120 F/A-18s in a program leading to licensed production of aircraft in South Korea. The first deliveries in this program are expected in 1993.

The F/A-18 evolved from Northrop's design for a lightweight, twin-engine, twin-tail aircraft--the YF-17--which was developed as a prototype for the U.S. Air Force's lightweight fighter program. In 1975, the Navy announced its selection of the team of McDonnell Douglas and Northrop to develop its new strike fighter, the F/A-18.

The Hornet's design enables the aircraft to be continually upgraded or retrofitted to incorporate state-of-the-art advances in technology and new weapons systems with relative ease. Current models have been equipped with night attack capabilities and provisions for tactical reconnaissance. The addition of several new missile systems has increased the aircraft's combat flexibility and usefulness.

Northrop and McDonnell Douglas continue to define further improvements which will give the Navy the capability to counter anticipated threats well into the next century.

MANSFIELD, OHIO (OCT. 10) PR NEWSWIRE - Ideal Electric Company of Mansfield today sued the city of Mansfield, three city officials and a Richland County Common Pleas judge for $24 million in damages, resulting from their conduct during the recent United Steelworkers' strike against Ideal. The suit was filed in U.S. District Court in Akron.

Individual defendants named in the suit are Mayor Edward T. Meehan, Service-Safety Director Daniel George Arnold, Police Captain Philip Messer and Richland County Common Pleas Court Judge Max K. Chilcote.

The suit amends an earlier complaint brought before the strike was settled, which sought injunctive relief to enable Ideal to operate its plant during the strike, as protected by federal law. Today's action also removes the United Steelworkers as a defendant in the suit.

The amended complaint seeks $12 million in compensatory damages and another $12 million in punitive damages for alleged violations of Ideal's civil rights conspiracy to violate Ideal's civil rights, breach of duty by public officials and wrongful interference with business relationships.

"Ideal Electric suffered a long and frequently violent strike," said the company's chief executive officer Michael Vucelic, "which was made even worse by the repeated actions of public officials to deny us the ability to operate our plant. Company managers were denied access to the plant, replacement workers were denied access to the plant, and the city failed to take any meaningful action to stop the union and its supporters from continued mob violence. In fact, the union was encouraged to proceed with its unlawful actions by the repeated refusals of city and law enforcement officials to enforce the law.

"As a result," he added, "the company was unable to fulfill customer orders and has lost customer confidence and goodwill. Moreover, we were placed at a significant economic disadvantage in our negotiations with the union and were denied the use of economic countermeasures against the strike that are guaranteed by federal law."

Ideal Electric has been represented throughout the labor dispute by Robert T. Rosenfeld, Michael McMenamin and other lawyers from the Cleveland firm of Walter, Haverfield, Buescher & Chockley. The amended lawsuit in U.S. District Court for the Northern District of Ohio will be heard by Judge Sam Bell in Akron and was brought under provisions of the U.S. Civil Rights Act and Ohio

law.

"The laws of this country and this state are meant to be enforced," said attorney McMenamin. "During the steelworkers' strike against Ideal, however, they were not and, as a result, our client was severly harmed. This is what the suit is all about."

Ideal Electric Company, located in Mansfield, is a manufacturer of electrical motors, generators and switch-gears.

NEW ORLEANS (OCT. 10) PR NEWSWIRE - Avondale Industries Inc. (NASDAQ-NMS: AVDL) today announced that it has acquired The Genco Group, a privately held steel fabricator based in Bridge City, Texas.

Genco generates annual sales of approximately $18 million principally through fabricating and installing large steel structures and process units for various industries. Although the purchase price was not disclosed, the Genco operations are expected to contribute positively to Avondale's earnings over the balance of 1990.

Albert L. Bossier Jr., chairman and chief executive officer of Avondale, remarked: "The acquisition of The Genco Group not only offers an attractive return on our investment but also importantly broadens the base of Avondale's business. Our other industrial contacts and strong financial position will support Genco's interest in pursuing geographic expansion as well as

increasing the size and scope of its manufacturing capabilities. Genco has an excellent record of growth, and the overall demand trends appear very favorable in the key industries it serves."

Bossier said that this acquisition follows Avondale's strategy of increasing the percentage of the company's revenues derived from industrial and other commercial customers. He commented: "We are continuing to market our modular construction expertise to a broad range of industries. We are also actively pursuing opportunities, such as the purchase of the Genco operations, to augment these internal marketing efforts through selective acquisitions. This particular transaction will allow us to extend our own considerable experience with steel fabrication into some major industries which we believe offer exciting potential for Avondale."

In summarizing the newly acquired operations, Bossier indicated that Genco, founded in 1979, was initially focused on providing steel fabrication services for the petrochemical, plastics and paper industries heavily concentrated in southeast Texas. Construction trends in those sectors have recently begun to accelerate following some sluggishness in the mid-1980s. Bossier said that Genco's revenues have more than doubled over the past five years based not only on the higher capital spending in those traditional customer groups but also on the company's success in broadening its base of contracts. These newer customers include waste-to-energy (cogeneration) ventures, waste incineration projects and power generation facilities. Genco has also developed a profitable business in providing on-site, in-plant maintenance and repair services.

Avondale Industries Inc., headquartered in metro New Orleans, is one of the nation's leading marine fabricators. In addition to its shipbuilding operations, the company specializes in boat construction and is a major repair contractor for commercial and Navy ships. It is also involved in the modular construction of plants and components for a variety of land-based industries.

#90283p3390 10/10/1990 ~PR Newswire
RICHMOND, Va. (OCT. 10) PR NEWSWIRE - Central Fidelity Banks, Inc. (NASDAQ: CFBS) reported record earnings for the third quarter ended September 30, 1990 and for the first nine months of 1990.

Net income for the third quarter increased 5.1 percent to $14,217,000 compared with $13,528,000 for the 1989 period. Net income per share was $.95 versus $.88 in 1989 representing an increase of 8.0 percent.

For the first nine months of 1990, net income was $42,467,000 or $2.79 per share versus $40,030,000 or $2.60 per share in 1989. This represents an increase of 6.1 percent in net income and 7.3 percent in earnings per share.

Total assets as of September 30, 1990 were $5,718,368,000, an increase of 12.7 percent over the prior year. Total loans grew a modest 3.2 percent to $3,577,715,000 reflecting the securitization of $76 million in mortgage loans, the sale of $25 million in credit card receivables, and the moderation of economic activity within the markets served by Central Fidelity. Total deposits increased by $404,574,000 or 10 percent to $4,436,595,000 at quarter-end. Stockholders' equity was $382,231,000 or 6.7 percent of total

assets, while the book value per common share was $26.36 compared with $23.90 on September 30, 1989.

Central Fidelity's return on average total assets for the quarter declined to 1.03 percent compared with 1.12 percent for the same period a year ago. The company's return on average stockholders' equity declined slightly from 14.80 percent in 1989 to 14.77 percent for 1990.

Net interest income for the quarter ended September 30, 1990 increased 8.0 percent to $52,709,000. On a tax-equivalent basis, the net interest margin for the current quarter was 4.41 percent compared to 4.74 percent for the third quarter of 1989. The margin decline is attributable mainly to a lower interest rate environment, a higher level of nonperforming assets, and growth in higher cost liabilities.

Noninterest income for the third quarter of 1990 increased 47.9 percent to $18,401,000. Significant contributors to this increase were $4 million in gains on the sale of credit card receivables, $1.9 million in investment securities gains, and higher levels of deposit fees and charges. Noninterest expenses increased 6.9 percent to $42,567,000 in the quarter during the final phase of the bank's branch expansion program. Stringent controls of expenses initiated during last year's fourth quarter have been a positive source of earnings enhancement throughout the year.

Nonperforming assets as of September 30, 1990 were $41,460,000 or 1.16 percent of net loans compared to $29,244,000 or .79 percent at the end of June 1990 and $33,876,000 or .98 percent on the same date last year. The weakness in real estate markets in various areas of the state is responsible for the higher levels of nonperforming assets. The allowance for loan losses at quarter-end was $42,776,000 or 1.20 percent of net loans versus $34,535,000 or 1.00 percent of net loans a year ago. This higher level of reserve reflects the company's commitment to assure its adequacy in the face of market weakness and uncertainties.

Net loan charge-offs for the quarter were $4,304,000 representing .47 percent of average loans on an annualized basis compared to .38 percent for the third quarter of 1989. For the nine months ended September 30, 1990, net charge-offs were $13,444,000 or .50 percent of average loans compared to $10,253,000 or .41 percent for 1989.

During the quarter, the company underwent a comprehensive examination by the Federal Reserve Bank. The results of the examination had no impact on the level of nonperforming assets, reserve for loan losses, or earnings in the quarter.

Central Fidelity Banks, Inc. is a Richmond, Virginia based bank holding company with 195 branch offices throughout the state.

WEST PALM BEACH, FL (OCT. 10) PR NEWSWIRE - Steego Corporation (NYSE: STG) announced today that it adjourned its annual meeting of stockholders held on Oct. 5, 1990, in order to permit the company to solicit proxies with respect to the company's proposed increase in its authorized capital stock by 15 million shares.

This action was undertaken in order to facilitate the company's ability to quickly and aggressively capitalize on attractive acquisition opportunities, should such opportunities develop, by providing the company with greater flexibility through the increased availability of equity securities to finance such acquisitions either as an aspect of the purchase price or through a secondary public offering. The company also announced today that it will be actively pursuing such opportunities in the near term, consistent with the decision of the company's board of directors at its regular meeting held on Oct. 5, 1990 that an expansion of Steego's business, rather than a liquidation of the company, would be advisable and in the best interest of Steego and its stockholders.

Industrial Equity (Pacific) Limited has advised the company that it intends to vote its 9,955,426 shares of common stock (representing approximately 86.6 percent of the company's outstanding common stock) in favor of the proposed increase in the authorized capital stock. Steego expects to reconvene the meeting within the next 60 days. The record date for determining stockholders entitled to receive notice of the reconvened annual meeting, proxy statement and proxy remains Aug. 10, 1990.

CLEVELAND, (OCT. 10) PR NEWSWIRE - Banner Aerospace, Inc. (NYSE: BAR) today announced the acquisition of Georgetown Jet Center of Georgetown, Texas, for an undisclosed amount of cash.

Georgetown Jet specializes in corporate aircraft engine repair and mainframe and avionics maintenance. It also reconditions aircraft for resale.

Georgetown Jet represents Banner Aerospace's eleventh acquisition of a specialized aviation service organization in the past three years and the

first since going public on Aug. 2, 1990. Samuel J. Krasney, chairman and chief executive officer of Banner Aerospace, said that the Georgetown Jet acquisition conformed to the company's pattern of purchasing well-managed, aviation-related businesses with market leadership whose growth can be accelerated by Banner Aerospace management support and capital investment. Krasney said that the acquisition of Georgetown Jet was a planned expansion into the jet engine service business.

Georgetown Jet will continue to be directed by its current management organization headed by Winthrop W. Aldrich and Ricky L. Peterson.

Cleveland-based Banner Aerospace is a leading supplier of aircraft replacement parts worldwide and provides numerous specialized aviation support services.

CHICAGO (OCT. 10) PR NEWSWIRE - Centel Corporation (NYSE: CNT) announced today that its board of directors has elected Maxwell S. Davis, Jr., and Eugene H. Irminger to executive vice presidents of the corporation effective Nov. 1, 1990.

In his new position, Davis, currently president - Centel Electric, will be responsible for Centel's corporate staff organization, including the company's legal, government relations, human resources and corporate communications areas, as well as continuing to manage the company's electric operations. Centel announced in August it intends to sell its electric operations. Irminger, senior vice president and chief financial officer, will retain his position as Centel's chief financial officer.

Davis joined Centel in 1978 as assistant general counsel. In September 1983, he became associate general counsel and assistant secretary. In 1986, Davis was elected vice president, secretary and associate general counsel. He was elected vice president - corporate development for Centel Corporation in January 1988. Davis assumed his current post as president of Centel Electric in December 1988.

Before joining Centel, Davis was an attorney with the Chicago law firm of Ross & Hardies. Davis has a bachelor's degree from Dartmouth College in Hanover, N.H., and a law degree from Harvard University in Cambridge, Mass.

Irminger joined Centel in 1973 as controller of the corporation. Two years later, he was elected vice president and controller of Centel, a position he held until being named senior vice president and chief financial officer in September 1982.

Before joining Centel, Irminger served as vice president - finance for Permaneer Corporation and as comptroller for Boise Cascade Corporation. He also served in various auditing positions with Arthur Andersen & Co.

Irminger has a bachelor's degree in accounting from the University of Wisconsin in Madison.

Chicago-based Centel Corporation, which had 1989 revenues of $1.19 billion, provides local exchange telephone service in nine states through more than 1.6 million access lines; operates cellular communications franchises that serve nearly 150,000 access lines in 45 markets in 15 states, and supplies electric power to more than 136,000 customers in two states.

SEATTLE (OCT. 10) PR NEWSWIRE - As federal lands set-asides prompt crucial decisions about Washington's forests, the public should not lose sight of the importance of privately-owned forestlands to the state's economy and environment, George H. Weyerhaeuser told the Seattle Rotary Club today.

Weyerhaeuser, chief executive officer and chairman of the board of the Weyerhaeuser Co. (NYSE: WY), said there are two forest products industries in Washington state -- one that relies for its log supply on public lands and one that relies primarily on privately-owned lands. Last year, private forestlands -- which account for just less that half of Washington's forestlands -- provided two-thirds of the state's timber harvest.

Decisions being made about harvests from public lands will have major impacts on some mills and their communities, Weyerhaeuser said. However, policies designed to help these public lands-dependent mills should not be allowed to harm the forest industry that relies on privately-owned forestland, he said.

"Public policy needs to take a longer view," he said. "For the forestland owner, who must plan for a 50-year harvest cycle, heat-of-the-moment policy shifts can be devastating."

As an example of how public policy priorities can rapidly shift, Weyerhaeuser used an analogy from Seattle's economic downturn in the 1970s.

"Just 20 years ago... there were signs that read: 'Will the last one out of Seattle please turn out the lights.' Not just two decades later -- less than half the time it takes to grow a tree -- the publicly perceived problem is too many lights."

Weyerhaeuser said the public's views on growth, and policies of the 1970s

aimed at stimulating growth, have shifted dramatically. He urged that public forestland policy should be made with an eye toward the future, as well as the present.

WINSTON-SALEM, NC (OCT. 10) PR NEWSWIRE - James C. Schroer will join R.J. Reynolds Tobacco Co. Oct. 22 as executive vice president of marketing and sales.

Schroer, 39, is currently vice president and a partner in the international management consulting firm of Booz, Allen & Hamilton.

Reporting to Schroer will be Yancey W. Ford Jr., executive vice president of sales, and David N. Iauco, senior vice president of marketing.

"We are extremely fortunate to have someone of Jim Schroer's talent and experience join Reynolds Tobacco to direct our overall marketing and sales efforts," said James W. Johnston, chairman and chief executive officer of the company. "Since the spring of this year, Jim has worked closely with us in developing our strategic business plans for the 1990s. He fully understands the importance of effective marketing, trade and retail strategies to make these plans successful and he is totally committed to the direction we've set. Having Jim on our team will help us accomplish our marketplace objectives over the next several years," Johnston said.

Schroer joined Booz, Allen & Hamilton in 1983. He became a principal in the firm in 1986, and a vice president in 1988. As a lead partner in Booz, Allen's marketing and sales department, he has experience across a variety of consumer product businesses, including packaged foods, beverages and tobacco.

Prior to joining Booz, Allen & Hamilton, Schroer was executive vice president of sales of the Broadcast Services Division of Media General; vice president of marketing at Wagner Electric Corp.; and vice president of marketing at STP Corp.

A native of Hammond, Ind., Schroer received a bachelor's degree from Carleton College in Northfield, Minn., in 1973, and a master's degree in business administration from Harvard Business School in 1975.

R.J. Reynolds Tobacco Co. manufactures and markets one of every three cigarettes sold in the United States. The company's major brands are Winston, Salem, Camel, Vantage, Doral, Magna, More, NOW, Century, Sterling and Ritz.

#90283p3418 10/10/1990 ~PR Newswire

NEW YORK (OCT. 10) PR NEWSWIRE - Keene Corporation (NASDAQ: KEEN) announced today that third quarter sales and earnings improved significantly over the comparable 1989 period.

Third quarter sales increased 51 percent to $6,546,000. Income from continuing operations totaled $1,465,000, or 14 cents per share, compared to $250,000, or 2 cents per share, in the 1989 quarter.

For the first nine months, sales increased 40 percent to $17,791,000. Income from continuing operations increased 72 percent to $5,051,000, or 48 cents per share.

Keene's third-quarter sales and income growth resulted from the continuing improved performance of Reinhold Industries, Keene's only operating division. Reinhold is a leading producer of composite materials, structures and ablatives for aerospace, defense and commercial applications.

Third quarter bookings were $2,890,000 below last year's record rate as a result of the decline in defense spending. In anticipation of this decline, Reinhold last year launched several developmental projects as part of its ongoing metals-replacement program for commercial markets. Some of these projects have already produced orders and contributed to Reinhold's increased third quarter sales and earnings.

ASBESTOS LITIGATION

There have been major changes in the direction and amounts of asbestos-related litigation expenditures, according to Keene. In the third quarter, Keene spent $2.8 million for indemnities and $6.5 million for defense legal fees, dramatically different form second quarter expenditures of $14.2 million for indemnities and $2.9 million for defense legal fees.

Keene makes settlements only on meritorious cases, agreeing to amounts based on specific disease ailments and national geographic locations.

"Third quarter payments reflect the results of this compensation program, and we are continuing our efforts to improve these results even further," reported Keene Chairman Glenn W. Bailey.

Legal defense costs were much higher in the third quarter, but Keene is developing a cost control system which should substantially reduce legal fees while maintaining a strong defense posture, Bailey pointed out.

BURLINGAME, CA (OCT. 10) PR NEWSWIRE - In a series of related announcements, Motorola's Microprocessor Products Group today underscored its long-term commitment to competing in the reduced- instruction-set computing (RISC) market.

"Over the next few years, we'll be bringing to market the most powerful RISC processors commercially available," said Jeff Nutt, marketing manager of the 88000 family. "Motorola is committed to a sustained and aggressive program to bring the 88000 to the desktop," he continued.

At the Microprocessor Forum here, Motorola described, in general terms and for the first time, the architecture of its second-generation RISC CPU, designated the 88110. Scheduled for introduction next year, and containing more than 1.4 million transistors, the 88110 will not only perform the combined functions of its software-compatible predecessors, the 88100 CPU and the 88200 cache and memory management units -- but it will perform them three to five times faster.

In addition, the 88110 will feature multiple integer, floating-point and graphics execution units, an 80-bit wide internal data path, improved handling of instructions sustaining more than one instruction per clock, and branch acceleration to maintain continuous execution. It will be fabricated with a 0.8-micron HCMOS process. Essentially, the 88110 will be a turbocharged, single-chip version of the 88100/88200 chip set.

At the 88110 introduction in 1991, Motorola will be providing a complete suite of development tools and support chips including C-compilers, assemblers and application development systems.

Motorola's 88000 architects see the leap in performance expected from the 88110 as but the first phase of an evolution. The third- generation CPU, also in design, will have more execution units, a wider data path, and even greater parallelism. It will be fabricated in BiCMOS and approach speeds of 100 MHz.

Assuming a quadrupling of performance by each new generation, 88000 engines of the late 1990s will be single-chip multiprocessors containing 100 million transistors clocked at 300 MHz. Motorola's engineers see a RISC chip with a throughput exceeding 4,000 MIPS as a distinct possibility by the year 2000.

Motorola also disclosed the development of a line of 88000-based embedded RISC processors. Named the 88300 family, these embedded RISC processors will retain software compatibility with 88000 CPUs and provide integrated single-chip solutions targeted for embedded control applications.

Motorola is one of the world's leading suppliers of electronic equipment, systems, components and services for worldwide markets.

WACO, TEXAS (OCT. 10) PR NEWSWIRE - ASK Corporation (NASDAQ: ASKC) said today that it has moved closer to a decision to re-enter the solar thermal market through its American Solar King Corp. subsidiary.

ASK had previously announced that it was considering reactivating American Solar King Corp. pending a study of market conditions and discussions with various investment advisors.

ASK said continuing price increases in world oil markets, the probability of sustained high oil prices and increased public support for solar and alternative energies have strengthened market potential for solar products.

ASK also said various investment sources have expressed enthusiasm for reactivating solar manufacturing and market operations The company said, however, a complete study has not been finalized and a firm decision has not yet been made.

ASK said it has broken off negotiations with the Sheet Metal Workers' National Pension Fund and another institution regarding a previously announced infusion of capital because, as previously announced, the capital would be primarily used for the acquisition of certain technologies and the equity of another company.

In view of current circumstances, ASK now believes such an investment would not be in its long term best interests.

SAN FRANCISCO, (OCT. 10) PR NEWSWIRE - AT&T (NYSE: T) today announced it has been awarded a contract to provide long-distance services to more than 5,500 room phones and public pay phones at 231 Travelodges across North America.

The contract is valued at approximately $3.4 million. An additional 200 independently owned and operated Travelodges also will have the option to offer AT&T Long Distance Service under the contract terms.

Under the contract, AT&T will provide 24-hour operator services for calling card, person-to-person, billed-to-third number and collect calling service from all guest rooms and public pay phones in participating Travelodge locations.

"We are constantly looking at ways to enhance our guest services," said Bill

Hanly, executive vice president of sales and marketing, Trusthouse Forte Hotels, the company that operates Travelodge. "AT&T Long Distance Service provides our guests the quality they have come to expect from Travelodge."

AT&T currently provides long-distance service at 17 of the 20 largest hotel and motel chains in the country. Travelodge is the 16th largest hotel chain in the United States and also operates more than 100 properties in Canada, Mexico, Puerto Rico and Great Britain. Travelodge is a subsidiary of London-based hotel and catering giant Trusthouse Forte PLC.

AT&T customers calling from hotels, motels, airports and other locations that have not selected AT&T need to dial an access code -- 10+ATT+0 -- and the area code and number they are calling to reach AT&T.

#90283p3449 10/10/1990 ~PR Newswire

FARMINGTON HILLS, MI. (OCT. 10) PR NEWSWIRE - Michigan National Corp. (OTC: MNCO) announced today that it expects to report third- quarter earnings of approximately $8 million after its regularly scheduled board meeting on Oct. 17, 1990.

At the end of the third quarter, it is expected that the equity to asset ratio will be in excess of 6.5 percent, the allowance to non- performing loans will be in excess of 90 percent and the allowance to loan ratio will be in excess of 1.8 percent.

The company continues to focus on maintaining a strong balance sheet. The reduction in earnings from the second quarter is mainly due to an increase in the provision for loan losses of approximately $10 million. The increased provision is a result of an increase in the non-performing assets of the company. Non-performing loans have increased from approximately $132 million at June 30, 1990, to approximately $140 million by Sept. 30, 1990, representing approximately 2 percent of total loans. Net charge-offs for 1989 (exclusive of charge-offs relating to the company's Bankard portfolio, which was sold in July 1989) totaled $37 million. 1990 year-to-date net charge-offs will be approximately $35 million.

This increase in non-performing loans reflects a softening of the national and regional economies over the last several months, particularly in the real estate market. Further softening may cause increases in non-performing loans. As a result, the company is continuing its scrutiny of the commercial and

real estate loan portfolios and is embarking on a loan-by-loan review of significant commercial and real estate relationships. The company will continue to closely monitor these relationships on an ongoing basis.

Michigan National Corp. is a diversified financial services corporation with total assets of $11.6 billion. It is a bank holding and a savings and loan holding company.

Michigan National Corporation's principal subsidiary, Michigan National Bank, has 200 branches throughout Michigan and operates the state's largest automated teller machine network.

Among its other affiliates are: Beverly Hills Federal Savings Bank which operates six branch offices in Southern California; First State Bank and Trust in Port Lavaca and Bay City, Texas; Independence One Mortgage Corporation which originates residential mortgages through 22 offices in nine states; Independence One Capital Management Corp. offers a full spectrum of research-driven advisory services, including fixed income, equities and balanced accounts; Independence One Brokerage Services, Inc. which offers brokerage services for stocks, bonds, mutual funds, unit investment trusts, government securities and other investments; and Independence One Financial Services, Inc., a commercial lender serving small businesses in the Northeast. Michigan National Corporation has its headquarters in Farmington Hills.

COLUMBUS, OH (OCT. 10) PR NEWSWIRE - The trustee for Cardinal Industries told the bankruptcy court here today that he is considering seeking a "financial backer" to provide up to $15 million in a trustee- sponsored reorganization plan. He said he also is considering bank financing to help bring the giant, Columbus-based motel and apartment owner and management company out of Chapter 11 bankruptcy proceedings within a year.

Jay Alix, court-appointed operating trustee for Cardinal, said the equity investor or the lender of what is called "debtor in possession" financing would need to be granted "superior priority" status, under bankruptcy provisions, guaranteeing repayment with interest before any other creditors.

An investor also may receive a percentage share with creditors on the overall recovery by unsecured creditors, he said in his report to U.S. Bankruptcy Judge Barbara Sellers.

The cash infusion would be used to help finance Cardinal's operations before and after it emerges from bankruptcy reorganization next fall, Alix said. The funds would be used during the reorganization to fund part of Cardinal's overall financial requirements, including an estimated $10 million in professional fees, $4 million in partnership plans of reorganization and $1 million in general partnership operation costs.

Alix told the court that generally all of his programs and turnaround teams' efforts have been successful in cutting corporate overhead, raising revenues and surpassing all budgets and targets, except in the area of proceeds from real estate sales due to poor market conditions. Distinguishing the only problem as one of liquidity and not of overall value, Alix said he had many new programs, and work is under way to create liquidity in the company.

The financial projections predict that the company could emerge from bankruptcy with a gross value between $243.5 million and $323.5 million at Sept. 1, 1991, Alix said, and a net value then for the unsecured creditors ranging from $46.5 million to $75.5 million, or 15 cents to 45 cents on the dollar, or more.

Cardinal would be a general partner, property manager and owner of apartment complexes primarily, he said, and would retain ownership or general partner interests in at least 461 unsyndicated and syndicated properties with a potential equity value to Cardinal of $113 million at Sept. 1, 1991.

Cardinal was the nation's largest producer of modular homes before filing May 15, 1989, for reorganization under Chapter 11 of the federal bankruptcy code, and was general partner of more than 800 limited partnerships controlling 1,000 apartment complexes, Knights Inn and Arborgate Inn motels and retirement villages worth more than $2 billion.

ARLINGTON, VA (OCT. 10) PR NEWSWIRE - Two Gannett (NYSE: GCI) editors were named to new positions today.

Anne M. Saul, formerly executive editor at the Pensacola (Fla.) News Journal, becomes news system editor for the Newspaper Division of Gannett Co., Inc.

Curtis Coghlan, who has been executive editor at The Jackson (Tenn.) Sun,

replaces Saul in Pensacola.

Saul, 46, began her newspaper career as a reporter in Pensacola in May 1966. In September 1969 she joined Today in Cocoa, Fla., where she worked through the ranks to become managing editor. In July 1982 she joined USA Today in Arlington as news editor and later was operations editor/cover stories. In April 1986 she was named managing editor/south at Gannett News Service, and she became executive editor in Pensacola in August 1987.

Saul was member of a 1988 Gannett task force that studied the future of technology in newsrooms. In her new position she will join the News Department of the Newspaper Division and will work with Gannett publishers, top editors and systems editors on news systems, electronic photo editing, news-systems training and related systems matters.

Coghlan, 34, has been at The Jackson Sun since April 1987 when he was named managing editor. He became executive editor in May 1988. He had previous reporting and editing experience at Gannett's Jackson (Miss.) Daily News, which since has combined with The Clarion-Ledger.

Last year, under Coghlan's leadership, The Jackson Sun won the award for best newspaper in the under-40,000-circulation category in Best of Gannett competition. The Sun also was rated one of the country's top 14 newspapers under 50,000 circulation in American Society of Newspaper Editors' judging in 1989.

Coghlan's replacement in Jackson will be named shortly. Gannett is a nationwide news and information company that publishes 82 daily newspapers, including USA Today, and USA Weekend, a newspaper magazine. It also operates 10 television stations, 15 radio stations, and the largest outdoor advertising company in North America.

GASTONIA, N.C. (OCT. 10) PR NEWSWIRE - Public Service Company of North Carolina, Inc. (NASDAQ-NMS: PSNC) the Gastonia-based natural gas utility, has announced that its wholly-owned subsidiary, PSNC Propane Corporation, has signed an agreement to acquire the propane gas operating assets of Kenan Oil Company, Inc., (NASDAQ-NMS: KTCO) which is based in Chapel Hill, North Carolina. No terms of the agreement have been announced.

Kenan has been distributing propane gas to customers in its service areas since 1966. Kenan currently serves approximately 4,200 propane gas customers with sales of approximately three million gallons annually. PSNC Propane

Corporation will be utilizing most of Kenan's current propane gas employees, along with other PSNC Propane Corporation personnel, to fulfill these customers' energy requirements and provide them additional services.

Public Service Company's president, Charles E. Ziegler, Jr., states, "We are excited about the strategic addition of Kenan's propane operations in Apex, Chapel Hill, Creedmoor, Durham, Hillsborough, Pittsboro and Roxboro. They will enhance Public Service Company's existing dual capabilities of natural gas and propane gas service in Chatham, Durham, Granville, Orange, Person and Wake counties. Additionally, this acquisition will increase PSNC Propane Corporation's total customers to approximately 14,000 in 33 North Carolina counties."

Owen G. Kenan, president of Kenan Oil Company, states, "Kenan Oil will use the proceeds to focus more on its gasoline, distillates (heating oil) and commercial real estate operations which have been expanding in recent years. This is a very positive strategic move for Kenan Oil which positions us well for the future."

Public Service Company distributes natural gas to approximately 230,000 customers in 87 cities, towns and communities in 26 counties ranging from the Raleigh, Durham and Chapel Hill areas in the northeast; the Concord, Statesville, Gastonia and Forest City areas in the Piedmont; to the Asheville, Hendersonville and Brevard areas in the western part of the state. Public Service Company, through subsidiaries of its wholly owned subsidiary, PSNC Natural Resources Corporation, also participates in oil and gas exploration and production, and retails propane gas.

DALLAS, (OCT. 10) PR NEWSWIRE - Central and South West Corp. (NYSE: CSR) said today that its Central Power and Light Co. unit received a favorable decision Oct. 9 in a rate case covering costs for Unit 1 of the South Texas Project nuclear power plant.

The Texas Public Utility Commission in a 2-1 decision affirmed a stipulated settlement that CPL and the majority of intervenors in the case signed in March 1990. Under that agreement, CPL has been collecting $144 million of interim rates to pay for costs of Unit 1. The PUC's decision makes those rates permanent.

The PUC permitted CPL to include in its rate base all of its investment in Unit 1. The commission also allowed CPL to recognize income due to the deferral of carrying costs to the extent interest charges were incurred for

Unit 1 and Unit 2.

The stipulated agreement calls for CPL to increase rates by a total of $264 million in two steps. CPL has a rate request pending before the PUC for an increase of $120 million on Jan. 1, 1991, to begin recovering its costs for Unit 2 of STP. CPL expects a decision in that case in December.

If the PUC approves the second increase, CPL's retail base rates would be frozen through 1994, barring any specified unusual circumstances. CPL's fuel charges would continue to be adjusted according to commission rules.

Central and South West said it would include the effects of the Unit 1 final order in its third quarter financial results, which it expects to release Oct. 18.

Central and South West Corp., a Dallas-based public utility holding company, owns Central Power and Light Co. and three other electric operating subsidiaries. These companies serve customers in Texas, Oklahoma, Louisiana and Arkansas. Central and South West also owns an Oklahoma intrastate gas pipeline subsidiary and five other companies.

NASSAU, BAHAMAS (OCT. 10) PR NEWSWIRE - British-American Insurance Co. Ltd., Nassau, Bahamas, announces that today it has been informed by the Wilmington Trust Company, Trustee of the McMillen Trust and holder of 65 percent of the outstanding common shares of British-American, that the Trustee had earlier today informed the Delaware Court of Chancery that it would do what it could to delay the payment of a dividend of $3.00 per share on the common stock of British-American, declared by the Directors on October 1, 1990.

British-American was further informed today that the Chancery Court had authorized the Trustee to exercise its rights as a shareholder in connection with its efforts to delay the payment of the dividend on October 12.

The Trustee has requested the Directors to postpone the dividend payment until November 6. The Directors have informed the Trustee that they decline to postpone the dividend payment.

The Trustee has informed the Directors that, more likely than not, it will do what the Chancery Court has authorized, but the Directors have not been informed by the Trustee what course of action, if any, it might pursue.

The Directors fully support the declaration and payment of the dividend and the equitable sharing of corporate profits on a pro-rata and fair basis with all of the company's shareholders, but they are unable to predict whether the Trustee will proceed with its stated intention or whether and to what extent any effort will succeed in delaying the payment of the dividend on Friday, October 12.

#90283p3485 10/10/1990 ~PR Newswire

SAN JOSE, CALIF. (OCT. 10) PR NEWSWIRE - Network Peripherals Inc. today announced two network interface boards that are the first products to bring Fiber Distributed Data Interface (FDDI) technology to personal workstations.

The boards connect an individual workstation or server to an FDDI network, greatly improving transfers for data-intensive applications such as graphics, modeling, computer-aided design and server-to-server communication. The two boards support workstations based on the AT bus architecture and the Extended Industry Standard Architecture (EISA) bus.

The cards represent a breakthrough in FDDI connectivity in two respects. First, they employ a highly integrated, second-generation design that puts the FDDI interface on a single board. In addition, they are the first FDDI adapter cards with extensive support for different operating system environments.

FDDI is an ANSI-standard network design that moves data at 100 megabits per second (Mbs), or 10 times the rate of Ethernet networks. In addition to advantages of greater speed and bandwidth, FDDI also provides improved network-management capabilities, supports very large networks, and allows connections over longer distances.

Network Peripherals' NP-EISA interface card connects an EISA-based workstation or server to an FDDI network. It produces the highest rate of data delivery available on an EISA workstation, by combining FDDI's 100 Mbs speed with EISA's 33 megabyte-per-second burst-mode transfer. The NP-AT card attaches an AT-based workstation to an FDDI network.

The EISA interface card includes software drivers for several network operating systems -- Novell NetWare 386 and NetWare 2.1X, Microsoft LAN Manager 2.0, and Sun Microsystems PC-NFS. The AT card includes all of the above, plus RISC/os from MIPS Computer Systems.

The boards can be used in either of two configurations. One board in a workstation creates a single-attach station (SAS), joining the workstation to an FDDI network through an FDDI concentrator. Two boards create a dual-attach station (DAS), with the workstation connected directly to an FDDI dual ring.

Both cards fully integrate the station management (SMT) functions of the FDDI standard, which improve management of large networks. Network Peripherals has embedded SMT functions in an on-board processor, which improves performance and assures reliability in different operating environments. The boards also include extensive installation and diagnostic tools.

The existing FDDI standard calls for fiber-optic cable as the transmission medium. Network Peripherals is part of a five-company effort -- organized by SynOptics Communications Inc. (NASDAQ: SNPX) -- to also put FDDI on shielded

twisted-pair wire, which is lower cost and more widely installed than fiber-optic cable.

The AT interface card is $3,495 and available now. The EISA card is $3,995 and will be available in December 1990.

Network Peripherals Inc. (NPI) is a one-year-old company whose mission is to develop, market and support high-performance connectivity products that enhance the productivity of personal workstation users.

#90283p3486 10/10/1990 ~PR Newswire

SAN RAFAEL, CA (OCT. 10) PR NEWSWIRE - The Software Toolwork (NASDAQ: TWRX) announced today that in light of the current economic environment, combined with the oversupply and severe price pressures on many Nintendo titles, it has established significant reserves to reflect price protection adjustments to past sales and potential product returns from three distributors.

The company said that price adjustments for prior sales will be necessary to facilitate discounting by the retailers and that one-time returns of slow-moving titles from these three distributors may be accepted for redistribution through the retail channel. The company added that results for the second fiscal quarter ended Sept. 30, 1990, were also adversely affected by delays in the delivery of certain new Nintendo titles from Nintendo of Japan. Accordingly, the company expects to report a loss for the quarter ended Sept. 30, 1990.

"The uncertain state of the economy is impacting our consumer products business," said Leslie Crane, chairman and chief executive officer. "It is now clear to us that retailers have reduced their estimates of consumer spending this Christmas season, which is typically our strongest period. Recent world events, combined with fears about the economy in general, have created an uncertainty reflected in the buying patterns of certain retailers as they prepare for the holiday period."

The company further stated that it believes its operating results for the Dec. 31, 1990, quarter and its full fiscal year ending March 31, 1991, will fall significantly below the published forecasts of financial analysts. "While retailers are enthusiastic about our new product, The Miracle Piano Teaching System, they are ordering conservatively to test consumer acceptance as the holidays approach," said Crane. He also indicated that sales have been affected by delays in the delivery of the Nintendo Miracle cartridges from Japan and the product is now expected to begin shipping by mid to late November rather than the previously anticipated late October target. Crane

stated, "Due to these factors we currently expect to sell less than the previously estimated 60,000 to 100,000 units. Meanwhile, our long-term commitment to this product requires significant expenditures. While we firmly believe these expenses are essential to the success of The Miracle, the anticipated shortfall in sales will contribute to disappointing results this year."

"Visibility in this environment is limited, so investors must not rely upon previous forecasts or projections," said Crane. "The actions we have taken are a necessary response to this disappointing retail environment. These measures should ultimately strengthen our balance sheet and in turn support the growth of each of our business segments." Crane added, "We remain optimistic about the fundamentals of our company and its product lines. We are pleased with the results of our OEM, PC disk-based and CD ROM software business segments. Our financial condition remains solid, with cash and equivalents of approximately $30 million at Sept. 30, 1990. We believe we are well-positioned for the long term."

LOUISVILLE, KY. (OCT. 10) PR NEWSWIRE - Liberty National Bancorp, Inc. (NASDAQ-NMS: LNBC) announced today net income of $23.6 million for the first nine months of 1990 and $6.5 million for the third quarter of 1990.

For the first nine months in 1990, net income was $23.6 million, compared to $23.8 million for the same period in 1989. Fully diluted net income per share for the first nine months of 1990 decreased 6.6 percent to $1.97, compared to $2.11 in 1989. Primary net income per share for the first nine months of 1990 decreased 7.7 percent to $2.05 from $2.22 for the same period in 1989.

Net income for the third quarter was $6.5 million, compared to $8.0 million for the same period in 1989. Fully diluted net income per share in the third quarter decreased 22.5 percent to $0.55 versus $0.71 reported for the same period of 1989. Primary net income per share for the third quarter of 1990 decreased 25.3 percent to $0.56 from $0.75.

Commenting on the earnings performance, Chairman Joseph W. Phelps stated, "We anticipated a larger than usual third quarter provision for loan losses in our August 1, 1990 announcement. While the $7.8 million third quarter provision for loan losses had an adverse effect on our earnings performance, we continue to support this conservative posture which should minimize the possibility of encountering the unexpected difficulties that other banks have recently reported in uncertain economic times. Liberty's return on assets was 0.89 percent and return on equity was 12.17 percent for the first nine months of

1990."

As of September 30, 1990, Liberty's total assets were $3.6 billion, which represents a $368 million, or 11.5 percent, increase over the same date in 1989. Stockholders' equity was $268.9 million as of September 30, 1990, an increase of $33.9 million, or 14.4 percent, over the $235 million reported as of September 30, 1989.

CLEVELAND (OCT. 10) PR NEWSWIRE - Mayor Michael R. White today chastised ABC Entertainment for its commercial promoting the series Coach in which Cleveland was made the brunt of a joke.

The spot, aired at halftime during the Oct. 8 Monday Night Football game between the Cleveland Browns and the Denver Broncos, featured Jerry Van Dyke quipping about the matchup, "I think the problem with Cleveland is, even if you win you lose. You still got to go home to Cleveland."

In response, White wrote to ABC Entertainment President Robert A. Iger expressing his anger over the network's insensitivity in running the egregious commercial. "Any comedian or comedy show that uses Cleveland as the punchline for a joke has never visited our city and is relying on what has been for years the crutch of feeble comedians," the mayor wrote.

White has asked Iger for a formal, national apology. Ideally, he would like the apology aired during the Oct. 22 Monday Night Football game in which the Browns play the Cincinnati Bengals.

ELGIN, ILL. (OCT. 10) PR NEWSWIRE - William H. Murphy, president of Katy Industries, Inc. (NYSE: KT), today announced that litigation has been filed against one of its subsidiaries relating to the subsidiary's operation of a waste-to-energy facility in Davis County, Utah. The lawsuit, which was filed by the Special Service District which owns the facility, alleges contractual breaches and fraudulent conduct by the unit and seeks termination of a long-term operating contract as well as compensatory and punitive damages. The company's counsel is conducting an investigation into the allegations.

Last year the Katy subsidiary which constructed the facility filed a multimillion-dollar lawsuit against the same district, alleging that the district had defaulted in its obligations to make full payment for construction of the waste-to-energy facility. The lawsuit is presently pending.

Katy Industries, Inc., with consolidated sales approaching $200 million, is a major diversified corporation with interests in consumer products, industrial machinery, industrial components, energy resources and equity investments. Katy common and preferred shares (Class B) are listed on the New York Stock Exchange.

#90283p3501 10/10/1990 ~PR Newswire

RESEARCH TRIANGLE PARK, N.C. (OCT. 10) PR NEWSWIRE - Glaxo Inc. will assume sole responsibility within Glaxo's worldwide operations for research into new medicines to treat cancer, inflammatory diseases, and metabolic disorders, the pharmaceutical company announced today.

The shift in the strategic focus of Glaxo's global research effort means that research programs in these areas currently under way in other Glaxo companies around the world will be transferred to the United States.

At the same time, Glaxo Inc.'s research programs in cardiovascular disease will be transferred to Glaxo scientists in the United Kingdom, home of Glaxo Inc.'s parent company, Glaxo Holdings p.l.c. (NYSE: GLX).

Charles A. Sanders, M.D., Glaxo Inc. chief executive officer, said the realignment would take advantage of the research strengths in both the United States and the United Kingdom.

Strong programs in respiratory and central nervous system disorders that are in place in the United Kingdom will be enhanced by the addition of programs centering on cardiovascular disease, Sanders said.

Glaxo Inc., meanwhile is better positioned to take advantage of rapid advances in the United States in the areas of molecular biology and biotechnology, he added. Each field is important to the study of cancer, inflammatory diseases like arthritis and such metabolic disorders as diabetes, osteoprosis and obesity.

"We think this is a significant opportunity for Glaxo Inc. to put in place a

first-class research function in therapeutic areas of critical importance to vast numbers of patients," Sanders said. "This represents another step in bringing our still-young R&D function to full maturity."

The new Glaxo Inc. Research Institute, created last week, provided the opportunity to refine the U.S. research and development operation, Sanders said. The institute will be temporarily headed by Dr. Richard B. Sykes, who will retain his responsibilities as director of worldwide R&D for Glaxo.

The announcement comes as Glaxo Inc. is preparing to dedicate its 1.5-million-squarefoot R&D facility in Research Triangle Park on October 18. Sanders said that both the new 10-building, $350 million complex and the redefined U.S. research effort were symbolic of Glaxo's global commitment to discovering and developing important new medicines.

Glaxo Inc. manufactures and markets prescription medicines, including those for the treatment of gastrointestinal disorders, respiratory ailments, cardiovascular diseases, infectious diseases and diseases of the skin.

DETROIT (OCT. 11) PR NEWSWIRE - General Motors Corporation (NYSE: GM) and the International Union of Electronic Workers (IUE) today reached tentative agreement on a new three-year national labor contract.

In announcing the tentative agreement, Alfred S. Warren Jr., vice president of the GM Industrial Relations Staff praised the dedication and the resourcefulness of the IUE main bargaining team.

"For these past three months, bargainers from both the company and the IUE have had to face a number of difficult and complex issues," Warren said. "However, the dedication and efforts of everyone at the bargaining table has resulted in an agreement which serves the best interests of both the corporation and the GM employees represented by the IUE," he said.

While details of the tentative pact will not be made public pending ratification, Warren said the new agreement provided for improvements of an already excellent wage and benefit package as well as increased job and income security. At the same time, he said the tentative agreement also provided sufficient flexibility to allow the corporation to make substantial gains in quality, productivity, and competitiveness.

The tentative agreement was reached at approximately 8:30 p.m. EDT, just three-and-one-half-hours before an extension of the current agreement was set to expire. GM and the IUE had agreed to extend the current pact from its

original expiration date of Sept. 14, 1990, to allow bargainers to continue to negotiate both national and local supplemental agreements. Bargaining between the two organizations formally began on July 19, 1990.

The IUE represents more than 22,000 GM hourly workers at plants in Warren, Dayton, Kettering, and Moraine, all in Ohio; Rochester, N.Y.; New Brunswick, N.J.; and Clinton and Brookhaven, Miss.

#90283t3263 10/10/1990 ~ts
MOSCOW (OCT. 10) TASS -

THE SOVIET PARLIAMENT IS TODAY DISCUSSING THE FIRST READING OF A BILL ON EMPLOYMENT.

THE DOCUMENT DETERMINES THE LEGAL, ECONOMIC AND ORGANISATIONAL FOUNDATIONS OF EMPLOYMENT IN CONDITIONS OF A REGULATED MARKET ECONOMY.

PRESENTING THE BILL, CHAIRMAN OF THE SOVIET STATE COMMITTEE FOR LABOUR AND SOCIAL ISSUES VLADIMIR SHCHERBAKOV NOTED THAT THE BILL SECURES THE "EXCLUSIVE RIGHT OF A PERSON TO COMMAND HIS ABILITY FOR WORK AND DOES AWAY WITH THE ADMINISTRATIVE COMPULSION FOR WORK".

HE SAID THE LABOUR MARKET GIVES ADVANTAGES TO THOSE WHO HAVE HIGHER AND MORE VERSATILE QUALIFICATIONS AND ARE NOTABLE FOR THEIR DILIGENCE, HONESTY AND HARD WORK.

SHCHERFAKOV SAID THE BILL ENVISAGES THE CREATION OF A RAMIFIED STATE EMPLOYMENT SYSTEM WHICH WILL SEARCH FOR JOBS, ANALYSE THE LABOUR MARKET, FORECAST THE DEVELOPMENT OF THE JOB SYSTEM, DEAL WITH VOCATIONAL GUIDANCE, TRAIN AND RETRAIN PEOPLE AND EMPLOY THEM.

THE BILL WAS WORKED OUT BY THE GOVERNMENT TOGETHER WITH THE COUNTRY'S CENTRAL TRADE UNION COUNCIL, BUT THEY FAILED TO AGREE ON A NUMBER OF ISSUES. THE MAIN DIFFERENCE LIES IN THE SIZE OF UNEMPLOYMENT ALLOWANCES. THE GOVERNMENT SUGGESTS THAT THE MINIMUM ALLOWANCE AMOUNT TO 80 ROUBLES A MONTH, WITH UNION REPUBLICS EMPOWERED TO INCREASE THEM IN ACCORDANCE WITH A PERSON'S LENGTH OF SERVICE.

THE CENTRAL TRADE UNION COUNCIL INSISTS ON THE INTRODUCTION OF A SCALE, ACCORDING TO WHICH THE ALLOWANCE IS CUT DEPENDING ON LENGTH O UNEMPLOYMENT. ACCORDING TO THE COUNCIL, IN THE FIRST FOUR MONTHS THE ALLOWANCE SHOULD AMOUNT TO 70 PER CENT OF A PERSON'S AVERAGE WAGES, IN THE NEXT FOUR MONTHS - 60 PERCENT AND IN THE FOLLOWING SIX MONTHS - 40 PERCENT. BOTH THE GOVERNMENT AND THE COUNCIL PROPOSE THAT THE ALLOWANCE BE PAID FOR A YEAR.

SHCHERBAKOV FAVOURED THE GOVERNMENT'S PLAN, SAYING THAT HIGH ALLOWANCES, PROPOSED BY TRADE UNIONS, MIGHT LEAD TO SOCIAL PARASITIC ATTITUDE.

CHAIRMAN OF THE PARLIAMENT'S COMMISSION FOR LABOUR, PRICES AND SOCIAL POLICY NIKOLAI GRITSENKO DISAGREED. HE SAID THE REGRESSIVE SCALE PROPOSED BY THE TRADE UNIONS TAKES FULLER ACCOUNT OF A PERSON'S LABOUR CONTRIBUTION, AND WILL BECOME A SERIOUS INCENTIVE FOR AN ACTIVE SEARCH FOR WORK, IT WILL ALLOW THE CREATION OF A COMMON MECHANISM FOR ALLOWANCES IN ALL UNION REPUBLICS, WHICH IS IMPORTANT FOR THE FORMATION OF A COMMON LABOUR MARKET, HE SAID.

AFTER THE GOVERNMENT AND PARLIAMENTARY COMMISSIONS DELIVERED THEIR REPORTS, PARLIAMENT BEGAN A DISCUSSION OF THE DOCUMENT, WHICH IS EXPECTED TO LAST UNTIL THE END OF TODAY'S SITTING.

MOSCOW (OCT. 10) TASS -

MCDONALD'S PRESIDENT GEORGE COHON, VISITING MOSCOW FOR TALKS TO OPEN NEW FAST FOOD RESTAURANTS HERE, HAS DECIDED TO CHANGE A BUSINESSMAN'S SUIT FOR JEANS, A WARM QUILTED JACKET AND RUBBER BOOTS.

COHON TODAY LEAVES FOR A STATE FARM NEAR MOSCOW, WHICH HAS GROWN A GOOD HARVEST OF DUTCH RUSSET BAIRBANKS POTATOES, THE TYPE USED BY THE SOVIET-CANADIAN MOSCOW-MCDONALD'S JOINT ENTERPRISE TO COOK THEIR FAMOUS FRENCH FRIES.

HE TOLD TASS THAT BEFORE THE VISIT HE HAD HEARD ABOUT UNFAVOURABLE WEATHER CONDITIONS IN MOSCOW REGION AND DIFFICULTIES WITH GATHERING IN POTATOES.

"I SAID TO MYSELF: I AM COMING OVER HERE, I HAVE SOME MEETINGS, BUT I WILL SPEND MOST OF THE AFTERNOON IN THE FIELDS. SO WHAT BETTER THING FOR ME TO DO THAN GO AND PICK POTATOES?", HE SAID, NOTING THAT HE BELIEVED THAT IT IS VERY IMPORTANT FOR THE VENTURE'S EMPLOYEES TO SEE HIM TOGETHER WITH THEM IN THE FIELD.

"I'VE NEVER PICKED POTATOES. I AM COMPLETELY INEXPERIENCED. IN THE WESTERN PRESS THERE HAS BEEN TREMENDOUS COVERAGE OF THE POTATO PROBLEM. THEY ARE TALKING ABOUT HEAVY RAINS IN THE MOSCOW AREA, ABOUT PEOPLE PICKING POTATOES. I UNDERSTAND, THE FIELD IS WET, THE EQUIPMENT IS GETTING BOGGED DOWN. SO YOU JUST HAVE TO DIG AND PICK", HE SAID.

KIEV (OCT. 10) TASS -

AFTER TWO DAYS OF HEATED DEBATES, THE UKRAINIAN PARLIAMENT ADOPTED A RESOLUTION ON REPUBLICAN CITIZENS' MILITARY SERVICE.

THE RESOLUTION ENVISAGES THAT, BEGINNING IN AUTUMN 1990, DRAFTEES WILL BE SENT MAINLY TO ARMY UNITS SITUATED IN THE REPUBLIC.

AN EXCEPTION HAS BEEN MADE ONLY FOR THOSE DRAFTED THIS AUTUMN AND NEXT SPRING TO THE PARTS OF THE SOVIET ARMY AND NAVY ENSURING STRATEGIC DEFENCE IN THE REPUBLIC'S INTERESTS. QUOTAS FOR SUCH DRAFTS HAVE BEEN DETERMINED BY THE REPUBLICAN GOVERNMENT.

CITIZENS OF THE REPUBLIC WILL ALSO BE SENT BEYOND ITS BORDERS TO GET SPECIALIST MILITARY TRAINING, ON CONDITION THAT THEY WILL RETURN TO THE REPUBLIC. THE RESOLUTION DOES NOT FORBID CITIZENS FROM SERVING IN OTHER REPUBLICS ON A VOLUNTARY BASIS.

THE PARLIAMENT DECIDED TO BAN THE USE OF UKRAINIAN CITIZENS SERVING IN THE ARMY TO RESOLVE INTERETHNIC AND OTHER CONFLICTS BEYOND THE REPUBLIC'S BORDERS WITHOUT THE APPROVAL OF THE UKRAINIAN PARLIAMENT. THE RESOLUTION INSTRUCTS THE REPUBLICAN GOVERNMENT TO ENSURE THE RETURN BETWEEN OCTOBER-NOVEMBER OF ALL CITIZENS SERVING IN SUCH UNITS AND MILITARY BUILDING DETACHMENTS.

THE PARLIAMENT APPROVED A NUMBER OF CASES WHEN PERSONS MIGHT BE EXEMPTED FROM MILITARY SERVICE, WHICH HAD NOT BEEN NAMED IN THE LEGISLATION, INCLUDING THOSE WHOSE FAMILIES HAVE MEMBERS WHO WERE KILLED OR BECAME INVALIDS WHILE PERFORMING MILITARY SERVICE.

THE PARLIAMENT DECIDED TO INTRODUCE STATE INSURANCE OF THE HEALTH AND LIFE OF CITIZENS SERVING IN THE ARMY AND INSTITUTE COMPENSATION IN CASE OF PHYSICAL OR PSYCHOLOGICAL INJURIES. THE REPUBLICAN GOVERNMENT HAS BEEN INSTRUCTED TO SUBMIT PROPOSALS CONCERNING THE ESTABLISHMENT OF ALTERNATIVE SERVICE IN THE REPUBLIC BY MAY 1, 1991.

THE PARLIAMENT CONSIDERED IT NECESSARY TO SET UP A STANDING PARLIAMENTARY COMMISSION ON OUTER AND HOME SECURITY AND A PLENIPOTENTIARY DELEGATION TO HOLD CONSULTATIONS WITH THE SOVIET PARLIAMENT, THE UKRAINIAN GOVERNMENT AND THE SOVIET DEFENCE MINISTRY.

MOSCOW OCTOBER 10 TASS - PRESIDENT MIKHAIL GORBACHEV MET JOHN PHELAN, CHAIRMAN OF THE NEW YORK STOCK EXCHANGE, AND THE HEADS OF LEADING U.S. FINANCIAL COMPANIES IN THE KREMLIN TODAY.

THE AMERICAN FINANCIERS ARE IN MOSCOW FOR A SOVIET-U.S. SEMINAR ON STOCK EXCHANGES AND THEIR ROLE IN FINANCIAL MARKETS.

AS THE VISITORS SHOWED A KEEN INTEREST IN THE SITUATION IN THE COUNTRY, GORBACHEV BRIEFED THEM IN DETAIL ON MEASURES TO STABILISE THE ECONOMY, CITING IT AS THE GREATEST CHALLENGE. HE SAID THE TIME HAS COME FOR DECISIVE ACTION ON THIS FRONT.

GORBACHEV SAID ACHIEVING ORDER IN FINANCIAL AFFAIRS, STABILISING THE ROUBLE AND MAKING IT CONVERTIBLE IN THE NOT SO DISTANT FUTURE ARE OTHER CRUCIAL TASKS.

THE FINANCIAL POSSIBILITIES OF WESTERN PARTNERS COULD PLAY A USEFUL ROLE IN STABILISING THE SOVIET ECONOMY. THERE SEEMS TO BE A DEGREE OF UNDERSTANDING ON THIS SCORE, WHICH OUGHT TO BE TRANSLATED INTO SPECIFIC ACCORDS WITH DUE REGARD FOR THE FACT THAT MAJOR DEALS ARE BEING PLANNED, INCLUDING THOSE IN THE OIL AND GAS INDUSTRIES AND AIRCRAFT-BUILDING, GORBACHEV SAID.

PHELAN, SPEAKING ON BEHALF OF THE ENTIRE DELEGATION, SAID THE U.S. BUSINESS COMMUNITY IS VERY IMPRESSED BY PLANNED AND CURRENT SOVIET ECONOMIC REFORMS. HE EXPRESSED SUPPORT FOR EFFORTS TO SWITCH THE COUNTRY TO A MARKET SYSTEM.

BOTH SIDES EXPRESSED HOPE AT THE END OF THE MEETING FOR MUTUALLY BENEFICIAL COOPERATION BETWEEN SOVIET AND U.S. FINANCIAL QUARTERS, FOR WHICH, IT WAS NOTED, FAVOURABLE OPPORTUNITIES ARE OPENING UP.

(OCT. 10) UPI - President Bush apparently is sticking by his promise NOT to hold grudges against Republicans who helped kill an administration-backed deficit-reduction budget last week. He will hit the campaign trail Wednesday to stump for Southern Republicans... including North Carolina Senator Jesse Helms, who opposed the budget plan. The three-term G-O-P senator is fighting for his political survival.

Another evacuation of Americans from Iraq is scheduled. The State Department says a U-S-chartered 747 jetliner will leave Wednesday for the Iraqi port city of Basra to pick up an estimated 400 U-S citizens and their foreign-born family members. The flight will fly to London and then on to North Carolina Thursday.

Newly uncovered evidence reportedly links Libya to the December 1988 terrorist bombing of Pan Am Flight 103. A published report says government investigators now believe Libyan intelligence agents may have put together and planted the bomb that destroyed the plane in the skies over Scotland. They think the agents were paid by a Syrian-sponsored terrorist group after the group's leader realized Western intelligence had penetrated his operation.

The shuttle Discovery is scheduled to return to Earth Wednesday. The landing at California's Edwards Air Force Base will end a mission highlighted by the successful deployment of the Ulysses solar probe. Unlike recent flights that have ended on dry lakebed landing strips, the astronauts plan to land on a concrete runway. It will be a test of Discovery's new carbon brakes- a post-Challenger safety improvement.

-30- 1755

#90283u0190 10/10/1990 ~United Press International

NEW YORK (OCT. 10) UPI - New evidence in the terrorist bombing of Pan Am Flight 103 in December 1988 shows for the first time that Libyan intelligence agents may have built and planted the bomb that destroyed the plane, The New York Times reported Wednesday.

The new evidence was revealed this week by government investigators involved in the inquiry, The Times said.

The two-year investigation of the bombing over Lockerbie, Scotland, has focused on evidence that Iran hired a Syrian-sponsored terrorist group, the Popular Front for the Liberation of Palestine-General Command, to bomb an American airliner in late 1988, the paper said.

The accepted theory had been that a cell of the Popular Front based in West Germany assembled the bomb and smuggled it onto the aircraft.

United States officials, who spoke on condition of anonymity, stressed that the newly discovered evidence does not clear Iran, Syria or the Popular Front from complicity in the Pan Am disaster, The Times said.

The officials said they still believe that Iran commissioned the attack in revenge for the accidental downing of an Iranian passenger jet in 1988 by a United States Navy warship in the Persian Gulf and that Syrian authorities were aware of the Popular Front's activities and took no action to stop them, it said.

But, they said, investigators now believe that the Popular Front's leader, Ahmed Jabril, who is based in Damascus, paid agents of the Libyan leader, Col. Moammar Gadhafi, to carry out the bombing when he found out in October 1988 that Western intelligence agents had penetrated his operations.

The evidence of a possible Libyan link, first reported publically this week by the French news magazine L'Express, was confirmed and detailed by American officials involved in the inquiry of the Pan Am bombing.

The Boeing 747 jet was blown apart by a plastic explosive concealed in a audio cassette player on Dec. 21, as it flew 31,000 feet over Scotland. The blast

killed all 259 people on the plane, including 188 Americans, and 11 other people in the village of Lockerbie below.

#90283u0196 10/10/1990 ~United Press International

BANGKOK, Thailand (OCT. 10) UPI - Authorities in Vietnam's largest city have arrested hundreds of gangsters, prostitutes, drug dealers, and forgers in a crackdown on crime, official radio reported.

The radio said the monthlong anti-crime drive broke up 125 criminal gangs, and ''wiped out nearly 200 nests of drug addicts, brothels, and gambling dens, detaining 118 vice den operators.''

The report broadcast on Sunday and translated Wednesday confirmed impressions that Ho Chi Minh City, formerly Saigon, has seen a resurgence in petty crime and vice since the government began liberalizing the economy to allow more private business and foreign investment three years ago.

It said police broke up hundreds of illegal film shows and illegal video-cassette dubbing operations.

They also arrested members of a counterfeiting ring producing 2,000- dong banknotes, the broadcast said.

The counterfeiting operation, however, could not have been very profitable, since inflation has dropped the value of the 2,000-dong notes to the equivalent of about 30 cents each.

(OCT. 10) UPI - Around the world... around the clock... news from United Press International:

.

The shuttle Discovery astronauts awakened to country music this morning for their trip back to Earth. ''The Highway Man'' was the tune that mission control in Houston played. One astronaut radioed back- ''We like both kinds of music- country and western.'' The shuttle is to return to Earth at Edwards Air Force Base in California this morning.

The five permanent U-N Security Council members, including the United States, have agreed on a resolution condemning the violence in Israel that has killed at least 21 Palestinians. Yesterday, Iraqi President Saddam Hussein warned Israel to leave Arab lands or face vengeance because of the violence. He said Iraq has a missile that can strike from hundreds of miles away.

The Press Trust of India says at least 47 people were killed in a train fire set by leftist radicals last night in south India. About 15 radicals boarded a passenger train, locked doors in one car, poured gasoline and set it on fire. Before setting the fire, the leftists sang revolutionary songs.

New evidence links Libyan intelligence agents with the terrorist bombing of a Pan Am plane in December 1988 that killed 270 people. A New York newspaper

says government investigators believe the Libyans may have built the bomb and and planted it on the plane.

President Bush flies to Raleigh, North Carolina, today to campaign for Senator Jesse Helms. Helms opposed the budget plan the administration backed. But Bush is using his prestige to help him win a fourth term. An opinion poll shows the race between Helms and Democrat Harvey Gantt is too close to call.

-30- 1857

#90283u0257 10/10/1990 ~United Press International

(OCT. 10) UPI - President Bush did an about-face yesterday on the issue of raising taxes for the rich. In the morning, he said he would consider a higher income tax rate for wealthy Americans if capital gains taxes are reduced. Later, Republican senators said Bush would NOT get that. Bush's reply was- ''Then forget it.''

U-A-L Corporation's directors have terminated a merger agreement which would have made the airline-holding firm the world's largest employee-owned company. A spokesman said the United Airlines employees failed to arrange financing. The company said the group reduced the four-BILLION-dollar offer the board accepted in April.

Stocks took a big plunge yesterday because of higher oil prices and interest rates. The Dow Jones industrial fell more than three percent. They were down 78 points in their second biggest drop of the year. Over- the-the-counter stocks were hurt worse. Oil prices hit a record high because of Iraq's threat against Israel.

The Soviet central bank says the ruble will be devalued more than three-fold in some foreign trade on January 1st. That means a ruble will cost about 50 cents, instead of about one dollar 50 cents, as it now is. The change will let Soviet enterprises deal with foreign firms instead of dealing through a central ministry.

Composer-conductor Leonard Bernstein is virtually retiring from public life because of illness. His spokeswoman says Bernstein's doctor has told him to give up conducting and performing at the piano. Bernstein has been suffering from emphysema. He is 72 and was a heavy smoker for many years.

-30- 1761

#90283u0274 10/10/1990 ~United Press International

(OCT. 10) UPI - In only his third game with the St. Louis Blues, Geoff Courtnall scored two goals and showed his teammates he could accomplish a few other objectives.

Courtnall, traded to St. Louis from Washington during the offseason, scored

twice Tuesday night, including the game-winning goal with 5:18 remaining, lifting the Blues to a 4-3 victory over the Pittsburgh Penguins.

''When you come to a new team, you want to do the job,'' Courtnall said. ''I want to work hard and fit in. The important thing is that we win.''

The Blues, 2-1, recorded their second victory by again scoring the winning goal in the last period. St. Louis beat Minnesota in its season opener with a third-period goal.

''We knew we could do it in the third period after they tied us,'' Courtnall said. ''We'd done it in the opener and we felt good about it tonight.

''After Saturday (losing to Chicago), we wanted to get a win in our building. We were fired up.''

With the score tied 3-3, Courtnall took a pass from Adam Oates and lifted the puck into the net to give St. Louis a 4-3 edge. Penguins defenseman Paul Stanton left Courtnall alone.

''He (Stanton) charged me but I saw Courtnall,'' Oates said. ''He deflected it in. It was kind of a lucky goal.''

Pittsburgh Coach Bob Johnson said he was not angry with Stanton.

''It's a game of mistakes,'' Johnson said about Stanton missing his assignment. ''You try to eliminate as many as possible. Hey, Bobby Orr made some mistakes.''

Oates had three assists and Brett Hull added two power-play goals for the Blues. Pittsburgh dropped to 2-1.

''To win like this one, our first win at home, that's a big win,'' St. Louis Coach Brian Sutter said. ''We know they could come back somehow. It was going for them tonight.''

Elsewhere in the NHL, New Jersey beat Minnesota 5-2 and Los Angeles pounded Vancouver 6-2.

-- AROUND THE NHL --

Devils 5, North Stars 2

At East Rutherford, N.J., Kirk Muller scored a goal and added two assists and New Jersey tallied on its first three power-play opportunities. Muller scored the first goal and assisted on the second and third to help the Devils earn their second victory of the season. Minnesota dropped its second decision in two nights, after losing Monday to the New York Rangers.

Kings 6, Canucks 2

At Vancouver, British Columbia, Bob Kudelski scored the game-winning goal at 1:23 of the second period and five Kings added two points each. The victory gave the Kings a measure of revenge after the Canucks crowned them 6-3 last Saturday night in Los Angeles.

#90283u0313 10/10/1990 ~United Press International

DURBAN, South Africa (OCT. 10) UPI - Unidentified gunmen armed with automatic weapons ambushed a passenger bus on the outskirts of the port city of Durban, killing at least six people and wounding 27 others, police said Wednesday.

A police spokesman said all 33 people aboard the bus, including the driver, were wounded in the attack, which occurred around 11 p.m. Tuesday as the bus headed north out of the Indian Ocean port city toward the town of Inanda. All the victims were black.

Motive for the attack was unknown and no arrests were made, Durban police spokesman Lt. Bala Naidoo said. He said the gunmen, armed with locally manufactured automatic weapons and AK-47s, opened fire from a stationary vehicle off the road.

Naidoo said it was unclear whether the attack was linked to the protracted conflict between supporters of the African National Congress and the rival Zulu movement Inkatha, which has left some 4,000 dead in Natal province since 1987.

The passengers were identifed as workers.

''Every passenger in the bus was struck by a bullet,'' said Naidoo. ''We subsequently counted 23 bullet holes in the bus and 16 smashed windows.''

It was the second violent incident in the city Tuesday, following by more than 12 hours a mob attack on white pedestrians in the city center in which at least eight white passersby and two of the assailants were wounded.

Police sources quoted by the Johannesburg daily Citizen Wednesday identified the leader of the mob attack as Jequ Ngcobo, a 26-year-old man believed to be a religious crank and mentally disturbed.

The report said Ngcobo was ''well-known'' on Durban's beach front and believed he was ''the Son of God.''

Ngcobo recruited 20 members for the attack Monday night and held an all-night vigil on a Durban beach before looting a gift shop and arming the gang with knives, the Citizen said. He then led the gang outside and began stabbing white pedestrians indiscriminantly.

Two of the gang members, including Ngcobo, were shot and wounded by police. At least eight members were arrested.

Amid reports that some of the attackers wore t-shirts of the radical black Pan Africanist Congress, both officials of the PAC and the African National Congress denied any involvement in the incident.

ANC spokesman Patrick Lekota blamed the ''bloody orgy'' on ''rented criminals.''

(OCT. 10) UPI - Rain and high winds drenched South Florida as Tropical Storm Klaus fell apart Wednesday sending floodwaters onto the Keys, while Texas shivered in record cold temperatures and wet weather hit the Midwest.

A large area of rain that included strong showers covered Dade and Broward counties and winds topping 30 mph and frequent lightning strikes were reported over the region. To the north, rain soaked the area around Vero Beach.

A large low pressure system gathered steam over the Florida Keys and strong winds pushed seaweed and a small amount of seawater onto a road near the airport in Key West. Flood watches and warnings were in effect for all of the Keys.

Western Texas cooled down to a record low temperature early Wednesday, reaching 42 degrees at Midland International Airport, breaking by 1 degree a mark set two years ago. The temperature was expected to drop as low as 34 degrees before sunrise.

A flood watch was in effect for northern Indiana, where showers have pelted the region since Monday, dropping as much as 2 1/2 inches of rain over the region since the showers began.

Warm weather helped create fog in the Northeast, where 70-degree temperatures were reported during the night. The heatwave that brought summer back to the region during the first half of the week was expected to continue.

Cooler weather greeted residents of Southern California as light breezes moved across the area. To the north, a snow advisory was issued for the Cascade Mountains in Washington state.

Rain and cool temperatures covered the Midwest.

(OCT. 10) UPI -

WASHINGTON - Two U.S. servicemen were killed Wednesday when their F- 111 fighter bomber crashed in the southern Arabian peninsula during a training mission, the Pentagon said. The plane was assigned to the 48th Tactical Wing of the RAF, Lakenheath, England, and was deployed in support of Operation Desert Shield. The names of the pilot and the crewmember were being withheld pending notification of next of kin.

CAIRO, Egypt - A senior Palestinian guerrilla leader says Saddam Hussein wants the Persian Gulf crisis resolved peacefully, provided the world links the solution to Israel's withdrawal from occupied Palestinian lands. Naiyef Hawatmeh, leader of the radical Popular Democratic Front for the Liberation of Palestine, said Saddam ''wants the crisis to be solved by peaceful means, if an international consensus was reached on a formula to be presented to the U.N. Security Council.''

CAIRO, Egypt - Baghdad Radio quoted Iraq's Saddam Hussein as saying Iraq had developed a rocket that could strike targets several hundred miles away. Following the disclosure about the rocket and the threat against Israel, world oil prices soared to record highs. ''The Al Hijara missile, which the Iraqis have manufactured with God's help, can be launched from somewhere in Iraq (and) can reach the evil targets,'' Baghdad Radio said.

WASHINGTON - A U.S.-chartered 747 was scheduled to leave Wednesday for Basra, Iraq, to pick up an estimated 400 American citizens and their foreign-born family members. The plane will fly to London and then to Raleigh-Durham, N.C., Thursday.

EDWARDS AIR FORCE BASE, Calif. - The five astronauts returning to Earth on the space shuttle Discovery received a greeting Wednesday from U.S. forces in the Middle East in a packet of instructions and messages faxed to the spaceship from mission control. ''From the sands and sea of the Persian Gulf, the soldiers, airmen, sailors and marines with Operation Desert Shield extend best wishes to the crew of the shuttle Discovery,'' it said. ''Yours has been a most successful space mission in the continuing search for answers to make the world a safer and better place to live.''

#90283u0408 10/10/1990 ~United Press International
JERUSALEM (OCT. 10) UPI - Prime Minister Yitzhak Shamir has agreed to the

police minister's request for an independent investigation of the slaying of 21 Palestinians by Israeli forces in Jerusalem, while Palestinians continued widespread general strikes Wednesday.

A Jerusalem magistrates' court also discussed Wednesday whether to extend the detention of leading East Jerusalem Palestinian Faisal Husseini and 25 prominent Moslem religious leaders and Palestinians who were detained after the violence on suspicion of inciting Monday's violence.

Conflicting information continued to prevail on how the violence began Monday in Jerusalem's walled Old City and whether stone-throwing by Palestinians at the Temple Mount toward Jewish worshippers at the Western Wall was organized beforehand.

Tuesday, Shamir accused Palestinian leaders of exploiting the deaths for their ''malicious purposes'' and vowed violence would not force Israel to change its policies. ''This is our country. This is our land and no force in the world will change this eternal fact,'' Shamir said.

In the wake of the deaths, the United States and the four other permanent members of the U.N. Security Council agreed on a text that would condemn the deaths of the 21 Palestinians at Islam's third holiest site. The agreement, described by a senior state department official, paved the way for a vote in the 15-nation council.

However, the five powers would not agree upon an Arab demand to send an investigative team to Jerusalem, the official said.

The police had launched an internal investigation Monday into the violence and police response. But late Tuesday Shamir agreed to a request by Police Minister Roni Milo to establish an independent probe without participants from the police forces.

Army Radio commentators indicated Milo's decision pointed to certain dissatisfaction with police Inspector-General Ya'acov Terner.

In East Jerusalem, the Israeli occupied territories of the West Bank and Gaza Strip, and Israeli Arab towns, a general strike called in mourning over the 21 slain Palestinians continued a second day. The military kept a curfew on the entire Gaza Strip, several West Bank towns and most West Bank refugee camps.

In the Israeli Arab town of Taibe, a policeman was slightly hurt after masked youths threw stones toward police posted at the city's entrance, Israel Radio reported.

Jerusalem police announced Jewish worshippers wanting to celebrate the Succot holiday's final day at the Western Wall Wednesday evening and Thursday should not be afraid. The Western Wall is a focal point for the holiday, especially

the final evening when Jews celebrate with song and dance.

''I would like to tell the Israelis and Jewish people a message please,'' Adnan Husseini, director of the Supreme Islamic Council, told Army Radio. ''They have to understand something that in Islam it is not possible to hurt other religions while they are praying. ... It is forbidden.''

#90283u0428 10/10/1990 ~United Press International

BOSTON (OCT. 10) UPI - State health officials said Tuesday there is an association between elevated cancer rates in towns around the Pilgrim nuclear power plant in Plymouth.

However, the officials stopped short of specifically linking emissions from the plant with the increased adult leukemia rates. They also said that the elevated association appears to have ended in 1983.

The Public Health Department released a study showing there were 108 cases of adult leukemia in the 22-town area surrounding the 18-year-old reactor between 1978 and 1986.

It said that, although a cause-and-effect relationship could not be established, a possible cause was plant emissions.

Elaine Robinson, a spokeswoman for Boston Edison, which runs the plant, questioned the validity of the study. She said all other U.S. studies of nuclear power plant risks have found no evidence of health threats.

Robinson said officials know how much radiation has been released from the plant and said ''there is still not enough radiation emitted to cause even a single cancer.'' She said it is ''improper to suggest that it has.''

The study said between 1978 and 1983 those living or working closest to the plant had a leukemia risk four times higher than those who had the lowest potential for exposure.

Public Health Commissioner David Mulligan said the department was taking four steps in the wake of the study, including asking the Legislature to establish the toughest air quality standards in the nation for nuclear emissions.

Mulligan said he would seek to lower permissible levels to less than half the federal standards.

''It must be emphasized that the relationship was the strongest for those diagnosed between 1978 and 1983,'' said Mulligan. ''For individuals diagnosed between 1984 and 1986, there was no elevated risk of leukemia associated with the plant.''

''Factors other than environmental radiation were examined and none, including occupation and smoking status, could account for the elevated risks associated with exposure to Pilgrim,'' he said.

#90283u0509 10/10/1990 ~United Press International

(OCT. 10) UPI - Surging oil prices and Wall Street's 78.22-point plunge Tuesday combined to send stock prices plummeting Wednesday on major markets in Hong Kong, Singapore, Thailand, Manila, Sydney and New Zealand. Trading was described as light.

Markets, banks and most major businesses were closed in Tokyo for the national holiday of Sports Day. Trading will resume Thursday on the world's busiest stock market.

In Hong Kong, stocks plunged 1.4 percent on the Hong Kong Stock Exchange in response to New York.

The benchmark Hang Seng Index, which lost 11.96 points Tuesday, tumbled 41.11 points to 2,872.41.

Among the narrower indexes, financials shed 29.00 points, utilities fell 34.26 industrials lost 37.38 and properties fell 86.38 points.

Volume amounted to around 588 million shares, compared with 552 million shares changing hands Tuesday.

In Singapore, stocks fell 1.4 percent in lackluster trading on the Singapore Stock Exchange.

The Straits Times Industrial Index, which fell 4.73 points Tuesday, dropped 15.16 points to 1,090.14. The broader-based All Singapore Index, which fell 3.76 points Tuesday, eased another 4.31 points to 303.27.

An estimated 22.1 million shares changed hands, slightly above the 20.9 million shares changing hands Tuesday.

In Bangkok, stocks fell 3.9 percent on the Thailand Stock Exchange amid worries over the violence in Israel.

The Securities Exchange of Thailand Index, which gained 2.10 points Tuesday, dropped 26.64 points to 655.55.

Volume amounted to 1.8 billion shares, compared with 2.4 billion shares changing hands Tuesday.

Declines overpowered advances 153 to only 5.

Elsewhere around the region, stocks fell 3.4 percent in Manila as investors succumbed to another bout of profit taking on the Manila Stock Exchange.

The Manila Composite Stock Index of 25 selective issues, which had risen almost 11 percent in the previous two sessions, fell 19.47 points to 552.34.

Analysts noted stocks fell amid a combination of factors including Wall Street's loss Tuesday, profit taking and surging global oil prices.

In Australia, stocks fell 1.1 percent as plunging global markets crushed bids on the Sydney Sharemarket.

The All Ordinaries Index, which added 5.9 points Tuesday, fell 15.2 points to 1,360.2. The All Industrials Index tumbled 33.3 points to 2, 019.3.

Turnover amounted to 57.7 million shares, compared with 55.7 million shares Tuesday.

Declines outpaced advances, 204 to 84, while 184 issues managed to remain unchanged.

#90283u0526 10/10/1990 ~United Press International

CAIRO, EGYPT (OCT. 10) UPI - Egypt's interior minister said Wednesday that suspected pro-Iraqi terrorist arrested in Egypt recently were planning to assassinate senior Egyptian officials to trigger chaos to the country.

Lt. Gen. Mohammed Abdulhalim Mussa, the interior minister, did not name the targeted Egyptian officials but told the semi-official Cairo daily Al Ahram the suspects were apprehended ''in possession of arms and explosives.''

None of the suspects have been formally charged or allowed to meet the press but under Egyptian emergency regulations the government can extend their period in detention without trial.

Egyptian security sources said last week they arreested more than 30 suspected Iraqi and Palestinian terrorists in a conspiracy by Baghdad to destabilize Cairo.

Egypt strongly condemned Iraq's Aug. 2 invasion of Kuwait and angered Baghdad by sending troops to defend Saudi Arabia from Iraqi aggression.

''The terrorists have revealed secrets of the sabotage and terrorism plans they were planning to carry out against Egypt and the Egyptians,'' Mussa was quoted as saying.

''Those who sent them gave them the illusion that there was a rift between the leadership and people of Egypt, but they were shocked to find there was no truth to this,'' he said.

Mussa said investigations were continuing into links between the arrested terrorist suspects and Egyptian Islamic fundamentalist groups opposed to the presence of U.S. troops in the Gulf.

Egypt's President Hosni Mubarak warned the 50,000 Palestinians living in Egypt to avoid pro-Iraqi extremist organizations or risk the consequences.

#90283u0527 10/10/1990 ~United Press International

(OCT. 10) UPI - President Bush campaigns today for southern powerbroker Jesse Helms, who is fighting for political survival in North Carolina. Bush plans to rally support for the G-O-P senator at a fund-raiser in Raleigh this morning. Bush told reporters yesterday that ''if we had more people on fiscal policy like Jesse Helms... and by that I mean control of the Senate... we wouldN'T be in this mess.'' Helms opposed Bush on a budget plan calling for a tax increases.

A New York Times report indicates there is new evidence of a Libyan connection in the 1988 terrorist bombing of a Pan Am jet over Scotland. The paper says new evidence from government investigators shows for the first time that Libyan agents may have built and planted a bomb that destroyed Flight 103. The blast killed all 259 people on the plane and 11 people on the ground.

It's nearly time for the shuttle Discovery and its five-member crew to come back to Earth after putting a Ulysses probe in space. Commander Richard ''Dick'' Richards and co-pilot Robert Cabana will fire Discovery's braking rockets over the Indian Ocean early today to drop the ship out of orbit in preparation for landing. Discovery is scheduled to land this morning at Edwards Air Base in the California desert.

Lawyers return to a Fort Lauderdale, Florida, court today as jury selection resumes in the obscenity trial of rap group 2 Live Crew. Three group members are charged with performing obscene material June 11th, two days after their album ''As Nasty As They Wanna Be'' was declared obscene by a federal judge. Defense lawyers are challenging the jury selection process, saying there are too few blacks in the juror pool.

(OCT. 10) UPI - South African police say gunmen fired on a passenger bus traveling near Durban, killing at least six people. More than 12 people were

hurt when gunmen in a passing vehicle fired on the bus eight miles outside the Indian Ocean port city. It was the second violent incident in the city yesterday. Earlier, a group of blacks staged a riot, stabbing at least eight whites. NO one was killed in that attack.

A poll shows tht about one-third of U-S family doctors report having treated at least one patient with the AIDS virus. At a meeting of the American Academy of Family Physicians, Dr. Ronald Goldschmidt said a survey of members found that 40 percent are currently treating at least one person with the AIDS virus. Doctors at the San Francisco meeting were warned to be alert for the growth of AIDS in the heterosexual population and among babies.

Memorial services will be held today for Dorothy Shelton, the wife of the only U-S soldier still listed as a prisoner of war in Southeast Asia. The 57-year-old mother of five shot herself to death last week at her San Diego home. A family spokesman says Shelton never gave up hope tht her husband was still alive and went ''to Laos in 1973 to search for him.'' Air Force Colonel Charles Shelton was shot down over Laos in April 23rd, 1965 and was captured days later.

Bosses at Chicken of the Sea say it will be the first U-S tuna brand to totally abandon the use of tuna from the Eastern Tropical Pacific. Dolphins and tuna often swim and are snared together in that area of the Pacific Ocean. Van Camp Seafood Company of St. Louis, marketers of Chicken of the Sea, says the firm is believed to be the only tuna processor in the nation to withdraw from the Pacific region.

#90283u0546 10/10/1990 ~United Press International

SEOUL, SOUTH KOREA (OCT. 10) UPI - New Defense Minister Lee Jong-koo apologized Wednesday for the political surveillance of civilians by military security agents that he said was ''an abuse of power.''

In testimony before the parliament's National Defense Committee, Lee said military authorities started a probe into the illegal watch over more than 1,300 noted civilians by the powerful Defense Security Command.

''That was an abuse of power committed by the command under the habit of the past era,'' Lee said. ''With this as a starting point, an overall study will be made on the mission, functions and setup of the command and problematic aspects will be boldy corrected.

''I offer sincere apologies to the public and to those listed as surveillance targets for the concern this case caused. I humbly accepts the fact that the people are angry and indignant at what the command did.''

Opposition politicians and dissident groups, furious about the military spying

on civilians, pushed preparations for a massive protest rally at a park in Seoul on Saturday.

The controversial surveillance on civilians was disclosed by an Army deserter last Thursday. Pvt. Yoon Suk-yang, 24, who was assigned to a branch office of the DSC, said its agents monitored the activity of the surveillance targets.

Yoon said among those watched were politicians, civic and church leaders, lawyers, professors, journalists, labor activists and dissidents. To back up his allegations, he produced files prepared by the agents of the DSC.

As the controversy snowballed into a major political issue, President Roh Tae-woo fired Defense Minister Lee Sang-hoon and the head of the DSC. Lee Jong-koo, a retired general and former srmy chief of staff, was named to head the Defense Ministry on Monday.

The Defense Security Command is in charge of both criminal investigations and intelligence for the armed forces. Under former governments it was accused by critics of spying on politicians and meddling in politics.

The latest development was embarrassing to Roh, a former general who promised to revamp the command structure to prevent such illegal activity when he was elected in February 1988.

Main opposition leader Kim Dae Jung, meanwhile, was on the third day of a hunger strike at his party headquarters to push a series of political demands.

He began fasting Monday demanding that President Roh promise not to switch to a parliamentary cabinet form of government revising the constitution, implement local autonomy without delay, and keep the military from politics.

Lawmakers of his Party for Peace and Democracy continued a sit-in at the party headquarters building but they were not fasting.

Kim is in good health and hopes to attend even briefly the Saturday rally protesting the illegal military surveillance on civilians, his aides said.

#90283u0636 10/10/1990 ~United Press International

(OCT. 10) UPI - The permanent members of the U-N Security Council have agreed on a resolution to condemn Israel for the deaths of 21 Palestinians. Despite differences on the Persian Gulf, Arab members are united in condemning Israel.

U-S Court in Boston has fined a military contractor firm 500-thousand dollars for providing untested parts for high-tech defense equipment. The firm, Micro-Dynamics, pleaded guilty to criminal charges.

Tropical storm Marco, has formed west of Key West, Florida, bringing with it heavy rains. Top winds are 40 miles an hour. Tropical storms Klaus and Lili

have weakened.

Fire officials say at least 22-hundred acres of brushland burned yesterday in Ventura County in southern California. The fire was fanned by Santa Ana winds. A brushfire in a canyon near downtown Oakland threatened houses.

Former F-B-I agent Richard Miller was convicted in Los Angeles federal court yesterday of espionage and bribery. Sentencing is set for January 7th. Miller could go to prison for life.

The United Auto Workers' Ford Council has approved the new contract with Ford. Union leaders say members are expected to accept it. Then the union will talk with Chrysler, hoping for a similar contract.

The Conference Board says executives' confidence in the U-S economy is at a 10-year low. The research organization says the confidence level in the third quarter was 40- meaning there were 40 optimists for every 60 pessimists.

A team of two Americans and two Russians has completed the first bicycle trip across the Soviet Union. Their support staff in Minneapolis said the seven-thousandmile trip took 127 days.

-30- 1811

#90283u0660 10/10/1990 ~United Press International

COPENHAGEN, DENMARK (OCT. 10) UPI - Denmark's parliamentary Intelligence Committee met Wednesday to discuss allegations that Israel's intelligence agency Mossad is working illegally in Denmark.

The decision to call the meeting followed allegations that Mossad is active in Denmark inviolation of Danish law and practice and despite previous government assurances the agency was passive in the country.

Unconfirmed reports said that Mossad eavesdropped on Arabs living in or visiting Denmark and that Denmark's own intelligence agency used Mossad to screen visa applications from Arab nationals.

The current controversy erupted with the publication in the United States of ''By Way of Deception,'' a book on the Israeli intelligence agency written by former Mossad agent Victor Ostrovsky.

Ostrovsky wrote that a liaison officer in Denmark's Police Intelligence Agency routinely screened indigenous Arabs seeking visas with Mossad, and told Danish television Sunday a DPIA agent also routinely furnished Mossad with tapes of bugged conversations.

Despite denials by Justice Minister Hans Engell and DPIA Chief Anne- Mette Moller that details in Ostrovsky's book were incorrect, the parliamentary

committee decided to investigate.

''We have no knowledge that Mossad actively carries out operations in Denmark. If they are doing so, their operations are contrary to Danish legislation,'' Engell said.

But following a meeting Monday with Engell, some committee members said they remained uncertain about Mossad's role in the country and called for a further investigation.

''If there are members of the committee who do not feel they have been given a full enough report on the issue, then I do not think we should use a majority to shut them up,'' said Liberal committee member Bjorn Elmquist.

Elmquist's party is in a three party, Conservative-led coalition ruling the country.

''We have been assured that not all visa applications are checked with Mossad '' said Elmquist, who said cooperation between Denmark's intelligence agency and foreign intelligence agencies is necessary.

Wednesday's meeting was expected to result in a further investigation into contacts between Mossad and the DPIA.

#90283u0675 10/10/1990 ~United Press International

PRINCETON, NJ (OCT. 10) UPI - Mayor Barbara Rowena Boggs Sigmund, daughter of Rep. Lindy Boggs, D-La., died Wednesday at home in her sleep after a long battle with cancer. She was 51.

Sigmund's cancer had cost her her left eye in 1982. Unable to wear a false eye she took to wearing an eyepatch and sewed dozens of color- coordinated patches to match various outfits. She gave out eyepatches as a campaign promotion during her unsuccessful bid for the 1988 Democratic nomination for governor.

Sigmund announced in the fall of 1989 that the cancer had spread and was inoperable.

Sigmund was born May 27, 1939, in New Orleans to Hale and Corinne ''Lindy'' Boggs.

Her father entered politics when she was 18 months old and became majority leader of the House of Representatives before he disappeared in a plane crash in Alaska in 1972. Her mother, who had never previously held public office, took over the Louisiana seat and was regularly re- elected.

Her younger sister, Corinne ''Cokie'' Roberts, is a congressional correspondent for National Public Radio, and her brother, Thomas, is a Washington attorney and lobbyist.

Powerful House Speaker Sam Rayburn and Lyndon Johnson were frequent visitors to the family's white-columned New Orleans home, where a cross was once burned on the lawn because of her father's support of civil rights legislation.

Sigmund got her first taste of elected office at a tender age, when third-grade classmates elected her to portray the Virgin Mary in a class Christmas play.

''After being elected the Virgin Mary, it's all down hill,'' she once said.

Sigmund worked as a staff member in the Kennedy White House and moved to Princeton in 1963 to become a teacher at the Stuart Country Day School. She married Paul Sigmund, a Princeton University professor of Latin American Studies, in 1964.

The couple had three children, Paul Jr., born in 1964, David, born in 1966, and Stephen, born in 1969.

Sigmund entered politics in 1972 with election to the borough council and served three years before being appointed to the Mercer County Board of Freeholders.

In 1982, she entered the Democratic primary for Congress only to switch to the primary for Senate, coming in fourth in a field of 10.

She made a political comeback the next year,winning election as the first woman mayor of Princeton, and won re-election in 1983.

#90283u0713 10/10/1990 ~United Press International
KATMANDU, NEPAL (OCT. 10) UPI - A Washington woman has become only the third American woman to scale Mount Everest, achieving the feat with her Russian husband, the Nepali Ministry of Tourism said Wednesday.

The ministry also announced the death of three members of a seven- member Soviet climbing team on 26,758-foot Mount Manaslu on Sunday.

Catherine Gibson, 35, of Seattle, conquered 29,029-foot Everest on Sunday with her husband Aleksei Karasnokutsky, 41, and Phinzu Sherpa, 22, after an eight hour climb from the fourth camp at 26,247 feet.

Gibson became only the 14th woman to climb the world's highest peak.

She and Karasnokutsky are the second couple to step on the summit recently. Last week a Yugoslavian couple reached the summit. Also last week, women from Yugoslavian and France recorded the first female ascents for their nations, officials said.

An 11-member American expedition, led by 44-year-old Hooman Aprin, a mountain guide from Jackson, Wyo., last week put two Americans, one Canadian and a Sherpa guide on the summit in two groups.

PROVIDENCE, RI (OCT. 10) UPI - New England Patriots wide receiver Hart Lee Dykes suffered a serious eye injury and teammate Irving Fryar was cut in the head during a brawl early Wednesday at a downtown nightclub, police said.

Dykes and Fryar, also a wide receiver, apparently got into the fight inside the Shalimar club and it spilled out onto South Main Street, Capt. Frank Dowd said.

Police were called to the club at 1:20 a.m. and found Fryar and Dykes bleeding from headwounds, Dowd said.

''They were both struck in the head with something,'' he said. ''Fryar said they had been in the place during the evening and as they were leaving they

were assaulted by a group of people.''

Fryar told police that he broke away from the scuffle and ''being in fear of serious injury,'' ran to his car, got a gun, put it in his boot, and returned '' Lt. Steven Hall said.

Reading from a police report on the incident, Hall said ''numerous witnesses'' told investigators that Fryar ''came running back with a chrome-plated gun in his hand and was brandishing it.''

Fryar refused medical treatment at the scene and police took him into custody pending an investigation into whether he legally had the gun, identified as a Smith & Wesson 9mm automatic.

Police confirmed Wednesday morning that Fryar had a permit for the gun and said he was being interrogated but had not been arrested.

While he initially declined medical treatment, Fryar went to Rhode Island Hospital at about 7 a.m. and received two or three stitches, a hospital spokesperson said.

Hospital spokesman Rick Piester said Dykes was in satisfactory condition, but he would not comment on the extent of injuries. Detective Maj. Milton Wilson said Dykes ''was admitted with a serious eye injury,'' but he did not know how serious the injury was.

Fryar told police that Dykes was set upon ''by an individual or individuals'' at the club. Fryar said he went to Dykes' aid, ''at which time he was wounded in the head,'' Wilson said.

The incident was just the latest for the troubled New England Patriots, both off and on the field.

The Patriots are 1-4 and have lost their three games since the Sept. 17 incident involving Lisa Olson, a reporter for the Boston Herald who claimed she was sexually harassed by a group of Patriots while conducting a locker-room interview.

New England owner Victor Kiam, after initially shrugging off the incident, later vowed ''mammoth changes'' in the management of the team, but withheld action pending an investigation by the National Football League.

Dykes was a first-round draft pick two years ago.

Fryar was the first pick of the Patriots in 1984 and was the NFL's leading punt returner during the Patriots AFC championship season in 1985.

He never got to play in the AFC championship game against Miami, however,

because he was involved in a domestic dispute with his wife that resulted in his suffering tendon damage in his hand when he was cut with a kitchen knife.

Fryar was one of six New England Players whose names were printed four years ago as having been involved with drug use.

In November 1986, Fryar suffered a separated shoulder in a game and left Sullivan Stadium at halftime without permission. As he was driving, he lost control of the car and crashed into a tree, suffering a concussion and facial bruises. In 1988, he was indicted in New Jersey on weapons charges after a state trooper stopped him for speeding.

KARACHI, PAKISTAN (OCT. 10) UPI - Authorities Wednesday arrested the husband of ousted prime minister Benazir Bhutto on charges of kidnapping and extortion officials said.

They said agents of the Federal Investigation Agency arrested businessman Asif Ali Zardari when he went to the FIA office in the southern port of Karachi to answer some queries.

The arrest of Zardari, a prominent businessman who married Bhutto in 1987, had been expected for some weeks on charges of bank fraud.

However, officials said he was charged Wednesday with helping to plot the kidnapping of a wealthy British-based Pakistani businessman, Murtaza Bukhari. Zardari has denied the charge.

Bukhari was abducted in April at his house in Karachi and made to pay about $800,000 before being released.

Police in August arrested Ghulam Hussein Unnar, a member of the Sind provincial Assembly and a close friend of Zardari, for allegedly carrying out the crime.

Zardari last month obtained pre-arrest bail, which forbids police from detaining him for a specified period unless permitted by the courts, in connection with allegations he used his influence to force a bank to give a loan of about $14 million to a businessman friend without surety. Zardari has denied any involvement.

Bhutto is also facing charges of misconduct while in office before Special Disqualification Courts. The courts were set up by President Ghulam Ishaq in what many believe is an attempt to bar her and members of her administration from the scheduled Oct. 24 elections.

Ishaq Khan dismissed Bhutto's 20-month-old administration on Aug. 6, accusing it of corruption and nepotism and of failing to control law and order. He appointed opposition leader Ghulam Mustafa Jatoi as interim prime minister until the elections.

Bhutto's counsel Wednesday defended her in one of the special courts in Karachi against a charge that while prime minister she illegally allowed the sale of cotton to a foreign firm at a price below the fixed minimum export rate. Bhutto was not present at the hearing, which was adjourned until Thursday.

Bhutto is facing another charge of corruption in the Karachi court and two more in the northeastern city of Lahore.

If found guilty on any of the charges, she could be barred from politics for seven years and from the forthcoming elections.

Two of Bhutto's former ministers are facing criminal charges of corruption, while three more must appear before the disqualification courts.

#90283u0743 10/10/1990 ~United Press International

KHARTOUM, SUDAN (OCT. 10) UPI - Sudan Wednesday joined a world chorus of disapproval of Israel, condemning as ''a brutal act'' Monday's killing of more than 20 Palestinians by Israeli security forces in Jerusalem, calling it ''yet another evidence of the genocidal policy pursued by the Israeli authorities against the Palestinian people.''

In a Foreign Ministry statement, the hardline Islamic government of Gen. Omar al Bashir demanded the protection of the Palestinian people and called for the Occupied Territories to be placed under the control of an international peace-keeping force.

It also demanded political, military and economic sanctions to force Israel to comply with the U.N.'s resolution calling for withdrawal from the Occupied Territories and the granting of self-determination to the Palestinians.

It said, ''peace and security constitute an indivisible issue and the Palestinian cause should therefore be handled in a comprehensive framework in accordance with a chronological order that should be observed by the international community.''

Sudan is among the few Arab countries that have lent support to Iraq's Aug. 2 annexation of Kuwait, refusing formally to condemn it and lobbying hard among Arab states for opposition to the western military build-up in the Persian Gulf.

Al Bashir has held frequent talks with Palestine Liberation Organization Chairman Yasser Arafat on the crisis and joined Arafat in calling for a simultaneous solution to the Kuwaiti and Palestinian issues.

U.N. security council members were to vote on a statement condemning the killings, while Pope John Paul II also condemned Israel Wednesday.

Also Wednesday, Israeli Premier Yitzhak Shamir approved an independent inquiry into the killings, which took place on Temple Mount, a site sacred to both Jews and Moslems.

#90283u0787 10/10/1990 ~United Press International
EDWARDS AIR FORCE BASE, CA (OCT. 10) UPI - The shuttle Discovery glided to a

''picture-perfect'' touchdown Wednesday to wrap up a successful flight, leaving the Ulysses probe behind in space on a quest to study the uncharted poles of the sun.

With skipper Richard ''Dick'' Richards, 44, and co-pilot Robert Cabana, 41, at the controls, Discovery gracefully swooped out of the morning sky, settling onto concrete runway 22 on 6:57 a.m. with swirling puffs of blue smoke from its main landing gear tires.

As Discovery barrelled down the runway at some 200 mph, Richards pumped its beefed-up carbon brakes to bring the 100-ton orbiter to a stop in the final test of a four-day 65-orbit flight covering some 1.7 million miles since blastoff Saturday.

''Wheels stopped, Houston,'' Richards radioed mission control.

''Copy, wheels stopped, Discovery; The rest of your team is glad to have you back (and) to have the fastest man-made object in the universe well on its way '' astronaut Brian Duffy said from Houston, referring to Ulysses. ''Congratulations on a picture-perfect mission.''

Wearing bright-orange spacesuits, Richards, Cabana, flight engineer William Shepherd, 41, Bruce Melnick, 40, and Thomas Akers, 39, climbed out of the orbiter about an hour after touchdown and briefly inspected the spaceplane before departing for medical exams and reunions with family members.

All five planned to fly back to their homes in Houston near the Johnson Space Center later in the day.

Before re-entry, the astronauts received greeting from U.S. forces in the Middle East in a message faxed to the spaceship from mission control.

''Yours has been a most successful space mission in the continuing search for answers to make the world a safer and better place to live. Here on the Earth, we strive to ensure the same results. We salute you on a job well done - and happy landings,'' the message said.

Officials said Tuesday Richards and company had chalked up a near- perfect flight, a welcome shot in the arm for the beleaguered space agency after a summer of repeated shuttle launch delays and near- constant criticism over problems with the flawed Hubble Space Telescope.

The astronauts accomplished the primary goal of the 36th shuttle mission, NASA's first in nearly six months, when they successfully deployed the nuclear-powered Ulysses probe Saturday on a $750 million flight over the poles of the sun.

While Ulysses is not equipped with a camera, and while its orbit will never

carry it closer than about 120 million miles to the sun, its instruments will give astronomers their first three-dimensional glimpse of Earth's star, its complex magnetic field and the tenuous solar wind.

To get into the required polar orbit, Ulysses' $87 million three-stage booster fired the craft toward distant Jupiter Saturday for a 1992 flyby that will utilize the planet's titanic gravity for a course-changing boost down, out of the plane of the solar system and back toward the sun.

If all goes well, Ulysses will begin a four-month pass over the sun's south polar region in May 1994. A similar pass over the north polar region is planned for 1995.

As of Wednesday, the 807-pound probe was nearly 2.5 million miles from Earth, hurtling toward Jupiter at more than 91,000 mph relative to the sun.

Elated European Space Agency officials said the spacecraft was working flawlessly, setting the stage for a series of small rocket firings next Monday and Tuesday to fine-tune its course toward Jupiter, more than 510 million miles away.

Discovery's flight was NASA's first in more than five months because of elusive hydrogen fuel leaks that grounded the shuttles Columbia and Atlantis in May, July and September. Atlantis has since been repaired, but Columbia remains grounded.

At the Kennedy Space Center in Florida, the leak-plagued Columbia was hauled off launch pad 39B Tuesday and back to a rocket assembly building to protect it from rain and high winds associated with the remnants of tropical storm Klaus.

If all goes well, Atlantis will be hauled to launch pad 39A Thursday and Columbia will be returned to its firing stand Friday for additional tests to pinpoint the hydrogen fuel leak that has grounded the ship all summer.

Atlantis, meanwhile, is scheduled for launch in early November. The shuttle was damaged last week when when a 70-pound beam fell in the ship's cramped engine compartment, raising new questions about NASA's quality control program.

While Atlantis suffered no major damage, it is not yet clear whether the orbiter will be ready for liftoff on a secret military mission by Nov. 7 as originally planned.

#90283u0801 10/10/1990 ~United Press International

BLAGNAC, FRANCE (OCT. 10) UPI - A man lost a hand when a tear gas cannister exploded Wednesday during a clash between French police and farmers protesting

the inauguration of a new Airbus factory by President Francois Mitterrand, police said.

Protesting low prices and livestock imports, farmers tried to block the airport runway at Blagnac near Toulouse, 437 miles southeast of Paris, where Mitterrand was scheduled to land to inaugurate a new Airbus assembly plant Wednesday.

Police said 400 farmers with 100 tractors broke through barriers at the airport and that officers responded with tear gas cannisters.

A 21 year-old demonstrator picked up one of the cannisters and lost his hand when it exploded, police said.

''These actions are a result of the violence and irresponsibility on the part of the farmers,'' a police spokesman said.

But the Central Department of Young Farmers blamed the violence on the ''unqualified barbary'' of the police.

''These are the assassins that kill our kids, ruining the life of a young man who only broke a few fences,'' said a vice-president of the farmers' group who asked not to be identified.

For months France has been rocked by farmers protesting low prices and the import of foreign meat. Their difficulties have been aggravated by two unusually dry summers, forcing farmers to slaughter their lifestock, flooding markets with surplus beef and lamb.

The government, embarrased that farmers were able to prevent Mitterrand from officially opening a new line of the high-speed TGV train two weeks ago, ordered a large police force to secure the Blagnac airport and the new Airbus factory to insure Mitterrand's safety.

Police said 900 police with aircraft and helicopters were deployed against the protestors.

The Airbus facility is the largest in Europe. It will assemble A330 and A340 passanger jets.

#90283u0812 10/10/1990 ~United Press International

(OCT. 10) UPI - Two American Air Force fliers taking part in Operation Desert Shield were killed today in a crash. The Pentagon says their F-111 fighter bomber crashed in the southern Arabian peninsula. The plane was assigned to the 48th Tactical Wing of the Royal Air Force in England. Two U-S helicopters and eight crew members have been missing since Monday in the North Arabian

Sea. A defense department official said the eight probably did NOT survive.

The Persian Gulf and Palestinian problems have become intertwined by Monday's killings of 21 Palestinians in Jerusalem. Iraqi President Saddam Hussein threatened Israel yesterday and warned it to leave occupied Arab lands. British Foreign Secretary Douglas Hurd said a solution to the gulf crisis must involve concessions on the Arab lands. But he said Iraq has to pull out of Kuwait first.

The aggravated battery trial of Edward Humphrey may go to the jury today in Melbourne, Florida. The 19-year-old Humphrey is a suspect in the killings of five college students in Gainesville, Florida, but has NOT been charged. In the Melbourne trial, Humphrey is charged with beating his 79-year-old grandmother. She told police he beat her, but refused to testify against him.

Three people were killed this morning in a house fire in Warren, Michigan. The victims were a 61-year-old woman, her 12-year-old granddaughter and a 10-year-old girl who was spending the night. Officials say two other people escaped and suffered serious burns. Two firefighters tried to rescue the victims and were trapped on the second floor. Other firefighters had to rescue them.

-30- 1780

#90283u0814 10/10/1990 ~United Press International

(OCT. 10) UPI - Philadelphia police say a 14-year-old girl accidentally killed her mother last night when she drove over her. Iris Rodriguez and her daughter went to a 7-Eleven store to get gasoline. The girl was driving the car and the mother stood behind the car to direct her to the pumps. Police say the girl's foot slipped off the clutch, the car jumped into reverse and pinned the mother against a utility pole.

Germany and the Soviet Union have signed a document requiring Germany to pay more than seven-BILLION dollars for withdrawing Soviet troops from what was East Germany. The 380-thousand troops are to leave within four years. The biggest share of the money will be used to build 36- thousand apartments in the Soviet Union for returning soldiers. Germany also is paying for transportation and stationing costs while the troops remain.

Health officials say there is an ''association'' between higher cancer rates around the Pilgrim nuclear power plant in Plymouth, Massachusetts. The state Public Health Department says a possible cause of the elevated leukemia rate may be plant emissions... but NO cause- and-effect relation was established. The report says the association appears to have ended in 1983.

A medical journal has summarized two reports which say Air Force veterans exposed to Agent Orange in Vietnam suffered NO apparent health problems as a result. The Air Force used the defoliant in Vietnam from 1965 to 1970. Critics

disagreed with the report in the Journal of the American Medical Association. Democratic Senator Thomas Daschle of South Dakota accused the Air Force of a ''calculated effort to mislead the public.'' .

-30- 1824

#90283u0857 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI - Two U.S. airmen were killed Wednesday when their Air Force F-111 fighter-bomber crashed in the southern Arabian peninsula, raising to 31 the number of Americans who have died so far in Operation Desert Shield.

At the same time, the Navy officially announced it had called off the search for the eight missing Marines who were aboard two UH Huey helicopters that crashed Monday in the northern Arabian Sea. The helicopters were from the USS Okinawa.

''There were no indications of survivors found during the extensive air and water search of the area,'' the Pentagon said in a statement. ''Some floating debris was recovered.''

The search for the Marines, who were from Camp Pendleton, Calif., was halted at about 11:30 a.m. Persian Gulf time Tuesday but it was not announced until Wednesday, after relatives of the crewmen were notified.

The U.S. death toll now stands at 31 in Operation Desert Shield, exceeding that of the 23 American servicemen killed in combat during last December's invasion of Panama.

A Pentagon spokesman said the F-111 fighter-bomber was assigned to the 48th Tactical Wing, based in England, and was deployed in support of Operation Desert Shield.

The spokesman said the jet was on a training mission at the time of the crash, which occurred at about 5:38 a.m. local time.

The names of the pilot and the crewmember were being withheld pending notification of next of kin.

The Pentagon - concerned about the sensitivities of Arab governments in the region that do not acknowledge a U.S. military presence in their country - refused to publicly disclose what country the F-111 crashed in or exactly where the Americans died, though it was believed to be in either Oman or the United Arab Emirates.

The F-111 crash was the third one in three days.

On Monday, an RF-4C Phantom reconnaissance plane from the Alabama Air National

Guard crashed, also in an undisclosed location in the southern Arabian peninsula, killing the two crewmen aboard, and two Marine UH Huey helicopters disappeared in the northern Arabian Sea with eight crewmen aboard.

The largest loss of life connected with the operation was the Aug. 28 crash of an Air Force C-5 cargo plane in West Germany that killed all 13 crew members aboard. Most were Air Force reservists who had volunteered from San Antonio, Texas. The plane was flying supplies to Saudi Arabia.

Pentagon officials said there was no common link to the accidents and that it was not unusual.

''We have hundreds of people die every year in training accidents (in the United States and elsewhere) and no one seems to notice,'' one official said.

#90283u0862 10/10/1990 ~United Press International

BRUSSELS, BELGIUM (OCT. 10) UPI - Unemployment in the 12-nation European Community rose in August for the first time in six years, increasing by 0.1 percent to 8.4 percent, officials said Wednesday.

Eurostat, the EC statistical agency, said the last increase in the jobless rate was in August 1984 when it rose to 0.1 percent 10.8 percent. About 13 million EC citizens were jobless in August.

The seasonally adjusted EC unemployment rate had been steadily declining for the past year, from 8.9 percent in August 1989 to 8.3 percent for the past several months.

''One should be careful not to over-interpret the increase, which is partly due to a very large number of young people leaving the educational system,'' said Henning Christophersen, the EC commissioner for economic and financial affairs.

''Nevertheless, the stagnant figures in recent months and this increase give rise to concern about the future development,'' he said.

A Eurostat official said more than 200,000 people under 25 left school and sought employment in August.

''The effect of the Persian Gulf crisis on the unemployment rate is not reflected in the August figures but we expect to see some effect in the figures for September,'' the Eurostat official said.

Citing the Gulf crisis, Christophersen urged continued momentum toward EC economic and monetary union.

''The experience from the 1970s with the first two oilshocks taught us what not to do,'' he said. ''Only through concerted efforts and close coordination can we avoid falling into the same trap as then.''

Ireland had the EC's highest jobless rate in August, at 16.7 percent, while Luxembourg was lowest at 1.6 percent. Spain was 15.5 percent Italy, 10.4 percent France, 9.0 percent Denmark, 8.4 percent Belgium, 8.2 percent Britain, 6.4 percent Germany, 5.2 percent Portugal, 5.0 percent. Figures for Holland and Greece were not listed.

WASHINGTON (OCT. 10) UPI - Passage of a bill to authorize a referendum on the future political status of Puerto Rico cannot be accomplished in the time left to Congress this year, Sen. Bennett Johnston, D-La., said Wednesday.

Johnston's statement that the bill is dead for the year came as the House prepared to vote on its version of the referendum bill.

The House bill would authorize a vote by Puerto Ricans next year to choose among three options - independence, statehood, or continued commonwealth status.

Johnston, chairman of the Senate Energy and Natural Resources Committee, said that even if the House passed the bill there would not be time to reconcile differences with the Senate approach to the issue.

With Congress trying to adjourn within two weeks ''it has become clear that enactment of a Puerto Rico referendum bill is not possible,'' Johnston said.

His committee and the Senate Finance Committee have approved the legislation, but the Senate Agriculture Committee, which also has jurisdiction in the matter, still has not scheduled action on the bill.

''There are substantial differences between the House and Senate approaches to this issue - differences which cannot be resolved within the very limited amount of time remaining in this Congress,'' Johnston said.

Johnston said he intends to meet with leaders of Puerto Rico next month ''to consider where we go from here on this issue.''

If the decision is to proceed, ''then I expect to resume consideration of the Senate legislation where we have left off, and complete Senate action early next year, which would still allow for a referendum in 1991, or early 1992 - well before the scheduled Fall 1992 local elections,'' he said.

The House bill provides for the referendum to be held on Sept. 16, 1991, or

later if agreed to by Puerto Rico's three political parties.

The last plebiscite on the political status of Puerto Rico was held in 1967 when voters chose to maintain the commonwealth status, which has existed since 1952.

Puerto Ricans have been U.S. citizens since 1917, but cannot vote in presidential elections and do not pay federal income tax. They are represented in Congress by a single delegate, who can vote in House committees, but not in the full House.

Johnston said he knew ''many people will be disappointed'' by his announcement but noted, ''We have gone a long way toward giving the people of Puerto Rico an opportunity to vote on their future. ... I look forward to maintaining our momentum'' next year.

#90283u0896 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI - President Bush's reversal on a possible tax hike for the rich will force Democrats to reconsider their plan to tie the increase to a capital gains tax cut, Senate Democratic leader George Mitchell said Wednesday.

After signing an emergency spending bill Tuesday that allowed the federal government to return to full operation, Bush expressed a willingness to consider steeper taxes for the wealthiest Americans if it were accompanied by a cut in capital gains taxes.

''If it's proper and can be worked, balanced between the capital gains rate and the income tax changes, fine,'' the president said.

But after a hurriedly called meeting late in the day with Senate Republicans opposed to any increase in the income tax rates, Bush backed away from the possible deal.

Mitchell, D-Maine, said Bush's shift would prevent the Senate from moving forward as planned Wednesday on a tax proposal crafted by Sen. Lloyd Bentsen, D-Texas, chairman of the Finance Committee.

''In view of the apparent reversal of the president last evening, we will have to reconsider,'' Mitchell said.

However, Senate Republican leader Robert Dole of Kansas said Bush ''didn't acquiesce'' when irate Republicans raised their objections.

''He listened to us,'' Dole said.

Dole denounced the media for portraying the tax ''bubble'' that Democrats want to eliminate as a concession to the wealthy and said tax conflcit threatens hopes for getting a deficit-cutting agreement.

In an angry speech, Dole said there was a campaign of ''disinformation ... distortion,'' adding, ''There is nothing wrong with the 'bubble' unless you are against progressivity.''

The Senate GOP leader said under the 1986 tax code, nobody, including the wealthy, pays more than 28 percent on in taxable income. He said the wealthiest are denied a personal exemption and cannot use the 15 percent rate on the first $32,000 of income given other taxpayers.

Congress and Bush have fought over capital gains rates, but they managed to come together on a budget agreement and an emergency spending bill that ended a three-day shutdown of the government Tuesday. The temporary funding measure will keep the government operating through Oct. 19.

By then, the White House and Congress hope to work out the details of the budget agreement that proposes through tax increases and spending cuts to slash the deficit by $40 billion in fiscal 1991 and by $500 billion over the next five years.

A White House official said Bush told GOP leaders Tuesday that he did not want to raise income taxes on the wealthy unless he could also get a cut in the capital gains tax rate.

''You're not going to get it,'' the official quoted Republicans leaders telling the president. ''Then,'' the official said Bush replied, ''forget it.''

Bush's meeting with Republican leaders occurred after word spread that Bentsen would propose a plan to eliminate the ''bubble'' with an across-the-board top rate of 33 percent.

The bubble'' involves taxable income between $78,400 and $208,690 for a married couple filing a joint return. At $78,400, the tax rate rises from 28 percent to 33 percent, but when it reaches $208,690, it drops back to 28 percent. Eliminating the bubble would leave the rate at 33 percent from $78,400 upward and would only affect those with $200,000- plus in taxable income.

In return for the change, Bentsen's plan calls for reducing the capital gains tax rate and cutting a proposed hike on gasoline from 12 cents to 9 cents per gallon, and dropping a 2-cent-a-gallon tax on heating oil, congressional sources said.

Another key to the Bensten plan would cut Medicare by $43 billion over five years rather than the five-year, $60 billion proposal contained in the

original budget agreement that failed in the House last week.

The new spending blueprint eliminates many specific tax increases and spending cuts worked out by the budget summit process, leaving it up to congressional committees to make those tough choices, particularly on Medicare.

#90283u0901 10/10/1990 ~United Press International

MOSCOW (OCT. 10) UPI - Defiant communist officials said Wednesday they oppose widespread private property and indicated their party will resist calls to give up its own vast holdings and share power in a coalition government.

The officials, briefing reporters on a two-day Central Committee plenum that ended Tuesday, also rejected the elimination of party cells in the work place and said the Soviet Union will continue to celebrate Revolution Day as a national holiday.

Politburo member Alexander Dzasokhov said Soviet Communists must adapt to the country's new political conditions, but he pledged ''no radical revision of Leninism-Marxism.''

Vladimir Ivashko, the party's No. 2 leader after Mikhail Gorbachev, bristled at one reporter's suggestion the country might consider scrapping the Nov. 7 celebration of the 1917 Bolshevik Revolution and its annual display of military might on Moscow's Red Square.

''The goals of the revolution are noble,'' Ivashko said. ''It is our national state holiday, and we - the party and the Central Committee - support this celebration.''

''If you don't want to celebrate, you shouldn't come,'' Ivashko said. ''No one will drag you there.''

Ivashko, elected to the new post of deputy general security in July at the 28th Party Congress, expressed the need to cooperate with new political forces and described the Communists' new motto as ''tolerance and very patient productive work.''

But when he moved to specific issues, the former Ukrainian party boss indicated little willingness to compromise.

On private property, for example, Ivashko said ''it will have to be restricted for quite a while'' and ''it is a process of privatization, not a one-time act or decree.'' Dzasokhov quoted party economists as saying just 7 percent of all property should be transfered to private ownershp in the next 10-12 years.

''The (Central Committee) plenary session confirmed that our attitude is

negative,'' Ivashko said. ''This is not ideology.''

Ivashko said he supports Gorbachev's call for a national referendum on private property and confidently predicted the Soviet people would vote against widescale privatization.

Gorbachev, both the Soviet president and the party's general secretary, said Monday in opening the plenum, ''Yes, we are encroaching upon socialism, but only the socialism that was build bureaucratically, under which the party veered off the path it embarked on in 1917.''

Ivashko also tersely dismissed the increasingly widespread calls for the Communist Party to give up the valuable buildings and real estate it owns throughout the country. ''The party will keep its property and dispose of its property as it deems necessary.''

On the possibility of power-sharing, Ivashko said proponents of coalition government are ''getting a bit ahead of the times'' and that ''for now I see no such perspective.''

Ivashko also dismissed demands for the removal of Communist cells from the work place, especially in the armed forces, KGB and other security bodies, saying, ''Those who talk about de-ideologization actually mean a change of ideology. There are many people who cannot separate the wheat from the chaff.''

Ivashko also showed anger when talking about the recent exodus from the Communist Party.

''There are people who worked in the party their whole life, and now they have adopted anti-communist positions,'' he said. ''These people have nothing in common with us.''

''There are others who have not withdrawn from the party but do not pay their dues. Gradually we must get rid of such people because they don't want to be real party members. We shouldn't keep them as statistical units. What will they contribute to the party? Nothing.''

Dzasokhov said 20,000 new members have joined the Communist Party this year, but he did not mention that more than 350,000 have left. Ivashko said he ''cannot give concrete figures'' on the total number of members, previously cited as 19 million but now believed to have dropped to 18 million or lower.

#90283u0904 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI - Despite outspoken criticism of the deal on Capitol Hill, there is little chance of a congressional attempt to block the administration's proposed $7.3 billion arms sale to Saudi Arabia,

congressional sources say.

In interviews this week, members of Congress, other Capitol Hill sources and administration officials said it is more likely that critics of the sale will wait until early next year to take the offensive, when a larger weapons deal with the desert kingdom will be disclosed.

The administration notified Congress Sept. 27 of the $7.3 billion package that includes high-tech tanks, attack helicopters, anti-tank and anti-aircraft missiles and 10,000 trucks, about 1,500 of them for transporting water.

Congress had 30 days from then to act on a resolution of disapproval blocking all or parts of the sale. But no resolution has been filed so far, and with Congress facing major budget fights before a hoped-for Oct. 19 adjournment, the chances of a challenge to the sale were diminishing.

''It's just not going to happen in the two weeks we have left,'' said one Senate aide. ''There's no sense out in the country that you can build a case for a resolution of disapproval that will get enough votes.''

Rep. Larry Smith, D-Fla., one of Israel's staunchest supporters in Congress, said, ''The reality of it is that if a resolution of disapproval were filed, we would not have sufficient time to get it to the floor.''

Complicating the situation was the killing of 21 Palestinians Monday by Israeli security forces after riots broke out on the Temple Mount in Jerusalem.

''This is not the week (to block the sale),'' said Smith, a House Foreign Affairs Committee member. ''But that doesn't mean we think this sale is good or there is justification for it. You have to pick and choose your spots.''

The administration had planned to sell Saudi Arabia $21 billion in arms to help it mount a defense against Iraq, but decided to divide the sale into two parts in response to congressional criticism that the deal would erode Israel's ''qualitative edge'' in Middle East weaponry.

Although the criticism continued when administration officials ventured to Capitol Hill last week to defend the $7.3 billion sale, congressional sources said the complaints were mainly aimed at the second weapons package.

In particular, supporters of Israel are worried that the second sale will include F-15 fighter planes, which were dropped from the $21 billion package.

''The message ... to the administration (was): Don't come back with a bigger package or be a little more thoughtful about it,'' said one congressional aide. ''That's when the fight might be.''

Meanwhile, congressional supporters of Israel were trying to persuade the

administration to provide more arms to the Jewish state and to consider leasing, instead of selling arms, to Saudi Arabia and other Arab states.

Rep. Tom Lantos, D-Calif., another Foreign Affairs Committee member with a record of strong support for Israel, said he had taken part in a ''long meeting'' with Defense Secretary Dick Cheney to discuss such questions and came away ''fully satisified.''

Lantos said Cheney demonstrated a ''willingness to listen'' to congressional fears about Israel's security and about the possiblity that weapons sent to Saudi Arabia could fall into hostile hands if the Saudi royal family were to fall.

Administration officials have said that even with the weapons sales, Saudi Arabia would be unable to defend itself against an attack by Iraq or Iran without help from the United States or other outside forces.

Instead, they said the tanks and other weapons would enable the Saudis to slow down a ground assault by their more populous neighbors to the north for long enough to allow U.S. and allied forces to send reinforcements.

#90283u0917 10/10/1990 ~United Press International

CHICAGO (OCT. 10) UPI - Grain and soybean futures were lower at midmorning on the Chicago Board of Trade.

After a mixed opening, the market retreated under active commercial and professional selling, triggering sell-stops on the way down. Some of the selling was attributed to profit-taking and some to the prospect of clearing weather during the weekend and the probable resumption of harvest activity.

The weekly crop reports indicated the progress of the corn and soybean harvest remained behind normal at the end of last week, and the wet weather across the Midwest so far this week has caused further delays.

However, cooler and drier weather was on tap for the western Midwest and the hard red winter wheat region.

Sluggish export news weighed on soybean prices despite he sale of about 112,000 tons to unknown destinations.

Corn was pressured by news the Soviet Union has said rumors they had bought up to 1 million tons of corn were nothing but rumors.

Wheat was lower in line with losses on the rest of the floor.

Interior and Gulf basis levels were steady to firm.

The midmorning prices:

Corn Dec 2.32 1/4 off 2; Mar 2.41 off 2 1/4; May 2.47 off 2.

Soybeans Nov 6.26 off 8 1/4; Jan 6.40 1/4 off 8; Mar 6.52 1/2 off 8 1/4; May 6.62 off 8 3/4.

Wheat Dec 2.75 1/2 off 3; Mar 2.89 1/2 off 3 3/4; May 2.96 1/2 off 3.

Oats Dec 1.19 3/4 off 2 1/2; Mar 1.29 3/4 off 2 1/2; May 1.36 3/4 off 2.

#90283u0937 10/10/1990 ~United Press International

(OCT. 10) UPI - Oil prices began to fall in early trading after they had hit more new highs Wednesday on unfounded rumors that U.S. troops had moved into occupied Kuwait.

On the New York Mercantile Exchange, the U.S. benchmark West Texas Intermediate crude for November delivery was trading late this morning at $39.75 a barrel, down 70 cents from Tuesday's close and down significantly from its high of $41.15 a barrel earlier in the session. WTI opened at $40.80 on the Merc.

''When people started to see prices over $41 they decided to take profits. Traders are psychologically not comfortable over the $40-a- barrel range,'' said Peter Beutel of Pegasus Econometrics Group, Hoboken, N.J.

''There were rumors overnight that U.S. troops had been sent into Kuwait. That got London going and sent prices up here. The rumors were denied by the Pentagon,'' said Tom Bentz, director of trading at United Energy Inc. in New York.

''We're kind of pulling back. It's going to be a mixed market,'' Bentz said. ''We're having a little trouble in the prices for petroleum products. It could keep the crude hesitant and from making new highs.''

On the Merc, home heating oil for November delivery had slipped 2.65 cents to $1.035 a gallon after gaining 3.19 cents Tuesday, while November-delivery unleaded gasoline, which rose 4.51 cents Tuesday, was down 2.16 cents to 96.15 cents a gallon.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent crude had gained 15 cents in morning trading to $41.75 a barrel.

The United Arab Emirates' Dubai Light, the key OPEC crude from the Middle East shipped mainly to the Far East, dropped 95 cents from Tuesday to $34.45 a barrel.

On the U.S. Gulf Coast spot market, prompt-delivery WTI fell 50 cents to $39.90 a barrel.

#90283u0941 10/10/1990 ~United Press International

SEATTLE (OCT. 10) UPI - Guard Gary Payton, the No. 2 overall choice in the NBA draft last spring, was expected Wednesday morning to sign a five- year contract with the Seattle SuperSonics worth more than $2 million a year, team officials said.

Sonics president Bob Whitsitt said he and Payton's agent, Don DeJardin, agreed Tuesday night on the contract, ending a five-day holdout for Payton.

Whitsitt said the point guard from Oregon State was expected to reported to

the team's training camp in Lacey Wednesday after signing his contract in Seattle.

The Sonics are believed to have raised their initial offer of $1.7 million per season to more than $2 million. DeJardin lowered his proposal of $2.67 million per year.

Sonics Coach K.C. Jones, who has projected Payton as a starter since his selection in the draft, said Payton probably would participate in a scrimmage Wednesday night.

The 6-foot-4 Payton, chosen college player of the year by Sports Illustrated, averaged 25.7 points, 8.1 assists and 3.5 steals in his senior season for the Beavers.

#90283u0956 10/10/1990 ~United Press International

COLUMBUS, OH (OCT. 10) UPI - The latest Columbus Dispatch Poll shows a majority of Ohioans are against State Issue 3, the Lorain casino proposal, the newspaper reported Wednesday.

The poll also shows the other two issues on the Nov. 6 statewide ballot are favored by voters. State Issue 1 would allow the state to provide housing assistance and State Issue 2 would expand the homestead tax reduction.

The mail poll of 1,597 registered Ohio voters was conducted Sept. 28 through Oct. 4. It showed 55 percent opposed to the casino proposal and 37 percent in favor, with 8 percent undecided.

A similar poll conducted by the newspaper a month earlier had 47 percent approving the issue, but the difference may have resulted from a change in the question's wording. The latest poll used the first paragraph of the official ballot language, which had not been adopted when the previous poll questionnaire was drafted.

The latest poll asked:

''Should the Ohio Constitution be amended to authorize the licensing of a casino resort hotel, including games by electronic and mechanical devices, for profit, in the city of Lorain as a pilot project for a period not yet specified, but for not less than five years, if approved by the voters of the city of Lorain?''

The earlier poll was worded to emphasize the proposal was a pilot project ''to determine the impact of such a facility on economic development and travel and tourism in Ohio.''

That question was based on proposed language then pending before the Ohio Ballot Board.

The proposal by Lorain developer Alan Spitzer is for a $400 million hotel-entertainment complex. If approved by Ohio voters, the amendment would allow Lorain residents to vote on bringing Ohio's first casino to that city. It also would empower the Legislature to establish seven other casino districts across the state.

The casino opponents are spearheaded by various religious groups and the horse racing industry. Race tracks, which enjoy extensive tax breaks from the state, would be forced to pay additional taxes if Issue 3 passes.

On the other issues, the poll showed 43 percent of the participants favoring Issue 1 with 33 percent against and 24 percent undecided. Eighty-nine percent of the respondents favored Issue 2 with only 3 percent against and 8 percent undecided.

The poll is considered accurate to within 3 percentage points.

#90283u1017 10/10/1990 ~United Press International

LONDON (OCT. 10) UPI - Rumors U.S. forces had entered into Kuwait and Iraq sent stock prices lower in cautious trading Wednesday on the London International Stock Exchange.

Stocks also fell on the Frankfurt Stock Exchange.

The London Financial Times 100-stock index, which tumbled 67.5 points Tuesday, eased 12.3 points to 2,121.8. The narrower top 30 industrial average slipped 13.8 points to 1,626.7.

Volume amounted to around 427 million shares compared with 824 million shares chnaging hands Tuesday.

Market watchers said increased tensions in the Middle East coupled with rumors of U.S. troop movements combined to send stocks lower.

A Pentagon spokesman denied U.S. forces in the Persian Gulf have been mobilized, and stocks recovered some of their lost ground.

Among the most widely traded stocks, Cable and Wireless lost 19 cents to $7.40.

The oil sector was boosted by the increase in North Sea Brent crude to more than $40 per barrel, a 10-year high, and increased tensions in the Gulf.

Enterprise Oil added 15 cents to $13.06.

Midland Bank PLC fell 25 cents to $3.75 amid adverse comments on its planned merger with a Hong Kong bank.

Barclays Bank PLC lost 31 cents to $6.82 in a generally weak banking sector amid a resurgence of bad debt worries.

Amstrad, the consumer electronics company, lost 11 cents to $1.09 after reporting its profits slipped to $86 million from $151 million.

Elsewhere in Europe, stock prices closed lower in light trading on the Frankfurt Stock Exchange.

The closely watched German Stock Index, which fell 32.12 points Tuesday, lost 26.30 points - or 1.8 percent - to 1,407.11.

Traders said stocks fell amid a combination of facors including worries over the Middle East and surging global oil prices.

FRANKFURT, Germany (OCT. 10) UPI - Bundesbank President Karl Otto Poehl Wednesday cautioned against lowering interest rates in reaction to recent fluctuations in financial markets spurred by rising oil prices and the weakening U.S. dollar.

''It would be wrong to respond to a crisis-prone situation with a policy of cheap money,'' Poehl said in a speech opening an international conference of banking authorities.

''It would undermine the credibility of our central banks and thereby the stability of our economic system,'' he said.

Poehl said he was concerned about skyrocketing oil prices, which hit a record high of $41 a barrel in New York Tuesday. The price of oil has jumped Iraqi invasion of Kuwait Aug. 2.

However, he warned central banks against hasty cuts in interest rates to stabilize financial markets.

Poehl said he was also worried about increases in Germany's public debt resulting from the costs of unification, which was completed Oct. 3.

The German government recently lifted this year's debt ceiling to about $64.5 billion to finance the rehabilitation of the crisis-ridden economy in the former East Germany.

''I have no illusions about the financial dimensions of this process, '' Poehl said in regard to the costs of unification, but added the dynamic market in the unified Germany could propel global economic growth.

Poehl told the 200 delegates from 100 countries that central banks can only act as effective monetary bodies if they are politically independent.

The Bundesbank, the German central bank which confers with the federal government but acts independently, has often been credited for its successful

monetary policies which have kept a tight lid on German inflation.

#90283u1066 10/10/1990 ~United Press International

MILWAUKEE (OCT. 10) UPI - Briggs & Stratton Corp. said Wednesday it was voluntarily recalling 850,000 fuel tanks on all Quantum Power lawn mower engines sold after July 1, 1989, because of a possible fire hazard.

Briggs & Stratton said it issued the recall in cooperation with the U.S. Consumer Product Safety Commission because fuel tanks on the engines may leak gasoline, which could cause a fire under certain conditions.

While eight fires have been reported to the company, only one minor injury has been reported, the company said Wednesday.

The engines being recalled were installed on more than 100 brands of walk-behind lawn mowers. The company said consumers should check their lawn mower engines for the words ''Quantum Power'' on the top of the engine. If the words appear on the top of the engine, the fuel tank is subject to recall.

Briggs & Stratton said Sears, Snapper and Toro produced some lawn mowers using Quantum Power engines, but the brands did not have the Quantum Power marking.

The company said consumers owning Sears, Snapper and Toro walk-behind mowers purchased after July 1, 1989, should check the model number on the engine to determine whether their engine is being recalled.

The model number is found on a stamped metal plate just above the spark plug. The company said if the first two digits of the model number are ''12,'' then the fuel tank is subject to recall.

Briggs & Stratton said consumers who have a lawn mower engine involved in the recall should immediately check the fuel tank for leakage. If fuel is leaking, the company said consumers immediately should arrange for replacement at one of the 16,000 authorized Briggs & Stratton dealers at no charge.

If the tank is not leaking, the company said consumers should schedule an appointment at the nearest Briggs & Stratton dealer for free replacement of the tank.

The company warned consumers against storing mowers near an open flame or a device using a pilot light, such as a water heater.

Briggs & Stratton said consumers with questions about the recall could call the company toll-free at 1-800-328-4457 Monday through Friday between 8:30 a.m. and 4:30 p.m. CDT.

#90283u1068 10/10/1990 ~United Press International

MIAMI (OCT. 10) UPI - Tropical Storm Marco formed in the Gulf of Mexico Wednesday from a low pressure system that swallowed up the remains of Tropical Storm Klaus.

Forecasters expected the storm to skirt along Florida's west coast, flinging scattered bands of rain across the peninsula.

Tropical storm warnings were in effect on Florida's Gulf coast from Everglades City to Longboat Key. A tropical storm watch was in effect from Longboat Key to Apalachicola in the Panhandle.

Small craft in the warning and watch areas were advised to stay in port.

At noon EDT, Marco was centered near latitude 25.4 north, longitude 82.9 west, or about 180 miles south of Tampa. It was moving northwest near 10 mph and was expected to turn north during the next 12 to 24 hours.

Marco's maximum sustained winds were near 40 mph, just 1 mph over the tropical storm threshold, and forecasters at the National Hurricane Center in Miami said strengthening was likely during the next day or two.

Tropical storm-force winds extended up to 175 miles from the center, mainly in the western half of the storm.

Forecasters said Marco would generally be a threat only to the marine community.

''However, as the center moves northward winds will shift to the southwest, causing seas to rise 1 to 3 feet, producing coastal flooding and beach erosion '' said hurricane center director Bob Sheets.

Marco is the 13th named storm of the Atlantic-Caribbean hurricane season, which runs from June 1 to Nov. 30. There have not been as many since 1969, when there were 14 named storms.

Marco formed out of a low pressure system that moved over Cuba Tuesday. That system swallowed up the dissipated remains of Tropical Storm Klaus, which killed six people as it moved over the Lesser Antilles last week.

Klaus's remains moved over south Florida Tuesday, dumping 3 inches of rain on Key West and more than 2 inches on parts of Dade County.

Since Klaus no longer had a recognizable center, the merged system was given a new name instead of being declared a rejuvenated Klaus.

#90283u1091 10/10/1990 ~United Press International
DHAKA, BANGLADESH (OCT. 10) UPI - Thousands of opposition party supporters Wednesday tried to lay siege to the nation's main government office, sparking bloody clashes with police that left at least five people dead and 200 others injured, hospital and witnesses said.

The unsuccessful attempt to surround and cut off the Central Secretariat building was part of a month-long anti-government agitation by the opposition left-wing Awami League and the centrist Bangladesh Nationalist Party.

The anti-government agitation seeks the ouster of the government of President Hussain Muhammad Ershad.

Demonstrators fought with police at several places in the capital city of Dhaka as they tried to reach the government building, witnesses said.

Road blocks were erected and all approaches to the secretariat were sealed by police, who beat party activists and fired several shots as the situation deteriorated, police said.

Police said two people were killed but hospital and witnesses claimed the death of at least five people. They said 200 others were injured, 11 of them shot.

The angry protesters attacked shops and government offices. They also set ablaze several private vehicles, including six vehicles of the U.S. Embassy.

Later, Awami League and Bangladesh Nationalist Party leaders called for a general strike to protest the the shootings.

General Ershad seized power from an elected government in a bloodless coup in 1982 and obtained a five-year presidential term in elections in 1986 that were boycotted by the major opposition parties.

Opposition leaders say there cannot be free and fair elections under Ershad.

CAPE TOWN, SOUTH AFRICA (OCT. 10) UPI - The government freed 21 political prisoners Wednesday in the largest mass release of convicted members of the African National Congress since President Frederik de Klerk lifted a 30-year ban on the movement in February.

Following emotional welcome scenes, the ANC demanded the immediate release of all its members being held for politically motivated crimes. It said in a

statement on ANC prisoners, ''No one should continue to endure any form of punishment.''

A conciliatory statement issued by the 15 prisoners freed from the offshore Robben Island maximum security prison endorsed the racial reform process launched by de Klerk in February and called on all supporters of the ANC ''to give peace a chance.''

The ANC had said the other six prisoners would be freed from four other South African prisons. A Prisons Service spokesman confirmed 21 prisoners were released but was unable to provide details.

As many as 100 cheering relatives and friends welcomed the 15 at the Cape Town harbor quayside, many weeping with joy and several shouting ANC slogans. The crowd quickly mobbed the group, helping them to carry the cardboard fruit boxes full of their belongings.

''We are happy to be released and to be back with the community,'' former prisoner Vrona Banda said on behalf of the Cape Town group. Banda, sentenced in 1983 to 12 years imprisonment on treason charges, was not due for release until 1995.

''We call upon all peace-loving South Africans to support the peace initiative and also urge all those who do support the ANC to give peace a chance,'' he said.

Banda also called on de Klerk to remove all obstacles still standing in the way of power-sharing negotiations between the white government and the black majority.

The releases Wednesday, coinciding with a national holiday honoring the Afrikaner nationalist hero Paul Kruger, raised to 66 the number of prisoners freed since Aug. 2, when the ANC announced a suspension of its 29-year guerrilla war in exchange for agreement on the release of an estimated 1,500 political prisoners by April 1991.

It also was the largest prisoner release since de Klerk lifted a 30- year ban on the ANC in February and ordered the release of black nationalist leader Nelson Mandela from 27 years imprisonment on sabotage charges.

Tuesday, Mandela visited Robben Island - the facility where he spent most of his incarceration - and briefed 20 ANC prisoners about the release program and plans for the return of thousands of political exiles.

There remain some 246 political prisoners on the island - South Africa's Alcatraz - including 17 members of the radical breakaway Pan Africanist Congress.

#90283u1102 10/10/1990 ~United Press International
WASHINGTON (OCT. 10) UPI - The State Department released a letter Wednesday in which Israel promises for the first time not to provide housing for new Soviet immigrants in the occupied territories, including East Jerusalem.

The letter, signed Oct. 2 for the Israeli government by Foreign Minister David Levy, was sought by the United States as a condition for providing Israel with $400 million in housing loan guarantees for recent immigrants from the Soviet Union.

In the letter, Levy, a former housing minister who aggressively pushed a program of new settlements, including in East Jerusalem, told Secretary of State James Baker, ''The government of Israel's policy is not to direct or settle Soviet Jews beyond the green line.''

The ''green line'' is the political boundary that marked the border of Israel before the 1967 Six-Day War. At that time, the West Bank, Gaza, and Arab East Jerusalem were outside the green line.

Since the war, Israel has officially annexed the Old City of Jerusalem and about 26,000 surrounding acres, but the annexation is not recognized by any other country, including the United States.

The status of Jerusalem surfaced again last week when Prime Minister Yitzhak Shamir announced ''a new neighborhood'' of settlements in East Jerusalem, just hours after Baker announced the agreement with Levy.

Baker immmediately ordered one of his senior aides to notify the Israelis that the United States was going to publish the letter Levy had signed, pledging no housing for Soviet Jews in the occupied territories.

Although the make-up of Shamir's announced ''new neighborhood'' has not been disclosed, the language of the Levy letter would appear to bar any Soviet immigrants from living in the new housing.

Further, the letter makes clear that the loan guarantees could not be used for East Jerusalem. Levy's letter said, ''The housing loan guarantees will be restricted to the geographic areas which were subject to the government of Israel's administration prior to June 5, 1967.'' That language would include East Jerusalem.

Those words in the letter also contradict statements made by Levy as he returned to Israel. Jerusalem Radio quoted him as saying he had ''made it clear that Israel did not promise Washington anything in order to receive the loan guarantees to fund immigrant absorption.''

The letter makes several promises about the future of the settlements and the new immigrants, including the pledge that the Israeli government would not encourage Soviet Jewish immigrants to settle ''beyond the green line.''

Levy also promised in the letter to provide the U.S. government with periodic reports on new housing plans, and to open the Israeli government's books on its financial support for other settlement activity.

That would be the first time the Israeli government has made such a concession on the settlement issue, in which there is a continuing disagreement with the United States, which opposes such settlements in the occupied territories.

The recent flood of immigrants, expected to reach 120,000 this year alone, has strained Israeli finances and has alarmed Arab countries who feared that settling the Soviet arrivals in the occupied territories was a way of displacing Palestinian Arabs and preempting any negotiated solution on the future of the territories.

#90283u1129 10/10/1990 ~United Press International
CARACAS, Venezuela (OCT. 10) UPI - Nine Latin American presidents are to gather Thursday to analyze President Bush's plan for a common hemispheric market spreading from the Arctic tundra to the wind-swept island of Tierra del Fuego.

The presidents hope to put their own stamp on the ''Bush initiative'' and take strides toward the elusive, century-old dream of Latin American integration.

''What can a Venezuelan or a Latin American expect from the meeting of nine presidents?'' asked the summit host, Venezuelan President Carlos Perez. ''That finally we make the Latin American integration a reality that up to now has been rhetoric.''

Bush proposed June 27 a new economic order in the hemisphere, the creation of a free trade zone similar to that taking effect in Europe in 1992.

The proposal has generated mostly favorable responses from Latin American leaders who already had begun serious efforts at creation of common markets. The fall of the communist regimes in eastern Europe, political changes in the Soviet Union and the 1992 combining of the economies of western Europe have

pushed Latin America toward creation of economic blocks of its own.

''Latin America runs the risk of being excluded from the important benefits that the new situation has generated,'' said Chilean President Patricio Aylwin the first leader to arrive for the summit.

Besides Perez and Aylwin, participating in the two days of meetings will be presidents Carlos Menem of Argentina, Fernando Collor de Mello of Brazil, Cesar Gaviria of Colombia, Carlos Salinas de Gortari of Mexico, Alberto Fujimori of Peru, Rodrigo Borja of Ecuador and Luis Alberto La Calle of Uruguay.

Mexico already has begun negotiations with the United States to form a free trade zone. The economies of the United States and Canada operate under a similar agreement.

Since Gaviria took office Aug. 7, Colombia has been pushing the Bush administration for special trade concessions to help its economy as it battles the powerful cocaine cartels that operate in the country.

''Colombia hopes to be the second country (after Mexico) to take advantage of the Bush initiative,'' said a top government official.

Several regional integration efforts also already are underway.

In South America, Brazil, Argentina, Uruguay and Chile have set a target date of Dec. 31, 1995, for form a common market.

''We now have a decree of common agreement,'' said Chilean Foreign Minister Enrique Silva Cimma. ''Even if there now exist some differences about economic policy, in December of 1995 integration must be a reality.''

The presidents of Mexico, Colombia and Venezuela also have begun discussions and called for studies on proposals for common electrical system running from Venezuela through Central America to Mexico.

Latin American political and economic integration was first proposed by Simon Bolivar, the general who freed much of South America from Spanish rule at the beginning of the 19th century. But the concept was never widely accepted and his dream has lain dormat since.

#90283u1136 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI - The Senate killed a proposed cut in Social Security taxes Wednesday after a warning that the reduction would deny the national treasury more than $150 billion in revenues and virtually torpedo any budget agreement.

The Senate rejected the legislation 54-44 on a procedural vote - it exceeded the budget ceiling - precluding a vote on the question of cutting the tax rate and putting Social Security on a pay-as-you-go basis.

The point of order was raised by Sen. Ted Stevens, R-Alaska, and it would have taken a 60-vote majority to override it.

''They have not told us where the money will come from,'' he said. ''Somebody will have to come up with $150 billion in revenues if this passes.''

The vote also killed two amendments, both proposals to change the Social Security system, which had drawn strong backing.

One, proposed by Sen. Rudy Boschwitz, R-Minn., would have ended the earnings limitation. Presently, Social Security beneficiaries between 65 and 70 lose $1 for every $3 they earn above $9,360.

The other, offered by Sen. Tom Harkin, D-Iowa, would have provided additional benefits for ''notch babies'' born between 1917 and 1926, who, through a quirk in the law, receive sometimes as much as 27 percent less than those born before them. The estimated cost was $4.5 billion a year through the middle of the century and then declining.

Sen. Daniel Moynihan, D-N.Y., the prime sponsor of legisislation to reduce Social Security taxes, said he ''never expected'' final congressional action in the final weeks of the session, but promised to bring the issue back next year.

Sen. James Sasser, D-Tenn., chairman of the Senate Budget Committee, said Congress would have backed Moynihan ''at another time in another way'' but not in the middle of attempts to fashion a deficit cutting budget.

''The Moynihan proposal will become a reality,'' Sasser said. ''It is an idea whose time has come.''

The Moynihan bill would have reduced revenues for the Social Security trust fund by $3.9 billion in fiscal 1991 and by $110.6 billion over five years.

Revenues paid to the Social Security trust fund, as well as several other trust funds, are calculated as income for the federal government and reduce the federal deficit.

Moynihan first proposed a retroactive repeal of last January's increase from 6.06 percent to 6.2 percent in the Social Security tax rate and a reduction to 5.1 percent in January 1991, that would have slashed revenues by $38 billion over two years.

The bill, however, would have reduced the tax rate to 6.06 percent in January of next year and then would have dwindled to 5.1 percent over six years.

Under the Moynihan bill, the tax rate would stay at 5.1 percent from 1996 through 2009 and then gradually climb to 8.1 percent in 2055. It would reach the current 6.2 percent in 2015.

At the same time, the taxable income would have increased from $54, 300 to $55,500 in January and climbed to $85,500 in 1996.

The Moynihan bill would have provided, at the end of 1995, a reserve equal to at least 18 months of benefit payments.

Moynihan said his proposal would have meant an ''immediate increase in take-home pay'' for 132 million American workers and after six years, a family with two incomes would have an increase in yearly income up to $1,544.

The legislation was called up only hours after the Senate gave final approval to a five-year, $500 billion cut in the federal deficit, including $40 billion in fiscal 1991.

-30- 3744

#90283u1142 10/10/1990 ~United Press International

KIGALI, Rwanda (OCT. 10) UPI - France and Belgium Wednesday urged the east African country of Rwanda to avoid human rights abuses in countering an 11-day-old rebel refugee invasion from Uganda, as diplomats in Kigali expressed concern at the apparent disappearance of numerous people in the capital.

''There have been a lot of arrests - between 1,500 and 3,000,'' said one Western diplomat, who spoke anonymously by telephone to Nairobi. ''There are people who have been disappeared.''

The French Foreign Ministry urged the government of President Juvenal Habyarimana to begin dialogue with all the country's political and ethnic groups, and said it had been in touch with other regional states, including Uganda, on ways to find a peaceful solution to the war.

Habyarimana promised a press conference for late Wednesday.

After about 1,500 rebels led by Maj. Gen Fred Rwigyema stormed into the country on Sept. 30, France, Zaire and Belgium all sent troops to Rwanda, but stressed their mission was to protect their resident citizens.

Ugandan President Yoweri Museveni, who has professed ignorance of invasion plans and closed his border to stop more rebels entering, meanwhile, accused Belgium - Rwanda's former colonial master - of failing to help solve the

country's refugee problem.

Museveni said Belgium was in part responsible for the flight of thousands of Rwandans to Uganda from tribal massacres in the early 1960s. Rwanda became independent in 1963.

A Belgian Foreign Ministry spokesman said Foreign Minister Mark Eyskens had twice expressed concern to Rwanda over reports of possible human rights violations and had received assurances that no such violations were taking place.

''They are ... arresting VIPs, army officers, intellectuals and so on,'' the Kigali diplomat said, however.

''It's not clear if this is a sort of preventative measure - let's arrest anyone who might be opposition - or whether they're lining up for a major human rights abuse,'' he said.

Detentions began last week after groups of armed men attacked installations in and around Kigali.

Initial reports said most of those rounded up were being held at Kigali's Nyaminambo sports stadium. But reporters who visited the stadium found it empty late Tuesday, and the whereabouts of the detainees was not known.

The Western diplomat said a lot of those detained were from the minority Tutsi tribe, but that the majority Hutu were not exempt.

''There's an element of randomness to the arrests,'' he said. ''People are being picked up on the street on the way to work.''

The rebels, still fighting an intense bush war in northern Rwanda, have denied that theirs is a tribal war and have also denied ever coming near Kigali. They accused the government Tuesday of sheltering behind foreign troops sent to Rwanda while waging a campaign of persecution against its citizenry.

A spokesman for the rebel Rwandese Patriotic Front said Monday in Brussels that all the security forces were doing ''is arresting people and leaving the security of the city to the Belgians.''

Both Rwanda and its southern neighbor Burundi have a history of some of the most bloody tribal massacres on the African continent. Up to 60, 000 people may have died in a Tutsi massacre of Hutu in Burundi in 1988.

There are 80,000 Rwandan refugees in Uganda, about 250,000 in Burundi and 23,000 in Tanzania.

Would-be rebel volunteers in Uganda have claimed their assault was partly

motivated by outrage at statements from Habyarimana this year that Rwanda was too overcrowded to allow its exiles to return home.

Rwanda is the most densely populated country in Africa. USAID Rwanda director James Graham warned Wednesday the war threatened to hasten a famine that threatens most of the country this fall.

#90283u1158 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI - The Supreme Court heard oral arguments Wednesday in a case pitting a woman's right to work against a company's attempt to protect the unborn children of its employees.

The ''fetal protection'' case, perhaps the most volatile of the court's 1990-91 term, will determine whether a company has the right to exclude all fertile women from certain jobs because of the fear they could become pregnant and their fetuses exposed to danger.

Women's rights groups and labor unions claim the policy violates Title 7 of the Civil Rights Act of 1964 and the Pregnancy Discrimination Act of 1978.

If the court upholds the policy of Johnson Controls Inc. of Milwaukee, Wis., a manufacturer of lead-based batteries with plants nationwide, it would relegate women to ''second class status'' and have a major impact on jobs nationwide, said Marsha Berzon, a lawyer for eight Johnson Controls workers and their union, the United Auto Workers.

''It would keep women from a broad range of jobs,'' she said, explaining that such policies could be used to exclude women from jobs involving toxics, stress, noise and accidents.

The American Civil Liberties Union claims the case could affect 20 million women and could be abused to keep them from high-paid jobs.

Upholding the policy would lead to ''resegregation of the workforce,'' Berzon told the justices. ''It would cut the heart out of Title 7 and the Pregnancy Discrimination Act.''

But Stanley Jaspan, a lawyer for Johnson Controls, said the real issue is whether companies can protect unborn children.

Johnson Controls claims it is a leader in employee safety measures and that its fetal protection policy was instituted in 1982 only after a voluntary policy failed. In the previous 3 1/2 years, eight women became pregnant while exposed to levels of lead that could cause birth defects.

Lead exposure levels established by the Occupational Safety and Health

Administration are too lax, said Jaspan, who said the Centers for Disease Control recommends all women of childbearing age be excluded from jobs with high lead exposure levels.

Justice Antonin Scalia said Johnson Controls is asking district courts to decide, on a case-by-case basis, what levels of exposure to toxics are legally safe.

''It puts us in a very unusual situation of becoming medical experts, '' said Scalia.

And some justices said safety concerns such as those raised by Johnson Controls were used for years to justify keeping women from certain jobs.

''It seems to me that you are not coming to grips with the Pregnancy Discrimination Act,'' Justice Sandra Day O'Connor, the only woman on the bench told Jaspan.

Johnson Controls claims its policy is legal under the ''BFOQ'' defense of Title 7, which allows sex discrimination ''in those certain instances where... sex... is a bona fide occupational qualification reasonably necessary to the normal operation of that particular business or enterprise.''

Berzon said Johnson Controls does not meet that standard.

A U.S. District Court and the U.S. 7th Circuit Court of Appeals, however, upheld the policy as justified by business necessity.

In a separate case, courts in California ruled Johnson Controls' policy violates that state's anti-discrimination law.

Jaspan said the policy also is in keeping with the Pregnancy Discrimination Act, which bans discrimination against women who can perform their jobs ''safely as well as efficiently.''

Johnson Controls maintains fertile women cannot perform jobs in lead exposed areas safely because a possible fetus could be harmed - not because the worker herself faces undue risk. And since it cannot know which women will become pregnant, the company claims it is justified in excluding all fertile women from certain jobs.

"That was always the justification" for pregnancy discrimination, said Scalia. ''To continue to allow that exemption is to make a farce of the Pregnancy Discrimination Act. ... You're making it a ridiculous piece of legislation.''

Jaspan countered that Congress never intended for an employer to be forced to ''injure a child.''

Many companies say fetal protection policies are needed to protect them from lawsuits that could arise if babies of employees are born with birth defects.

A ruling in the case is not expected before next year.

#90283u1164 10/10/1990 ~United Press International

CALCUTTA, INDIA (OCT. 10) UPI - Nobel laureate Mother Teresa was awarded the 1990 Soviet Land Nehru award Wednesday for her contribution to the ''cause of humanity,'' the Soviet Union consulate announced.

''I am most grateful for awarding the prize. I accept it for the glory of God and good of our poor. God bless you,'' said the 80-year-old Roman catholic nun in a letter to the Soviet consulate in the communist- ruled West Bengal state capital city of Calcutta, 830 miles southeast of New Delhi.

All the previous recipients of the Soviet Land Nehru award were either communists or closely associated with different Soviet-sponsored organizations.

Soviet Land is a magazine published in all major Indian languages by the Soviet embassy in New Delhi.

The award will be handed to Mother Teresa on Nov. 14 during a celebration to mark the birth anniversary of Jawaharlal Nehru, India's first prime minister, said a Soviet consulate official.

''Mother Teresa has been awarded ... for her outstanding contribution to the cause of humanity at large,'' said the consulate.

The award carries a cash price of $5,500 and a two-week visit to the Soviet Union.

The nun in April announced her retirement, saying she wanted to step down as head of the Missionaries of Charity, an order she founded, because of poor health and advanced age.

But she was re-elected last month to a six-year term as head of the charity.

Mother Teresa, who came to India in 1929, has suffered coronary problems for several years and surgeons last year implanted a pacemaker near her heart.

Doctors have advised her to restrict her activities, but Mother Teresa at the time of her re-election said she had to leave retirement.

ATLANTA (OCT. 10) UPI - John Schuerholz left his job as general manager of the Kansas City Royals Wednesday to become general manager and executive vice president of the Atlanta Braves.

Schuerholz, 50, succeeds Bobby Cox, who held the dual post of manager-general manager. Braves President Stan Kasten said Cox will remain field manager.

The Braves finished at 65-97 last season, the worst record in baseball. They were 26 games behind the first-place Cincinnati Reds in the National League West.

Schuerholz joined the Royals in 1968 as an administrative assistant. He became assistant farm director in 1970 and farm director in 1975. He was named major-league Executive of the Year in 1985 when the Royals won the World Series.

#90283u1217 10/10/1990 ~United Press International

MONROVIA, LIBERIA (OCT. 10) UPI - In the mangrove swamps at the end of the runway of Monrovia's Spriggs-Payne airfield lies the bloody legacy of Samuel Doe's 10-year rule.

Hundreds of skulls peered out from the long grass and bleached, clean bones lay on the dark, wet mud of the killing fields discovered Wednesday by advancing troops of the West African Peacekeeping Force.

Picked clean by insects, perfectly preserved skeletons of slaughtered victims were wrapped in their rotting shorts, T-shirts and skirts.

Others, with smashed skulls, lay naked, the dissolving flesh falling from their bones into the mud.

''They used to come at night,'' said one man who lost five members of his family to Doe's death squads. ''They knocked at the door and said, 'The chief wants to see you.' Then they would take you either to the beach or, more often to the airfield.''

A UPI correspondent counted more than 100 skulls scattered around the end of the runway, but could see more bones littered throughout the dense undergrowth into inaccessible swampland which stretches for miles beyond the airfield.

The killing site was a chilling reminder of the brutality of the decade-long rule of Doe, who was tortured to death on Sept. 9 by rebel leader Prince Johnson.

Thousands filed past his mutilated body when it was exhibited with ears, fingers and toes missing at a Monrovia hospital.

Atrocities and indiscriminate killings have been committed by all sides in Liberia's 10-month civil war.

The peacekeeping force's offensive against rebels in the east of Monrovia also gave access to the St. Peter's Lutheran Church, where Doe's soldiers butchered 600 refugees from rival tribes on July 29.

In a largely destroyed, deserted part of the city, journalists walked through the church's wide-open doors into the stinking, silent nave.

Half-clothed, decomposed heaps of flesh were splayed out on the floor, which rippled with the dull sheen of millions of maggots.

Contorted bodies lay huddled beneath the church pews, while others were piled up in a dark corner beside the altar.

In the choir balcony, entangled corpses testified to vain attempts to escape.

In the classrooms of the adjacent school building, used as dormitories, bodies woken from their sleep by the murderous soldiers were rotting into their mattresses.

On the first floor in a large meeting hall set aside for women and children refugees, clothes clung to the skeletons of female and underaged victims.

Upturned buckets, saucepans and other cooking utensils lay scattered on the floor. Dogs leaped over the bodies.

Shooting broke out when a surviving unit of Doe's disintegrated army that was patrolling the area caught journalists at the church. Col. Michael Tilly, feared by Liberians as the leader of Doe's death squads, accused the reporters of being spies.

Three officers from the West African Peacekeeping Force confronted the group of 40 government soldiers and defused the confrontation, before escorting the journalists to a safe part of town.

#90283u1226 10/10/1990 ~United Press International

NAIROBI, KENYA (OCT. 10) UPI - Kenyan President Daniel arap Moi said Wednesday his security forces uncovered links between armed dissidents arrested this week and powerful politicians he said were plotting to bring down his government.

He pledged a major political crackdown, attacked western governments for sympathizing with his opponents and grouped prominent advocates of multi-party democracy, including internationally acclaimed lawyer Gibson Kamau Kuria, in the same category as the armed detainees.

''They (the opponents) have been saying by next month my government won't be in existence ... that I will not be in the country. Let them know that I will go nowhere for I have strong and loyal security forces at my disposal,'' the 66-year-old president said, addressing a huge crowd at Nairobi's Nyayo sports stadium on the occasion of ''Moi Day,'' the anniversary of his accession to power in 1978.

Kenyan security police Monday arrested a prominent dissident, Koigi wa Wamwere and a number of others at the Nairobi home of a lawyer, Rumba Kinuvia, uncovering five automatic rifles and large amounts of ammunition in the process.

Koigi had been thought to be in self-imposed exile in Norway. Western diplomats said they believed the weapons hoard pointed to a planned terrorist attack.

Further arrests followed, including that of Member of Parliament Chris Kamuyu, Kinuvia and another lawyer, Mirugi Kariuki.

Speaking in Swahili, Moi said the detentions were just the start of a major crackdown on his opponents and crushed hopes that two former cabinet ministers Kenneth Matiba and Charles Rubia, held without trial since July, would be released.

The president said the two men, who campaigned publicly for months for an end to one-party rule in Kenya, were being held ''for their own safety.''

Kenya's debate this year over its political future turned sour in July when Matiba's arrest was followed by five days of rioting and looting sparked by a pro-democracy demonstration that left at least 30 dead and hundreds injured.

Moi accused western governments of sympathizing with his political opponents who he said were not seekers after real deomcracy but sought to promote unrest for its own sake.

''We have been telling our friends from the western world that it is only us (Africans) who know and understand better what is happening in this continent and it is only us who can deal better with those bent on destabilizing the security of our nations,'' he said.

He said Kuria, who fled Kenya in July and is now working at Harvard University was not a genuine pro-democracy campaigner but ''a criminal who wants to cause bloodshed in his motherland.''

Kamau Kuria was awarded the 1988 Robert F. Kennedy Human Rights Award and the Human Rights Award of the Lawyers' Committee for Human Rights.

Moi's July crackdown on opponents drew international criticism and a 50 percent, $5 million military aid cut from the United States.

Kenya has been a de jure one-party state since 1982 and a de facto one since 1969. The government defends the system on grounds that multi- party democracy would cause a reversion to tribalism.

#90283u1239 10/10/1990 ~United Press International

NEW YORK (OCT. 10) UPI - Saks Fifth Avenue said Wednesday it would eliminate about 700 jobs, or about 7 percent of its work force, as part of a new five-year business plan.

The retailer also said it would invest about $250 million over the next five years, primarily on renovations of 12 older stores across the country.

The plan calls for increased emphasis on direct-mail business, equity participation and other incentives for employees, and a shift of resources to ''the selling floor.''

The company said in a statement it would eliminate or reduce ''redundant and marginal administrative positions and re-emphasize sales-oriented functions.''

The job reductions will be shared among the company's 47 stores nationwide and will be achieved by a mixture of attrition and layoffs, said a Saks spokeswoman who declined to be identified. She asaid the reductions would begin immediately and continue over ''a couple of months.''

Chairman and Chief Executive Mel Jacobs said the company would develop an ''entrepreneurial strategy'' in which 100 key employees would be offered equity in the company and others will be offered bonus incentives.

Despite a tough retailing environment, Saks is expecting ''satisfactory results'' for the current year, said Arthur Martinez, vice chairman.

He expressed confidence the fourth quarter, including the Christmas season, would produce sales and profit improvements for 1991, and added the company's targets are based on a conservative view of economic conditions.

''We have the substantial benefit of being able to plan for the future without being burdened by a highly leveraged financial structure, '' he said.

The company said it aimed to double its ''Folio'' direct-mail sales volume by 1995 and would continue to use Folio as a marketing vehicle for the stores.

Merchandising plans will focus on growth in women's fashion apparel, accessories and shoes, cosmetics and fragrances, and men's wear.

The retailer also said it would place greater emphasis on localizing its merchandise, improving merchandise planning and distribution, and controlling investory investment.

Monroe Greenstein, an independent New York-based retail analyst, said the announcement was a ''very solid move'' by Saks. ''It shows they are interested in the long-term health of the business and they are not in it just to make a quick buck and bail out,'' he said.

He said the renovation program was a response to similar moves by Saks' competitors, particularly the Neiman Marcus Group. He added Saks faces new competition in the New York area from Nordstrom Inc. of Seattle, which recently moved into New Jersey.

He said Saks is in a strong financial position due to an injection of equity capital by Investcorp, the international investment group that bought Saks earlier this year from the U.S. arm of London-based B.A.T Industries PLC.

He said a key to Investcorp's strategy with Saks is its allowing retailers, rather than financiers or real estate specialists, to run the company. ''This is extremely important,'' he said.

But another analyst who declined to be identified said the size of the work force reduction indicated the company was experiencing some difficulty.

''An ordinary cutback would be 3 percent; the 7 percent has to indicate a degree of difficulty,'' he said.

#90283u1243 10/10/1990 ~United Press International

ROME (OCT. 10) UPI - Italy's once-powerful Communist Party plans to drop the communist label and form a new party under the name Democratic Party of the Left, party leader Achille Occhetto announced Wednesday.

Occhetto, 54, made the long-awaited announcement at a meeting of the party directorate as he traced the reasons for the change and made a ''declaration of intent'' on the policies of the reformed party.

He said the main reason for the change was that ''the international communist movement has not succeeded in providing a reply to the problems for which it was designed.''

In dropping its communist tag the Italian party is following the line of most European communist parties in the collapse of communist regimes in Eastern Europe last year.

''I propose that the Italian Communist Party at its (forthcoming) 20th Congress, shall promote and sanction a new party,'' Occhetto said. ''I propose that the name of the new party shall spring from the great ideas that define the fundamental coordinates of the forces of renewal on a world scale - the idea of democracy as the way to socialism.

''I therfore propose that the name of the new party shall be the Democratic Party of the Left (Partito Democratico della Sinistra),'' Occhetto said.

He also proposed that the party's hammer-and-sickle symbol be changed to a ''great and robust tree ... which can become ever stronger only if alongside its deepest roots there grow always new roots to feed it,'' he said.

But at the bottom of the symbol there will remain a small hammer-and- sickle, with small crossed flags of the Italian Republic and the red socialist banner, and a small red star.

(OCT. 10) UPI - Congressional sources in Washington report that there may be little chance to derail a proposed multi-BILLION-dollar arms sale to Saudi Arabia, despite some misgivings. The Saudis have put together a seven-point-three-BILLION-dollar ''wish list'' that includes everything from high-tech tanks to attack helicopters. The sources expect the package will be delivered, given the current political situation in the Persian Gulf.

The Navy is calling off its search for eight Marines missing aboard two Huey helicopters that crashed on Monday during night maneuvers in the North Arabian Sea. The choppers were from the U-S-S Okinawa. Some debris was found during an air and water search, but NO survivors. Today, two more U-S airmen died in the crash of their Air Force F-111 fighter-bomber in the southern Saudi desert. The deaths raise to 31 the number of Americans to die in Operation Desert Shield.

Parts of Florida could get up to three inches of rain today. A storm watch and small craft warnings are in effect in the Florida Keys and along the Gulf Coast. Tropical Storm Marco formed in the Gulf of Mexico near the Keys last night from a low pressure system that swallowed the remnants of Tropical Storm Klaus. Marco's sustained 40-mile-an-hour winds are expected to intensify, but the National Hurricane Center says it will only be a threat to the marine community.

#90283u1283 10/10/1990 ~United Press International

GEORGETOWN, Texas (OCT. 10) UPI - A gamble on Japanese cattle that Americans once scoffed at as worthless is paying off for a retired stone carver who owns a stockpile of semen from Wagyu bulls valued at $2 million.

''People used to think I was crazy for having these cattle,'' said Don Lively, 62. ''But I made up my mind the Wagyu cattle business would be successful regardless of what it took.''

Lively said cattlemen and agri-business companies from all over the world now travel to his sprawling LoDo Ranch seeking to buy some of the semen so they can start breeding their own herds of Wagyu cattle.

Lively and his partner, rancher Fred Hildebrand, have already sold hundreds of the semen samples, used to artificially inseminate cows, for about $1 million. Each vial sells for $250.

The semen was collected from four Japanese bulls brought to the United States under a veil of secrecy 14 years ago. Lively says the semen is a rare commodity that could revolutionize the beef industry in the United States and Japan.

The bulls, whose names were Fuji, Judo, Mazda and Ryusho, died of old age several years ago. They are believed to have been the only cattle of the famed Wagyu breed to ever leave their homeland.

The Japanese have always been fond of the cattle and hesitant to share the breed with the rest of the world, Lively said. They have closely guarded the cattle and steadfastly refuse to export them.

''You'd be classified as a traitor if you brought it out of Japan,'' he said. ''The Japanese are resentful that we have Wagyu cattle. Some of them won't even admit these are Wagyu when we show the cattle to them.''

The Wagyu's tender, slightly sweet-tasting meat - called Kobe beef - is considered a delicacy that brings up to $180 a pound in Japan. U.S. breeders have always preferred stockier cattle to the spindly legged and sway-backed Wagyu, Lively said.

But interest in the Wagyu has grown since Japan announced it would lift beef import quotas by 1991.

''They can't increase cattle production in Japan,'' Lively said. ''They don't have the land. If you could raise Wagyu cattle here and be the first one to back into Japan with Kobe beef you got yourself a market - be it a niche or the corner on a billion dollars.

''It'll probably be a billion dollars,'' he said.

But Lively and others in the beef industry believe U.S. breeders could also reap huge profits from Wagyus in the domestic market, where some Wagyu cattle have sold for $20,000 to $30,000 a head.

That figure is about 10 times the going rate for average U.S. cattle.

Texas A&M University researchers believe Kobe beef is substantially lower in cholesterol than any other beef and may even reduce cholesterol levels.

''I guarantee you don't know what beef is until you've tasted this beef,'' said Lively. ''It's a healthier meat. I think it'll eventually be served in those white-tablecoth restaurants because it'll be expensive to buy.''

There are about 900,000 head of Wagyu cattle in Japan today, but only about 60 purebreds exist in the United States. Lively said he and his partner own most of those.

BOSTON (OCT. 10) UPI - In the latest twist in a nearly 30-year debate over the health effects of coffee, a study of more than 45,000 men found no evidence that coffee boosts the risk of heart disease or stroke, researchers said Wednesday.

The new findings, published in the New England Journal of Medicine, contrast with a recent California study, which found that heavy coffee consumption increases the heart attack risk by 40 percent.

''I think the public is increasingly feeling whipsawed,'' Dr. Harvey Wolinsky, a cardiologist at Mount Sinai Hospital and Medical Center in New York, said of the conflicting results.

Nevertheless, Wolinsky, who believes coffee is safe, called the new study reassuring. ''It's good news to hear that coffee drinking, which the American people consider a part of their day, is not bad for you.''

The research surveyed coffee, tea and caffeine consumption by 45,589 male health professionals ages 40 to 75 with no history of heart disease when the study began.

Questionnaires sent to the men during a two-year period found no indication that consuming even large daily amounts of caffeinated coffee or caffeine from any source increased the rate of heart disease or stroke, said Dr. Walter Willett of the Harvard School of Public Health in Boston.

However, researchers did find drinking more than four cups a day of decaffeinated coffee was associated with a ''moderate and marginally significant'' 50 percent increase in heart disease risk.

Willett called the findings on decaffeinated coffee ''somewhat surprising.'' Buthe cautioned they were based on small numbers - only 1, 512 men drank the decaffeinated brew in large amounts and 22 had evidence of heart disease by the end of the study.

The Boston researcher said he could not explain why decaffeinated coffee might have a different effect than coffee with caffeine, other than to note that a study last year found decaf appeared to increase cholesterol levels.

''People who drink decaf should not be altering their consumption on the basis of these findings alone,'' he said. ''But on the other hand, people should not switch to decaf if it is just out of concern about their heart attack risk.''

The Health Professionals Follow-up Study included more than 29,000 dentists, over 10,000 veterinarians and others involved in health care occupations. The researchers said the men, who averaged 54 years old, were ''not strictly representative'' of the male population because only 10 percent smoked and they consumed relatively little cholesterol.

Willet said people ''shouldn't put too much emphasis'' on the differences in results between his study and recent research led by Dr. Arthur Klatsky of Kaiser Permanente Medical Center in Oakland, Calif., which found drinking more than four cups of coffee daily increased the heart attack risk by 40 percent.

Willett said both studies stand in sharp contrast to a widely- publicized study three years ago which ''showed a 300 percent increase in risk from heavy coffee drinking. Our study doesn't show that and neither does Kaiser's.''

Klatsky speculated his research may have differed in part because participants more accurately reflected the general population, including minority groups, women and people from various social and economic backgrounds.

More than 50 percent of those in Klatsky's study were women and their increased heart attack risk from heavy coffee consumption was 60 percent, versus 30 percent for the men, he said. In addition, about one- third of those in the study were smokers and one-third past smokers.

''It's hard to say why the studies differ,'' Klatsky said. ''There are aspects

of the subject that remain unresolved and more studies are needed.''

Mount Sinai's Wolinsky agreed that the coffee controversy is far from over, despite the new findings.

#90283u1305 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI - After years of having its warnings and proposals ignored, the National Transportation Safety Board issued a ''call to action'' Wednesday and a ''most wanted'' list of 18 recommendations it wants to see adopted.

The proposals, aimed at the federal government, regulatory agencies, state governments and private industry, include suggestions to fight drunkeness on land, water and in the air.

''What we hope to do is to ensure that Congress, industry and the public have greater awareness of all of these issues and to enlist their help,'' said James Kolstad, board chairman. ''It's a call to action.''

Kolstad said the recommendations were adopted in no order of importance. But he expressed a personal ''favorite'' in a 1984 recommendation calling for passage of laws in all states allowing for administrative revocation of driver's licenses.

Such laws give officials the right to revoke licenses if drivers refuse to take sobriety tests or are found to be legally intoxicated.

''We found it's the single most effective way to get drunken drivers off the road and drunken drivers account for 50 percent of all the nation's highway fatalities,'' Kolstad said.

Twenty-seven states, as well as Puerto Rico, the Virgin Islands and Guam, were identified as jurisdictions that have not fully implemented such laws.

The board also called on most states to pass laws clearly defining the level of legal intoxication for recreational boat operators and calling for strict enforcement. That recommendation was originally issued in 1984.

In 1988, the board recommended airlines take steps to ensure that pilots are free of alcohol and drug convictions. The Federal Aviation Administration, the target of this recommendation, has moved toward screening and check-up requirements in the past year.

The board also recommended that:

-The Federal Railroad Administration require installation of a train control

system to prevent collisions.

-The FAA require the use of ground proximity warning devices in all planes certified to carry 10 or more passengers.

-The FAA require air traffic controllers to get a readback, or pilot acknowledgment, for all runway instructions, including takeoff and taxi maneuvers.

-The Coast Guard require the licensing of captains of commercial fishing vessels, and that fishing boats meet minimum standards for lifesaving equipment and emergency location equipment.

Other recommendations included proposals on auto safety belts, school bus safety, airplane structural testing and a series of steps - from alcohol testing to medical standards and safeguards against driver fatigue - regarding the heavy commercial trucking industry.

BONN, GERMANY (OCT. 10) UPI - German authorities appealed to spies in Germany to turn themselves in after they announced several more arrests of intelligence officials believed to have spied in West Germany for the former East German espionage network.

Among the latest arrests were Klaus Kuron, 54, and Gabriele Gast, both employees of the federal intelligence services. Later in the day, the federal prosecutor's office said police took eight other intelligence officials into protective custody.

When East Germany became part of the Federal Republic on Oct. 3, the two West German intelligence services automatically became the agencies for all of Germany.

Government spokesman Hans Klein said that former agents for the now- disbanded East German state-security ministry known as Stasi had provided the federal authorities with a wealth of information about espionage activities within ministries in what used to be West Germany.

Speaking of potential moles still in the ministries, he said that, ''They can assume that they will be uncovered and would be well advised to turn themselves in now.''

A spokesman for the federal prosecutor's office said Kuron was formally arrested Tuesday, three days after he turned himself in to the authorities.

Kuron worked for the Office of the Protection of the Constitution, while Gast,

arrested Sept. 30, was a director in the Federal Intelligence Agency. Both form the federal intelligence services.

The two alleged spies will be charged with ''high treason in a particularly serious case'' - a charge rarely used in the past, which carries a maximum sentence of life imprisonment.

Government officials said that the two had apparently worked for the Stasi, but did not exclude the possibility that the Soviet KGB may have had access to the secret information the pair provided.

The spokesman for the federal prosecutor's office said that Kuron had been paid about $322,000 by the Stasi to disclose the ''entire extent of his knowledge'' including files which ranked as ''top secret.''

He said that Kuron had worked with the West German intelligence service since 1962 and started providing information to the Stasi in 1982.

Kuron gave himself up to the German authorities one day after a KGB agent tried to recruit him, the spokesman said.

He said that Kuron admitted he last met with his Stasi contacts in February in Austria, an apparent confirmation that Stasi activities continued for months after East Germany's hardline Communist leadership collapsed last fall.

The massive Stasi apparatus - about 85,000 people worked full time for the ministry - was dismantled this year. Officials in charge of closing down the operations described the Stasi as the world's most efficient intelligence service.

In recent months, authorities have arrested several people suspected of espionage after receiving information from ex-Stasi officials.

Investigators are also looking for former East German foreign intelligence chief Markus Wolf, who claimed in a letter to Federal Prosectutor Alexander von Stahl that he was vacationing and will return to Germany to face charges.

Authorities reportedly searched Wolf's Berlin apartment for eight hours last Saturday.

#90283u1369 10/10/1990 ~United Press International

(OCT. 10) UPI - The road to a budget compromise may NOT be as smooth as first thought. Senate Democratic Leader George Mitchell says his party members may take a second look at tying a capital gains tax cut to increased taxes on the very rich now that President Bush has backed away from the tax hike idea. Bush has long championed the idea of a capital gains cut. He seemed to tie it to the tax increase at yesterday's news conference only to later reverse his stand.

The president may be stumping for G-O-P candidates around the country today, but he hasn't left the budget mess in Washington far behind. Bush told a breakfast fund-raiser for North Carolina Senator Jesse Helms in Raleigh that putting more Republicans in Congress would have made the budget story different.

The five Discovery astronauts plan to fly back to Houston this afternoon after undergoing medical check-ups at Edwards Air Force Base in California. The crew left the spaceplane about one hour after the orbiter glided in for a safe landing on runway 22. The shuttle usually lands on the dry desert lake bed, but NASA wanted to test its new braking system. The four-day shuttle mission sent the European probe Ulysses on a five-year trip to study the Sun.

Communist Party officials in Moscow say they will oppose any plans to return property in the Soviet Union to private ownership. And they also oppose the idea of the party giving up the property it has amassed over 70 years in power. Communist leaders also reject suggestions that the November 7th celebration of the 1917 revolution is NO longer relevant to modern-day Soviet culture.

The Washington Post says Pakistan has tried at least three times this year to buy advanced, high-temperature furnaces that can be used in the production of nuclear weapons. The paper says the furnaces are made by a New Jersey firm and are more technically advanced than similar equipment bound for Iraq that was halted by Customs agents in August. Pakistan, which denies it has a nuclear weapons program, reportedly used intermediaries in Europe and North America in a bid to obtain the equipment.

Pakistani authorities today arrested the husband of ousted prime minister Benazir Bhutto in Karachi. Asif Ali Zardari, a prominent businessman, was charged with plotting the April kidnapping of a wealthy British-based Pakistani who paid an 800- thousand-dollar ransom for his release. Zardari also may face charges of bank fraud. His wife, Benazir, is accused of official misconduct while she was prime minister of Pakistan.

#90283u1372 10/10/1990 ~United Press International

MOSCOW (OCT. 10) UPI - An advertised demonstration by prostitutes demanding better protection and legal brothels fizzled Wednesday when none of the ladies of the night showed up.

''Five hundred brothels in 500 days,'' said one slogan in a play on the 500-day economic market plan being championed by Soviet President Mikhail Gorbachev.

Yevgenia Debranskaya, an activist who has championed a variety of causes from human rights to rights for prostitutes and homosexuals, represented the prostitutes cause.

The prostitutes were expected to appear on Gorky Street in front of the Inturist Hotel to plead for better protection against police and doormen taking bribes for them and customers beating them up.

But Debranskaya said the prostitutes felt that it was not time yet to demonstrate in public. She explained for them, however, that prostitutes face constant danger and their medical needs are not looked after.

''Five billion condoms instead of one submarine,'' said a large banner unfurled on Gorky Street. Debranskaya then reached into a blue plastic bag and showered the onlookers with condoms.

''Moral tolerance in society is a guarantee of democracy,'' she said.

Once a taboo subject, sex is now discussed in the Soviet press, and newspapapers have analyzed the growing number of prostitutes at hotels for foreigners. AIDS is a frequent subject in newspapapers, and bookstores now sell volumes on sexual problems. Semi-nude calendars and posters are now sold by cooperatives at the entrance to the metro station by cooperatives.

#90283u1391 10/10/1990 ~United Press International

NEW YORK (UPI-FNNPRO) - The U.S. auto industry, faced with a weakening economy, continued strong competition from Japanese automakers and higher fuel prices, is headed for a tough year in 1991, analysts said Wednesday.

Already reeling from sharply lower earnings this year compared with 1989, the Big Three automakers may see their earnings decline further next year, industry watchers said.

''Clearly the economic environment is going to be tougher next year than this year,'' said Jean-Claude Gruet, an auto industry analyst with UBS Phillips & Drew.

Gruet said he expected auto sales would remain weak in the first half of 1991 due to slow growth in real wages, higher unemployment and the impact of the Mideast crisis on consumer pocketbooks and psychology. The second half of 1991 could see a mild recovery, he said.

General Motors Corp.'s position is somewhat stronger than its two U.S. competitors because it is introducing more new models this year and next - including the much-anticipated Saturn line to be launched Oct. 25 - and because it has superior earnings power in the growing European market, Gruet said.

In addition, the No. 1 automaker is somewhat cushioned from the downturn in

the auto industry by its subsidiaries Electronic Data Systems Corp. and Hughes Aircraft Co., he said.

Gruet projected that GM earnings would drop to $3 a share for 1991 from an estimated $3.75 a share this year. GM posted earnings of $6.33 a share in 1989.

Gruet predicted that Ford's earnings would slide to $3.70 a share next year from $5 in 1990. In 1989, the No. 2 automaker posted earnings of $9.06 a share.

The analyst projected that Chrysler's earnings would rise to $1 a share next year, from 35 cents a share this year, largely because the company's results were hurt this year by a number of unusual costs. The No. 3 automaker posted earnings last year of $2.69 a share.

Stephen Girsky, an analyst with PaineWebber, was even more pessimistic about the industry's prospects for next year.

Girsky projected that total sales for the industry would dip to 13.6 million units in 1991 compared with an estimated 14 million units this year. In 1989, the Big Three automakers sold 14.8 million cars and trucks.

Girsky forecast that GM's earnings would fall to $3.35 a share this year and $1.80 a share in 1991, while Ford's earnings would slide to $4.50 this year and $3.40 in 1991. His forecast for Chrysler was even more dismal: a profit of 25 cents a share this year vs. a 25-cent-a- share loss next year.

Girsky said Chrsyler's problems stemmed from an over-dependence on the U.S. market, which accounts for 95 percent of the company's sales, and the lack of new products.

''Chrysler is at a low point in its product cycle. They have new cars coming out in the 1993 model year, but they don't have much before that, '' he said.

''If we come out of the recession before the end of next year, it's not a problem for Chrysler because they're hoarding cash. Any longer than that and it could be a problem - they will lose more money.''

Analyst Jack Kiman of Kidder Peabody was slightly more upbeat about the auto industry's prospects. He projected Big Three earnings this year of $4 a share for GM, $5 a share for Ford and 50 cents to 60 cents a share for Chrysler, with 1991 results flat for all three companies.

But, Kiman said his projections are based on oil prices of $30 a barrel next year, rather than the current $40 level. ''If we don't get oil prices down from where they are right now, we may as well throw darts at a board,'' he said.

#90283u1429 10/10/1990 ~United Press International
MELBOURNE, FL (OCT. 10) UPI - A University of Florida freshman named as a suspect in the serial slaying of five students was convicted Wednesday of beating his elderly grandmother.

The Brevard County jury of five men and one woman deliberated one hour before returning with their verdict. They found Edward Lewis Humphrey, 19, guilty of a lesser charge of battery on an elderly person.

Humphrey could be sentenced to a maximum five years in prison. Sentencing is scheduled for Nov. 8.

Humphrey was charged with aggravated battery of an elderly person, which

carries a minimum mandatory sentence of three years and a maximum of 30 years in prison.

But Assistant Public Defender J.R. Russo argued that the state failed to prove that the grandmother, Elna Hlavaty, 79, suffered ''great bodily injury.'' That is the minimum standard that must be met to support the more serious aggravated battery charge.

Hlavaty testified in Humphrey's defense Wednesday morning, saying that her grandson had not attacked her.

''I love him with all my heart,'' Hlavaty said.

In closing arguments, Russo accused prosecutors of trying to ''hammer'' Humphrey on the battery charge because investigators had identified him earlier as a suspect in the serial killings near the University of Florida campus in Gainesville.

''It's my opinion they weren't able to prove the charge and they brought it anyway ... in an attempt to keep Edward Humphrey incarcerated as long as possible,'' Russo said.

Police will no longer comment on whether Humphrey or anyone else is a suspect in the student killings.

The bodies of the five students were discovered in their apartments near the University of Florida campus Aug. 26, 27 and 28. All had been stabbed to death and some had been mutilated. No one has been charged in the killings.

On Tuesday, Dr. Jere Fitts, who treated Hlavaty, testified that the black eye, bloody face and facial injuries Hlavaty suffered resulted from at least three or four blows.

But Hlavaty said she fell when she and Humphrey both reached for a light switch.

She became angry when Assistant State Attorney Phil Williams pointed out inconsistencies with her testimony, the account she gave at a bond reduction hearing Sept. 6 when she said she did not remember how she was injured and statements she gave at the state attorney's office.

Hlavaty testified that anything she said the day of the incident could not be trusted because she was ''addled'' by the fall.

When prosecutors suggested she might be perjuring herself, she said, ''I would do nothing wrong .... If I thought he'd hit me on purpose I'd put him in jail.''

While the family was at a September bond hearing, Florida Department of Law Enforcement Agents swarmed into Hlavaty's home and spent the day looking for evidence in the Gainesville killings. They had a search warrant and a locksmith let them in.

Hlavaty said she was later hospitalized for a heart condition aggravated by the stress of the search.

''They broke into my home. I didn't know they could do that ... that should be illegal,'' she said.

Hlavaty said that before her fall Humphrey told her he had come home to escape the serial killer.

''He said, 'Yes, Grandma, they're killing people in Gainesville. I'm scared.'''

#90283u1455 10/10/1990 ~United Press International

CHICAGO (OCT. 10) UPI - United Airlines' pilots stubbornly continued their efforts Thursday to keep a proposed employee buyout of the carrier's parent UAL Corp. alive in the face of stiff management opposition.

The pilots' cause may be aided by what analysts saw as the apparent reluctance of any other prospective buyers to surface any time soon. But that foot-dragging may also extend to the lenders whom the pilots might turn to for help in financing a deal for UAL.

Incensed by the UAL's rejection Tuesday of the latest employee buyout bid, the pilots' union will try to orchestrate a shareholder rebellion while taking management to the mat in new contract talks, buyout group sources said.

''They're intent on employee ownership and they want (UAL Chairman Stephen Wolf) out,'' a source close to the buyuout group - United Employee Acquisition Corp., said. ''The pilots are a lot more vehement than the flight attendants and the machinists,'' who are also a part of the buyout proposal.

The sources said leaders of the Airline Pilots Association have already sought a meeting with representatives of Coniston Partners - UAL's largest shareholder.

They said the union leaders will ask the New York investment group, which holds 11.8 percent of UAL's stock, to lead a drive to unseat the current directors - who unanimously rejected the latest buyout proposal Tuesday - and replace them with a panel amenable to another employee buyout.

No meeting date was set, but Coniston was slated to meet with UAL management next week for a briefing on the company's status and future plans.

Coniston has seen the value of its UAL holdings decline some $150 million in a yearlong slide of UAL stock following last October's collapse of a $6.75 billion, $300-a-share bid by the pilots and UAL management.

Coniston threatened early this year to mount a bid to oust UAL directors unless they moved to bolster stock value. And it was the same threat that pressured the board to endorse a $4.4 billion, $201 a share, employee buyout.

United Employee Acquisition Corp. - which included the pilots' union, the flight attendants and mechanics' unions and non-contract United employees - was unable to finance the deal.

The UAL board terminated the merger agreement Tuesday - the deadline set for financing the $4.4 billion offer - after rejecting two alternative bids that included preferred stock, debt and little or no cash.

Coniston has refused to comment on the UAL situation, but an investment banker knowledgable about recent UAL buyout efforts said Coniston is unlikely to support any bid that fails to include a substantial amount of cash.

''But they could renew their call for a rsstructuring to shore up stock prices

'' he said. ''There are a lot of unhappy people out there.''

The category of unhappy people includes not only shareholders but all three UAL unions - which have been working under expired contracts while pursuing efforts to make United the world's largest employee owned company.

The unions, which had agreed to contract concessions totaling $2 billion as part of the buyout, will be seeking major improvements in wages and benefits.

United's 13,000 flight attendants have been working without a new contract since March 1987, while the airline's 6,000 pilots have been working under an extended contract since April 1988.

The contract betweeen United and the International Association of Machinists - its biggest union, with some 23,000 members - expired last November.

#90283u1467 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI _ Congress moved into the next phase of its complex budget process Wednesday as committees began putting specific tax increases and spending cuts into the plan to slash the deficit by $500 billion over five years.

The tax-writing House Ways and Means Committee met privately to disucss the specific tax increases it will recommend as well as the levels of cuts in federal benefit programs, like Medicare.

A meeting of the Senate Finance Committee, set for Wednesday afternoon, was canceled as a result of confusion over whether President Bush would support a deal raising income tax rates on the rich in exchange for a capital gains tax cut sought by Bush and many Republicans.

After months of opposing it, Bush indicated publicly for the first time Tuesday he might support such a swap, if it were fair. But a group of Senate Republicans later urged him not to go along and the White House later backtracked, saying such a deal was off the bargaining table.

Bush on Wednesday kept the waters muddy.

''Publically, we're not taking a position on any specific item,'' said Bush press secretary Marlin Fitzwater. ''Our position is we are looking for common ground, we are talking to various members of Congress. ... It's up to Congress not us, to come up with a package.''

He said that although GOP senators left the White House Tuesday afternoon saying Bush had backed off the deal, Fitzwater said Bush made no commitment. "The president didn't say anything. He just listened to them," Fitzwater said.

Arriving in St. Petersburg, Fla., for a second campaign stop of the day, Bush refused to clear up the tax question, saying, ''Let Congress clear it up.''

As the committees struggled with their responsibilities, it was in many ways as if the four-month budget summit with the administration never occurred.

Had their been no summit, which began May 15 at Bush's invitation, Congress's regular budget process - the one it has used for years - would have been followed. Democrat-controlled budget committees in each chamber would have adopted, and the Democrat-controlled Congress would likely have accepted, the budget plan.

Then the Democrat-controlled tax-writing and other committees would have set their own priorities on how to cut the deficit.

But with the House's rejection last week of the $500 billion, five- year bipartisan deficit reduction plan produced by the budget summit, the congressional committees are back in business, ready to establish their own priorities, just as they would have done had there been no summit.

What the summit did was establish the deficit reduction numbers needed this year and over five years. And it forced Bush to admit on June 26 that it was clear to him that ''tax revenue increases'' were needed to cut the deficit.

''We never would have had these overall numbers except for the summit,'' said one Democratic budget aide. ''The summit locked in the bold approach.''

But gone is the requirement, agreed to by summit participants, that any $500 billion, five-year deficit reduction plan Congress passed must win a majority of votes in both parties in both houses to keep one from blaming the other in the November elections for the political pain the package included.

That requirement, House Speaker Thomas Foley, D-Wash., said Wednesday, ''is now part of the history of the past.''

Gone are the specific tax increases, like the 12-cent-a-gallon gasoline tax, and spending cuts, like the $60 billion Medicare cut, the summit produced. Committees are free to readjust the tax package and both the gasoline tax and the huge Medicare cut are expected to be lowered.

Gone are the lofty promises of bipartisanship and cooperation that surrounded the budget summit.

And, along that line, gone is the need for Democrats to make as many compromises on tax and spending issues now that GOP majorities in each chamber are not needed.

''The battlelines in this (budget) document are going to be favorable to us and unfavorable to them,'' said a House Democratic aide.

If Republicans don't like what the Democrat-controlled committees produce, ''What are they going to argue? That we didn't tax gasoline enough? That we didn't cut Medicare enough?''

The aide said budget gridlock resumes Oct. 19, the deadline for final action on the budget, and the day ''when Bush decides if he'll accept a budget that forces the rich to pay their fair share or whether he'll insist on shutting down the government in favor of a budget that breaks the back of the middle class.''

With less than three weeks to go before the election, Democrats believe Republicans will put pressure on Bush ''to make government work, '' the aide said.

OTTAWA (OCT. 10) UPI - Canadian National Railways, stymied by high administrative costs and reduced passenger traffic, Wednesday offered early-retirement packages to 1,500 managers, most of them at the company's headquarters in Montreal.

CN said in a release that the railway's administrative costs were higher than those of CP Rail, the Canadian Pacific Ltd. subsidiary that is CN's major competitor.

About 57 percent of the railway's $4.2 billion in 1989 operating costs went for wages and benefits. Most job cuts will take place in major cities, including Montreal, Toronto and Winnipeg.

CN, owned by the federal government, blamed the cuts on declining rail revenues, primarily resulting from an increase in bulk traffic and a corresponding reduction in more profitable passenger business, and on greatercompetition from the trucking industry.

In August, CN reported sharply lower rail profits in the first half of 1990 compared to the same period in 1989.

Since 1985, the railway has reduced its work force to 35,000 from 50, 000, withthe job cuts mainly coming from its unionized ranks.

The CN job cuts followed Air Canada's announcement Tuesday that it would lay off about 2,900 employees and turn away from unprofitable international routes.

#90283u1498 10/10/1990 ~United Press International

URBANA, IL (OCT. 10) UPI - Dick Jorgensen, an National Football League game official for 23 years and referee of Super Bowl XXIV last January, died Wednesday from a rare blood disorder. He was 56.

Jorgensen, who died at the Carle Clinic, had not worked any games this season.

He joined the NFL as an official in 1968 and worked 12 playoff games, including four conference championships and one Super Bowl. He had been a referee, the chief game official, since 1971.

Jorgensen was also president of Marine Bank in the Champaign-Urbana area for 13 years. He graduated in 1956 from the University of Wisconsin, where he was captain of the basketball team as a senior. He served two years in the Navy after graduation.

Jorgensen is survived by his wife, Adlone, and daughters Londa Dewey, Susan Fitzgerald and Sarah Thompson.

CHICAGO (OCT. 10) UPI - A comatose, Alzheimer's stricken man whose family won court permission to remove the tube that had been feeding him for five years has begun swallowing food on his own, a nursing home official said Wednesday.

However, the lawyer who led the battle to remove the feeding tube on behalf of the family of Sidney Greenspan of Chicago was skeptical the 82-year-old really can swallow on his own.

Doctors had predicted Greenspan would die within a week of removing the tube. It was removed last Wednesday on the order of Cook County Circuit Judge Richard Dowdle but Greenspan, felled in 1984 by a massive stroke, remained alive seven days later.

Greenspan, an Alzheimer's sufferer, still was comatose but in stable condition and able to swallow food, said Frank Kleinerman, Lake Shore Nursing Centre administrator.

''He's been eating and swallowing. Some days he takes a lot and some days he takes a little. But he's taking enough to sustain his life,'' Kleinerman said. ''He's a very strong gentleman and could live another five or 10 years.''

Cook County Public Guardian Patrick Murphy was skeptical.

''I just talked to Mr. Greenspan's doctor and he told me they're taking two hours to feed Mr. Greenspan a couple of tablespoons of food,'' Murphy said. ''I'm not sure how well he's able to swallow or if he can even do so. I have serious doubts of the good faith of the nursing home for putting him through this.''

Murphy said he would view the feeding on Thursday to determine if the process is humane.

Paul Linton, a spokesman for the group Americans United for Life, said he was encouraged by the development. The group had argued against removing the feeding tube.

Linton said it was interesting Greenspan could swallow despite doctors' testimony that he had lost the reflex necessary to take in food on his own.

''I find that very interesting because one of the neurologists testified without any hesitation that Mr. Greenspan could not take food orally. What this illustrates is that a medical diagnosis can be wrong,'' Linton said.

(OCT. 10) UPI - Senate Democratic leader George Mitchell says President Bush's reversal on higher taxes for the rich will keep the Senate from moving forward on a tax proposal. Bush changed his mind about tying higher taxes for the wealth to a capital gains cut after meeting with Republicans at the White House yesterday.

Bush campaigned for North Carolina Senator Jesse Helms at a Republican fund-raiser in Raleigh today. Holding NO political grudges, Bush called Helms ''a champion of conviction'' even though Helms helped defeat an administration-backed budget deal last week. .

Bush then traveled to St. Petersburg, Florida, to stump for Governor Bob Martinez. He speaks at a fund-raising dinner in Atlanta tonight for Republican gubernatorial candidate Johnny Isakson.

The Navy has given up any hope of finding eight Marines missing aboard two helicopters that crashed in the North Arabian Sea on Monday. The Pentagon says ''some floating debris'' was recovered, but NO survivors. An Fbomber crashed in the southern Saudi desert today, killing two airmen. .

Oil prices are slipping on world markets after hitting record highs today on rumors that U-S forces were moving into occupied Kuwait. West Texas Intermediate was trading at 39 dollars 75 cents a barrel on the New York Mercantile Exchange after hitting a high of 41-15.

Israeli Prime Minister Yitzhak Shamir has approved a request calling for an independent investigation into the slaying of 21 Palestinians by Israeli police on Monday. The incident in Jerusalem touched off widespread Arab general strikes, which continue today.

The near-perfect four-day flight of the Discovery shuttle ended at Edwards Air Force Base in California today. The shuttle and its five- member crew made a smooth landing... ending a 65-orbit mission in which the Ulysses probe was launched to study the uncharted poles of the sun.

Senator Bennett Johnston says action on a bill authorizing an island referendum on the future status of Puerto Rico will be postponed to next year. The Louisiana Democrat says there is NOT enough time to consider the measure

in the closing days of this Congress.

Briggs and Stratton Corporation says it is recalling 850-thousand fuel tanks on all its Quantum Power lawn mower engines sold after July 1st, 1989. The Milwaukee firm says the engines might leak gasoline that could cause a fire under certain conditions. Eight fires have been reported.

Soviet sources say three members of a seven-person climbing expedition fell to their deaths on a mountain in Nepal. The team was attempting to reach the summit of Mount Manaslu, a nearly 24-thousand-foot peak in the Asian nation. The remaining climbers called off their attempt to scale the mountain.

VENTURA, CA (OCT. 10) UPI - A former funeral home employee was ordered Wednesday to stand trial on charges he murdered a rival mortician in what is believed to be the nation's first oleander poisoning prosecution.

Following a preliminary hearing, David Wayne Sconce, 33, of Pasadena was ordered to stand trial on one count of murder with special circumstance allegations - murder by poisoning - that qualify him for a possible death penalty.

Sconce was ordered to remain in custody without bail and to appear in Superior Court for arraignment Oct. 24.

He is charged with using the lethal leaves of the oleander plant to poison Timothy R. Waters, 24, a Burbank mortician, in 1985, to keep Waters from exposing activities at Sconce's parents' Lamb Funeral home.

Prosecutors said the case is believed to be the first murder prosecution in the country involving oleander poisoning.

Sconce, who worked at the funeral home, is serving a five-year state prison term after pleading guilty in April 1989 to 21 criminal counts involving the mingling of human remains, the theft of body parts and the removal of gold teeth from cadavers.

His parents, Laurieanne Lamb Sconce and Jerry Sconce, are awaiting trial on

similar charges.

Even though Waters died in Ventura county, the case is being handled by the Los Angeles County District Attorney's Office because that office has been prosecuting Sconce and his parents for the alleged funeral home violations.

#90283u1579 10/10/1990 ~United Press International
WASHINGTON (OCT. 10) UPI - A week after German reunification, the Senate added a footnote to history Wednesday by ratifying the treaty that formally returns full sovereignty to Germany.

The Senate voted 98-0 for the treaty that was signed Sept. 12 by the four occupying powers from World War II - the United States, the Soviet Union, Great Britain and France - and by West and East Germany.

The treaty formally ends the rights of the four occupying powers over Germany and Berlin. Germany, in turn, is confined to the borders of the two previous German states and renounces aggressive war.

To prevent any implication that the treaty also recognizes the Soviet Union's post-war borders, the Senate approved a resolution emphasizing that the United States does not recognize the incorporation of the Baltic states of Lithuania, Latvia and Estonia into the Soviet Union.

The division of Germany ended Oct. 3 without Senate ratification of the treaty but Sen. Claiborne Pell, D-R.I., Foreign Relations Committee chairman, said the pact nonetheless ''constitutes a landmark in international diplomacy.''

''History in our century has been dominated by two overarching events - successive world wars in the first half, and throughout the second half, a great geopolitical rift that has threatened civilization on our planet. The

treaty before us today marks an end to both of these major events,'' he said.

Although senators from both parties united in hailing the treaty as a milestone, Pell clashed with his committee's ranking Republican on the lessons to be drawn from the accord.

Pell called the treaty ''the crowning achievement of the policy of containment pursued by nine consecutive presidents,'' saying the ''defensive shield'' of NATO eventually wore down the Soviet Union.

''This treaty fulfills the major objectives of post-war American foreign policy with respect to Germany: a free and united Germany, linked to the West through social and political systems, reflecting common values,'' he said.

But Sen. Jesse Helms, R-N.C., said containment, a policy devised in the Truman administration, led to ''unprecedented communist expansion abroad'' and the continuation of a heavily armed police state in the Soviet Union.

Helms argued the treaty owed its existence to President Reagan's defense buildup of the 1980s and should be known as the ''Reagan treaty.''

The Foreign Relations Committee ratified the treaty Oct. 2 by a 19-0 vote, although reservations were expressed at that time by Sen. Rudy Boschwitz, R-Minn., a German-Jewish emigre who lost relatives in the Holocaust.

In brief Senate remarks, Boschwitz said he viewed unification with ''some concern'' and said he hoped that a unified Germany would contribute to peace and progress ''rather than the turmoil a unified Germany has created before.''

Under the treaty, Soviet forces will have to withdraw from what is now East Germany by 1994, while U.S. British and French troops will remain in Berlin through 1994 at the request of the German government.

The united Germany also will remain in NATO. But following the withdrawal of Soviet troops, the treaty would bar NATO from stationing nuclear weapons or non-German NATO forces in what had been East Germany.

The Germans also renounced any intention to manufacture, possess, or control nuclear, biological or chemical weapons, and pledged to reduce their combined armed forces from the current 600,000 to 370,000.

Pell, noting the restrictions of the Soviet and Germany military, said the treaty ''may be the most constructive arms control agreement in history.''

WASHINGTON (OCT. 10) UPI - The Energy Department said Wednesday it would conduct new studies on the danger of explosions in aging storage tanks at the Hanford nuclear weapons plant that could spew radioactive wastes into the environment.

Energy Secretary James Watkins said there are concerns the department has underestimated the potential environmental impact of an explosion in the aging leaking tanks, each of which contains hundreds of thousands of gallons of highly radioactive and toxic wastes.

In addition, the department said a review the high-level radioactive waste program at the Hanford plant in Washington state had ''raised questions''

about whether the department had enough scientific information to assure the tanks were being managed safely.

''The (additional studies) should not be misconstrued as an indication of increased risk to the public,'' Watkins said in a statement. ''Rather, it should be seen as a confirmation of the department's commitment to protecting the environment with full public participation.''

Along with Watkins' announcement, the department released a report by a special team of investigators that concluded the probability of an explosion is low.

However, the investigators said they were working with limited information and therefore, ''the team has no basis at this time to quantify the probability.''

The investigators added, ''Even once better information has been developed on the probability of an explosion, sufficient uncertainty will remain that continued storage of the wastes will be considered unacceptable.''

They urged the department to speed up plans for final disposal of high-level radioactive waste at Hanford, a sprawling facility in eastern Washington where the government has produced materials for nuclear warheads since the 1940's. The processing generated millions of gallons of highly radioactive wastes that were stored in the tanks.

Department officials earlier this year acknowledged for the first time that volatile hydrogen gases could accumulate in the underground tanks in amounts large enough to pose the risk of an explosion.

Under one accident scenario, chemical reactions in the tanks could ignite the explosive hydrogen gases. In particular, Hanford officials say an explosion could be caused by ferrocyanide, a chemical added to some tanks in the late 1950's and early 1960's in an effort to stabilize wastes.

Watkins said the department believes the probability of ''significant'' radioactive releases from a tank explosion is low. But he said a new study by the General Accounting Office, the auditing arm of Congress, suggested releases could be larger than the department's estimates.

The GAO study, which has not been publicly released, was reviewed by the team of Energy Department investigators, who agreed radioactive releases likely would be higher than earlier agency analyses had indicated.

The investigators said they believe the probability of an explosion is low because temperatures in the waste tanks appeared well below the level needed to trigger a ferrocyanide explosion.

They said the lowest temperature at which a ferrocyanide explosion has been

observed in laboratory tests was 446 degrees F. The highest temperature currently measured in a waste tank containing ferrocyanide is 135 degrees F.

''The team believes the overall risk of an explosion is low as long as temperatures in the tanks remain low,'' the team said in a memo to John Tseng, an official in the department's Office of Environmental Restoration and Waste Management.

However, the investigators said those temperatures could increase, especially in tanks where liquid has been removed and the remaining solid waste is drying out. They also said other unforseen chemical reactions could pose danger.

They said improved temperature monitoring would help ensure safety of the tanks for the short term, but plans for permanent disposal of high- level wastes should be accelerated.

#90283u1620 10/10/1990 ~United Press International

MOSCOW (OCT. 10) UPI - The New York Stock Exchange signed an agreement with the Soviet Union Wednesday to help train Soviets and provide other assistance as the country struggles to establish to a market economy.

The agreement was signed at the end of a three-day financial market seminar that drew 22 NYSE officials and top American financial experts.

''The road will be painful and difficult,'' Finance Minister Valentin Pavlov told the closing session of the seminar for 400 Soviet officials and budding entrepreneurs. ''We are glad as we begin this road that we have such good assistance.''

The agreement signed by Pavlov and NYSE Chairman John Phelan called for continued American assistance as the Soviets attempt to set up financial markets and move away from a centrally planned economy.

Phelan said details of the exchanges were not yet set, but added Soviet specialists would likely travel to the United States for training at the stock exchange and affiliated firms.

The Moscow seminar included lectures on fundamentals such as the difference between stocks and bonds, and practical matters such as accounting procedures and regulations. But Soviet and American participants cautioned it would be some time before the Soviet Union was ready to establish an exchange.

''Declaring that you have a stock exchange is one thing. Having a full, active and functioning marketplace is an entirely different set of facts,'' Phelan said.

Soviet economic reform plans call for setting up a stock exchange and other types of financial markets, but Pavlov acknowledged that the country has much to accomplish before it is ready for such elements of capitalism.

''We have to give an unambiguous answer to one question we have been shirking for quite some time,'' Pavlov said. ''What kind of market are we creating, who will be the agents in that market?

''Although everybody says, as with one voice, that we are developing a market of enterprises, in fact nobody has given enterprises the right to become truly independent.''

President Mikhail Gorbachev has begun ordering preliminary steps toward a market economy, but an overall economic reform plan is still stalled in the Supreme Soviet, the country's parliament.

Pavlov said he could not estimate when the Soviet Union would be ready for a stock exchange, and that there are as yet very few Soviet companies that could participate in a stock market.

Phelan said American financial experts were impressed with the sophisticated market knowledge shown by their Soviet audience, but added that a major cultural change would be necessary before a market system could work.

''The sophistication has to be translated down to more people,'' he said. ''There has to be a cultural change ... a feeling that it is not illegal to have a profitable negotiation between two people, that profit is what drives the system. That is going to take time to change.''

Despite the eagerness of the Soviet government and the seminar audience displayed for a market economy, there are still laws outlawing speculation such as that conducted in a stock exchange. Soviets must overcome 70 years of communist teaching that ''profit'' is a dirty word.

''We still have a lot to learn,'' Pavlov said. ''Nowhere in the world is there a country so far from the market, a country that has totally lost touch with the market.''

LOS ANGELES (OCT. 10) UPI - Department store operator Carter Hawley Hale Stores Inc., in a move to cut its $1.65 billion debt load, said Wednesday it plans to cut about 1,000 jobs from its workforce, a reduction of about 3 percent.

Shares of the company's stock dropped 50 cents to $2.50 Wednesday on the New York Stock Exchange. The stock had fallen 37.5 cents on Tuesday.

Spokesman William Dombrowski said that the move was part of a ''streamlining'' of non-selling activities at its 88 stores, most of which operate in the highly competitive California market.

The loss of jobs, set to take place during the next 12 to 18 months, will be accomplished largely through attrition, Dombrowski said.

Carter Hawley Hale, which operates the Broadway, Weinstocks and Emporium chains, has been operated with a heavy debt load since 1987 when it successfully fended off a takeover attempt and spun off its Neiman Marcus,

Bergdorf Goodman and Contempo Casuals stores.

It said Tuesday that it had lost $25.5 million for the fourth quarter ended Aug. 4 on sales of $623.3 million and that it had agreed to sell its 26-store Thalhimers chain to May Department Stores Co. for $325 million.

Dombrowski said proceeds from the sale would be used to reduce the debt load. He also said that the company plans to spend $110 million over the next two years to remodel 16 to 20 stores.

The company spent $40 million on seven remodelings during the past fiscal year including extensive renovations at its earthquake-damaged Emporium store in Oakland.

WASHINGTON (OCT. 10) UPI - The Marine Corps called up its first reservists to active duty Wednesday for Operation Desert Shield, assigning them to fill the positions of Marines in Hawaii who were sent to Saudi Arabia.

The Army, Navy, Air Force and Coast Guard have called up more than 27,000 reservists and National Guard members to help support military operations in Saudi Arabia and the Persian Gulf region. But the Marines had not called up any reservists until Wednesday.

In a Pentagon statement, the Marine Corps said the commandant, Gen. Alfred M. Gray, ordered about 160 reservists in the 4th Marine Division, the 4th Marine Aircraft Wing and the 4th Service Support Group to report to active duty.

''The reservists will form Combat Service Support Detachment (CSSD)- 40, and will replace active duty Marines at Kaneohe Bay, Hawaii, who have deployed to Operation Desert Shield,'' the statement said.

The detachment was to be activated Wednesday. While in Hawaii, the reservists will be assigned jobs in logistics, supply, ordnance, utilities, motor transport and personnel support, the Pentagon said.

TORONTO (OCT. 10) UPI - Imperial Oil Ltd. offered early retirement and severance plans Wednesday to about 13,500 eligible employees in an effort to cut surplus jobs.

Imperial Oil spokesman Dennis Baxter refused to say how many jobs the company hoped to cut, but industry analysts said it was expected about 1,500 employees

would take advantage of the programs.

Baxter said the staff reduction plans were not aimed at the 3,500 additional employees the company acquired in its takeover last year of Texaco Canada Inc.

Denis Mote, oil industry analyst with Toronto-based Maison Placement Canada, said in an interview the job cuts did not reflect Imperial's financial situation. ''The third quarter is going to be outstanding,'' Mote predicted, adding that the job cuts were intended to keep employee levels down.

Imperial has not yet released its third-quarter results. However, in the second quarter, the company suffered one of its worst quarters ever, showing an 86 percent drop in net income from a year earlier.

The company is reportedly on target with a program to shed up to $900 million worth of assets in order to reduce its debt to $3 billion by yearend.

Among plans aimed at cutting staff were two early retirement programs and a severance program. Imperial has more than 15,000 workers, the majority of them in their mid-30s, according to some news reports.

According to Baxter, the early retirement plans were being offered to those workers with 10 years service at Imperial Oil and the severance plan to all remaining employees.

About 13,500 employees were eligible for the plans, Baxter said, excluding workers at several subsidiaries, including the company's chemical division. The chemical division was not directly affected by the takeover.

Workers aged 55 to 65 years can apply for an early retirement pension enhancement program, while those aged 50 to 54 can apply for a similar pre-retirement program.

Baxter said those workers who opt to leave have until Dec. 14 and Jan. 15, respectively, to inform the company. Workers who qualify will be let go by the end of 1991.

Baxter said the career change program, or ''financial program to assist employees interested in seeking a new career outside of Imperial Oil'', was aimed at the remaining employees.

BOSTON (OCT. 10) UPI - A study has found evidence suggesting the drug AZT may be effective in treating people infected with the AIDS virus in doses far lower than once used, scientists said Wednesday.

In the 12-week study at Harborview Medical Center in Seattle, 28 patients with AIDS-related complex, or ARC, were given 300 milligrams of AZT daily - just one-fifth the daily dose of 1,500 milligrams originally recommended when the drug was approved in March 1987.

Fifteen similar patients receive 1,500 milligrams of AZT daily and 24 others were given 600 milligrams daily, which is currently the standard dose.

The patients who received the lowest dose of AZT experienced as much improvement, and suffered fewer side effects, thane patients given higher doses, said Dr. Ann Collier, who headed the study.

Although the findings published in the New England Journal of Medicine are preliminary, Collier said they indicate the miniumum effective dose of AZT has yet to be determined and more studies using very low doses are warranted.

Collier said the study may help set the stage for an approach to HIV treatment ''that says more of something is not necessarily better.'' She said the work also may have significant economic implications for the 1 million Americans infected with the AIDS virus since lower doses of AZT would cost less than current dose levels.

Burroughs Wellcome Co., of Research Triangle Park, N.C., which makes AZT, says the current wholesale price of a year's supply of AZT at the 500-milligram per-day level totals ''less than $2,200 a year.''

AZT, also known as zidovudine, is the only government-approved drug to directly fight the AIDS virus. Although it is not a cure, studies have shown it can prolong the lives of people with AIDS, and also slow disease progress in people with the AIDS-causing human immunodeficiency virus, or HIV, who have no symptoms.

However, AZT's drawbacks include its ability to cause toxic side effects such as anemia in higher doses and its expense.

Collier said all three dose levels of AZT appeared about equally effective in suppressing the AIDS virus in the patients' blood and helping improve symptoms such as fatigue and weight loss. In addition, she said those in each group had increased numbers of key disease- fighting T-4 cells, although their immune systems remained impaired.

However, there was a notable difference among the groups in the severity of the side effects they experienced, she said. After the initial 12 weeks, 40 of the 47 patients continued treatment. But as time went on, a larger proportion of those receiving the 1,500 milligram dose dropped out, largely because of side effects, Collier said.

''The bottom line is: 'Why bother giving higher doses of a drug that can be

toxic when a lower dose is equally effective?''' Collier said.

Earlier this year, the Food and Drug Administration approved changing dosage recommendations for AZT to say that after the first month of treatment in patients with AIDS symptoms, the daily dose could be cut to 600 milligrams. The recommended dosage for HIV-inrected people who have no symptoms except for depressed immune cell counts is 500 milligrams per day.

At one time, the standard daily dosage was 1,500 milligrams.

In another aspect of the study, Collier said the researchers found that the drug acyclovir, which is widely used to treat herpes viruses, had no effect when used in combination with AZT to treat the ARC patients.

#90283u1756 10/10/1990 ~United Press International

NEW YORK (OCT. 10) UPI - Developer Donald Trump's casino junk bonds dropped Wednesday amidst warnings by a ratings agency and rumors the Trump Organization was going to file for bankruptcy protection.

Trump spokeswoman Norma Foederer denied the bankruptcy rumors, calling them ''totally, absolutely false.''

Trump's Taj Majal and Trump Castle casinos are not generating enough cash to pay interest on their bonds, Fitch Investors Service said.

Without external assistance, the Taj will be unable to make $47.3 million in interest payments due Nov. 15 because of insufficient cash flow, Fitch said.

Trump is seeking to restructure about $1.3 billion of casino bond debt, including about $675 million in Taj debt.

The real estate developer, who survived a payment crunch earlier this year only with the help of a bailout by his banks, has asked bondholders to defer the interest payment in return for equity. Negotiations are still in progress, Fitch said. Fitch projected the Taj's cash flow can service only half the current interest expense on its 14 percent first mortgage bonds due 1998 and estimated the restructured value of the Taj bonds at 49 cents on the dollar. Bondholders may demand up to half of Trump's equity and control of the Taj in the restructuring, Fitch said.

Taj bonds dropped about one-half point to 30 1/2 to yield 48.37 percent in late afternoon trading.

Trump Castle bonds, which pay a 13 3/4 coupon, dropped about 1 1/2 points to 30 late afternoon. The bonds were trading flat - without accrued interest - because traders didn't anticipate future interest payments would be paid.

Trump Plaza bonds, which pay a 12 7/8 percent coupon, dropped slightly to 48 to yield 28 percent. The bonds are expected to make their December interest payments and probably won't be restructured, Fitch said.

Earlier this year, Trump came close to defaulting on a $43 million payment on the Trump Castle casino bonds.

He made the payment after his banks agreed on a bailout plan allowing him to defer interest payments on about $850 million worth of bank debt for up to five years and giving him $65 million in new loans.

His $1.3 billion in publicly traded debt has underwritten the growth of his Atlantic City casinos.

NEW YORK (OCT. 10) UPI - The nation's supplies of crude oil fell for a fourth straight week as imports continued at low levels, the American Petroleum Institute reported Tuesday.

For the week ended Oct. 5, the API's weekly industry survey showed crude oil inventories fell 4.2 million barrels to 350.4 million from 354.6 million in the prior week but remained above year-ago levels of 337.1 million barrels.

Crude stocks had fallen 19.8 million barrels in the three prior weeks.

Daily imports of crude held in the latest week at 5.4 million barrels, the same as the previous week's revised level, but were substantially less than year-ago imports of 6.3 million barrels a day.

U.S. refineries operated at 87.6 percent of capacity last week, compared with 91.2 percent a week earlier and 88.3 percent a year ago.

The decline in inventories may be the result of some refineries beginning their seasonal maintenance ''turnarounds,'' in which they switch production from gasoline to heating oil.

Inventories of distillate - used for home-heating oil and diesel fuel - fell to 133.3 million barrels from 134.8 million a week earlier but were above year-ago levels of 121.8 million barrels.

Daily distillate production slipped to 2.9 million barrels from 3.0 million in the preceding week. The year-ago daily output was also 3.0 million barrels.

Daily distillate imports fell to 182,000 barrels last week from 337, 000 the previous week and were below year-ago imports of 276,000 barrels a day.

Gasoline supplies increased to 225.7 million barrels from 223.9 million barrels in the prior week and were about even with year-ago levels of 225.8 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also increased, to 174.1 million barrels from 172.0 million a week earlier and remained higher than year-ago levels of 163.0 million barrels.

Daily gasoline production eased off to 7.0 million barrels from 7.3 million barrels in the previous week. The year-ago output was 7.0 million barrels a day as well.

Daily gasoline imports plunged to 216,000 barrels from 480,000 in the previous week and were well below year-ago daily imports of 478,000 barrels.

Daily imports of all refined products tumbled to 1.5 million barrels from 2.4 million in the preceding week and were less than year-ago imports of 2.2 million barrels a day.

#90283u1776 10/10/1990 ~United Press International

MEXICO CITY (OCT. 10) UPI - Cuban Armed Forces Chief of Staff Ulises Rosales de Toro said Cuba has consolidated its military ties with the Soviet Union and that the island is increasing its defenses.

Rosales de Toro made his comments following a four-day visit to Havana by a ranking Soviet military delegation.

The official Cuban news agency Prensa Latina, in a dispatch monitored in Mexico City, quoted Rosales as saying the visit ''contributed to the consolidation of mutual ties and strengthening of the island's defense capacity.''

The Soviet delegation, headed by Armed Forces Chief of Staff Gen. Mikhail Alexeevich Moiseev, left Cuba late Tuesday.

Prensa Latina quoted Moiseev as saying his trip to Havana ''served to bring closer the ties of brotherhood that have existed and will continue to exist between the two countries and their armed forces.''

''We are faithful to the roots of our friendship and particularly the agreements ... regarding economic, political and military relations,'' he said.

Prensa Latina did not specify any military agreements but mentioned Cuban medical treatment for Soviet troops crippled in Afghanistan and more than 2,000 children affected by the Chernobyl nuclear accident.

The Soviet Union has supported Cuba with an estimated $5 billion a year in direct and indirect aid, although the Cuban government acknowledges food and oil supplies have been affected in recent months.

#90283u1780 10/10/1990 ~United Press International

NEW YORK (OCT. 10) UPI - Rumors of major Persian Gulf developments swept the New York foreign exchange market Wednesday, pushing the dollar higher against most key world currencies with the exception of the Japanese yen.

But currency players said a number of other factors were at work in what one participant described as a ''very confusing'' market. One leading influence was the price of oil, which slipped below $40 a barrel.

Despite market skepticism about Gulf rumors, the dollar lifted when a pair of rumors circulated saying U.S. forces advanced into Iraqi-held territory, and that Iraqi President Saddam Hussein had been assassinated.

But the effect was limited. ''We are becoming somewhat immune to rumors,'' said Robert White, a First Interstate Bank currency vice president.

Late in the New York session, the dollar traded at 1.5280 German marks, ahead from 1.5230 Tuesday, and at 129.35 yen, down from 130.20.

Midland Bank treasury officer Donald Hubbard said the dollar moved in a wide range against the mark. In early trading it hit the same low of 1.5200 marks it set Tuesday before recovering in later action.

But he said the dollar was boxed in, with Gulf events on one side pushing up oil prices and hammering U.S. financial markets, and on the other a bleak domestic economic outlook boding lower U.S. interest rates.

''I don't see any big turnaround for the dollar here,'' Hubbard said.

Even so, said White, playing the market is extremely complicated, as even the dollar can strengthen amid conflicting forces.

He pointed to ''a web of influences right now,'' concluding, ''It would be very hard to describe the market in a novella today.''

Other New York dollar rates: 1.2820 Swiss francs, up from 1.2735; 5.1120 French francs, up from 5.0990; and 1,1144.50 Iralian lire, up from 1,143.50.

The pound moved down to $1.9680 from $1.9725.

In Europe, the dollar ended mixed after gaining some ground on rumors of U.S.

troops attacking Iraq or Kuwait. But sentiment was still bearish.

Barclays de Zoete Wedd senior analyst Mark Brett said the dollar gained as it was purchased to cover short positions. ''People say, 'I don't what's going to happen''' and acquire the U.S. unit, he explained.

If war breaks out, Brett said, the dollar would enjoy a day-long surge, but then plummet as investors sought safer havens.

The dollar moved up in Frankfurt, to 1.5273 German marks vs. 1.5255 Tuesday, but fell in Zurich, to 1.2755 Swiss francs against 1.2760.

Analysts were predicting the dollar would drop below the level of 1.50 German marks, and might go as low as 1.40 deutsche marks.

In London, the pound eased to $1.9695 against $1.9720. Dealers expected the pound to challenge the pyschological mark of $2.00.

The dollar also fell in Paris and Milan, to 5.1170 French francs vs. 5.1185, and 1,145.40 Italian lire vs. 1,146.45. In Brussels, it gained to close at 31.43 Belgian francs compared with 31.38.

Foreign exchange markets closed in Tokyo Wednesday for Sports Day, a national holiday. The Tokyo market's dollar-yen closing price Tuesday was 129.95 yen. Trading was scheduled to resume Thursday.

Gold closed sharply lower in Zurich at $390.50 an ounce vs. $396.50. It also fell off in London, to $391.25 an ounce vs. $395.

Renewed tension in the Gulf after Israeli troops killed 21 Palestinians sent gold prices soaring Tuesday, but hopes of a $400 ounce faded.

Republic National Bank in New York closed cash gold at $389 an ounce, down from $390.50 Tuesday. The New York Commodity Exchange settled contract gold at $388.10 an ounce, down from $389.70.

Silver closed lower in Zurich at $4.50 an ounce vs. $4.70, and also was lower in London at $4.54 an ounce vs. $4.68.

Republic closed cash silver at $4.44 an ounce, down from $4.615. Comex silver closed at $4.409 an ounce, off from $4.593.

#90283u1782 10/10/1990 ~United Press International

NEW YORK (OCT. 10) UPI - Stocks closed sharply lower Wednesday, with the Dow industrials at a new 52-week low, after a late plunge sparked by an unexpected rise in interest rates at the Treasury Department's note auction.

The Dow Jones industrial average, which sank 78.22 Tuesday, tumbled 37.62 to close at 2407.92 - its lowest level since May 1989. The previous 52-week low was 2427.48, reached on Sept. 27.

Among broader market gauges, the New York Stock Exchange composite index fell 2.44 to 164.97, settling at its lowest point since March 1989, and Standard & Poor's 500-stock index lost 4.71 to 300.39, a new low for the year. The price of an average share slumped 43 cents.

Declines pounded advances 1,207-353 among the 1,982 issues crossing the NYSE tape. Big Board volume totaled 167,890,000 shares, up from 145, 610,000 traded Tuesday.

At the Treasury Department's auction of 7-year notes Wednesday afternoon, yields rose to an average of 8.76 percent, the highest since 9.39 percent April 12, 1989.

Analysts had expected that a rate of 8.75 percent, in a worst case scenario, would be sufficient to attract investors and said the unexpectedly high yield showed a lack of enthusiasm for the medium- and long-term government securities and indicated pessimism about short-term interest rates heading lower anytime soon.

Robert Dederick, chief economist at Northern Trust in Chicago, said the stock market reacted violently in the final hour to the poor demand for the government's latest note offering.

''It was a poor showing,'' Dederick said. ''It was generally a bad scene and the market reacted accordingly. I would think there was a close connection between the two.''

Other analysts agreed. ''The seven-year note auction didn't go well,'' said Sid Dorr, vice president of institutional trading at Charles Schwab & Co. in San Francisco. ''The yield was the highest since April of '89. They were looking for better.''

Peter Vandenberg, vice president of equity trading at Lehman Brothers, called the bad news about interest rates ''a concrete negative.''

Before the late drop, computer-driven buy programs had pushed stocks higher at midday as a rumor circulated that Iraqi President Saddam Hussein had been shot. The rumor was quickly squelched by U.S. officials in Washington and stocks lost their gains.

Oil prices swung wildly, plunging on the Hussein rumor and never recovering, which analysts said should have been supportive for the market. But gloom about the prospects for interest rates dominated, they said.

On the trading floor, two retailers paced the actives. Wal-Mart Stores was the most active issue, down 1 to 25 1/8, as the whole retail sector weakened amid fears about what Thursday's monthly sales reports may show.

Toys ''R'' Us followed, falling 1 3/4 to 20 3/4 after a Lehman Brothers analyst reportedly made negative comments about the company's short-term outlook. Waste Management was third, down 7/8 to 30.

Oil issues tumbled on the plunge in oil prices. Exxon lost 1 to 48 3/4, Texaco fell 1 1/8 to 59 7/8 and Chevron slid 1 1/2 to 70 3/4. All are components of the Dow industrials.

Among other blue-chip issues, AT&T fell 7/8 to 31 1/8, IBM lost 1 7/8 to 103 1/2, General Electric slid 7/8 to 52 and Sears fell 7/8 to 23 3/8. But General Motors managed a gain, up 5/8 to 36 1/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 202,735,650 shares, compared with 175,997,170 shares traded in the previous session.

Prices closed sharply lower in moderate trading on the American Stock Exchange.

The Amex Market Value index skidded 3.79 to close at 299.26. Declines led advances 393-141 among the 760 issues traded. The price of an average share lost 12 cents. Composite volume totaled 12,986,600 shares vs. 13,543,900 traded Tuesday.

B.A.T Industries led the Amex issues, off 5/16 to 10 3/4.

The National Association of Securities Dealers composite index sank 5.86 to close at 333.25 after having hit its lowest level since January 1988 on Tuesday.

#90283u1820 10/10/1990 ~United Press International

ANCHORAGE, AK (OCT. 10) UPI - Scientists have discovered the remains of a horned dinosaur and an armored dinosaur at two widely-separated locations in Alaska, a researcher reported Wednesday to the 1990 Arctic Science Conference.

''We have a very exciting group of finds this year on the North Slope,'' said Roland Gangloff, paleontologist and curator of earth sciences at the University of Alaska Fairbanks museum.

''But even more interesting, in my point of view, is a find in the Talkeetna Mountains of a different type of dinosaur than we've found so far on the North Slope or anywhere else in the arctic and this is a form of an armored dinosaur called ankyklosaur,'' Gangloff said.

The discovery in the Talkeetna Mountains, about 125 miles northeast of Anchorage, was accidental but represented the first ankylosaur found so far north, he noted.

The find on North Slope, the gently sloping terrain between the Brooks Range and the Arctic coast, was made by scientists concentrating on a site along the Colville River, 98 miles southwest of the Prudhoe Bay oil fields, near a known fossil bed.

Both discoveries were made over the summer but were not reported until the 41st Arctic Science Conference, organized by the Arctic Division of the American Association for the Advancement of Science.

For years, wilderness guides had noticed a strange rock outcropping in the rugged Talkeetna Mountains. The odd-looking rocks broke off and tumbled down this year, were collected by hunting guides and turned over to the university museum in Fairbanks where scientists concluded that they had an ankylosaur skull, Gangloff said.

A portion of the snout and the back of the skull were missing, but enough remained to identify the creature as belonging to the nodosauridae family of ankylosaur, Gangloff said.

Until the chance find, no ankylosaur had been found farther north than southern Alberta, Canada, Gangloff said. But he said the lone discovery may lead to new scientific exploration of the mountain range north of Anchorage.

The middle Colville River has been known as a rich source of dinosaur remains

since 1984 when scientists identified the bones of a hadrosaur, a duck-billed dinosaur, found in what has become known as the Liscomb bed.

But over the summer, water levels of the river dropped to unusually low levels and scientists took advantage of the opportunity to explore new grounds a quarter-mile downstream.

''This revealed a massive accumulation of bones ... which may be an extension of the well-known Liscomb bone bed or may be slightly younger, '' Gangloff said. He said the site yielded what appears to be ''a rich concentration of horned dinosaur remains.''

Scientists speculate that the bone pieces may belong to a pachyrhinosaurus, which Gangloff described as ''a very thick-nosed, thick-headed form, quite ugly,'' or to a horned dinosaur of the ceratops family, or even another ankylosaur.

''We haven't really had a chance to collect anything to any great degree'' from the new Colville River site, Gangloff said. He said researchers have only two weeks each summer to explore the rich Colville fossil beds because when winter snows finally melt, there is only a brief period when scientists may work in the area without disturbing nesting sites of the endangered peregrine falcon.

But in eight weeks of work - two weeks each summer over the last four years - at the Colville bone beds, scientists have collected over 1,000 bones, which Gangloff characterized as ''an extraordinary accumulation of material in such a short period of time.''

Gangloff said the middle reaches of the Colville River have proven to be ''one of the richest areas anywhere in the world and certainly the richest found anywhere in the arctic of North America.''

He said evidence of several other dinosaurs also has turned up in ''the teeth of a number of meat-eaters, including the tyranosaurid, a small form of tyranosaurus rex.''

The concentration of bones along the Colville River, now from two sites or one expanded site, suggests that ''these animals were probably killed in mass kills,'' Gangloff said, possibly by flooding.

He said the discoveries may contribute to the study of whether dinosaurs migrated, either seasonally or over a long term. Alaska was substantially milder 70 million years ago, the estimated age of the sediments, but temperatures still may have reached freezing, Gangloff said.

#90283u1832 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI - The Commerce Department said Wednesday four companies have been selected for the Malcolm Baldrige National Quality Award for 1990.

The winners are:

- The Cadillac Motor Car Division of General Motors Corp., Detroit.

- International Business Machines division, Rochester, Minn.

- Federal Express Corp., Memphis.

- Wallace Co., Inc., a private Houston petrochemical firm.

The coveted award, named for the late Reagan administration commerce secretary recognizes American companies that practice and promote quality and share successful quality management strategies with others.

Commerce Secretary Robert Mosbacher, saying top-notch exports are the key to the nation's business future, called quality ''the one thing we can do in this country to assure our continued economic prosperity.''

''If we can keep up our exports it'll keep us out of any real recession,'' Mosbacher said in an interview. ''The No. 1 way you build your exports is building quality products. It sounds simple as hell, but that's the way it is.''

The award judges, including business school faculty and retired corporate executives, checked 97 competing companies on customer satisfaction, planning, quality assurance, leadership and other points.

The selection of Federal Express marks the first time a services- sector company has earned the award. Cadillac and IBM were cited for achievements in manufacturing. Wallace was cited for achievements as a small business.

In 1989, Milliken & Co., and Xerox Business Products and Systems were named winners. In 1988, the first year the competition was held, Motorola Inc., The commercial nuclear fuel division of the Westinghouse Electric Corp., and Globe Metallurgical Inc., claimed the award.

#90283u1861 10/10/1990 ~United Press International

BURBANK, Calif. (OCT. 10) UPI - Lorimar Telepictures, the largest producer of prime-time network programming, said Wednesday it named Leslie Moonves as its president, one day after David Salzman left the post to form his own entertainment company.

Moonves, who had been exectutive vice president of creative affairs, has acted as Salzman's chief aide during the past four years. During that time, Lorimar has been the leading prime-time network television supplier.

Lorimar, a unit of Time Warner's Warner Bros. Inc., currently supplies the three networks and Fox Broadcasting Co. a total of 11 series with eight hours of programming.

Warner Bros. TV supplies six shows with four and a half hours of prime-time programs, giving the two production companies more than a 20 percent share of the 60 hours of entertainment series regularly programmed by the three networsk and Fox.

Moonves has overseen the development anbd production of such series as ''Knots Landing,'' ''Dallas,'' ''Midnight Caller,'' ''Full House,'' ''Perfect Strangers'' and ''The Hogan Family.'' He also supervised four new shows on the network fall schedules: ''DEA,'' ''Gabriel's Fire,'' ''The Family Man'' and ''Going Places.''

Moonves joined Lorimar in 1986 after working for Twentieth Century Fox, Saul Ilson Productions and Catalina Productions.

#90283u1862 10/10/1990 ~United Press International

UNITED NATIONS (OCT. 10) UPI - Non-aligned countries and the U.N. Security Council permanent members discussed a compromise resolution Wednesday that would condemn this week's violence in the Old City in Jerusalem and order an investigation of the incidents that led to the death of 21 Palestinians.

Diplomats said non-aligned delegates agreed in the afternoon to discuss a text proposed by the president of the Security Council, British Ambassador David Hannay.

Hannay's version was based on a resolution proposed by the United States, which sought to condemn the violence in Jerusalem. Hannay, trying to meet demands by the non-aligned, changed the text by removing references that appeared to defend Israel in the killings.

Diplomats declined to say when they would reach final agreement on a resolution.

If the Security Council voted to condemn Israel, it would mark the first time since 1982 that the United States did not use its veto to defend an ally. In June 1982, the United States joined other council members to condemn Israel's invasion of Lebanon.

The U.S. text contended that the Israeli forces were ''ill-prepared'' for the sudden events at the Temple Mount's Western Wall Monday, when thousands of Jewish worshipers celebrated the Feast of the Tabernacle and were attacked by rock-throwing Palestinians.

The new phrasing in the British text said, ''Israeli security forces responded excessively, and with deadly force, thus resulting in the tragic consequences.'' The text ''condemns the violence and particularly the excessive Israeli response.''

Both the United States and non-aligned nations have advanced each a resolution since Monday. Both condemned the killing, but differed in who should investigate the incidents. Washington wanted Secretary-General Javier Perez de Cuellar to send an envoy while the non-aligned, backed by the PLO and Arab states, wanted a three-member Security Council team, which would give an official report on the violence.

Israeli authorities said rock-throwing Palestinian demonstrators attacked Jewish worshipers forcing an intervention by Jerusalem police. More than 150 Palestinians and Israelis were also wounded.

The non-aligned rejected the U.S. resolution because it shields Israel although it condemns the killing. In return Washington threatened to veto the non-aligned document for calling Israel the occupying power in the West Bank and Gaza Strip.

Diplomats negotiated without success Tuesday night to find a common ground. Hannay then proposed his version based on the American text and the non-aligned accepted to discuss it Wednesday, diplomats said.

U.S. Ambassador to the United Nations Thomas Pickering told reporters Wednesday afternoon that he preferred not to use the veto in order to keep the unity in the council, which worked unanimously against the Aug. 2 Iraqi invasion of Kuwait.

The possible condemnation of Israel by the Security Council prompted Jewish organizations to protest.

Seymour Reich, president of the Conference of Presidents of Major American Jewish Organizations, issued a statement expressing ''deep dismay'' that Washington would condemn Isreal.

''The proposed U.N. resolution is harsh in its condemnation of Israel and hypocritical in ignoring the perpetrators of the events,'' Reich said.

Reich said the U.S.-supported condemnation may satisfy the Western- Arab coalition against Iraq, but it would be ''far outweighed by the long-range perils that would follow this U.N. resolution.''

SAN FRANCISCO (OCT. 10) UPI - The California Supreme Court Wednesday refused to consider a request to reduce the $5 million bail for jailed financier Charles H. Keating Jr.

Only two of the court's seven justices indicated they would vote to consider a reduction in Keating's bail. It takes four votes to grant bail reduction.

Keating was jailed last month after Los Angeles County Superior Court Judge Gary Klausner imposed the $5 million bail on a 42-count indictment charging Keating and three business associates used fraud and deceit in the sale of allegedly unsecured bonds, commonly known as ''junk bonds,'' to Lincoln Savings and Loan customers.

Indicted by a grand jury Sept. 18, he has pleaded not guilty to the charges.

Keating is the alleged architect of the costliest savings and loan failure in U.S. history. He allegedly sold bonds in American Continental Corp., the Keating-controlled parent company of Lincoln Savings.

Keating, 66, and the three associates are accused of making false and misleading statements in connection with the sale of bonds that were high risk and ultimately turned out to be worthless.

Keating has been described as the quintessential wheeler-dealer in the thrift bailout scandal. The land developer admits using Lincoln Savings assets to invest millions of dollars in real estate and building projects in Texas, Arizona and Florida.

In addition, he donated hundreds of thousands of dollars to officeholders, including Sen. Alan Cranston, D-Calif.

The cost to taxpayers of the Lincoln Savings collapse is estimated at $2 billion.

Lincoln was seized by regulators in April 1989, a day after American Continental filed a bankruptcy petition to protect itself from creditors.

Keating's three co-defendants are: Judy Wischer, 42, former president of American Continental, and Ray C. Fidel, 32, and Robin Symes, 37, both former presidents of Lincoln.

Justices Edward Panelli and Stanley Mosk indicated they would vote to hear Keating's request for a reduction in bail.

ANDOVER, Mass. (OCT. 10) UPI - Unable to get prompt regulatory approval,

Andover Bancorp Inc. and First Essex Bancorp Inc. said Wednesday they backed out of an 8-month-old ''definitive'' agreement to merge into a $1.3 billion banking company in Massachusetts and New Hampshire.

They blamed the mutual decision on recent deterioration in the region's economy, the faltering real estate market and changes in the ''regulatory environment'' for banks.

Leonard A. Wilson, president and chief executive officer of Essex, said the companies had not consummated their merger because they had been awaiting regulatory approval, which had not yet been granted. He also said no date had been set for the stockholders' meetings that would have been necessary before the deal closed.

In a joint statement, the companies said ''the uncertainties inherent in the current climate make it impossible to be sure that the anticipated benefits of the proposed merger would be achieved.''

They also acknowledged that both companies have had to increase their loan loss reserves.

Andover Bancorp, with $694 million in assets, is the parent of Andover Savings Bank. The bank has eight offices in northeastern Massachusetts.

First Essex, based in Lawrence, has $599 million in assets and owns First Essex Savings Bank in Lawrence and First Essex Savings Bank of New Hampshire in Wingham, N.H. It has 10 offices in the two states.

The merger deal, signed Feb. 12, had called for Andover Bancorp stockholders to retain their shares in the company, which would change its name to Andover-Essex Bancorp. First Essex shareholders would have turned in their shares for 0.526 shares of the Andover-Essex stock.

#90283u1940 10/10/1990 ~United Press International

DETROIT, Mich. (OCT. 10) UPI - A federal jury in Detroit has found one of the nation's leading computer manufacturers liable for violating antitrust laws in a judgment that could approach $30 million, attorneys said Wednesday.

The jury, after a month-long trial before U.S. District Judge Horace Gilmore, awarded a verdict of $8,453,000 against Prime Computer Inc. of Natick, Mass. Jurors held Tuesday that Prime's practice of tying customers' needed software

revisions to hardware maintenance contracts violates federal antitrust laws.

The verdict was expected to be appealed.

Rodger Young, one of the attorneys for plaintiff Virtual Maintenance Inc., said the judgment was expected to be trebled, which with interest and attorney fees, could come close to $30,000.

''This case is significant because the issue of tying computer software revision with hardware maintenance at the expense of free and open competition is being litigated for the first time in this context,'' Young said.

''A decision on the questions will have a major business impact, since most computer manufacturer's profits come from software revisions and hardware maintenance rather than the low-profit margins derived from the sale of hardware alone,'' he said.

Prime Computer is the world's second-largest supplier of computer- aided design and computer-aided manufacture, or CAD-CAM, after IBM, Young said.

''In the automotive industry alone, this verdict will be critical to the numerous CAD/CAM design firms which supply the major auto manufacturers,'' Young said.

Prime Computer had contended the contractural agreements are a business necessity.

Virtual Maintenance sought an injunction barring Prime Computer from enforcing numerous customer contracts tying software revision and hardware maintenance, as well as money damages.

Jamal Hamood, another of the Virtual Maintenance attorneys, said ''the judge took that portion under advisement. He said he would wait five days, and if there are no objections, he would sign it.''

Hamood said the verdict almost certainly would be appealed by the firm of Honigman, Miller, Schwartz & Cohn of Detroit, representing Prime Computer.

#90283u1954 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI - In a big step forward for the clean air bill, House and Senate negotiators reached tentative agreement Wednesday on provisions requiring reduced smog-causing emissions from cars and sale of low-polluting ''reformulated'' gasoline in polluted cities.

The deal on motor vehicle emissions - achieved after marathon staff negotiations - resolved some of the toughest issues blocking final

congressional action on the clean air legislation.

However, with Congress expected to adjourn for the year within two weeks, the clean air negotiators still must work out substantial disagreements over sections requiring cutbacks in acid rain pollution from power plants and toxic air emissions from industry.

Even if the negotiators act quickly, their final product still must be approved by the House and the Senate. And while House passage appears assured, there have been rumblings that Republican senators - unhappy with the cost of the bill - might stage a filibuster to block action and kill the measure.

The time crunch was underscored by House Speaker Thomas Foley, D- Wash., and Senate Democratic leader George Mitchell of Maine in a meeting Wednesday with leaders of the House-Senate conference committee on the clean air bill.

Foley and Mitchell asked that all remaining disputes be settled by Sunday, seemingly a tall order given the so far snail-like pace of the conference committee, which has been meeting since July.

Worse, tensions between House and Senate negotiators appear to have thickened in recent weeks, with two sides trading angry words at their last meeting.

On the bright side, the tentative agreement on motor vehicle emissions is a major step forward, largely because it is the area of prime concern to Rep. John Dingell, D-Mich., leader of the House clean air conferees and the powerful chairman of the House Energy and Commerce Committee.

The negotiations over car emissions were especially difficult because Dingell was determined to protect his home-state automakers from any requirements he considered excessively costly.

''We've all lost a fair amount of sleep over this (section), and I suspect that industry is going to lose some sleep trying to comply with what are some very stringent provisions,'' Dingell said of the agreement on car emissions.

''Nevertheless, we have resolved these issues in a way that makes economic and environmental sense and I think everyone is relieved to have this portion of the legislation behind use.

The oil industry, another powerful force on Capitol Hill, also was greatly concerned by the bill's alternative fuels provisions.

The key parts of the agreement on motor vehicles would:

-Give the Environmental Protection Agency discretion over how far to push requirements for reductions in smog-causing automobile tailpipe emissions after the year 2000. House and Senate negotiators agreed on a first round of

cuts in the mid-1990s, but the Senate initially wanted to require additional post-2000 cuts if the nation's smog problem had not appreciably improved.

-Require the sale of cleaner-burning ''reformulated'' gasoline starting in 1992 in cities with excessive carbon monoxide pollution. The gasoline would contain ethanol additives known to reduce carbon monoxide emissions. Reformulated gas would be required in the nation's nine smoggiest cities by 1995. That gasoline must reduce smog-forming emissions by 15 percent initially and then 20 percent by the year 2000.

-Allow states to adopt California's program for requiring sale of thousands of low-polluting cars and the use of such vehicles by companies with large commercial fleets.

Environmentalists gave a lukewarm reception to the agreement on motor vehicles saying it would help clean up urban smog, but none too soon. They complained that negotiators pushed back compliance dates for cleaner cars and fuels until the late 1990s.

''The auto and oil companies will have to make far fewer pollution reductionsin the 1990s than they are capable of making,'' said Daniel Weiss, lobbyist for the Sierra Club.

William Fay, head of the Clean Air Working Group, the main industry coalition, said the car agreement was less onerous on the auto and oil industry than previous versions.

But he said oil companies had concerns over whether they could change refinery operations quickly enough to produce the required amount of reformulated gasoline.

#90283u1960 10/10/1990 ~United Press International

CHICAGO (OCT. 10) UPI - A federal judge Wednesday found three former Sundstrand Corp. executives not guilty of making false statments to the government about fraudulent defense contracting policies, saying prosecutors failed to prove the charge.

Senior U.S. District Judge Prentice Marshall also dismissed portions of remaining conspiracy counts that accused the defendants of conspiring to defraud the government and the Defense Department.

But he reserved judgment on charges Joseph McCarthy, 54, and Ralph Hamann, 64, both of Rockford, and Ray J. Chapel Jr., 47, of Reston, Va., conspired to disguise millions of dollars in cost overruns on defense contracts as overhead expenses payable by the government.

Marshall issued a directed verdict acquitting the defendants on the charge of making false statments. The ruling came after the prosecution rested its case.

Marshall, presiding at the bench trial, heard a month of testimony from government witnesses. He ruled that prosecutors failed to prove the defendants lied to the Defense Department about contract fraud.

The defense offered no evidence and called no witnesses.

Marshall also seid the government failed to show intent required to substantiate the sections of the counts alleging the defendants knowingly conspired to defraud the government and the defense department out of money and design rights.

He said he would issue a verdict next week on the remaining conspiracy counts - related to an alleged coverup of contracting practices under which Sundstrand surreptitiously billed the government for cost overuns on government contracts,

Sundstrand pleaded guilty to five counts of a federal indictment for defense fraud in October 1988 and agreed to pay $115 million in penalties and reparation - the biggest recovery an any defense fraud case.

It also agreed to pay the Defense Department another $62.3 million in settlement of administrative matters related to its past contracting practices.

The company was suspended as a government contractor following the guilty plea but was reinstated in January 1989 after agreeing to revise its contracting procedures and make reparations.

Sundstrand, a Fortune 500 company, has 15,000 employees worldwide, including 4,000 in Rockford. It manufactures electronic, mechanical and hydraulic systems for the government and diversified aerospace and industrial markets.

#90283u1966 10/10/1990 ~United Press International

RALEIGH, N.C. (OCT. 10) UPI - President Bush stuck to his vow not to hold grudges against breakaway Republicans Wednesday by campaigning for Sen. Jesse Helms, R-N.C., ''a champion of conviction,'' who last week helped kill a Bush-backed budget deal.

Speaking at a breakfast fund-raiser, the first of three stops for the day, Bush described the three-term conservative senator as an effective leader and ''a watchdog of taxpayer money.''

And in a direct reference to their dispute over the budget, Bush noted, ''Occasionally, of course, there are going to be differences.''

Making good on his promise to campaign for Republicans regardless of their stand on the budget, Bush touted his plans for the package as he traveled to St. Petersburg, Fla., to campaign for Gov. Bob Martinez, and then on to address a dinner in Atlanta for GOP gubernatorial nominee Johnny Isakson.

Martinez is being challenged by former Democratic Sen. Lawton Chiles. Isakson is far behind in a bid to defeat Lt. Gov. Zell Miller and become Georgia's first GOP governor in 122 years.

Helms, who is in a razor-close race with Democrat Harvey Gantt, broke from Bush last week in opposing the bipartisan budget agreement that called for a hefty increase in taxes and a big cut in federal services.

A poll released Tuesday showed Gantt, a former two-term mayor of Charlotte, N.C., leading Helms 43.5 percent to 42.7 percent, with 9 percent undecided.

The president noted that reporters had challenged him on the senator's defection on the budget plan. ''That is not the point,'' Bush said. ''I tell them if we had more senators like him,'' these deficit problems ''would have been settled years ago.''

Bush also sought to smooth the latest flap in the budget crisis by remaining mum on whether he might consider raising tax rates for the richest Americans in return for a cut in the capital gains tax.

''Publically we're not taking a position on any specific item,'' said press secretary Marlin Fitzwater, accompanying the president.

Arriving in St. Petersburg, Fla., Bush refused to clear up the tax question, saying, ''Let Congress clear it up.''

But, in his speech on behalf of Martinez, Bush predicted an acceptable budget can be hammered out by Oct. 19, the day stopgap funding expires.

''I'm confident Congress can complete its vital work and pass a sound budget that puts this nation on the path to long-term economic growth,'' he told several hundred Martinez supporters at a seaside rally.

In Atlanta, Fitzwater said Bush would meet with key congressional Republicans Thursday at the White House where he said the president will primarily listen to what the lawmakers have to say.

Asked if Bush would take a definitive stance on the divisive combination of tax rates and capital gains at the meetings with GOP House committee members, Fitzwater said, ''I don't think he will reflect on that one way or the other.''

Throughout the day, Bush pressed the message that ''this budget package was

not the one I would have written alone.''

At the breakfast fund-raiser, he added, ''And it's not the one Jesse would have written either. But as president I don't control Congress and we had to compromise because the future of the country is at stake.''

And to Helms, he held out his hand. ''Jesse has earned a reputation for independence and candor. And occasionally we do not see eye to eye,'' said Bush. ''Sometimes honest men do disagree.''

The president was accompanied on the campaign swing by a number of Republican lawmakers, but conspicuous by his absence was Rep. Newt Gingrich, R-Ga., the House Republican whip who helped lead last week's GOP revolt against the budget package.

A spokesman for Gingrich said the congressman planned to remain at work on Capitol Hill to try to obtain a congressional override of Bush's veto of a bill that would limit textile imports.

#90283u1998 10/10/1990 ~United Press International

(OCT. 10) UPI - President Bush says he's confident Congress will hammer out an acceptable budget agreement by October 19th, the day an emergency government spending bill expires. Bush is on the road today, campaigning for Republican candidates in Raleigh, North Carolina, St. Petersburg, Florida, and Atlanta, Georgia.

The Supreme Court heard oral arguments today in a case pitting a woman's right to work against a company's attempt to protect unborn children from exposure to hazardous substances in the work place. Johnson Controls of Milwaukee, Wisconsin, barred women from jobs having a high exposure to lead.

Israel today named three independent investigators to probe Monday's slayings of 21 Palestinians by police on Jerusalem's Temple Mount. Prime Minister Shamir began the investigation at the request of Israel's police minister. Arabs deny the rioting was organized.

The shuttle Discovery crew boarded a NASA jet for Houston today, hours after completing a four-day mission with flawless landing at Edwards Air Force Base in California. Officials hope the flight ends NASA's recent run of bad luck. The shuttle Atlantis is to be moved back to its launch pad tomorrow.

A man doused two women abortion clinic employees with sulfuric acid in New York City last night. Police say one of the woman was splashed in the face and eyes and is listed in guarded condition at a hospital.

A German defense official says the Soviet Union has agreed to cut back on

military maneuvers in former East Germany territory and withdraw its 380-thousand troops from the country within four years.

The South African government today freed 21 political prisoners. It's the largest mass release of convicted members of the African National Congress since a 30-year ban on the movement was lifted by the de Klerk government in February.

Education Secretary Cavazos told a Senate panel today that he needs more authority to stem fraud and abuse in the guaranteed student loan program. At the end of the 1990 fiscal year, borrowers owed eight-BILLION dollars in defaulted loans.

#90283u2095 10/10/1990 ~United Press International

NEW YORK (OCT. 10) UPI - Mike Lynn, executive vice president and general manager of the Minnesota Vikings, was named Wednesday president of the World League of American Football.

Dan Rooney, chairman of the board of the league, said Lynn will replace TexSchramm. The former Dallas Cowboys GM will remain as a consultant for the World League, which begins play in the spring of 1991, with teams based in Europe and North America.

''Mike has long been a proponent of pro football's international expansion and strongly believes in the future of American football overseas,'' NFL Commissioner Paul Tagliabue said.

''Tex Schramm has made countless contributions to football over the last 30 years and has been one of the outstanding innovators in all sports,'' he said.

#90283u2105 10/10/1990 ~United Press International

KANEOHE MARINE CORPS AIR STATION, Hawaii (OCT. 10) UPI - A Marine who refused to board a plane for Saudi Arabia faces a court-martial even though a military official said Wednesday that significant issues have clouded the legality of the orders he is accused of having disobeyed.

Maj. James Axelrod recommended a military trial after presiding over an investigative hearing last month for Cpl. Jeff Paterson, who is seeking conscientious objector status rather than fight for ''imperialistic economic interests.''

Paterson, 22, assigned to F Battery, 1st Battalion, 12th Marine Brigade at Kaneohe Marine Corps Air Station, refused to board a plane at Hickam Air Force Base as his unit was deployed to Saudi Arabia Aug. 29. When his sergeant tried

to push him aboard, he sat down in the hangar.

He spent three weeks in the brig before a federal judge ordered his release and is now confined to the base in Kaneohe.

Marine spokesman Capt. Leonard Ryan said the court-martial has not been scheduled but could start as early as Monday. Paterson's attorney Eric Seitz, said he will seek a delay because he is handling an upcoming murder trial.

Paterson faces trial on one count of missing movement, two counts of disobeying a lawful command, and two of unauthorized absence.

If convicted of all charges, he would face up to five years and one month in prison, reduction to private, forfeiture of all pay and benefits, and a dishonorable discharge, Ryan said.

Seitz, however, predicted that military authorities would lose the court-martial and Paterson would be discharged either by them or by a federal court - and he said the case will prove ''embarrassing'' to the Marine Corps.

''The orders they gave to him were illegal,'' Seitz said. ''They were not supposed to assign him to duties that might conflict with his conscience and they weren't supposed to send him anywhere he couldn't talk to his lawyer and complete his conscientious objector application.''

Seitz also said authorities acted ''subjectively'' because ''they hated what he was saying and what he stood for, and they weren't handling the situation with any intelligence or maturity.''

Axelrod, although he recommended a court-martial, wrote that ''significant issues'' must be resolved during trial, since some evidence raises the question of the legality of the orders Paterson was given.

One of the issues is whether reasonable efforts were made to assign Paterson to duties that conflicted as little as possible with his beliefs.

The Marine was to be assigned as a supply clerk for his artillery unit, but Axelrod said that would have ''inexorably'' required him to support the unit's mission in Saudi Arabia, peaceful or hostile.

Axelrod also wrote that Paterson suffered some unnecessary ridicule, such as removal of the corporal insignia of his clothing on the grounds that he no longer deserved to wear the Marine uniform.

Paterson, a native of Hollister, Calif., held a news conference Aug. 16 to announce that he had no political opinions when he joined the Marines four years ago but now opposes U.S. policy in the Third World. He said he would not be ''a pawn in America's power plays for profits and oil in the Middle East.''

The Marine Corps commandant in Washington is considering Paterson's request for conscientious objector status, which Marine investigator Maj. Steven Arbogast has recommended be denied.

Arbogast said investigators believe Paterson's position is sincere but questioned its depth, saying he ''has read a few books, talked with some people ... and now burns with the zeal of the convert.''

The Los Angeles Times published an essay written by Paterson on Tuesday. In it he said his attitude changed after service in Okinawa, South Korea and the Philippines and when he returned to Hawaii he joined various peace and environmental groups.

He said choosing to seek conscientious objector status was a difficult decision, but he felt ''that tens of thousands of lives were being threatened for imperialistic, economic interests,'' and questioned why ''200,000 U.S. troops (are considered) expendable to secure less than 5 percent of this nation's oil supply.

''The truth does not set us free,'' he wrote, ''but demands that we act on it as people of conscience, no matter the cost.''

#90283u2133 10/10/1990 ~United Press International

WASHINGTON (OCT. 10) UPI - President Bush maintained his string of successful vetoes Wednesday when the House set aside pleas for protection from unfair foreign competition and failed to override his veto of a bill to restrict textile and shoe imports.

Supporters of the bill won a 275-152 majority, but fell 10 votes short of the thirds required to pass the bill over Bush's objections. Bush has vetoed 15 bills since becoming president and Congress has not been able to override any of them.

Supporters of the legislation argued the measure would help U.S. textile and shoe manufacturers who are losing more and more of the domestic market to foreign firms using cheap labor.

Foes branded the bill ''protectionist,'' saying it runs contrary to the U.S. open-market trade policy and invites retaliation by other nations. Opponents also said the legislation would drive up domestic prices, give unnecessary support to an already healthy industry and could hurt key U.S. allies such as Turkey and Egypt.

The textile bill would have limited foreign-made textiles and apparel to a 1 percent increase per year over the previous year's levels, and would hold shoe

imports to 1989 levels.

The bill also would have authorized a special allocation of textile quotas for countries that increase their purchases of American agricultural exports.

Bush said in his veto message the bill would ''damage the national economy, increase already artificially high costs to consumers ... and abrogate our international agreements.''

House Republican leader Robert Michel of Illinois said, ''In an effort to protect one industry, we'll be socking it to our farmers, our industry workers and many others who rely on exports for their livelihood.''

''Recent events in the Persian Gulf have heightened the critical importance of international cooperation,'' added Ways and Means Committee Chairman Rep. Dan Rostenkowski, D-Ill.

''Yet the textile and footwear quota bill ... would violate 40 different trade agreements and super-impose a unilateralist policy to protect two industries so critically important to the international trading system.''

Rep. Howard Coble, R-N.C., said the legislation would create 150,000 new American textile jobs, helping to offset the nearly 400,000 jobs lost in the industry since 1980.

''Each of us probably embraces free trade as an abstract concept,'' Coble said. ''But we are not dealing with theoretical niceties today so much as we are responding to the needs of real people with real problems.''

Rep. Jamie Whitten, D-Miss., argued for an override, saying, ''We have been suckers, in my opinion, by letting (foreign countries) have our domestic markets while they refrain from letting us have equality.''

Rep. William Gray, D-Pa., added, ''Those who are argue that imports are a boon to the American consumer are pulling the wool over your eyes. That's their right, I suppose. I just want to make sure that the wool that they pull is American wool.''

-30- 3233

#90283u2142 10/10/1990 ~United Press International

(OCT. 10) UPI - Lawmakers huddled on Capitol Hill today, continuing efforts to put together a budget package. Talks in the House Ways and Means Committee center on what to cut and what to add to the budget mix. The goal is to slash the deficit by 500-BILLION dollars over five years. President Bush says he's confident that an acceptable budget compromise will be passed by October 19th, when the government is due to run out of money again.

President Bush followed through today on a pledge NOT to hold grudges against breakaway Republicans. He spoke at a fund-raiser for North Carolina Senator Jesse Helms in Raleigh, then traveled to St. Petersburg, Florida, to campaign for Governor Bob Martinez. Helms voted last week against a Bush-backed budget deal, but today the president lauded the lawmaker as ''a champion of conviction'' and ''a watchdog of taxpayer money.''

The Senate has rejected a proposed cut in Social Security taxes that would have reduced government income by 150-BILLION dollars. Opponents maintained the cut would virtually torpedo any budget agreement. The proposal was turned down on a 54-44 procedural vote.

The Supreme Court heard oral arguments today in a case that could become the most controversial of its current term. The court must determine whether a company has the right to exclude all women from certain jobs because of the fear they might become pregnant and their fetuses exposed to danger. Women's rights groups and labor unions claim the policy violates a section of the Civil Rights Act of 1964 and other legislation.

An advertised demonstration by prostitutes in Moscow fizzled today. NO women showed up at the scheduled rally that was to center on demands for improved police protection and legalized brothels. A spokeswoman says the hookers failed to show up because they felt it was NOT time yet to demonstrate in public.

#90283u2251 10/10/1990 ~United Press International

OAKLAND, CA (OCT. 10) UPI - Dave Stewart proved to be the unshakable foundation of the Oakland Athletics pitching staff in earning the MVP award of the American League playoffs.

Stewart won two games in the ALCS, giving him a record five LCS victories. He set the tone of the series by holding the Boston Red Sox to one run and four hits in Game 1 and was a picture of calm during the turmoil in Game 4.

He held the Red Sox to two runs and eight hits in 16 innings, an ERA of 1.13.

''Dave Stewart went out and did what he has done for us all season long,'' third baseman Carney Lansford said. ''He always gives us a chance to win.''

Stewart's career LCS ERA of 1.79 is the fifth lowest of all-time. He has been the starter and winner in the deciding game of the Athletics' last three playoff championships.

''My record speaks for itself,'' said Stewart when asked if he thinks he's the best pitcher in baseball. ''I just go out and do the best I can.

''I'm not the type of guy to say that I did it all myself. I'm complimented with guys behind me who do an awful lot to help me.''

Stewart also was as outspoken Wednesday about Roger Clemens antics, which led to his ejection in the second inning, as he was Tuesday about Clemens being allowed to start with an injured shoulder.

''There is no excuse for what took place out there,'' Stewart said. ''This is a game of baseball, a game of sportsmanship. A ball's a ball, a strike's a strike.

''What it did was give me more of a reason to go out and shut them down.''

And what is Stewart - possibly the most famous pitcher in baseball today - going to be doing Thursday?

''I'm going to be under the Richmond Bridge fishing,'' he said. ''I hear the sturgeon are running.''

Hopefully the fish will have a better chance against Stewart than the Boston Red Sox did.

#90283u2367 10/10/1990 ~United Press International

(OCT. 10) UPI - Congressional committees have started working on what taxes to increase and what programs to trim. The tax-writing House Ways and Means Committee met privately today to start work. The Senate Finance Committee was scheduled to meet. But the session was canceled because of confusion about whether President Bush will support higher taxes for the rich... in exchange for a capital gains tax cut.

The death count for Americans involved in Operation Desert Shield rose to 32 today when two fliers died in the crash of an F bomber. The jet went down in the southern Arabian peninsula. In Kuwait... 378 women and children... most of them Americans... are ready to leave on the first evacuation flight in more than two weeks.

In Washington, sources say there is little chance Congress will block a seven-BILLION-dollar weapons sale to Saudi Arabia.

Widespread incidents of stone-throwing are reported in Arab sections of Israel today. But Israeli police used NOthing stronger than tear gas on the demonstrators. Prime Minister Yitzhak Shamir named three independent investigators to probe Monday's killings of 21 Arab demonstrators at Temple

Mount.

The astronauts who finished a successful mission aboard the shuttle Discovery just hours ago are heading home to Houston. Discovery's flawless landing marked the final chapter in a nearly perfect flight... boosting the morale of the space agency after a summer of delays and failures. Discovery's crew launched the Ulysses probe that will fly over the poles of the sun.

-30- 1705

#90283u2530 10/10/1990 ~United Press International

(OCT. 10) UPI - The budget process has in a way begun all over again in Congress. The House Ways and Means Committee met today to talk about what tax increases it will recommend. In addition, the panel will suggest the levels of cuts to be made in federal benefit programs. The meeting is the first in a series that results from the complex budget process stemming from the new federal budget.

.

The committee today approved a deficit reduction plan that cuts Medicare 10-BILLION dollars less than was proposed by the bipartisan budget summit. It also would raise gasoline taxes a penny less than proposed. The plan does NOT address the trade-off between a capital gains tax cut and a hike in tax rates for the rich. That issue might be addressed in separate Democratic and Republican packages that could come to the House floor next week.

NON-aligned nations and the permanent members of the U-N Security Council discussed a compromise resolution today that would condemn Monday's Temple Mount violence in Jerusalem. Diplomats say the text is based on a proposal by the United States... but drops references that appear to defend Israel in the killings of 21 Palestinians. The compromise also orders an investigation into the incident. NO word on when a final agreement would be reached.

A suspect in the killings of five college students has been convicted- of assaulting his grandmother. 19-year-old Edward Humphrey was found guilty in Melbourne, Florida, today of beating his grandmother... even though she denies he beat her. The University of Florida freshman is a suspect in the five murders a month and a half ago in Gainesville, but has NOT been charged.

-30- 1840

#90283u2542 10/10/1990 ~United Press International

(OCT. 10) UPI - Tropical storm watches and warnings are up in Florida. Tropical Storm Marco appears headed for the Florida Keys, Florida Bay and Florida's Gulf Coast north to Longboat Key. Governor Bob Martinez activated the state's emergency operations center today to help local governments cope with the storm. Marco formed earlier today from a low pressure system that

swallowed the remains of Tropical Storm Klaus.

.

At last report, Marco was centered 95 miles south- southwest of Fort Myers, Florida... moving north at near 5 miles-an- hour.

A new study of the AIDS drug A-Z-T indicates the dose needed to be effective may NOT be nearly as large as earlier thought. Scientists at the Harborview Medical Center in Seattle gave 28 patients with AIDS- related complex one-fifth of the previously recommended dose. The patients improved just as much as patients who get larger doses... and had fewer side-effects.

A Greenpeace ship is being towed away from a Soviet nuclear test site in the Arctic Circle. The Soviets say they are towing the ship... the M- V Greenpeace... to Murmansk, but WON'T say if they will charge the crew with violating the Soviet border. A Greenpeace representative in Moscow says the crew of 28 has been incommunicado since the Soviets commandeered the ship Monday.

-30- 1466
#90283u2757 10/10/1990 ~United Press International
(OCT. 10) UPI - President Bush sought to smooth the latest flap in the budget crisis by keeping quiet on the tax question today. But in a speech in St. Petersburg, Florida, Bush predicted an acceptable budget can be worked out by October 19th... the day stopgap funding expires. .

In Washington, the House Ways and Means Committee approved a deficit reduction plan that would cut Medicare 10-BILLION dollars less than was proposed in a budget agreement killed by the full House last week.

Also on Capitol Hill today...

House and Senate negotiators reached tentative agreement on provisions that would reduce smog-causing emissions from cars. It's a big step forward for the clean air bill. But other disagreements are blocking final congressional action on the legislation.

President Bush maintained his string of successful vetoes today when the House failed to override his veto of a bill to restrict textile and shoe imports. Supporters of the measure had said it would protect U-S makers from unfair foreign competition.

The House today approved a bill authorizing a referendum by Puerto Ricans next year to choose the future status of the island- independence, statehood or continued commonwealth status. A similar measure is stalled in the Senate. In 1967, voters chose to maintain the commonwealth status.

A compromise resolution condemning Monday's deadly violence in Jerusalem's Old City is being discussed by permanent and NON-aligned members of the U-N Security Council. Diplomats say the text also calls for an investigation of the incidents that led to the deaths of 21 Palestinians. .

In Israel, Prime Minister Shamir named three independent investigators today to probe the Temple Mount slayings. It's still NOT clear how the violence began, or why police opened fire.

-30- 1971

#90283u2777 10/10/1990 ~United Press International

(OCT. 10) UPI - Tropical storm watches and warnings are in effect from the Florida Keys northward along the gulf coast to the Panhandle... thanks to Tropical Storm Marco. The weather system that ate the remains of Tropical Storm Klaus spit out Marco this morning in the southeastern Gulf of Mexico. .

At last report, Marco was centered about 45 miles southwest of Fort Myers, Florida, and was moving northward at about 10 miles an hour. Its top winds were clocked at near 60 miles-an-hour.

Parts of the upper Midwest are getting an early taste of winter. Up to six inches of snow fell in parts of Michigan, Illinois and Wisconsin today. Police say at least one person was killed in a snow-related traffic accident outside Madison, Wisconsin.

The California Supreme Court has rejected a request to cut Charles Keating's five-Million-dollar bail. The jailed former savings-and-loan official is accused of fraud in a thrift collapse that will cost taxpayers some two-BILLION dollars.

Testimony began today in Portland, Oregon, in the trial of a 10-Million-dollar civil lawsuit against white supremacist Tom Metzger. The former California Ku Klux Klan leader is charged with inciting three so- called ''skinheads'' who beat a black man to death in 1988.

The search is still on in Fort Lauderdale, Florida, for a jury to hear the obscenity trial of three members of the controversial rap group 2 Live Crew. A third day of jury selection ended today without a single juror being selected.

Hospitals and witnesses in Dhaka, Bangladesh, say at least five people were killed and 200 injured today when thousands of opposition party supporters clashed with police outside the nation's main government building.

A Canadian construction worker is hospitalized in stable condition in Toronto after surviving a 23-floor plunge yesterday. Police say Jason Watson was able to grab a safety rope for part of the way down, and that helped slow his fall.

He suffered a broken pelvis.

-30- 2155
#90283u2919 10/10/1990 ~United Press International
(OCT. 10) UPI - The first airlift of foreigners... mostly Americans... from occupied Kuwait in more than two weeks left Baghdad, Iraq, tonight en route to London. A spokeswoman at the U-S Embassy in London says 378 women and children were aboard the U-S-chartered jetliner... including 24 Britons, nine Canadians and five Austrians. Tomorrow, the Americans will be flown to Raleigh-Durham, North Carolina.

A plan to trim the federal deficit cleared the House Ways and Means Committee tonight. The plan would cut Medicare by 10-BILLION dollars less than proposed by the bipartisan budget summit. It would boost gasoline taxes a penny less than earlier proposed. The committee's plan does NOT get into whether to cut the capital gains tax or increase income tax rates on the rich.

The clean air bill received a major push forward today. House and Senate bargainers tentatively agreed on provisions requiring reductions in car emissions... and requiring the sale of low-polluting ''reformulated'' gasoline in cities. There are still major disagreements about cutbacks in acid rain pollution from power plants and cuts in toxic air emissions from factories.

The Supreme Court heard arguments in a significant case today... but the court is NOT expected to rule before next year. The case involves a woman's right to work... versus a company's attempt to protect the unborn children of its employees. A Milwakee manufacturer of lead-based batteries... which bars fertile women from certain jobs... is the defendant in the case.

-30- 1698
#90283u2924 10/10/1990 ~United Press International
(OCT. 10) UPI - A judge in Ventura, California, has ordered a former funeral home employee to stand trial in the nation's first oleander poisoning case. 33-year-old David Sconce is charged with killing a rival mortician by poisoning him with the deadly leaves of the oleander plant. If convicted, Sconce could be sentenced to death.

The debate of cloth versus disposable diapers for the sake of the environment may have ended today. Cincinnati-based Procter and Gamble says it believes it has found a use for disposable diapers once they've been used. The company says it will begin selling diapers that will break down in compost piles. The new ''compostable'' diapers could be test marketed as early as 1991.

PLEASANTON, CA (OCT. 11) BUSINESS WIRE - Arthur H. Wilder has been named president of the newly restructured FloWind Corp. according to an announcement released Thursday by Leon E. Richartz, FloWind board chairman and chairman of Leema Energy Resources Inc., majority shareholder of the newly reorganized FloWind Corp.

Wilder, who has held financial positions with IBM, Itel, Four-Phase-Systems, and Margaux Controls is assuming leadership of the firm as it emerges from a lengthy Chapter 11 proceeding.

FloWind, headquartered in Pleasanton, is one of the country's largest producers of electricity through wind energy. Under the reorganization, Board Chairman Richartz emphasized that the firm will continue to focus on generation of alternative energy from non-polluting and renewable resources.

FloWind is the primary U.S. developer and manufacturer of vertical axis wind turbines, a technology FloWind developed in cooperation with Sandia National Laboratories and the Department of Energy.

Other newly appointed members of the company are Stephen M. Harald, vice president of finance and member of the board; Michael M. McMullen, director of information services; and Cheryl Giles in administration. Harald, McMullen and Giles were previously associated with Leema Energy Resources Inc. Dr. Lawrence A. Schienbein will continue as vice president of research and engineering.

SANTA CLARA, CA (OCT. 11) BUSINESS WIRE - Catalyst Semiconductor Inc. announced Thursday the introduction of the CAT27HC010, a high speed CMOS 1Megabit (128Kx8) UV erasable and electrically reprogrammable EPROM.

As any byte on this device can be accessed in less than 70ns, the CAT27HC010 is ideally suited for high speed applications, such as high-performance microprocessor systems where eliminating the need for speed-robbing wait states is critical.

The Quick Pulse algorithm reduces the time required to program this chip and ensures more reliable programming. Product highlights include:

-- Fast Access Time: 70, 90, 120ns

-- 5V Single Power Supply (Read Mode)

-- Low Current Requirements:

Active: 80mA max (CMOS Levels)

Standby: 1mA max (CMOS Levels)

-- High-Speed Programming: 100us/byte

-- TTL Compatible Input/Output

-- 12.5V Programming Voltage

-- Electronic Signature

The CAT27HC010, available in JEDEC-approved 32-pin DIP and 32-pin LCC packages is targeted for military, telecommunications, instrumentation and computer market segments.

Catalyst Semiconductor Inc., a privately held company founded in 1985, is a technology leader in CMOS nonvolatile memories and is dedicated to the development of next generation memory products and their applications. The company's innovative products include: Smart Card microcomputers, CMOS NVRAMs CMOS E2PROMs, High Speed CMOS EPROMs, CMOS SRAMs, CMOS Flash Memories and BiCMOS analog products.

     #90284b0056 10/11/1990 ~Business Wire
MISSISSAUGA, ONTARIO (OCT. 11) BUSINESS WIRE - Lawson Mardon Group has announced the purchase of the blowmoulding operation of Jeyes Ltd. in Britain.

The purchase is the third major development in the United Kingdom to be announced by the Canadian-owned packaging and printing group in less than two weeks.

Last week Lawson Mardon announced the purchase of Koters Ltd. of Liverpool, the flexible packaging company of the Associated British Foods Group, and two weeks ago, Lawson Mardon opened a new 150,000 square foot factory in York, England to specifically supply the global packaging needs of international confectionery giant, Rowntree Mackintosh.

The moves follows a string of acquisitions by Lawson Mardon which recently incorporated four pacakging companies in Germany and France into its family of more than 40 factories located in Canada, the United States, Britain and

Ireland.

Lawson Mardon is now one of the three largest packaging companies in Britain and the ninth largest in Europe.

Thursday's sale is a transfer of undertaking by Jeyes, which is located at Thetford near Cambridge, to LMG Fibrenyle -- one of Britain's leading blowmoulders. The sale includes a seven-year manufacturing agreement worth nearly $10 million annually.

Bob Scales, managing director of LMG Fibrenyle, said this agreement ''reflects a continuation of LMG Fibrenyle's policy of forging close working relationships with major companies in the UK and Continental Europe.''

He said LMG Fibrenyle is negotiating the lease of a 32,000 square foot factory adjacent to Jeyes in which it will install custom-built equipment to supply Jeyes with more than 30 different types of blowmoulded bottles for its leading line of disinfectant, bleach and liquid toilet cleaning products.

The factory is expected to be commissioned in early 1991 subject to the finalization of lease negotiations and the receipt of planning consent. Production is scheduled to commence during the first three months of 1991.

Under the terms of the sale, more than half of Jeyes own blowmoulding workforce will be employed by LMG Fibrenyle under the same employment conditions and although there will be a small number of redundancies, most of the remaining workers will be offered alternative employment within the Jeyes Group.

Management for the new plant will be drawn from Fibrenyle's existing head office at Beccles near Norwich.

Jeyes Group Managing Director, Jimmy Moir, said the sale of the blowmoulding operation to LMG Fibrenyle is part of Jeyes long-term strategy to concentrate on its core activities.

''The fact that we will be neighbours is clearly an important element in the deal,'' said Moir.

''The benefit of having the very latest in computer-aided packaging design right on our doorstep -- coupled with the virtual absence of delivery costs -- will make a significant contribution to the development of our business over the next few years.''

The Lawson Mardon Group produces flexible, rigid plastic, metal and folding carton packaging, and is engaged in commercial printing, label making and print trade finishing, with operations in Canada, the United States, the United Kingdom, Ireland, West Germany and France.

Lawson Mardon is listed on the Toronto, Montreal, American and London stock exchanges. Major shareholders are Roman Corporation Limited (26 percent), management (11 percent) and Woodholme Holdings (7 percent).

SAN MATEO, CA (OCT. 11) BUSINESS WIRE - CBR Cement Corp. announced Thursday that it has entered into a definitive agreement for the acquisition of the Cadman Companies, a leading aggregates and ready-mix concrete producer headquartered in Redmond, Wash.

Terms of the agreement were not disclosed, but the transaction is expected to close after applicable regulatory reviews are completed.

With annual sales of approximately $65 million, Cadman operates seven aggregates plants, as well as five ready-mix concrete plants, in the greater Seattle/Bellevue area. Cadman has operated in the area since 1930.

The acquisition of Cadman will strengthen CBR's position in the Pacific Northwest, where its companies have operated since 1886. Cadman joins other CBR companies in the region, Tilbury Cement and Ocean Construction Supplies, which have been serving the Seattle area with cement, ready-mix concrete and aggregates since 1986.

CBR recently completed its acquisition of Standard Concrete Products Inc., a leading ready-mix concrete producer in Southern California, where it also operates Calaveras Cement, at Tehachapi.

The CBR Group is a leading international cement producer with integrated concrete and aggregates operations in the Western areas of Europe, Canada and the United States.

BEVERLY HILLS, CA (OCT. 11) BUSINESS WIRE - George Elkins Co. has sold its Brentwood residential real estate office to focus on its real estate services business, company President Ronald H. Robbins announced Thursday.

The office, located in Brentwood, was sold Thursday to Dennis Duggan and Erny

Pinckert and will maintain its current location and staff along with a working relationship with the parent company. Purchase price for the branch will remain undisclosed.

''For many years, our real estate services -- property management, mortgage banking, and real estate insurance -- have become the core of our business,'' says Robbins. ''The sale of our residential real estate offices completes our transition to a real estate services company.''

Robbins said Elkins is currently in negotiations to sell its Beverly Hills and San Marino branches. The George Elkins Co. will maintain its current headquarters in Beverly Hills, along with its mortgage banking branch offices in Newport Beach, San Diego and Seattle.

VANCOUVER, BRITISH COLUMBIA (OCT. 11) BUSINESS WIRE - David Patterson, chief executive officer announces that its associated company, Nucell Inc. of Idaho, held a shareholders meeting in Portland, Ore., on Oct. 9, 1990.

Nucell Inc. is owned as to 49 percent by Steelhawk Energy Inc. and as to 51 percent by Peripheral Systems (NASDAQ:PSIX) an Oregon company. Steelhawk shares are quoted on the Canadian Over-the-Counter Automated Trading Systems (COATS) under the symbol STLH.

The purpose of the meeting was to make changes to the present board of directors of Nucell. Cliff Sawyer and Lowell Dicke, both members of Steelhawk Energy Inc.'s board of directors were asked to join the board of Nucell and this was accepted.

At the director's meeting following the shareholders' meeting, Sawyer was appointed to the position of president. For the past fifteen years Sawyer has acted as an independent management consultant and has completed assignments for large corporations, small and medium sized businesses and departments of governments, He was formally vice president, Brascan Ltd. of Toronto, prior to which he served as a senior executive of the Ford Motor Co. in the United States, Europe, South America and Canada.

Dicke and Sawyer were also appointed to the executive committee of Nucell Inc. Dicke is a qualified lawyer with wide business experience, particularly in the alternative energy sources and the development of energy technology.

Dicke's past accomplishments include chief financial officer with Fayette Manufacturing Corp., chief financial officer and general counsel with Tracy

Drilling Co. and general manager of Bechtel Financing Services, the project financing subsidiary of the Bechtel Group of Cos. Dicke has also worked as a consultant to the U.S. State Department, Litton Industries Inc., Econotech and various alternative energy companies.

CHICAGO (OCT. 11) BUSINESS WIRE - William E. Chapman II will be nominated to the position of senior vice president, pension/savings programs for Kemper Financial Services Inc. (KFS) at the next meeting of KFS' board of directors, announced Stephen E. Gibson, executive vice president and director of marketing for KFS.

According to Gibson, Chapman, who joined the firm on Oct. 8, will head up Kemper Financial's Pension/Savings Programs Department, which is responsible for the centralized support of marketing and sales of Kemper qualified plans.

Chapman, 49, comes to KFS from the Connecticut General Life Insurance Co. (CIGNA) where he was senior vice president of CIGNA Investments Inc. and President of CIGNA Asset Advisors and CIGNA Capital Brokerage Inc.

At CIGNA, Chapman was responsible for investment management sales to large corporate and public pension plans, financial institutions and individual markets. Prior to that, Chapman was president and chief executive officer of CIGNA Financial Partners Inc. and CIGNA Securities Inc. Chapman began his career with CIGNA in 1967 in the Group Pension Sales area.

Chapman is a 1963 graduate of Bowdoin College. In 1989, he was part of the Stanford Business School International Investment Programme at the London Business School. He is a Chartered Life Underwriter and Certified Employee Benefit Specialist.

Kemper Financial Services is one of the nation's largest asset managers, with over $62 billion in assets under management, including approximately $5.5 billion in retirement plan assets under management.

KFS is a major investment management and financial products company under the umbrella of Kemper Financial Companies Inc., a holding company for the financial services units of Kemper Corp. Kemper Corp. is a non-operating holding company with major subsidiaries in property-casualty insurance, life insurance, reinsurance and investment services.

LOS ANGELES (OCT. 11) BUSINESS WIRE - Health Care Property Investors Inc. (NYSE:HCP) Thursday reported a new high net income for the nine months ended Sept. 30 of $17,647,000, or $1.58 per share, on revenues of $53,123,000.

This compares with net income of $9,493,000, or $1.08 per share of common stock, on revenues of $45,644,000, for the similar period in the prior year. The year-to-date increase in per share net income amounted to 46.3 percent.

For the three months ended Sept. 30, net income increased to a record $6,326,000, or 55 cents per share of common stock, on revenues of $18,238,000. This compares with net income of $2,510,000, or 27 cents per share of common stock, on revenues of $15,735,000 for the corresponding quarter in 1989.

The per share earnings for the three months ended Sept. 30 represent an increase of 3.8 percent over the prior quarter earnings, which were also at an all-time high. The results are not comparable to the quarterly results for the like period last year.

Year to date, total dividends paid represent a distribution of about 83.7 percent of cash flows for the nine months ended Sept. 30. This payout ratio ranks among the most conservative in the REIT industry.

Health Care Property Investors Inc. is a self-administered equity-oriented real estate investment trust that invests in health care related facilities, including long-term care facilities, acute care, rehabilitation and psychiatric hospitals, substance abuse recovery centers, congregate care and assisted-living facilities and medical office buildings.

NEW YORK (OCT. 11) BUSINESS WIRE - Masstor Systems Corp. (NASDAQ/NMS:MSCO) Thursday announced that Cygnus Ventures (formerly Vista Ventures), headquartered in the United Kingdom, has loaned $2 million to Masstor's United Kingdom subsidiary, Masstor Systems Limited.

The loan is secured by all of the assets of Masstor Systems Limited and is repayable upon demand by Cygnus Ventures. In connection with the loan, Masstor issued warrants entitling Cygnus Ventures to purchase 400,000 shares of Masstor Common Stock, exercisable at a price per share set initially at 75 cents and increasing to $1.50 over the three-year term of the warrant.

Masstor stated that the $2 million would be used for working capital and that the loan provided by Cygnus Ventures was in lieu of the sale by Masstor of its Preferred Stock contemplated in the Proxy Statement relating to its special meeting of stockholders held on Sept. 20, 1990.

Founded in 1976, Masstor Systems Corp. manufactures and services mass storage systems for IBM, Cray and Bull HN mainframe customers with very high volume applications. It has over 100 large company and institutional customers in 10 countries in North America and Europe. Its focused business strategy helps MIS managers quickly leverage their huge installed mainframe investments by automating their storage process and expanding their on-line applications.

SANTA CLARA, CA (OCT. 11) BUSINESS WIRE - Siliconix Inc. (NASDAQ:SILIQ) announced Thursday that sales for the third fiscal quarter ended Sept. 9, 1990 were $31,713,000, with a net loss of $(3,108,000) or (23 cents) per share.

This compares with sales of $27,191,000 and a net loss of $(5,052,000) equal to (38 cents) per share for the third quarter of last year.

The third quarter 1990 loss was primarily due to the accrual of interest expense and Chapter 11 related expenses. However, the company was encouraged by the continuing improvement in the operating level results.

The third quarter ended Sept. 9, 1990 marks the first quarter since 1988 that Siliconix has been profitable at the operating level. In addition, third quarter bookings continued to be strong with record bookings for a summer quarter. This followed all-time record bookings for both the first and second quarters of 1990.

Siliconix is a leading supplier of advanced semiconductor products for motor controls, power supplies, computer peripherals, telecommunications, instrumentation and automotive systems. In business for 28 years, Siliconix is a publicly traded company on the NASDAQ National Market System.

SAN BRUNO, CA (OCT. 11) BUSINESS WIRE - Aetna Life Insurance Co., the nation's largest investor-owned health care insurance company, Thursday completed its purchase of 20 percent ownership in Bay Pacific Health Corp.

The purchase price was not disclosed.

This transaction presents the opportunity to create a regional Northern California health care network in the nation's most populous state, offering a wide variety of health care plans and products to the market, according to Aetna and Bay Pacific officials.

A letter of intent to purchase the stock was signed in January 1989. During the interim period, the two companies developed a variety of services and products they plan to jointly market beginning in early 1991.

The Bay Pacific Health Corp. is the parent company of 12-year-old Bay Pacific Health Plan, the fourth largest Health Maintenance Organization (HMO) in the San Francisco Bay Area, with 112,000 members.

Aetna Life Insurance Co. provides group health benefits and services for more than 12 million Americans. As a result of its acquisition in May 1990 of full ownership of PARTNERS National Health Plans, it is the third largest managed health care organization in the country.

Aetna has 2.8 million members in its nationwide network of 29 health maintenance organizations and 125 preferred provider groups. In California, Aetna has 173,900 members in its two HMOs and approximately 296,900 members in its four Preferred Provider Organizations.

Bay Pacific Health Plan was formed in 1978. Headquartered in San Bruno, the Bay Area company's health care system is currently comprised of 3,000 physicians, 29 hospitals, serving the counties of San Mateo, San Francisco, Contra Costa, Santa Clara, Marin and Alameda.

In 1989, Bay Pacific's revenues were $153 million, with operating income of $2 million.

#90284b0098 10/11/1990 ~Business Wire

TUSTIN, CA (OCT. 11) BUSINESS WIRE - Eldorado Bancorp (ASE:ELB) Thursday reported net income of $846,000, or 31 cents per share, for the third quarter ended Sept. 30, 1990.

This compares with net income of $1,027,000, or 37 cents per share, for the three months ended Sept. 30, 1989.

For the first nine months ended Sept. 30, 1990, earnings were $2.8 million, even with the year-earlier period. Net income per share was $1 compared with $1.02 due to additional shares outstanding at Sept. 30, 1990.

Results for 1989 have been adjusted to reflect the 10 percent stock dividend paid Feb. 23, 1990.

On Sept. 30, 1990, total assets were $283.7 million, and shareholders' equity was $25.7 million, or $9.27 per share. The 14 percent increase in shareholders' equity continues Eldorado's solid primary equity-to-asset ratio at 9.8 percent, one of the strongest in California.

J. B. Crowell, president and chief executive officer of Eldorado Bancorp and Eldorado Bank, said: ''The softness in third-quarter earnings was primarily a result of reduced net interest margins, slow loan activity and an increase in non-accrual real estate loans. Additionally, earnings were impacted by higher non-interest expenses in salaries, deposit insurance assessments and non-recurring expenses.

''Continuing the Bank's conservative accounting practices, certain real estate loans are being reported on a non-accrual basis foregoing interest income recognition. This action was taken due to the general economy and, more specifically, the weakness in real estate activity. Reserves for loan losses have been maintained at 1.21 percent of all loans, or $2.6 million, on Sept. 30, 1990.

''Net loan losses for 1990 are expected to continue to be significantly below the industry average.

''The company's strong capital position provides deposit safety, the ability to complete future mergers and acquisitions and the assurance to continue its cash dividend policy. It also provides flexibility for any economic environment.

''The Bank continues to maintain its strong financial position. Management anticipates the second best earning year in its history for 1990. The slowdown in the economic environment has reduced loan activity and fee income.

''We are now being very selective in emphasizing loan quality and therefore may sacrifice growth. We are more interested in maintaining solid financial strength during the current unsettled environment.''

Eldorado Bancorp, through its principal subsidiary, Eldorado Bank, operates through nine locations in Orange, Riverside and San Bernardino counties.

#90284b0102 10/11/1990 ~Business Wire

LOS ANGELES (OCT. 11) BUSINESS WIRE - Westwood One Inc. (NASDAQ:WONE) Thursday reported operating income of $2,489,000 for its third quarter ended Aug. 31, 1990, as compared with $120,000 in last year's third quarter, representing an improvement of more than $2 million.

It reported a 66 percent reduction in its net loss to $3,101,000, or a loss of 21 cents per share, in the third quarter of this year from a loss of $9,023,000, or a loss of 63 cents per share, reported a year ago.

Revenue increased during the quarter by more than 7 percent to $38,764,000 from $36,043,000 in the comparable quarter a year ago.

For the nine months of fiscal 1990, revenue increased 17 percent to $107,937,000 from $91,960,000 in the same period a year ago. The company reported operating income for the nine months ended Aug. 31, 1990, of $960,000 compared with an operating loss of $4,560,000 last year, an improvement of more than $5.5 million.

The net loss for the nine months was reduced to $14,637,000, or $1.01 per share, from $18,675,000, or $1.29 per share, in 1989.

William J. Battison, president and chief financial officer of Westwood One, said that the company's improvement is directly related to cost control programs implemented this year, as well as higher revenue from its stations and radio networks. ''Our latest audience increases as reported by RADAR, the reconfiguration of our radio networks and our recent affiliation agreement with Infinity Broadcasting Corp., positions the company for additional growth in the fourth quarter and in fiscal 1991,'' Battison said.

''This quarter exhibits a continuation of our improvement in operations. Operating income is at its highest level in two years and reflects the impact of both cost controls and growing revenue. Radio continues to be an attractive market to advertisers, even in a soft economy,'' Battison stated.

''Our cash flow has improved significantly as our start up and turn around properties have become productive. Simple cash flow, as defined by operating income plus depreciation and amortization, has grown from $847,000 to $3,288,000, an increase of 288 percent vs. this quarter last year, with only a 7 percent revenue increase,'' Battison said.

Westwood One is the nation's largest producer and distributor of radio programming and the parent company of the Mutual Broadcasting System and the NBC Radio Networks. The company owns and operates radio stations in New York City and Los Angeles, and is the owner of the music industry trade publication ''Radio & Records.''

FOSTER CITY, CA (OCT. 11) BUSINESS WIRE - A popular topic for the 1990s is cultural diversity in the workplace.

Information Access Co., a major producer of databases, is one firm that is exploring these issues.

''Over the next few months, IAC will be introducing managers and employees to issues on working in a culturally diverse workplace,'' said Morris Goldstein, president of Information Access Co.

The program will include viewing films produced by San Francisco-based Copeland Griggs Production on cultural diversity, and roundtable discussions on being successful in a multi-cultural organization.

To launch this program, an ''International Festival'' will be held on Friday, Oct. 12, from noon to 2 p.m.

The festival will include employee booths, representing various cultures found at the company. Traditional dress and cuisine from such cultures as Irish, Hispanic, German, Chinese, Indian, Russian, Tongan, Hungarian, Filipino and Pan African will be seen.

SANTA MONICA, CA (OCT. 11) BUSINESS WIRE - The board of directors of Vidmark Inc. (NASDAQ:VDMK) Thursday announced that it has authorized the purchase by the company of up to 500,000 shares of Vidmark's outstanding shares of common stock.

''The board's decision reflects our belief that Vidmark's stock is undervalued and represents a good use of our capital. This action also reflects our confidence in the company's future,'' said Mark Amin, chairman of the board.

According to Roger Burlage, president and chief executive officer, the repurchase will occur from time to time over the next six months with the amount and timing of the purchases dependent on market conditions and other factors.

Vidmark is an international distributor of motion pictures, primarily engaged in the distribution of feature films for the domestic home video market and in the licensing of distribution rights to motion pictures for foreign markets.

SALT LAKE CITY (OCT. 11) BUSINESS WIRE - Electro Brain International Corp. Thursday revised its estimate of total revenues for its third quarter ended Sept. 30, 1990, to be approximately $520,000.

Previously the company had estimated total revenues for its third quarter to be in the range of $750,000 to $900,000. However, due to an unanticipated delay of approximately 10 days in the delivery of one order of game cartridges from Nintendo, the company was unable to fill certain orders until fourth quarter 1990. This resulted in certain sales previously expected to occur in third quarter 1990 being delated until fourth quarter 1990.

In September 1990, the company received an additional capital infusion of approximately $1,870,000 in gross offering restricted common stock to private Japanese investors. This equity financing, together with an additional $680,000 of gross offering proceeds raised earlier in the quarter, brings the total amount of gross equity capital raised by the company in third quarter 1990 to $2,550,000.

The company anticipates that this equity financing will enhance the ability of the company to expand its business and to participate in certain opportunities for video game development and possibly in related entertainment fields. The company is no longer presently seeking equity financing.

The company proposes to redeem all 6,250,000 shares outstanding of the company's privately held Series A convertible preferred stock (preferred stock) effective as of Nov. 14, 1990. Such redemption shall be made at the price of 8 cents per share, plus accrued dividends thereon. The company will pay accrued dividends on its preferred stock of approximately $30,000

(approximately $0.0048 per share) in November 1990.

If all of the preferred stock is redeemed, the company will pay out an additional $500,000 with respect thereto. All such shares bear the right to be converted into shares of the company's common stock. The company is not presently able to determine whether or to what extent shares of the preferred stock may be so converted.

The company's common stock is publicly traded in the Over-The-Counter market.

DENVER (OCT. 11) BUSINESS WIRE - Auto-trol Technology Corp., a leading software developer and integrator, has formed a technology alliance with Bridgeway Corp. (Redmond, Wash.) for development and marketing of network configuration management products.

KONFIG -- the first product combining the technology of the two firms -- utilizes powerful computer-aided graphics, relational database technology and enhanced network interfaces. The new software was announced Thursday at Interop 90 in San Jose, Calif.

Auto-trol will offer KONFIG as a complement to its extensive family of facility design and management software. AEC industry marketing manager Cully Culbreth said major markets for the product include Fortune 500 companies and large government agencies that operate complex LAN systems.

Bridgeway, the product's principal developer, retains separate marketing rights.

The first release of the KONFIG software will run on the UNIX operating system and Sun workstations.

Details of pricing, hardware configurations and software applications can be obtained from Culbreth at Auto-trol Technology Corp., 12500 North Washington St., Denver, CO 80241-2404; 303/252-2317.

#90284b0125 10/11/1990 ~Business Wire

LOS ANGELES (OCT. 11) BUSINESS WIRE - Luz International Ltd. Thursday announced completion of its second 80 megawatt solar power plant.

The plant was financed, constructed and put on line in a record 7 1/2 months.

The 80 megawatt solar electric generating system (SEGS IX), located in the Mojave Desert approximately 140 miles northeast of Los Angeles, delivers electricity to the Southern California Edison (SCE) utility grid. Combined with its eight other plants, SEGS IX gives LUZ a total power output of 354 megawatts or enough to serve the residential needs of a half million people.

During this time of increased tension in the Mid-East, SEGS helps to reduce United States dependence on foreign oil by providing an alternative to fossil fuels. The combined electrical production from LUZ' nine SEGS plants is equivalent to displacing 2.3 million barrels of imported oil per year.

In addition to producing reliable power for utility markets, LUZ' solar power plants provide environmentally benign electricity when compared to other sources. Replacing an 80 megawatt oil-fired plant with a solar plant would cut emissions of carbon dioxide by over 340 million pounds and more than a quarter of a million pounds of nitrogen oxide per year.

SEGS IX is the second in a six-plant complex being built at Harper Lake. When all six plants are completed and on line in 1994, LUZ will be providing a total of 680 megawatts of electricity to Southern California. This large-scale production of solar electricity will provide enough energy to meet the residential needs of almost one million people, or as many people as live in cities the size of Phoenix, San Antonio or San Francisco.

LUZ is actively pursuing additional projects in California, the southwest United States and overseas. The company has proposed projects to the Sacramento Municipal Utility District, L.A. Department of Water & Power, and is exploring the feasibility of projects in Nevada, Texas, Arizona and other states. Overseas, LUZ officials are looking at projects in Spain, Brazil and India, among others. LUZ has headquarters in Los Angeles.

#90284b0131 10/11/1990 ~Business Wire

LOS ANGELES (OCT. 11) BUSINESS WIRE - Medco Research Inc. (NASDAQ:MEDR) (BSE:MRE.B) Thursday announced that its new drug Adenoscan (adenosine) was found to be more potent than Persantine (dipyridamole) as a coronary vasodilator.

Researchers at the University of Iowa are scheduled to present their findings at the 63rd Scientific Sessions of the American Heart Association (AHA) to be held Nov. 12-15 in Dallas. An abstract of their presentation appears in a recent issue of CIRCULATION 1990;82:III-731.

In a study sponsored by Medco, these investigators compared the relative efficacy of adenosine, dipyridamole and papaverine as coronary vasodilators in patients undergoing cardiac catheterization, and concluded that ''....adenosine is a more potent coronary vasodilator than dipyridamole and is comparable in potency to intracoronary papaverine.''

The results of this study are significant and support Medco's view that adenosine would be relatively more effective than dipyridamole as a coronary vasodilator used with thallium-201 scanning to detect coronary artery disease.

Also scheduled for presentation at the AHA meeting is the very favorable safety experience with Adenoscan in patients studied at the Baylor College of Medicine (CIRCULATION 1990;82:III-730). In a series of studies sponsored by Medco, these investigators performed adenosine thallium-201 heart scans in 607 patients, including 125 patients with recent heart attacks.

They reported that ''no serious complications occurred'' and concluded that their experiences ''attest to the excellent safety of adenosine infusion in man, even within a few days of acute myocardial infarction.''

The results of this study support Medco's position that, unlike the coronary vasodilator dipyridamole, the extremely short half-life of adenosine (less than 10 seconds) makes it particularly well suited for use in thallium-201 heart scans.

Although no drug has yet been approved by the FDA for use in conjunction with thallium-201 scintigraphy, Medco filed its Adenoscan New Drug Application (NDA) with the FDA in February 1990 and this application for marketing approval is now under review by the FDA.

#90284b0153 10/11/1990 ~Business Wire

SAN FRANCISCO (OCT. 11) BUSINESS WIRE - Potlatch Corp. Thursday reported lower earnings for the third quarter.

Weaker markets in several operating areas were the major cause of the decline.

Third quarter net earnings decreased to $24.7 million from $35.1 million reported last year. Earnings per common share were 85 cents, compared with $1.22 for 1989's third quarter. Sales for the quarter were $314.3 million, down from $318.4 million reported last year.

Earnings for the first nine months of 1990 were $94.1 million, down from $96.8 million for the like period in 1989. Earnings per common share were $3.25, compared with $3.41 earned during the first nine months of 1989. Sales for the first nine months were $962.2 million, an increase over the $911.9 million for 1989.

The redemption of the convertible subordinated debentures in June 1990 eliminated the potential for dilution and no fully diluted earnings per share are reported for the quarter or the nine months ended Sept. 30, 1990. In 1989

fully diluted earnings per share for the third quarter and first nine months were $1.17 and $3.24, respectively.

Richard B. Madden, Potlatch chairman and chief executive officer, stated that weak markets for wood products and printing papers were largely responsible for the third quarter decline. He also noted third quarter results were affected somewhat by a maintenance shutdown at the Cypress Bend, Ark., mill late in the third quarter.

The shutdown continued into early October and will have a larger impact on fourth quarter results. In addition, an extended shutdown at our Lewiston mill for normal maintenance and new equipment installation will have a significant adverse impact on fourth quarter results.

The company's wood products group reported a loss of $1.5 million for the third quarter, compared with earnings of $6.5 million in 1989. ''Sales realizations for this group's panel products were significantly lower than a year ago and lumber prices were also down,'' Madden said.

The Northwest Paper division reported third quarter earnings of $6.9 million, down from $11.7 million in 1989. ''Weak markets and operating problems were the main causes for this division's earnings decline,'' Madden noted.

The normal maintenance shutdown was taken during the third quarter at the Cloquet, Minn., pulp and paper mill. A flash flood in early September also caused an unscheduled shutdown, but much of the loss incurred was covered by insurance.

Third quarter earnings for the other pulp-based segment decreased to $41.6 million from $45.7 million for the like period in 1989. Despite continued excellent results for the consumer products division, earnings for the segment decreased modestly due to lower sales realizations for paperboard and sharply lower realizations for pulp.

''During the third quarter, paperboard and tissue markets were stable while markets for pulp continued to weaken,'' Madden stated.

''Our fourth quarter comparisons will be affected adversely by the fourth quarter shutdowns at the company's two pulp and paperboard mills and weaker markets in several of our product lines. Prices for wood products are unusually depressed as we enter the fourth quarter. Although we expect a difficult fourth quarter, we remain optimistic about our intermediate and long-term outlook,'' Madden concluded.

Potlatch is a diversified manufacturer of forest products with timberland in Arkansas, Idaho and Minnesota.

WEST HOLLYWOOD, CA (OCT. 11) BUSINESS WIRE - Mark E. Buchman, president and chief executive officer of BKLA Bancorp, Thursday announced that the company reported a loss of $188,000 for the three-months period ending Sept. 30 and a year-to-date loss of $419,000.

Management said the third-quarter loss was primarily attributable to an addition of $350,000 to the reserve for loan losses by the company's subsidiary, Bank of Los Angeles. The provision for loan losses has been increased by approximately $1.45 million over the nine-months period ending Sept. 30.

Loan charge-offs totalled $306,000 for the third quarter and $1.84 million for the first nine months of 1990.

The company continues to maintain a strong capital-to-assets ratio, which exceeds regulatory requirements.

Founded in 1982, Bank of Los Angeles markets both business and consumer financial products and has regional offices in West Hollywood, Beverly Hills and Hollywood.

The common stock of the West Hollywood-based BKLA Bancorp is traded under the symbol BKLA on the NASDAQ National Market System and Western OTC.

PALO ALTO, CA (OCT. 11) BUSINESS WIRE - Hewlett-Packard Co. Thursday announced it has begun worldwide, volume shipments of its mainframe-class computers, the HP 3000 Series 980/100 and HP 9000 Model 870S/100.

These computers nearly double the performance of HP's previous high-end PA-RISC-based (Precision-Architecture reduced-instruction-set computing) computer families, and they offer mainframe-class performance at minicomputer prices.

HP also announced on-schedule initial shipment by year end of HP 3000 Series 980/200 multiprocessing computers. The company noted that shipment of the HP 9000 Model 870/200, originally scheduled for shipment December 1990, would be

delayed up to six months, until the next release of the HP-UX operating system.

Hewlett-Packard Company is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 92,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

SANTA ANA, CA (OCT. 11) BUSINESS WIRE - EECO Inc. (ASE:EEC) stated Thursday that a class action suit has been filed by two EECO shareholders naming the EECO board of directors and certain present and former company executives as defendants.

The suit, filed in the U.S. District Court for the Central District of California, alleges that during the period beteen Dec. 21, 1987, and May 2, 1990, EECO published false and misleading reports concerning operating and financial problems which the company was experiencing and claims that the company's published reports were in violation of federal securities laws.

Robert B. Bonney, chairman of EECO, stated that in his opinion the suit is without merit and that the defendants intend to vigorously contest the suit. EECO was not named as a defendant in the complaint.

EECO manufactures and markets electronic keypads, electromechanical switches and hotel computer systems worldwide and computer keyboards in Europe.

CINCINNATI (OCT. 11) BUSINESS WIRE - Fifth Third Bancorp's net income was $32,036,000 for the third quarter and $88,401,000 for the first nine months of 1990, compared to $28,854,000 and $80,647,000, respectively, for the same periods in 1989.

Third quarter earnings per share were 82 cents, a 10.8 percent increase over last year's 74 cents, and $2.26 for the first nine months of 1990, up 8.7 percent over last year's $2.08.

Total assets were $7.7 billion at quarter-end, compared to 1989's third quarter-end assets of $6.9 billion. For the first nine months of 1990, return on average equity was 16.1 percent and return on average assets was 1.64 percent.

Fifth Third places great importance on dividend growth to shareholders. This quarter, Fifth Third was again able to reward shareholders by declaring a cash dividend of 27 cents per share, a 12.5 percent increase over the prior quarter. This represents the 21st dividend increase in 15 years, since the formation of Fifth Third Bancorp, and brings the company's 5-year compound dividend growth rate to 15.8 percent. Fifth Third's dividend growth rate for the past 10 years has placed the company in the top 100 of Moody's 1989 'Dividend Achievers' list compiled from over 5,500 companies in its equity data base, including all NYSE, AMEX and actively traded NASDAQ companies.

At quarter-end, the Bancorp had $760.0 million in equity, which represented 9.9 percent of total assets. This is one of the strongest capital positions in the industry. The company's ROA of 1.70 percent and ROE of 16.9 percent for the quarter also place Fifth Third among the top performing banks in the country.

Fifth Third Bancorp is a regional banking holding company with 210 banking locations, including 27 Bank Marts located in Kroger stores, throughout Ohio, Indiana and Kentucky.

PALO ALTO, CA (OCT. 11) BUSINESS WIRE - Despite the turmoil in the real estate market this year, Marcus & Millichap Real Estate Investment Brokerage Co. has closed over $1 billion of investment real estate in 1990 as of Sept. 15, according to William A. Millichap, president of the company.

This is the highest year-to-date record in the company's twenty year history.

Sales of multi-residential properties (apartment buildings) have accounted for 60 percent of the firm's overall sales, with the remaining 40 percent resulting from sales of leased investments, including shopping centers, office industrial and R & D buildings.

As of Sept. 15, 1989, the firm had closed $797 million in sales. Number of transactions closed were 308 for this time last year, as compared to 379 to date in 1990.

A survey of Marcus & Millichap offices indicates that multi-residential properties are currently more popular, particularly in the $1-$4 million range with down payments under $1 million. In northern California markets, newer buildings are hot commodities, while 30-year old ''bread and butter'' buildings are moving more slowly.

In the leased investment area, properties that tend to be the toughest to sell are those in the $7-$10 million range, The market is indicating that this size property tends to be too small for institutional buyers and too large for individuals.

''We are seeing a greater number of transactions close all cash and no loans, compared to any other time in the past 5-10 years,'' said Millichap. ''One of the underlying factors creating this trend is the turbulent financing market. In light of the tightening of the reserve requirement for S & L's and banks and the media's poor perception of the real estate market, our traditional sources of lending funds have all but dried up.''

Marcus and Millichap conducts a loan survey on a weekly basis that provides agents with updates on which lenders are in or out of the market and what new lender imposed restrictions have taken place, so that they can close deals

with the buyers that are in the market.

Marcus & Millichap Real Estate Investment Brokerage Co. specializes in the sale of income producing property. In 1989, the company had sales of $1.35 billion.

MILPITAS, CA (OCT. 11) BUSINESS WIRE - Octel Communications Corp. (NASDAQ/NMS:OCTL) Thursday announced that for the first quarter of fiscal 1991 ended Sept. 30, 1990, net revenues were $35,170,000, an increase of 25 percent over net revenues of $28,195,000, for the like three-month period in fiscal 1990.

Net income for the first quarter of fiscal 1991 was $2,935,000, or 17 cents per share, a decrease of 21 percent from net income of $3,720,000, or 23 cents per share for the like period last year.

''We believe our results for the first quarter were affected by uncertainty in the economy,'' said Robert Cohn, chairman. ''After 16 consecutive quarters of increasing revenues and 13 consecutive quarters of increasing income (before extraordinary tax credits), we continued to increase our staffing and other expenses in anticipation of continued growth in the first quarter.

''We have seen delays in orders from some customers. While we continue to be optimistic about the long term prospects for our company and industry, we are instituting cost reduction measures while we monitor near-term economic events and the effect these may have on our order rate.''

Octel Communications Corp. designs, manufactures and markets a full line of high-performance voice processing systems. Octel's Aspen product line is sold in the United States, Canada and overseas to small businesses and large multisite corporations.

The recently announced Sierra multiple-application voice processing platform is a very large capacity system designed to meet the special needs of telephone companies and other voice information service providers.

Octel was founded in 1982 and has headquarters in Milpitas.

VANCOUVER, BRITISH COLUMBIA (OCT. 11) BUSINESS WIRE - Safeguard Ventures Inc. (VcSE:SFV) and Consolidated Ramrod Gold Corp. (VcSE:CYN) announced that they have entered into a letter of intent with each other pursuant to which Safeguard has the option to acquire up to a 50 percent interest in the above referenced property (Neel-Jacobsen Prospect, Chelan County, Wenatchee, Wash.).

Safeguard may exercise the option by incurring exploration expenditures and property payments on the Neel-Jacobsen property over a period of three years as follows:

Year	Cumulative Expenditures	Cumulative Interest Earned
1	$ 500,000	15 pct
2	$ 1,250,000	30 pct
3	$ 2,000,000	50 pct

Safeguard will also issue 75,000 shares to Ramrod upon execution of a formal agreement, of which 37,500 shares will have a one-year hold period.

Upon exercising the option, the parties will constitute a joint venture for the purpose of participating in a joint operation on the exploration and development of the property, with Safeguard as operator of the property.

The subject property is located near the Cannon Mine owned jointly by Asamera Minerals Inc. and Breakwater Resources Ltd. in Wenatchee, Wash.

The granting of the option on the foregoing terms is subject to Vancouver Stock Exchange approval.

SANTA CLARA, CA (OCT. 11) BUSINESS WIRE - Applied Materials Inc., a pioneer in reactive ion etching (RIE) technology, has just marked a milestone by shipping 600 Precision Etch 8300-series etch systems.

The latest system, a Precision Etch 8310, was shipped to Intel Corp.'s facility in Chandler, Ariz., said Tom Peterson, director of hexode product marketing at Applied Materials. The system is one of the Precision Etch 8300 family of low-pressure RIE hexode etchers, and is configured for etching dielectric materials; it also features new molecular backside cooling hardware.

Peterson explained that Applied Materials' 8300-series etchers are used extensively in wafer fabrication lines worldwide to produce DRAMs, SRAMs, EPROMs and microprocessors. In production, these systems are achieving device densities of up to 4 megabits. The 8300-series also is widely used in R&D labs to fabricate 16- and 64-megabit devices.

Applied Materials entered the plasma etch market in 1981 with its AME 8100 system. This technology combines RIE with a vertical hexode-shaped chamber that enables uniform etching of wafers in large batches. The Precision Etch 8300 was introduced in 1983, with higher levels of automation than the 8100.

Applied Materials Inc. is a global growth company based in Santa Clara, and is the leading independent supplier of wafer fabrication systems to the worldwide semiconductor industry. It is a market leader in chemical vapor deposition (CVD), dry plasma etching and silicon deposition.

The company is also a leading manufacturer of ion implantation systems and recently launched its entry into the physical vapor deposition (PVD) market.

LOS ANGELES (OCT. 11) BUSINESS WIRE - MasterTech (tm) Computer Products International, developer of educational and business management PC software, this week announced the release of its first computer-based training tutorial, the ''How to Operate a Computer (tm)'' course.

Designed for the computer novice, and experienced users lacking the basics, ''How to Operate a Computer'' is a simple self-study course which provides a basic understanding of how to operate a personal computer.

Based on the widely acclaimed works of best-selling author L. Ron Hubbard, the course employs Hubbard's proven training technique in teaching computer basics. Built-in tools help the user independently solve study difficulties. An on-line glossary is also available for ready definitions of most terms.

Training the man on the street to use computers is indeed one of MasterTech's goals. Concerned with the overall literacy problem in America, the company

plans to help people meet technology's challenge -- on the job and in everday life. A relatively new business,
MasterTech's user list already includes such corporate heavyweights as IBM, AT&T and Intel Corp.

The ''How to Operate a Computer'' course, Bach explains, for a list price of just $50, puts a person quickly and easily on the road to computer literacy. With corporate America spending over $10 billion yearly on computer training, fighting computer illiteracy is a costly battle.

GARDEN GROVE, CA (OCT. 11) BUSINESS WIRE - Hycor Biomedical Inc. (NASDAQ:HYBD) Thursday announced sales of $2,546,000 and net income of $168,000, or 3 cents per share, for the three months ended Sept. 30, 1990.

For the nine months ended Sept. 30, 1990, sales were $7,528,000 and net income was $418,000. These figures represent sales increases of 14 percent and 10 percent, respectively, over the quarter and nine months of 1989. Sales of the company's current products remain strong both in the United States and in foreign markets.

Although net income declined from last year, results would have shown a dramatic improvement except that the company has invested heavily in promotional and marketing activities as part of its plan to launch the new accuPINCH line of on-site drugs of abuse tests.

The initial four tests for cocaine, marijuana, opiates and PCP were introduced at the American Correctional Association Convention in San Diego in August. These products will also be featured at the Drug Free Workplace Conference in Washington, D.C. on Oct. 15.

Hycor Biomedical is a biotechnology firm specializing in the development, manufacturing and worlwide marketing of human diagnostic products.

HONOLULU (OCT. 11) BUSINESS WIRE - Due to the continuance of the situation in the Middle East and the related increases in fuel oil prices, Matson Navigation Co. Inc. has filed a rate increase of 2.9 percent to take effect

Nov. 11 in its U.S./Pacific Coast-Hawaii service.

The across-the-board increase was filed Oct. 11 with the Federal Maritime Commission in Washington, D.C., and a parallel increase was filed with the Interstate Commerce Commission for certain intermodal rates and tenders for government cargo subject to ICC jurisdiction.

''In response to President Bush's request, Matson exercised restraint in reacting to the crisis,'' C. Bradley Mulholland, president and chief operating officer said. ''We felt this approach would best serve Hawaii's shippers, consignees and the public at large.

''We are one of few transportation companies in the country to have resisted taking action in the midst of these substantial increases in fuel oil costs. We had hoped that the sudden increase in fuel oil prices was a temporary phenomenon. However, after waiting two months, we find that the reality of the situation makes this rate increase unavoidable.

''The increase which Matson seeks is solely to recover a portion of our increased fuel costs.''

Matson Navigation is a subsidiary of Alexander & Baldwin Inc. (NASDAQ:ALEX).

TEMPE, AZ (OCT. 11) BUSINESS WIRE - C. Zane Close, president and chief executive officer of CerProbe Corp. (NASDAQ:CRPB) Thursday announced revenues and results from operations for the third quarter ended Sept. 30, 1990.

Revenues for the quarter were $1,377,793, a 12.6 percent increase compared to the third quarter 1989 revenues of $1,223,171. Revenues for the nine-month period ended Sept. 30, 1990, were $3,604,043, a decrease of 3 percent from revenues of $3,713,689 for the same period in 1989.

The third quarter net income of $5,509, or less than 1 cent per share, compared to a third quarter 1989 loss of $14,437, or 1 cent per share. For the nine-month period ended Sept. 30, 1990, the loss was $97,251, or 4 cents per share compared to a loss in 1989 of $172,969, or 8 cents per share.

CerProbe has introduced two new probing technologies this year. The Beta Card was introduced in May, followed in September with the unveiling of CerCard, a probe card hich incorporates the advantages of ceramic adhesive technology with that of conventional epoxy-ring cards. Although the CerCard was introduced only a month ago, orders were being filled in early October.

CerProbe Corp. develops and manufactures products for the high performance testing of state-of-the-art integrated circuits and microelectronics components. The Arizona-based company markets its products worldwide to major semiconductor manufacturers and has satellite facilities operating in Kokomo, Ind.; Westboro, Mass.; Santa Clara, Calif.; and Austin, Texas.

LOS ANGELES (OCT. 11) BUSINESS WIRE - Mercury Entertainment Corp. Thursday reported net income of $360,834, or 63 cents per share, for the three-month period ended Aug. 31, 1990, and net income of $336,898, or 59 cents per share, for the nine months ended Aug. 31, 1990.

For the same periods in the prior year, Mercury Entertainment reported net losses of $253,421, or 44 cents per share, and $728,692, or $1.27 per share, respectively. A substantial portion of the 1990 income related to recognition in connection with the production of the films described below, of previously deferred income, the proceeds of which had been received by the company in prior periods.

The company also announced that its second feature film to roll before the cameras this year is ''Mom & Dad Save the World,'' which began photography on Aug. 22, 1990. Its earlier feature, ''The Real World,'' completed photography in July. Both films will be released by Warner Bros. in 1991.

SAN JOSE, CALIF. (OCT. 11) BUSINESS WIRE - Novellus Systems Inc. (NASDAQ:NVLS) Thursday reported its 14th consecutive quarter of growth in revenues and record quarterly net income for its third fiscal-1990 quarter of growth in revenues and record quarterly net income for its thrid fiscal-1990 quarter, ending Sept. 30, 1990.

Net sales for the quarter were $17.2 million, an increase of 25 percent from third-quarter 1989 sales of $13.8 million. Net income for the quarter was $3.6 million, or 26 cents per share, up 16 percent from $3.1 million, or 23 cents per share, in 1989.

For the first nine months of 1990, net sales were $49 million, an increase of 35 percent from net sales of $36.4 million in the first nine months of 1989. Net income for the nine months was $10.3 million, or 74 cents per share, an increase of 30 percent from $7.9 million, or 62 cents per share, in 1989.

All per-share amounts have been adjusted to give effect to a two-for-one stck split completed during the quarter.

Robert Graham, Novellus president and chief executive officer, commented: ''The third quarter of 1990 was an excellent one for Novellus Systems. We achieved record results in both revenues and net income. We introduced a new blanket tungsten deposition system into the market that we feel will be a successful second product for us. We declared a two-for-one split of our common stock effective in August.

''Cash generation continued, with cash and short-term investments climbing to $36.9 million, a $4.3 million increase over the ending balance in the second quarter of 1990. Although there are uncertainties in the economy and the semiconductor-equipment market, we remain optimistic about the future for Novellus.''

Novellus Systems manufactures, markets and services advanced automated wafer-fabrication systems worldwide for semiconductor manufacturing and development.

SAN JOSE, CA (OCT. 11) BUSINESS WIRE - Xilinx Inc. (NASDAQ:XLNX) Thursday reported record revenues, operating income and net income for the second fiscal quarter ended Sept. 29.

Revenues for the quarter were $23.1 million, an increase of 103 percent from $11.4 million for the comparable period last year and up 25 percent from $18.5 million in the immediately preceding quarter.

Year-to-date revenues of $41.6 million increased 91 percent from $21.8 million for the corresponding prior period.

Operating income of $5.3 million for the quarter increased 170 percent from $2.0 million in the comparable quarter of 1989 and grew 26 percent from $4.2 million for the immediately preceding quarter. Year-to-date operating income of $9.5 million also increased 164 percent from $3.6 million for the first six months of 1989.

Net income for the September quarter was $3.7 million, an increase of 102 percent from $1.9 million in the second quarter 1989 and up 34 percent from $2.8 million in the immediately preceding quarter. Year-to-date net income was $6.5 million, up 91 percent from $3.4 million in the like period last year.

Earnings per share increased to 16 cents in the second quarter, compared to 10 cents a year ago and 14 cents for the previous quarter. Xilinx has reported increased revenue and operating income of 12 consecutive quarters.

Xilinx's balance sheet remains very strong with cash and cash equivalents of $60.7 million currently representing 67 percent of total assets. Total debt constitutes approximately 20 percent of total assets.

Geographically, Vonderschmitt said business remained strong in all regions with 31 percent of second quarter sales coming from overseas. Sales in Japan increased 25 percent over the immediately preceding quarter as the company ramped up volume shipments of surface mount devices and the XACT version for NEC PCs, both popular choices in the Japan market.

Field programmable gate arrays are off-the-shelf ICs that can be programmed by the user to perform the exact logic function desired. The company's FPGAs are well suited to a wide variety of applications which require high logic integration and where time to market is critical, production volumes unpredictable, or frequent design changes necessary to adapt a product to new markets.

JOPPA, MD (OCT. 11) BUSINESS WIRE - Oct. 11, Merry-Go-Round Enterprises Inc. (MGR:NYSE) today announced that sales for the five week period ending Oct. 6, 1990 increased 24 percent to $55.8 million from $45.1 million in the comparable calendar weeks in September 1989.

Same store sales for September 1990 in the comparable calendar weeks increased 16 percent.

Total sales for the nine week period of back-to-school increased 23 percent to $118.4 million from $96 million in the corresponding period last year. Same store sales for the nine-week period increased 17 percent.

Michael D. Sullivan, president and chief executive officer, commented, ''We are delighted with our sales performance in September especially considering our excellent results last year and the current difficult economic and retail environment.''

Same store sales for September 1989 increased 30 percent.

Merry-Go-Round Enterprises Inc. is a leading specialty apparel chain selling contemporary fashions for young men and women in over 630 retail stores in 37 states.

#90284b0615 10/11/1990 ~Business Wire

CONCORD, MA (COT. 11) BUSINESS WIRE - GenRad Inc. Thursday announced it has received an order from ACUSTAR Inc., a subsidiary of Chrysler Corp., for several of GenRad's latest printed circuit board test systems.

The multi-million dollar order from ACUSTAR is for the newest member of the GR228X family, a system yet to be announced for general sale and designed in cooperation with ACUSTAR for its high-volume printed circuit board facility in Huntsville, Alabama. The order is to be shipped in late 1990.

Commenting on the order, GenRad President and Chief Executive Officer, Robert E. Anderson said, ''The size and scope of this ACUSTAR board tester contract is significant for GenRad as it typifies the co-destiny partnership forged between GenRad and suppliers to the automotive industry around the world. GenRad's design and test products are applied in the automotive industry for design verification, production test and service bay diagnostics."

A variety of our production test systems for electronic systems are used by automotive manufacturers including Chrysler, Delco, Ford, Fiat, Bosch, BMW, Mercedes Benz, Porsche, Jaguar and Nissan. Similarly, service bay diagnostic systems such as that developed for Jaguar Cars XJ6 series are now being marketed to other automotive manufacturers. Last week, GenRad announced a major order from Ford Motor Company for advanced diagnostic systems.

Anderson emphasized that providing design and test solutions to the automotive industry could have significant growth potential for the Company's orders and revenue. He noted that despite sluggish U.S. car sales in the current market year, by the year 2000, the automotive electronics industry in North America alone is expected to reach $28 billion nearly quadrupling the 1989 level.

Such sales volume is contingent upon a 14 percent increase in Original Equipment Manufacturer (OEM) electronics content per vehicle in each year through the year 2000, the year in which the average electronic content per vehicle is forecast to be $1,803, more than three times what it was in 1986.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment, to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management. The Company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

CANTON, MA (OCT. 11) BUSINESS WIRE - Oct. 11, 1990, Hills Department Stores, Inc. (HDS/NYSE) today announced that total sales for the fiscal five-week period ended October 6, 1990 increased 12.4 percent to $201.9 million from $179.7 million for the corresponding period in 1989.

Same store sales for fiscal September 1990 increased 8.0 percent.

Sales for the fiscal thirty-five week period ended October 6, 1990 increased 8.0 percent to $1.29 billion from $1.19 billion for the corresponding period a year ago. Same store sales increased 4.5 percent during this period.

Hills reported sales in fiscal 1989 based on a 53-week year. Consequently, the ending dates for 1990 fiscal months are one calendar week later than the corresponding 1989 fiscal month ending dates. Had the Company reported results based on a 52-week year, the comparable five-week period would have reflected increases of 12 percent for total sales and 7.3 percent on a same store basis. Results for the comparable thirty-five week calendar period would have reflected increases of 6.1 percent and 2.8 percent, respectively.

Hills Department Stores, Inc. is a discount store chain, operating in 14 states, with 213 locations compared with 202 stores a year ago.

SAN FRANCISCO (OCT. 11) BUSINESS WIRE - International Business Network announced Thursday the successful completion of phase one in the development of a single, global, electronic common market.

This established a touch-tone telephone-operated, menu-driven computer system utilizing voice processing. The technology is easy to use and can be accessed from anywhere in the world.

The service may be used to promote business opportunities in the United States or abroad and the professional skills of consultants or expert international business specialists. The service may also be used by industry organizations as a calendar of international business events, to promote organizational agendas, meetings and special events.

IBN allows subscribers to enter business profiles, company news and notices, advertise goods and services and seek advice from other subscribers in the electronic common market.

The service may also be used to promote employment opportunities in foreign countries and facilitate the search for qualified employees with skills in various fields of international business.

Any recently graduated students with degrees or certificates in international relations, policy, diplomacy, trade, management, marketing, sales, and economics (or other pertinent skills) may list their resumes on the service.

Interested parties listening to these messages may leave their name, phone number and a request for more information for IBN subscribers to call them back.

The IBN Global Voice Information Service is available free of charge to listen to companies, organizations or individuals comment on the services, products and information they have to offer.

Previewing of the system is now available.

Any interested party may access the IBN computer voice bulletin board by calling the International Business Network computer at 415/985-7153.

DALLAS (OCT. 11) BUSINESS WIRE - National microcomputer dealer CompuCom Systems Inc. (NASDAQ:BYTE) announced that revenues for its third quarter ending Sept. 30 increased 22 percent to $88,732,000 over revenues of $72,850,000 posted for the same period in 1989.

Earnings for the quarter increased by 141 percent, to $1,066,000 ($4 cents per share), up from $442,000 (2 cents per share) during the third quarter of 1989. For the first nine months of 1990, earnings increased 144 percent to $2,124,000 on revenues of $234.9 million compared with earnings of $869,000 on $189.4 million of revenues.

The third quarter 1990 earnings and revenues reflect the best results in CompuCom's history.

Avery More, president and co-CEO of CompuCom said, ''We have grown rapidly but carefully over the past few years. Two years after the acquisition of CompuShop, we are hitting our stride. We clearly proved that we can profitably consolidate large acquisitions. We plan to continue this growth by combining our internal momentum with strategic acquisitions within the industry.''

CompuCom entered the microcomputer business in 1987 with the acquisition of TriStar Data Systems, a regional computer reseller. In 1988, CompuCom acquired CompuShop, a computer retailer with national coverage.

Warren V. Musser, chairman of Safeguard Scientifics Inc. (Wayne, Pa.) CompuCom's largest shareholder, said, ''CompuCom's record revenue and earnings performance for the quarter reinforces our confidence and commitment in CompuCom's management team. They know what to do and they deliver.''

CompuCom Systems Inc., based in Dallas, serves major accounts through 28 offices nationwide. The company sells and supports major personal computer lines, including IBM, Compaq, and Hewlett-Packard, and offers related customer-based services. CompuCom focuses on establishing a partnership relationship with its customers by providing products, support, and integration services for their Information Technology requirements.

LYNNWOOD, WA (OCT. 11) BUSINESS WIRE - Ralph V. Schapler, chairman and chief executive officer of Pioneer Savings Bank, Lynnwood, Thursday announced increased earnings for the third consecutive quarter.

Net income for the current quarter was $2,785,000, compared to $2,686,000 for the quarter ended June 30, 1990, and $2,517,000 for the quarter ended March 31 1990. Pioneer Bank converted to stock ownership on July 13, 1989, and trades on the NASDAQ National Market System under the symbol ''PFBK''.

Net income for the three and nine months ended Sept. 30, 1990, was $2,785,000 and $7,988,000, respectively. During the three months ended Sept. 30, 1989, a recovery of the unused provision for the balance sheet restructuring was recorded in the after-tax amount of $8,356,000, resulting in net income of $10,167,000. The net loss for the nine months ended Sept. 30, 1989, of $3,189,000 included the one-time charges for the restructuring and Management Recognition Plan in an after-tax amount of $7,234,000. Net income, excluding these one-time effects was $1,811,000 and $4,045,000 for the three and nine month periods ended Sept. 30, 1989.

The 54 percent increase in quarterly net income, not including the effects of the one-time events over the previous year, was principally composed of a $1.8 million increase in net interest income. This increase resulted from the restructuring of investments and borrowings together with larger portfolio balances, which was partially offset by a $377,000 decrease in income from real estate operations, due to decreased residential lot sales by the bank's subsidiary. The 97 percent increase in nine-month net income, excluding the effects of the one-time events noted above, over the same period in 1989 was principally composed of a $6.1 million increase in net interest income, resulting from the previously mentioned restructuring of investments and borrowings and larger portfolio balances. This increase was partially offset by a $781,000 decrease in income from real estate operations.

Mortgage loan originations increased to $172,124,000 for the nine months ended Sept. 30, 1990, as compared to $107,381,000 for the same period a year ago.

Based primarily on increased earnings, the board of directors declared a dividend of 16 cents per share to stockholders of record Oct. 12, 1990, payable on Oct. 26, 1990.

#90284b0630 10/11/1990 ~Business Wire

PENNSAUKEN, NJ (OCT. 11) BUSINESS WIRE - Environmental Control Group Inc. (NASDAQ: ECGI) Thursday announced net income of $483,000 or approximately 7 cents per share, on third quarter revenues of $15,114,000.

This compares to a net loss of $1,682,000 or 24 cents per share in the third quarter of 1989.

For the first nine months of this year, net income was $1,045,000 or 14 cents per share. This compares to a net loss of, after an extraordinary item, of $502,000 or 7 cents per share during the comparable nine-month period of 1989.

The company reported third quarter operating income before interest and taxes of $1,410,000 compared to an operating loss of $1,371,000 in 1989.

For the nine-month period, operating income before interest and taxes was $3,518,000 compared to 1989 operating income of $1,701,000.

The company noted that revenues were down substantially from 1989 levels. Comparative results for 1989 did not include any underwriting revenues or earnings of the insurance subsidiary due to the open year deposit method of accounting for underwriting results then in use.

This decline in revenues is attributable to the company's earlier decision to discontinue various product lines and cease some services to certain sectors of the asbestos abatement marketplace, as well as to a general softness in the industry, an increase in competition and the slow down in the mid-Atlantic regional economy.

''While revenues were lower than those reported in the third quarter of 1989, we are nonetheless pleased with the fact that we are continuing to make progress in our program to reduce breakeven levels,'' said ECG President and Chief Executive Officer Brian R. Esher.

''This has enabled us to generate profits on lower revenues and margin levels. We are pleased that all operating business units have contributed positively to our bottom line results and have done so since the beginning of the year.

#90284b0634 10/11/1990 ~Business Wire

SALT LAKE CITY (OCT. 11) BUSINESS WIRE - Utah Medical Products Inc. (NASDAQ/NMS:UTMD), a manufacturer and marketer of proprietary medical products for use primarily in the critical care areas of hospitals, announced increases in revenues and earnings for the third quarter 1990.

Sales for the third quarter were $6,466,373, an increase of 40 percent from the $4,634,728 reported for the third quarter of 1989.

Net earnings increased 67 percent to $1,284,979, or 16 cents per share, from the $771,689, or 10 cents per share, reported for the like period last year. Weighted average shares outstanding were 7.85 million vs. 7.66 million in the third quarter 1989.

For the first nine months of this year, sales were $16,828,393 or an increase of 35 percent from the $12,424,237 reported for the first nine months of 1989.

Net earnings for the nine month period were $2,994,011, or 38 cents per share, compared with $1,693,072, or 22 cents per share, for the like period last year an increase of 77 percent.

Weighted average shares outstanding were 7.82 million vs. 7.60 million for the first nine months of 1989.

Wm. Dean Wallace, president, stated: ''We are on target for our goal of 30 percent growth in revenues and are exceeding our 30 percent target in earnings for 1990.

''To meet the increasing demand for our products, we have now moved to three shifts in the manufacturing division of our company and are also expanding the physical plant from 34,000 to 85,000 square feet over the next six months to accommodate our growth.

''Utah Medical is grateful for the continued support of the investment community, our shareholders and our customers.''

MOUNTAIN VIEW, CA (OCT. 11) BUSINESS WIRE - ASK Computer Systems Inc. Thursday announced that its wholly owned subsidiary, Palette ACQ Corp., has extended its all-cash tender offer for all outstanding shares of common stock of Ingres Corp. until midnight, New York time, on Friday, Oct. 19.

The tender offer was previously scheduled to expire on Oct. 12. All of the

other terms of the offer remain unchanged. ASK stated that negotiations are continuing on the definitive bank financing agreement, completion of which is a condition to the offer.

ASK also announced that as of 5 p.m. California time on Oct. 10, 4,363,791 shares of Ingres common stock had been validly tendered pursuant to the tender offer and not withdrawn. These shares represent approximately 38 percent of the outstanding shares of Ingres common stock. The offer is conditioned upon a minimum number of shares being tendered, calculated in accordance with the merger agreement among ASK, Ingres and Palette. Based on shares and options outstanding as of Sept. 10, the minimum number of shares would be approximately 6,450,000 shares.

ASK Computer Systems is a leader in enterprise-wide information systems. It completed its 1990 fiscal year-end in June with revenues of $207 million.

SAN FRANCISCO (OCT. 11) BUSINESS WIRE - The Gap Inc. Thursday reported sales of $181 million for the five-week period ended Oct. 6, an increase of 17 percent over sales of $155 million for the comparable period ended Oct. 7, 1989.

The company's comparable store sales increased 8 percent in September 1990 compared to an increase of 17 percent a year ago.

Sales of $1.154 billion for the 35 weeks ended Oct. 6, 1990, represent an increase of 24 percent over sales of $930 million for the like period in 1989. Year-to-date comparable store sales increased 16 percent in both 1990 and 1989.

As of Oct. 6, 1990, The Gap Inc. operated 1,059 stores compared to 964 at Oct. 7, 1989, an increase of 10 percent.

#90284b0638 10/11/1990 ~Business Wire

BOSTON (OCT. 11) BUSINESS WIRE - State Street Boston Corp. reported third quarter earnings per share of $.79 on a fully diluted basis, up 11% from $.71 per share in the third quarter of 1989.

Net income for the quarter was $29.9 million, up from $27.0 million a year ago. The earnings per share gain resulted from revenue growth partially offset by increased operating expenses and a higher provision for loan losses. Return on stockholders' equity was 18.0%.

Fee revenue accounted for 67% of total revenue, reflecting State Street's businesses that combine information technology with banking. State Street is the largest provider of securities processing and recordkeeping services for U.S. mutual funds and pension funds. The corporation also specializes in quantitative investment products and is the largest U.S. manager of international pension assets.

State Street provides global services from its offices in the United States, Toronto, London, Luxembourg, Munich, Hong Kong, Tokyo and Sydney.

Fee revenue was $127.4 million, up $13.6 million or 12% over the third quarter of 1989. The largest component of fee revenue, fiduciary compensation, was $95.2 million, up 11%. Growth in revenue from servicing mutual funds and pension plans contributed to the increase. Revenues from managing assets for other institutions and recordkeeping for 401(k) plans were up substantially.

Other fee revenue includes gains on the disposition of leasing residuals of $3.7 million, up $2.1 million over a year ago. Foreign exchange trading revenue was $8.5 million, up $1.6 million over the third quarter of 1989. The third quarter of 1989 included non-recurring processing service fees of $2.0 million.

Taxable equivalent net interest revenue was $73.2 million, up $15.3 million or 26% from the third quarter of 1989 due to balance sheet growth and wider interest rate spreads. Interest- earning assets increased $2.3 billion, or 33%, funded in part by additional multi-currency deposits from money managers of global portfolios. The excess of rates earned over rates paid by State Street widened, reflecting lower short-term market interest rates.

The provision for loan losses charged against income was $10.4 million, up from $4.6 million a year ago. Net loan charge-offs were $11.3 million. During the quarter, non-performing assets increased to $58.5 million, or 2.3% of loans. At quarter end, loans were $2.6 billion and the allowance for loan losses was $51.8 million, or 2.0% of loans.

Operating expenses of $137.4 million were up $16.4 million, or 14%, over the third quarter of 1989. The increase was due to additional people and other expenses supporting business growth.

On September 30, total assets were $11.6 billion. State Street had a risk-based total capital ratio of 14.0%, well above the regulatory minimum of 7.25% required by year-end 1990.

#90284b0641 10/11/1990 ~Business Wire

SEATTLE (OCT. 11) BUSINESS WIRE - AirSensors Inc. (NASDAQ:ARSN) announced Thursday revenues for the quarter ended July 31, 1990, were $6,721,252 with a net loss of $445,000, or 2 cents per common share.

Revenues for the first quarter ended July 31, 1990, were approximately 12 percent less than for the first quarter of fiscal year 1990.

The decline in sales is attributed to a soft market for fleet conversion in North America. Volatile propane pricing which occurred last winter is partially blamed for market softness. Uncertainty with respect to alternative fuel policies in various key states and as finally spelled out in the pending Federal Clean Air Bill, is believed to be the primary cause, however.

Bert Martin, president and chief executive officer, stated: ''Although not reflected in present sales, AirSensors is becoming the focal point of technical interest as evidenced by an unprecedented volume of inquiries. It appears to be the consensus that our newly developed technology is visionary, elegant and greatly needed.

AirSensors' subsidiary, IMPCO Technologies Inc., is a leading manufacturer of products for the alternative fuel equipment market. IMPCO has a dominant share of the domestic market and a significant share of the international market for propane and natural gas systems used in automotive, material handling, industrial and small engine industries. It also designs and develops engine management systems for internal combustion engines.

#90284b0642 10/11/1990 ~Business Wire

EUGENE, OR (OCT. 11) BUSINESS WIRE - Spectra-Physics announced today that it filed suit in the U.S. District Court for the District of Oregon on Sept. 27, 1990, against Symbol Technologies of Bohemia, N.Y.

The suit asks the court to declare that Spectra-Physics has the right to make, use and sell products free and clear of claims of infringement of any valid and enforceable patent. The suit also contends that Symbol Technologies has competed unfairly in the market, and Spectra-Physics seeks to enjoin them from all further acts of unfair competition. Spectra-Physics also seeks compensatory and punitive damages.

At the Scan Tech Show last week in Atlanta, Spectra-Physics introduced its SP 300 series of handheld laser barcode readers and received an overwhelmingly positive response. The SP 300 series competes directly with Symbol Technologies' handheld scanner product line.

Spectra-Physics alleges that Symbol Technologies has intimidated customers and competed unfairly by tying purchase agreements for handheld lasers scanners to the grant of licenses to other Symbol Technologies' patents.

John O'Brien, president of Spectra-Physics, asserted: ''We are committed to offer the broadest and most complete scanner product line in the industry. Handheld laser scanners are a fundamental element of that strategy. As holder of a bona-fide license from Symbol Technologies for these devices, which we acquired in 1985, Spectra-Physics has every right to participate fully in this product arena. We intend to put an end to Symbol Technologies' unfair practices via the courts.''

Spectra-Physics is a wholly owned subsidiary of Pharos AB, a Swedish conglomerate of high technology companies. Headquartered in Eugene, Spectra-Physics employs approximately 700 people and has offices throughout the United States, Europe and Pacific Rim. It manufactures and markets laser barcode readers to a variety of customers, such as retailers, manufacturers, etc., who use automated barcode data entry.

#90284b0643 10/11/1990 ~Business Wire

CUPERTINO, CA (OCT. 11) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) Thursday announced that preliminary results for the fourth fiscal quarter, ended Sept. 30, indicate that the company will report record revenues for the quarter.

Revenue growth for fiscal 1990 is expected to approximate 13 percent to 14 percent compared with fiscal 1989. The company plans to report final results the week of Oct. 22.

''Preliminary revenue results indicate it was a good quarter,'' James G. Treybig, president and chief executive officer, said. ''Revenues will be consistent with the more favorable scenario we painted for Wall Street on Sept. 10, 1990, when we commented on the unpredictable economic environment.

''After a number of competitors announced new products our close rate accelerated, especially in the United States and United Kingdom. The Far East continues to record strong growth.

''Sales of NonStop Cyclone processors, which have been doing well throughout the year, increased substantially in the fourth quarter over the third, reflecting the continued success of this powerful new system,'' Treybig added.

''We won a significant number of high value deals in competitive situations in large accounts. Tandem's telecommunications business had an outstanding quarter and our Ungermann-Bass subsidiary also did very well.

''Our historical pattern is that either the first or second quarter of our fiscal year usually generates less revenue than the fourth quarter of the previous year,'' Treybig said.

''Tandem is maintaining a conservative approach to budgeting in light of the current economic environment and will tighten cost control measures adopted during the last six months by instituting additional measures in 1991.

''We are working hard to overcome reduced capital spending in the banking industry in certain countries by strengthening our product offerings in other industries and developing new banking products. We are in a strong product cycle and are confident that Tandem is positioned well for future growth.''

Tandem Computers Inc. manufactures and markets fault tolerant computer systems online transaction processing systems, and enterprise networks. The company is headquartered at 19333 Vallco Parkway, Cupertino, 95014. Telephone is 408/725-6000.

BOULDER, CO (OCT. 11) BUSINESS WIRE - Exabyte Corp. (NASDAQ:EXBT) Thursday reported a 96 percent increase in net income for the quarter ended Sept. 29, 1990.

Net income for the quarter was $6.1 million, or 29 cents per share, vs. $3.1 million, or 17 cents per share, for the comparable period of 1989. Third quarter revenues increased by 64 percent to $39.2 million from $23.9 million for the same period last year.

For the nine months ended Sept. 29, 1990, the company reported a 142 percent increase in net income to $20.8 million, or 99 cents per share. Net income for the comparable period in the previous year was $8.6 million, or 47 cents per share, including extraordinary gains from the utilization of income tax carryforwards of $1.25 million, or 7 cents

per share. Revenues for the 1990 nine-month period were $126 million, an increase of 119 percent over revenues of $57.4 million for the equivalent period of last year.

Exabyte Corp. develops, manufactures and markets high-capacity 8mm cartridge tape subsystems which are used primarily with workstations, network file servers and minicomputers.

DALLAS (OCT. 11) BUSINESS WIRE - American Telecommunications Corp. (NASDAQ:AMTTF) announced Thursday that it has signed an Agreement in Principle with an Operator Service Provider to acquire the company's entire business base, which will produce a significant increase in ATC's monthly revenues.

This agreement, which involves the assumption of certain debt and other obligations of the company and is still subject to certain other conditions, is expected to be finalized and consummated within one week.

Kerry R. Fox, ATC's president, noted that this substantial addition to the company's present business base of major hotels throughout the United States will greatly benefit the company's long range growth and profitability objectives.

At the same time, Fox announced that he and a group of other investors had acquired for cash the entire 2.5 million shares of 7 percent cumulative preferred stock of the corporation's Texas subsidiary from United Artists Telecommunications II Inc. A Form 8-K covering this transaction has been filed with the SEC.

The company further reported that it held an Extraordinary General Meeting on Oct. 2, 1990 in Vancouver, British Columbia at which time shareholder approval was obtained for (a) a one for three reverse split of the common stock of the parent corporation; (b) an increase in the authorized capital of the company by the creation of 5 million Class ''A'' Preference shares with a par value of 1 cent each; and (c) the approval of the first step of the company's plan to redomicile the parent corporation from British Columbia to Delaware.

American Telecommunications Corp. provides telecommunications management services to hotels and motels throughout the Continental United States, including a full line of long distance services, operator and billing services and the installation and maintenance of specialized call accounting equipment.

#90284b0665 10/11/1990 ~Business Wire

BOSTON (OCT. 11) BUSINESS WIRE - Zilactol (the liquid form of Zilactin) was introduced Thursday at the American Dental Association Annual Meeting in Boston.

Zilactol treats cold sores and fever blisters often before they break out.

According to oral pathologist and dental oncologist Dr. Brad Rodu, who conducted in-vitro studies on Zilactol at the University of Alabama School of Dentistry... ''We are excited about what we've seen Zilactol do.'' Dr. Rodu has conducted extensive clinical and in-vitro research on the Zila line of products.

With 98 million cases of recurrent herpes labialis occurring every year, dentists are constantly asked for cold sore/fever blister help. The virus resides in latent form in the nerve ganglia near the spinal column, were its reactivation -- by stress, diet or any number of other stimuli - results in a blister-like eruption that typically lasts from 7 - 14 days.

Zila first made an impact on this widespread problem with its medicated gel, Zilactin, now widely prescribed by dentists and recommended by pharmacists. In an extensive, uncontrolled study, dentists found rapid and prolonged pain relief with Zilactin plus a speedy resolution of the lesion(s). Zilactol, a non film-former, contains the same effective ingredient as Zilactin.

Zilactol is now being shipped to wholesalers and major drug store chains nationwide. It joins a growing family of non-prescription oral health care products from Zila Pharmaceuticals. The three gels are all based on the patented Zila bioadhesive technology which permits the medication to tenaciously adhere to moist tissue, even in the mouth, for hours. Zila products include:

Zilactin Medicated Gel - the original medicated gel for canker sores, fever blisters and cold sores (Drug Topics magazine, August 1990, reported that pharmacists have made Zilactin one of the most frequently recommended canker/cold sore remedies).

ZilaBrace Oral Analgesic Gel - for cuts and sores caused by braces and other dental appliances.

ZilaDent Oral Analgesic Gel - for sores and irritations caused by dentures.

At September's annual meeting of the National Association of Covnenience Stores in Dallas, Zila introduced a new Zilactin MiniPak for distribution in

convenience stores, airline terminal shops, resorts, hotels and other HBA convenience outlets.

Bausch & Lomb Inc., earlier this year announced it will market Zila oral health products worldwide outside of the United States. Canadian sales are expected to begin in December.

Zila product sales have surged from $166,000 in 1986 to $3.5 million in fiscal year 1990 (July 31). Zila stock is traded on the NASDAQ market (symbol:ZILA).

For more information, contact Zila Pharmaceuticals at 777 East Thomas Road, Phoenix, AZ 85014, 602/957-7887.

#90284b0671 10/11/1990 ~Business Wire
INFO '90, NY (OCT. 11) BUSINESS WIRE - On-Line Software International Inc. Thursday introduced AD/VANCE DataModeler, the first in On-Line Software's planned series of new CASE tools to enhance IBM's AD/Cycle,

The AD/VANCE DataModeler, a database design and administration facilitator, brings automated structured techniques to the mainframe and provides a low risk, cost effective path to IBM's AD/Cycle. AD/VANCE DataModeler was developed in conjunction with Tata Consultancy Services (TCS).

AD/VANCE DataModeler is designed to provide a low cost, low risk path to IBM's AD/Cycle. Using AD/VANCE DataModeler in conjunction with PC CASE tools can help achieve corporate benefits with CASE. Developers can centrally store and share models produced with AD/Cycle compliant PC CASE tools such as those produced by Knowledgeware's Information Engineering Workbench (IEW) product. In this way, users can share the benefits of CASE throughout the corporation. AD/VANCE DataModeler can validate, display, and maintain IEW data models. In addition, it helps maintain model integrity with check-in, check-out facilities and reference number based import/export facilities.

AD/VANCE DataModeler's sophisticated Entity-Relationship (ER) Diagram Facility automates ER diagramming, allowing designers to define data entities, attributes and their specific properties and relationships. ER model information can be created and maintained graphically or by using ISPF panels. The AD/VANCE DataModeler stores modeling information in its own DB2-based ''data store'', and will offer a real time Repository Manager interface in 1991.

Since AD/VANCE DataModeler is mainframe-based, data is stored in a central location, providing central control and security. Data integrity is insured through the timestamping facility which avoids concurrent updates. AD/VANCE DataModeler provides a Domain Assignment Facility that establishes and enforces corporate data standards. A ''starter set'' of commonly used data standards is provided. These standards and models can then be easily disseminated to multiple users through the existing mainframe terminal network regardless of terminal type since model simulation is possible on non-graphic type terminals. No user retraining is needed since SAA-CUA compliant TSO/ISPF menus are utilized.

The AD/VANCE DataModeler's Expert Model Validation Facilities automate the model review and quality assurance process. Model validation functions check for completeness and correctness of models, and validate model structure against the rules of key-based modeling. The diagnostic reports generated highlight inconsistencies and errors to ensure that quality data bases can be built from the corrected data model. These facilities provide ''powertools'' for data administrators and data planners who are often inundated with model quality assurance work.

AD/VANCE DataModeler is a cost-effective, low risk approach to AD/Cycle because it utilizes existing mainframe hardware and workstations and provides multi-user access.

AD/VANCE DataModeler installs in under an hour, and it is available for $31,500 for the IBM Processor Group 50.

Headquartered in Bombay, India, TCS is part of the Tata Group of Companies, a $4 billion corporation. TCS has developed software solutions and products on a variety of platforms over the last 22 years, including products in the CASE area. TCS provides services to major corporations worldwide, with established offices in the United States, United Kingdom, Europe, Australia, Far East and the Middle East.

On-Line Software International Inc. is a NYSE listed company (OSI) headquartered in Fort Lee. The 21 year old firm combines consulting and educational services with CICS, DB2, CASE, and development systems products that enhance the productivity of IBM computer systems users.

As a Charter Vendor Member of the International DB2 Users Group and a Founding Member of R/AD, the International User Group for Repository and AD/Cycle, On-Line Software supports the IBM user community. With 16 domestic and international offices, On-Line Software's distribution network services over 30 countries. The company is an IBM Business Partner that has products and professional services utilized by all Fortune 100 IBM mainframe sites.

#90284b0672 10/11/1990 ~Business Wire

SALT LAKE CITY (OCT. 11) BUSINESS WIRE - Equity Oil Co. (NASDAQ:EQTY) Thursday reported 1990 third quarter net income of $1,011,773, or 8 cents per share, compared to $441,254 or 4 cents per share for the comparable period in 1989.

Revenues for the three months ended Sept. 30, 1990 were $4,609,785, up 20 percent from $3,832,359 in 1989. Net income for the first nine months of 1990 was $618,570 or 5 cents per share compared to $1,042,427 or 9 cents per share in the same period of 1989. Total revenue for the nine month period was $12,994,811, a 16 percent increase from the $11,236,800 in revenues recorded in the same period of 1989.

As previously disclosed, Equity Oil's 1990 nine month's net income includes two unusual non-cash charges taken in the second quarter of this year - a charge of $1,960,000 resulting from the abandonment of two wells in Pecos County, Texas; and a charge to Leasehold Abandonments of $336,000. The second quarter abandonments were one-time non-cash charges and will result in no loss of future net revenue.

The company's Cemetery Ridge Prospect, located in Goliad County, Texas, consists of 6,800 acres in which the company has a 37.33 percent working interest. Through the first nine months of 1990, the first three wells had cumulative net production of 390,508 MCF. A fourth well was completed and was prepared to be placed on production in the fourth quarter. It is anticipated that the gross production from the four wells will approximate 5200 MCF per day during the fourth quarter of 1990.

The company anticipates the drilling of two additional wells on the prospect in the fourth quarter of 1990 and present plans call for the drilling of additional wells in 1991 to further evaluate the Cemetery Ridge acreage. The drilling will be done on a well-by-well basis, using the results of prior drilling to select the drill site for subsequent wells. The full extent of the reserves and production potential can only be assessed after the completion of the drilling program.

Equity Oil Co., headquartered in Salt Lake City, is an independent oil and gas exploration and development company with operations in nine western states and Canada. In 1989, Equity Oil ranked as the 32nd largest U.S. independent based on proved reserves.

NEW HAVEN, CT (OCT. 11) BUSINESS WIRE - SNET announced that it expects that the company's third quarter net income will be reduced by approximately $25 million.

SNET is finalizing and will release its earnings figures, as scheduled, on October 18.

The principal reasons for the earnings reduction are: first, a writedown of accounts receivable and an increase in the reserve for uncollectible accounts, due in part to the weak Connecticut economy; and second, expenses associated with the refinancing of high-coupon debt. The refinancing will serve to reduce annual interest expense. The company will not be proposing any change in its rate request before the Connecticut Department of Public Utility Control as a result of this earnings reduction.

#90284b0678 10/11/1990 ~Business Wire

BURLINGAME, CA (OCT. 11) BUSINESS WIRE - AT&T Microelectronics Thursday announced a new high-performance digital signal processor architecture that will give personal computers and workstations multiple new capabilities such as speech and music processing, speech recognition, graphics, and modem functions.

AT&T said at Microprocessor Forum West that its AT&T WE (R) DSP3210 digital signal processor is the world's first DSP being designed expressly for PC and workstation multimedia applications. It will enable designers of such systems to add multimedia capability directly on motherboards.

Based on the very successful DSP32C, the DSP3210 is designed to interface directly with microprocessor primary busses. It is compatible with both Intel's and Motorola's 32-bit microprocessor bus protocols.

Besides being microprocessor bus-compatible, the DSP3210 directly supports request/relinquish/retry and bus error protocols enabling the DSP3210 to operate as a bus master. Bus mastering greatly increases multimedia system performance by allowing the DSP3210 and the host microprocessor to pass and share data.

Bus mastering also minimizes system implementation costs by allowing the DSP3210 to share existing system resources.

In addition to an optimizing C compiler and assembly-language support tools, the DSP3210 features a new real-time operating system, VCOS, for multitasking and multiprocessing. Patented task- and code-management functions enable the DSP3210 to share host system memory without need for expensive dedicated SRAM.

Complete real-time debugging tools enable fast application and algorithm development. By separating application development from algorithm development VCOS simplifies and hastens creation of multimedia software.

Design support includes a full bus-level SmartModel (a) of the DSP3210 from Logic Automation for system simulation incorporating the DSP3210. Other development support is being planned by third-party vendors of hardware and software.

Since the DSP3210 is code-compatible with AT&T's DSP32C, developers can begin code development for the DSP3210 now with the DSP32C tools. The DSP3210 software development tools will be available in the first quarter of 1991.

Samples of the DSP3210 are expected to be available in June 1991, and production is forecast to begin in the fourth quarter 1991. The price of the DSP3210 is expected to be less than $50 in quantities of 100,000 in the first quarter of 1992.

Advanced product information is available by calling 1-800-372-2447 (in Canada 1-800-553-2448); or by writing to AT&T Microelectronics, Dept. 52AL300240, 555 Union Blvd., Allentown, Pa., 18103.

AT&T Microelectronics offers a full line of high-performance components and electronic subsystems to original equipment manufacturers.

Included in the product line are analog components, application specific integrated circuits, communication devices, speech processors, memory circuits components and linear arrays, interconnect products, lightwave products, and a full line of power supplies. (a) SmartModel is a registered mark of Logic Automation Inc.

DALLAS (OCT. 11) BUSINESS WIRE - Sun Oil Largeau Chad Ltd. (Sun) a subsidiary of Sun Co. Inc. (NYSE:SUN) and Hunt International Petroleum Co. Ltd. (HIPCO-Tchad) have entered into an agreement to explore a 62 million acre concession in the African Republic of Tchad.

Approval in principle of the joint venture by Tchad's Oil Minister Mahamat Senoussi Khatir was confirmed Thursday.

Tchad is located south of Libya in north-central Africa and the license area is situated south of the Tibesti mountains and north east of Lake Tchad.

HIPCO-Tchad originally obtained the rights to the large license area in 1988 and had done some initial surface geology and gravity work in the area. In October 1989 HIPCO-Tchad opened an office in N'Djamena, the capital of Tchad, and has maintained the office since that time.

Under a HIPCO-Sun agreement Sun will acquire a 50 percent working interest and will become the operator. During the next 18 months Sun will obtain about 800 kilometers of seismic data across the license area.

''We are excited about the prospect of exploring this frontier area with such an experienced and knowledgeable partner,'' commented HIPCO-Tchad's President Jim McGowen from his Dallas office. ''We think this area has an excellent potential for giant reserves.''

HOUSTON (OCT. 11) BUSINESS WIRE - BJ Services Co. (NYSE:BJS) has officially announced the availability of a newly developed fracturing fluid system for well stimulation employing sea water.

This method eliminates the necessity of costly fresh water which has, up to now, been the limiting factor of the number and volume of hydraulic fracturing operations on the North Slope.

BJ Services has successfully applied this technique on several wells for British Petroleum Alaska with positive results. A recent treatment of this type consisted of 83,000 gallons of sea water based fluid and 140,000 pounds of propping agent.

In addition to its availability and low cost, sea water has inherent

properties which renders it compatible with formation fluids and water sensitive reservoir minerals. This advanced fluid is designed to accomodate the salinity variations which normally occur in Beaufort Sea water due to seasonal changes.

BJ Services Co. is a leading participant in the pressure pumping business serving the petroleum industry worldwide. Principal services include cementing and stimulation work for oil and gas wells.

ANSONIA, Conn. (OCT. 11) BUSINESS WIRE - Great Country Bank (NASDAQ:GCBK) announced Thursday that it increased its provision for loan losses in its first quarter by $1,150,000.

This action taken in response to the persistent depression in the real estate economy increased reserves to 60 percent of nonperforming loans. In so doing, the company reported a loss of $908,000 for the quarter, or 41 cents per share.

Frederick J. Quinn, president and chief executive officer explained, ''We are working diligently to reduce the negative impact of nonperforming assets on the earnings of the bank.

''Our greatest obstacle in resolving many of our nonperforming assets is the increasingly protracted legal processes. Wherever possible we have tried to resolve issues outside the courts, but the growing phenomenon of bankruptcies has created a legal web entrapping many debtors and creditors.''

He continued, ''these circumstances have caused a considerable rise in expenses pertaining to loan workouts.'' He noted, ''In the first quarter of this year we incurred $467,000 in other real estate expenses compared to $94,000 in the first quarter of last year.

''Additionally, expenses related to the bank's restructuring of its benefit programs and severance pay related to staff reductions have caused a substantial fluctuation in other expenses for the first quarter.''

Commenting on the recent performance of the bank's common stock, Quinn stated, ''It is distressing that the marketplace has indiscriminately battered the market prices of New England Bank stocks. It's inconceivable that an institution with a book value of over $22.00 per share trades at less than $4.00.''

As of Aug. 31, Great Country Bank had nonperforming loans totaling $9,461,000,

or 2.6 percent of the bank's total loan portfolio. Nonperforming assets, including nonperforming loans, other real estate owned and the bank's direct investment in real estate totaled $32,082,000, or 7.3 percent of assets.

Total assets as of that date were $437,035,000, and the shareholders' equity amounted to $48,548,000. Great Country Bank's primary capital ratio was 11.1 percent as of Aug. 31, more than twice the minimum amount required.

FALLS CHURCH, VA (OCT. 11) BUSINESS WIRE - Infodata Systems Inc. (NASDAQ:INFD) Thursday announced that it has been awarded an $800,000 contract with the Federal Bureau of Investigation, to provide text management software systems, as well as training and support.

Infodata will be providing the FBI with multiple copies of its INQUIRE/Text system for use with IBM mainframes. The FBI has also licensed Infodata's new INQUIRE/Workstation and Folio VIEWSTM, companion products for personal computers.

This contract began contributing to revenues during the third quarter of fiscal 1990 which ended September 30, 1990.

Alan Curtis, Federal District Sales Manager for Infodata, commented, ''We are pleased to be doing business with the FBI. Using INQUIRE/Text, the FBI plans to automate several document-centered applications, including online access to FBI's internal policies, procedures and regulations. The system will be installed at FBI headquarters and two regional data centers.''

Infodata Systems Inc. is a leading supplier of text and image management software and services. The INQUIRE/Text product line is widely used by Fortune 1000 companies, utilities, and government agencies for automating document-centered applications such as litigation support, records management, regulatory compliance, and business and government intelligence.

Folio VIEWS is a registered trademark of Folio Corp.

INWOOD, N.Y. (OCT. 11) BUSINESS WIRE - Choice Drug Systems, Inc. (NASDAQ:DOSE (common stock), DOSEW (warrants), DOSEU (units); Boston Stock Exchange:CD) Thursday announced unaudited results for the second quarter and six months ended August 31, 1990.

Revenues for the three months ended August 31, 1990 rose 21% to $5,880,222 from $4,844,411 in the prior year's second quarter. Income from operations increased to $276,553 from $142,016 in last year's second quarter.

Net income increased substantially to $193,402 or $.04 per share (which includes extraordinary income of $66,000 or $.01 per share) up from $854 or less than $.01 per share in the corresponding period last year.

For the first six months of fiscal 1991 revenues were $11,587,502, up 20% from $9,630,536, in the first half of the prior fiscal year. Income from operations was $473,230 versus $319,061 in the first six months of fiscal 1991. Net income increased over 270% to $305,639 or $.07 per share (which includes extraordinary income of $102,000 or $.02 per share) up from $82,072 or $.02 per share (which includes extraordinary income of $21,000 or $.01 per share) in the first half of last year.

As at August 31, 1990, the Company was in technical default in minor amounts of certain financial and ratio covenants under the terms of its Loan Agreement with United Jersey Bank. However, the bank waived the defaults which existed at August 31, 1990 on October 9, 1990.

Marvin Sirota, Chairman of Choice Drug, commented, ''Revenue growth in the first half of fiscal 1991 was mainly due to the acquisition of Sterling Health Systems, Inc. on October 31, 1989, the increase in the Company's customer base through the purchase of certain assets of World Medical & Surgical Corp., and sales of additional product lines to new and existing customers. Despite start-up costs relating to a recently formed subsidiary, Choice Drug achieved record results in the first half of this year.''

In a separate development, Choice Drug also announced that it has terminated the services of M.H. Meyerson & Co., Inc. of Jersey City, New Jersey to act as its investment banker with regard to acquisitions, mergers and financing alternatives.

Choice Drug Systems, Inc. and its wholly-owned subsidiaries provide pharmaceuticals, durable medical equipment and disposables to health care facilities, home health care providers, and physician groups primarily in the greater New York/New Jersey Metropolitan area and in Massachusetts and Connecticut.

SAN DIEGO (OCT. 11) BUSINESS WIRE - California Jamar Inc. (NASDAQ:JMAR)

(BOSTON STOCK EXCHANGE:JMR) announced Thursday that it has received notice of a contract award from the Defense Advanced Research Projects Agency (DARPA) for a technology program to study the company's advanced excimer laser plasma x-ray source which is currently under development for semiconductor industry lithography applications.

''This program will utilize the results of our proprietary company program which employs pioneering approaches to converting the output of our Advanced Compact Excimer Laser (ACEL) into the type of x-rays needed to manufacture future semiconductor chips,'' Dr. James A. Glaze, president, explained.

Hundreds of millions of dollars are being spent in a worldwide race to develop advanced lithography sources to enable the semiconductor industry to manufacture higher density integrated circuits needed for advanced electronic systems of the future.

Much of that investment is directed toward the development of very expensive and complex synchrotron x-ray sources. Jamar's laser-driven point sources promise to provide the semiconductor industry with a more flexible cost effective alternative way to manufacture advanced chips.

In addition, Jamar is currently working on programs to evaluate the feasibility of using its ACEL system for remote detection of illegal/dangerous substances such as narcotics, as well as for a variety of military targets.

California Jamar Inc,. specialized in the development of advanced laser systems for a range of industrial and military applications including optical communications, remote detection and x-ray lithography for semiconductor manufacturing.

DALLAS (OCT. 11) BUSINESS WIRE - Commercial Metals Co. (NYSE: CMC) announced that it has been awarded the contract for the City of Dallas Household Recyclable Material Collection Pilot Program.

The pilot program, to include 14,000 Dallas households, will provide convenient residential collection of recyclable materials. In addition to the once a week residential pick-up, CMC Recycling will be responsible for processing and sales of the aluminum and steel cans, glass, newsprint, and plastics such as milk jugs and soda bottles.

Stanley A. Rabin, president and chief executive officer, commented that although the Dallas Pilot Program is a small beginning the company believes citizens throughout Texas are ready to support increased recycling efforts.

Rabin stated, ''It is appropriate that CMC, a Dallas based company with 75 years of recycling history, be the leader in encouraging household recycling in this area. For many years we have been a major recycler of metals throughout the southern half of the United States and particularly in Texas.''

Rabin said the company is excited about developments in municipal, household and non-traditional recycling. ''CMC Recycling will be an active participant. We are studying plans for a major multi-materials recycling facility, the first of its kind in the Dallas/Fort Worth area.

''This initial City of Dallas program will give us a base to add other creative sources of recyclable materials, including programs being considered by area municipalities, industries and groups of concerned citizens. Our goal is to be the major multi-materials recycler in the area.''

Commercial Metals Co. was founded in Dallas 75 years ago as a scrap metal recycling company. In addition to 37 recycling facilities, it has three steel minimills, steel fabrication shops, a copper tube plant, and world-wide trading in various minerals, metals, steel and semi-fabricated, nonferrous metal.

LOUISVILLE, KY (OCT. 11) BUSINESS WIRE - Thomas Industries Inc. (NYSE:TII) reported a decline in third quarter earnings in the face of continued deterioration in North American residential and non-residential construction markets, as well as a softening economy.

For the three months ended September 30, Thomas' net income totaled $3,101,000 ($.30 per share), down $826,000 or 21 percent from the same quarter l989, when net income was $3,927,000 ($ .39 per share).

Net sales were off a modest 2.7 percent for the third quarter 1990, totaling $116,953,000 compared to $120,147,000 for the identical period in l989. Operating income also declined, down 13.0 percent from $11,749,000 in the third quarter 1989 to $10,222,000 for the current quarter.

Net sales for the nine months ended September 30, l990, rose to a record $353,449,000, up 10.4 percent from $320,133,000 for the first nine months in

l989. Operating income for the nine month period ended September 30, l990, was $30,716,000, down slightly from $31,407,000 for the same period in l989 due to competitive margin pressures. Net income declined for the nine month period, down 29.3 percent from $13,592,000 in l989 to $9,607,000 in l990. Earnings per share for the first nine months ended September 30 were $.94, as compared to $1.13 for the same period 1989 when adjusted for non-recurring gains.

Thomas Industries Inc. designs, manufactures and markets a broad array of commercial, industrial and residential lighting products, fractional horsepower compressors and vacuum pumps, as well as specialty products for commercial, industrial and consumer markets. Thomas, with worldwide sales last year in excess of $436 million, has operations in the U.S., Canada, Europe and Asia.

BOSTON (OCT. 11) BUSINESS WIRE - Keane Inc. (AMEX:KEA) reported earnings and revenues Thursday for the third quarter ending Sept. 30, 1990.

Revenues increased to $23,214,000, up 19 percent; pretax income rose to $2,350,000, up 54 percent and net income increased to $1,376,000 up 53 percent vs. $899,000 during the third quarter of 1989. Earnings per share rose to $.29 per share (on 4,756,886) as compared to $.23(a) per share (on 3,885,303 shares) a year ago.

For the first nine months of the year, Keane's revenues were $69,811,000 vs. $53,552,000 last year. Pretax income was $6,619,000 as compared to $4,421,000 in 1989, and net income was $3,864,000, up 48 percent as compared to $2,609,000 last year. Earnings per share for the nine month period was $.85 per share (on 4,570,841 shares) vs. $.67(a) per share (on 3,871,500 shares) a year ago.

The increase in revenues and net income is due to the continuing strong demand for custom software development services, and Keane's strategy to differentiate itself through its project management expertise.

Keane Inc. is a $95M custom software development company which designs, develops, integrates and maintains software for corporations and hospitals.

#90284b0716 10/11/1990 ~Business Wire
COLUMBUS, OH (OCT. 11) BUSINESS WIRE - The Public Utilities Commission of Ohio (PUCO) Thursday denied several requests to reconsider its decision in the last Ohio Edison rate case.

The Office of Consumers' Counsel, North Star Steel, Industrial Energy Consumers, RMI Co. and Ohio Edison had asked the commission to reconsider its Aug. 16 decision in which the commission granted Ohio Edison a rate increase of approximately $142,376,000, rejecting the company's request for an approximate $216 million increase.

In making rulings in rate cases, the commission is required by law to authorize rates which are fair and reasonable to customers, while at the same time, allowing the company the opportunity to meet expenses, pay interest on debts, and provide a reasonable return to stockholders. Intervenors, or formal parties, dissatisfied with the PUCO decision may request that the commission rehear, or reconsider, its ruling.

The typical Ohio Edison residential customer using 500 kwh per month, paid approximately $57.23 per month for electric service prior to the Aug. 16 ruling. The typical customer now pays $60.59. Today's ruling on rehearing does not affect customer rates.

#90284b0717 10/11/1990 ~Business Wire
DAYTON, OH (OCT. 11) BUSINESS WIRE - Amcast Industrial Corp. (NYSE:AIZ) reported Thursday that, for the fiscal year ended Aug. 31, the company posted a loss of $13.4 million or $1.97 per share which includes a previously announced special provision of $16.6 million or $2.44 per share.

Sales were $274.3 million. Last year, net income was $8 million or $1.12 per share on sales of $329.5 million.

For the fourth quarter, including the provision which amounted to $2.48 per share, Amcast generated a loss of $15.5 million or $2.32 per share on sales of $73.8 million. In the year earlier three-month period, earnings were $2.5 million or 35 cents per share on sales of $80.7 million.

L.W. Ladehoff, chairman, president and chief executive officer, said that operating profits were generated in each quarter, but overall earnings were significantly below expectations. He cited several factors that attributed to the year's lower sales and earnings: a three-month strike at the company's largest plant, a decline in car build last winter, the credit crunch that

reduced housing starts, and a cold, wet spring which devastated the air conditioning business. The divestiture of three iron plants early during the year also impacted sales.

Amcast Industrial Corp. is a manufacturer of technology-intensive metal products. Its two primary businesses are proprietary FLOW CONTROL PRODUCTS marketed through national distribution channels, and ENGINEERED COMPONENTS for original equipment manufacturers. The company serves four major sectors of the economy: aerospace/aviation/defense, construction, automotive and general industry.

NEW YORK (OCT. 11) BUSINESS WIRE - Asia Pacific Fund Inc. Monthly Review - October 1990

INVESTMENT REVIEW

This was a difficult month for markets worldwide and the markets of the Asia Pacific region proved no exception. Greatest falls were experienced in the most liquid markets of Thailand, Malaysia and Singapore. These less liquid markets were hit by waves of institutional sales, particularly from open-ended mutual funds which were raising cash to meet redemptions. The markets of the region are now on very appealing valuations. Singapore and Malaysia are trading at the low end of their ten year valuation range, and Hong Kong is trading on valuations that have only been lower in times of local crisis of confidence. However, despite these attractive valuations, the markets of the region remain susceptible to external events, particularly the Gulf conflict. Until the world political scene is clearer, it is unlikely that the value in the Asia Pacific markets will be realised. The managers continue to focus on value, and have built a reserve of cash with a view to picking up equity at distress prices.

MANCHESTER, NH (OCT. 11) BUSINESS WIRE - Bank of New Hampshire Corp. Thursday reported a third quarter loss of $4.0 million versus net income of $1.9 million during the same period of 1989.

For the nine months ended Sept. 30, 1990 the company's net loss was $10.0 million, compared to net income of $6.5 million a year ago.

Davis P. Thurber, chairman, stated that: ''The losses are principally attributable to increased levels of loan loss provision (up $24.1 and $8.4 million, respectively, over the comparable nine and three month periods of 1989) and also are reflective of the continuing slowdown in the overall economy.''

He additionally noted that, as a result of the increased provisions, the allowance for possible loan losses now stands at $20.0 million up from $6.2 million a year ago and represents over 100 percent coverage of nonaccrual loans, and approximately 58 percent coverage of all nonperforming assets (''nonaccrual loans'' and ''other real estate owned'').

Total assets were $974 million as of Sept. 30, 1990, an increase of $33 million over Sept. 30, 1989, total deposits increased $24 million to $837 million and the company's total equity capital position, at $57.5 million, remained strong as evidenced by a primary capital ratio of 7.80 percent, well in excess of the current regulatory requirement of 5.50 percent.

Bank of New Hampshire Corp., headquartered in Manchester, is a five-bank holding company. There are 28 offices of the affiliates in 16 different communities throughout the southern, central, coastal and lakes regions of the

state.

SPRING HILL, TN (OCT. 11) BUSINESS WIRE - Saturn officially launched its new family of small cars here Thursday by sending its first truckloads of vehicles from Tennessee to Saturn retailers in California.

Saturn President Richard G. ''Skip'' LeFauve said the cars will go on sale in key markets in California, the south and southeastern United States on Thursday, Oct. 25.

''We're seeing a tremendous amount of consumer interest already and have received more than 14,000 calls on Saturn's toll-free '800' number since we put it in operation five weeks ago. The callers are leaving their names and seeking additional information which will be followed up by our retail partners,'' LeFauve said. ''Saturn is committed to providing our customers with high quality cars that will match the best of the imports and assure a superior ownership experience.''

Tennessee Governor Ned McWherter told the gathering of some 500 community leaders and news media that ''Today marks a significant event for American workers. Saturn today launches a line of quality automobiles that proudly bear the 'Made in Tennessee - Made in U.S.A.' label.''

The governor then drove with LeFauve in a Saturn sports touring sedan from the ''Inspiration Point'' final shipping area to a car carrier, where it was loaded and dispatched to California.

Commenting on the Saturn team members' enthusiasm, UAW Region 8 Assistant Director Bobby Lee Thompson said,

Last week, Saturn announced the manufacturer's suggested retail prices for its vehicles, including the sports sedan (SL), $7,995; sports sedan (SL1), $8,595; sports touring sedan (SL2), $10,295; and sports coupe (SC), $11,775.

Saturn retailers will have more than 30 facilities in operation at launch, building to more than 130 facilities by mid-1991.

PORTLAND, OR (OCT. 11) BUSINESS WIRE - Willamette Industries Inc. (OTC: WMTT) has reported third quarter earnings of $31,274,000, or $1.24 per share.

These results were down 28 percent from second quarter 1990 earnings and down 40 percent from record profits earned during the third quarter of 1989.

Third quarter results brought the year-to-date net to $117,324,000, or $4.62 per share, down 16 percent from the same period last year.

Sales for the first nine months of 1990 were $1,445,157,000, up 2 percent.

William Swindells, Willamette's president and chief executive officer, said that operations at the company's manufacturing facilities were excellent during the third quarter, with almost all facilities operating at capacity. Lower prices in most product lines accounted for reduced sales and most of the reduced profits. Prices for unbleached paper products, linerboard and fine paper show signs of strength moving into the fourth quarter, Swindells said.

Willamette Industries is an integrated forest products company with 72 plants and over 1 million acres of timberland.

MELVILLE ANNOUNCES SEPTEMER RETAIL STORE SALES OF $840.17 MILLION

RYE, NY (OCT. 11) BUSINESS WIRE - Melville Corp., a specialty retailer of apparel, prescription drugs, health and beauty aids, footwear, toys and household furnishings, Thursday reported retail store sales for the fiscal month and 39 week and 6 day periods ended Oct. 6, and the comparable periods last year. Retail store sales for the five weeks ended Oct. 6, were $840,173,000 an increase of 18.8 percent over sales of $706,923,000 for the five week period last year.

Retail store sales for the 39 week and 6 day period ended Oct. 6, increased 11.9 percent to $5,769,670,000 compared to $5,155,481,000 for the comparable period last year.

The reported September sales include the sales of Circus World Toy Stores and Peoples Drug Stores, Incorporated and Subsidiaries (''Peoples'') which were acquired on Aug. 17, and on Sept. 17, respectively. Had the sales of these entities been excluded from consolidated sales as reported, sales would have increased by 8.5 percent and 10.4 percent for the five week and 39 week and 6 day periods ended Oct. 6, respectively.

As of Oct. 6, there were 7,821 stores and leased departments in operation, an increase of 14.5 percent from the 1989 total of 6,831.

Melville specialty retail chains, with stores located across the country, include Marshalls, the off-price brand name apparel chain; Chess King, the young men's apparel chain; Wilsons, in leather apparel; Bob's, the casual family apparel and footwear chain; Accessory Lady, the quality fashion accessory stores; CVS and Peoples, the prescription drugs, health and beauty aids chain; Freddy's, the ''deep discount'' drug and sundries stores; Thom McAn, Fan Club and the Meldisco Leased Department division in footwear; the Kay-Bee toy chain; Linens 'N Things, the brand name linens and domestics chain; This End Up, the casual furniture stores; and Prints Plus, the prints and wall decor stores.

CHERRY HILL, NJ (OCT. 11) BUSINESS WIRE - Infotron Systems Corp. appointed

Thomas W. Aiken vice president of finance, chief financial officer (CFO) and treasurer, reporting to James C. Castle, chairman, chief executive officer and president.

Aiken will assume overall responsibility for Infotron's financial activities. The position was previously held by David P. Barnhill, senior vice president of finance and administration and CFO, who will remain with Infotron until the end of the year.

Aiken joined Infotron in 1984 as director, financial accounting. He was appointed treasurer in January 1988. Prior to joining Infotron, Aiken was the director of corporate accounting for the Penn Central Corp. He also held various accounting positions with Ford Aerospace Corp.

Infotron Systems Corp. is an international provider of integrated strategic networks. It supplies the systems and services which turn a company's communications network into a strategic resource by moving information faster, less expensively and more reliably, producing improved results at the customer's bottom line. Infotron serves multi-national banks, manufacturers, government agencies and common carriers through a sales/service infrastructure in 64 countries.

ALEXANDER CITY, AL (OCT. 11) BUSINESS WIRE - Russell Corp. (NYSE,PSE:RML) Thursday announced record sales and earnings for the quarter ended Sept. 30, 1990.

Sales for the 13-week period ended Sept. 30, 1990 were $193,789,000 compared with $187,747,000 in the quarter ended Oct. 1, 1989. Net income for the 1990 quarter increased 4 percent to $20,854,000, equivalent to 51 cents per common share versus net income of $20,041,000 or 49 cents per common share a year ago.

Sales for the 39-week period ended Sept. 30, 1990, were $519,421,000 compared with $484,105,000 in the like period ended Oct. 1, 1989. Net income for the three quarters of 1990 increased 12 percent to $47,783,000 or $1.17 per common share versus $42,741,000 or $1.05 for the prior year.

Russell Corp. is a vertically integrated, international manufacturer and marketer of leisure apparel, activewear, athletic uniforms, better knit shirts and a comprehensive line of lightweight, yarn-dyed woven fabrics. The company's common stock is listed on the New York Stock Exchange and several regional exchanges under the symbol RML.

#90284b0744 10/11/1990 ~Business Wire

NEW YORK (OCT. 11) BUSINESS WIRE - Jegeroil Corp. (NASDAQ:JEGR) Thursday announced daily sales of one million cubic feet of natural gas from its Falkner Parker 36-1 well.

The gas now flowing into the Panhandle Eastern interstate pipeline from this well is to be sold on the spot market.

With a projected average sales price of $2.00 mcf. (which will rise in view of the Middle East situation) the sale of gas from the Parker 36-1 well projects an annual gross revenue of $700,000. Life of this well is expected to be 30 years.

The Parker 36-1 was successfully completed July 31, 1990 and was the second well completed on Jegeroil's Falkner Prospect in Woods County, Okla. Production from the first Falkner well, the Pettit 35-1, commenced Decemeber 1989 with sales of 850,000 cubic feet of gas per day. The sales of natural gas from its Pettit and Parker wells have a major impact on the company's growth and will more than double the company's cash flow.

Jegeroil plans to drill three additional wells on its Falkner Prospect at three month intervals. Geological and engineering studies indicate these wells will be as productive as the Pettit 35-1 and the Parker 36-1. The total anticipated annual gross revenue from the Falkner Prospect after completion of all five wells is $2.9 million.

Jegeroil Corp. drills and operates its own wells as well as participating with major oil/gas companies on their prospects. To date Jegeroil operates and has working interests in 15 oil and gas wells and in addition owns high potential producing oil/gas prospects, and plans to convert these prospects into revenues as fast as prudently possible.

Jegeroil with a current undervalued share price offers investors a stock with excellent growth and profit potential.

#90284b0745 10/11/1990 ~Business Wire

DALLAS (OCT. 11) BUSINESS WIRE - National Heritage Inc. (NYSE:NHR) Thursday reported results for the fiscal fourth quarter and year ended June 30.

For the year ended June 30, 1990, the net loss was $9.7 million or 56 cents per share, vs. net income of $1.3 million or 8 cents per share for fiscal 1989. Revenues rose to $93.8 million from $84.6 million a year earlier.

For the three months ended June 30, 1990, the net loss was $6.2 million or 36 cents per share, compared with net loss of $1 million or 6 cents per share for the fourth fiscal quarter of 1989. Revenues totalled $19.6 million, versus $21.8 million in the same period a year ago.

Increased revenues for the year were primarily due to the expansion of the company's pharmacy operations. Higher revenues, however, were more than offset by increased operating expenses associated with this expansion and by write-downs of certain assets.

In line with the company's goal of divesting non-core business units, the company has accounted for its pharmacy operations as an asset held for sale. A $2,433,000 charge against earnings was recorded based on the estimated net loss from the pharmacy operations as well as other assets held for sale.

Year-end results were also adversely affected by a pre-tax provision for estimated losses of $9,468,000, most of which was attributable to mortgage loans and advances to limited partnerships for which the company manages nursing homes and retirement centers.

In determining the net realizable value of the mortgage loans and advances, the company estimated the value and cash flow of the related properties which secure the loans using current operating results rather than projecting future results. Notwithstanding the write-downs, the company is actively pursuing available avenues to maximize its recovery on these mortgage loans and advances.

Further affecting year-end results was an operating deficit partially attributable to a significant decrease in the number of homes under management during the last quarter of the year. Since the close of the quarter, the company has taken steps to reduce expenses by consolidating operations to the corporate headquarters in Dallas.

Regional offices have been closed and staffing levels adjusted to bring costs in line with the number of homes under management.

Robert M. Galecke, President, commented, ''Although the results for the year are not favorable, I am confident that the number of homes now under National Heritage's management provides a more stable contract base upon which to rebuild through the addition of third party management and leasing contracts.''

National Heritage Inc. is one of the nation's leading managers of long-term care facilities for the elderly.

CHATTANOOGA, TN (OCT. 11) BUSINESS WIRE - Daniel K. Frierson, chairman of the board of Dixie Yarns Inc. (''Dixie''), Thursday announced that Dixie has withdrawn from the previously announced joint venture to invest in Harding Carpets.

The investment was to have been made through a corporation in which Clarus Corp. (''Clarus''), members of Harding's management, and Dixie were to be shareholders. Frierson stated that the transaction was ended due to the failure of the joint venture to obtain acceptable bank financing.

Dixie's business consists of four product categories: specialty yarns, industrial sewing threads, knit fabrics, and carpet and rug yarns. The company manufactures and markets yarns and threads from a variety of natural and man-made fibers and also processes yarns into knit fabrics.

Its products are used in the apparel, carpeting, domestics, drapery and upholstery, hosiery, industrial fabrics, transportation, and other industries.

LANSING, MI (OCT. 11) BUSINESS WIRE - CFSB Bancorp Inc. (NASDAQ:CFSB), newly-formed holding company of Capitol Federal Savings Bank, Lansing, Thursday reported net income for its third quarter of $578,000, or 36 cents per share.

A net loss of $2,387,000 was recorded for the comparable period in 1989. Per share information is not presented for previous quarters since Capitol Federal converted from mutual to stock form on June 22.

For the nine months ended Sept. 30, 1990, net income was $1,147,000, compared to a net loss of $3,678,000 during the like period in 1989.

Net interest income for the nine months ended Sept. 30, 1990, was $9,004,000 as compared with $7,292,000 during the like period in 1989, an increase of 23 percent. The increase was primarily due to increased interest rate spread and margin. Additions to loan loss reserves during the nine months ended Sept. 30 1990, were $90,000 compared to additions of $1,768,000 during the like period

in 1989.

The significant provision in 1989 was made primarily for certain purchased mortgage loans, totaling $3.5 million, the guarantor of which was taken over by the F.D.I.C. in 1989. In addition, unrealized losses on securities held for sale were recognized during the third quarter of 1989. Substantially all these securities were sold in the fourth quarter of 1989 and first quarter of 1990.

At Sept. 30, 1990, total assets of CFSB Bancorp Inc. were $505.4 million and stockholders' equity, all tangible, was $30.6 million, or 6.1 percent of total assets. This compares to total assets of $501.8 million and net worth of $18.2 million at Dec. 31, 1989. Capitol Federal Savings Bank meets all fully-phased in regulatory capital requirements.

Capitol Federal Savings Bank, sole subsidiary of CFSB Bancorp Inc., is headquartered in Lansing. Capitol Federal, now in its 100th year, provides retail banking and mortgage lending services to its mid-Michigan customers. The bank's 12 retail branches are located in the three counties comprising the Lansing metropolitan area.

Capitol Federal Savings Bank was a mutual savings bank prior to June 22, therefore, per share information for periods prior to the third quarter 1990 is not presented.

#90284b0753 10/11/1990 ~Business Wire

MCLEAN, VA (OCT. 11) BUSINESS WIRE - Unisys Corp. announced Thursday that its Defense Systems unit was awarded a $174.7 million contract by the U.S. Naval Sea Systems Command for upgrade kits to the Mk-92 fire control system for U.S. Navy ships and for several new Mk-92 systems for foreign allies.

The Unisys Mk-92 fire control system is a lightweight, modular system designed to control missile and gun fire aboard small and medium-sized combat ships. Providing both area and point defense, the Mk-92 is used aboard the U.S. Navy's 51 FFG-7 class frigates, as well as on a variety of foreign allied navies' ships.

The fixed-price contract has a basic value of $170.2 million, with a $4.5 million option. Under the terms of the contract, the Shipboard and Ground Systems Group of Unisys Defense Systems will deliver seven coherent receiver/transmitter (CORT) kits to the U.S. Navy for upgrading FFG-7 class frigates from the older Mod 2 configuration to the Mod 6 level.

The contract also calls for the production and delivery of four new systems in the Mod 6 configuration, two for Spain and two for another friendly foreign nation, which requested not to be identified.

The result of tests conducted by the U.S. Navy in April 1989 proved the CORT kits would: double the detection and tracking range of the present system; acquire and hold targets better and improve reaction time; provide a significant improvement in clutter rejection; provide the ability to detect a target cross section many times smaller than the current system; increase the ability to defeat enemy jamming and provide signficantly improved reliability and maintainability.

This contract is the second production order by the U.S. Navy for modification kits. Six kits were ordered previously and are being delivered by Unisys. The first fleet backfit is scheduled for early 1991 aboard the USS Taylor (FFG-50).

The contract calls for the systems to be delivered between 1992 and 1994. Work on the program will be done at Unisys Shipboard and Ground Systems Group facilities in Great Neck and Ronkonkoma, N.Y. and Waterbury, Conn.

PEABODY, MA (OCT. 11) BUSINESS WIRE - Analogic Corp. (NASDAQ:ALOG), a leading manufacturer of high-precision data conversion and signal processing instruments and equipment, announced Thursday the results for the fourth quarter and the fiscal year ended July 31, 1990.

Revenues for the fourth quarter ended July 31, 1990, were $36,615,000 compared with revenues of $37,825,000 reported for the fourth quarter of the prior fiscal year. Net income for the fourth quarter was $3,190,000, or 22 cents per share, compared with a net income of $2,538,000, or 17 cents per share, for the fourth quarter ended July 31, 1989, an increase of 26 percent.

Revenues for the fiscal year ended July 31, 1990, were $143,556,000, compared with $137,411,000 for the same period a year ago, an increase of 4 percent, before the inclusion of the $7,513,000 gain resulting from the sale, during the first quarter of fiscal year 1989, of the remaining interest in the joint venture, Medical Electronics Laboratories Inc.

Net income for the fiscal year was $12,431,000, or 85 cents per share, compared with net income of $9,918,000, or 67 cents per share for the same period a year ago, an increase of 25 percent, before the inclusion of the $4.6

million gain resulting from sale of the aforementioned joint venture interest.

HAUPPAUGE, NY (OCT. 11) BUSINESS WIRE - JACO ELECTRONICS, INC. (NASDAQ/NMS Symbol: JACO) Thursday announced results for the year ended June 30.

For fiscal 1990, net sales increased 28 percent to $79,947,355 from $62,577,899 in fiscal 1989. Net earnings were $246,251, or $0.15 per share, as compared to $1,141,249, or $0.78 per share, last year.

Commenting on fiscal 1990 year end results, Joel H. Girsky, chairman and chief executive officer of JACO ELECTRONICS, INC., said, ''While Quality Components, our latest acquisition, was not profitable during the year, the subsidiary has proven advantageous to JACO through the addition of new product lines, including subsystem franchises. We anticipate that product expansion and QC's established presence in the Southwest and Southeast will contribute positively to JACO's sales and earnings in fiscal 1991.''

Girsky continued, ''JACO will concentrate on strengthening operating

efficiencies, thereby improving fiscal 1991 earnings. We remain committed to delivering quality services to our customers and are confident that revenue growth will continue as we expand our market share.''

JACO ELECTRONICS, INC., founded in 1961, distributes electronic components and electromechanical devices, such as capacitors, semiconductors, relays, fractional horsepower electric motors, resistors and electronic sub-systems, for use in commercial, industrial, aerospace and defense applications. JACO represents over 115 electronics manufacturers, selling nationally through its own sales force and independent representatives to over 10,000 customers.

CONCORD, NH (OCT. 11) BUSINESS WIRE - New Hampshire Savings Bank Corp. (NASDAQ:NHSB) Thursday announced that the board of directors has elected Lawrence Connell, most recently president and chief executive officer of San Jacinto Savings Assoc. of Houston, as chief chairman and chief executive officer of the company.

Connell succeeds Joseph J. Butare Jr. who resigned his position with the company effective Aug. 31, 1990.

Connell, 54, has enjoyed a rich and varied career in banking, government and law. Since 1985, when he became a partner in the law firm of Prather Seeger Doolittle & Farmer of Washington, he has counselled financial institutions on strategic, operational and regulatory issues.

During this time he has also served as chief executive officer of three thrifts in Texas -- Commodore Savings Assoc. of Dallas, United Savings Assoc. of Houston and San Jacinto Savings Assoc. of Houston -- where he conceived and executed restructurings and reorganizations preparatory to transfers of ownership and management.

Between 1983 and 1985 he served as president and chief operating officer of Washington Mutual Savings Bank of Seattle, successfully reorganizing this publicly-owned thrift with assets of $4.0 billion.

New Hampshire Savings Bank Corp., headquartered in Concord, the capital of New Hampshire, is the fourth largest bank holding company in the state with assets of $1.3 billion divided among four banking affiliates, with deposits insured by the FDIC to the maximum extent permitted by law, and three nonbanking subsidiaries which together serve individuals, corporations and municipalities throughout central and southern New Hampshire.

TEMPE, Ariz. (OCT. 11) BUSINESS WIRE - The common stock of FCS Laboratories Inc. (the ''Company''; FCSIC) was deleted from the National Association of Securities Dealers Automated Quotation (NASDAQ) system effective Oct. 2.

The company's stock had continued to be included for quotation on the NASDAQ

system via a temporary exception from the NASD's Capital and Surplus requirement. This temporary exception was granted subject to the company meeting certain conditions. The exception period having expired before the conditions were met, and an extension not being granted, the company's securities were deleted.

While the securities continue to be quoted in the over-the-counter market, the company is continuing its efforts to meet the referenced conditions and is also investigating alternative listing possibilities.

FCS Laboratories Inc. is a healthcare company engaged in serving the general practice physician and veterinarian with diagnostic and therapeutic products for various diseases, including allergy.

NEW YORK (OCT. 11) BUSINESS WIRE - Ogden Corp. announced Thursday that its board of directors has authorized a plan to repurchase up to 2 million shares of its common stock from time to time in the open market.

The shares to be repurchased will be held in treasury and available for use in connection with employee benefit programs or other general corporate purposes.

R. Richard Ablon, president and chief executive officer of Ogden, stated that the repurchase plan demonstrates the board's belief that Ogden's current common stock price does not reflect Ogden's recession-resistant growth potential.

Ogden Corp. is a diversified services company that offers aviation, entertainment, environmental and energy consulting, industrial and remote site technical services, and through its subsidiary, Ogden Projects, builds and operates waste-to-energy plants.

NEW YORK (OCT. 11) BUSINESS WIRE - The net asset value of Petroluem & Resources Corp. at Sept. 30, 1990 is compared with that a year earlier in the table below.

For the twelve months ended Sept. 30, according to Indata's figures, total return on Petroleum & Resources Corp. net asset value, after adjusting for income dividends as well as the capital gains distribution paid was 11.2 percent.

Comparable figures for the Dow Jones Industrial Average and The Standard & Poor's Index of 500 stocks were -5.6 percent and -9.4 percent, respectively.

For the nine months ended Sept. 30, according to Indata's figures, total return on Petroleum & Resources net asset value, after adjusting for income dividends as well as the capital gains distributions paid in 1990 was 2.7 percent.

Comparable figures for the Dow Jones Industrial Average and the Standard & Poor's Index of 500 stocks were -8.5 percent and -11.2 percent, respectively.

During the three months ended Sept. 30, Petroleum & Resources Corp. added five new names to its portfolio list with the purchases of Columbia Gas System Inc. Dillard Department Stores Inc., TransCanada Pipelines Ltd., Valero Energy Corp. and Waste Management Inc.

An addition was made to the existing portfolio holding of Sonat Inc.

Reductions were made in the holdings of Atlantic Richfield Co., British Petroleum PLC ADR, British Gas PLC ADR, Kimberly-Clark Corp., Lubrizol Corp., Murphy Oil Corp. and Union Texas Petroleum Holdings Inc.

#90284b0803 10/11/1990 ~Business Wire
BLUE BELL, PA (OCT. 11) BUSINESS WIRE - Unisys Corp. Thursday announced several recent orders for its InfoImage document management solutions.

The Unisys InfoImage program, which was launched one year ago today, unites the capabilities of the latest imaging technology with Unisys demonstrated information management expertise. The result is a modular end-user solution that can be readily integrated into the customer's existing information system.

This protects current investments and provides an easy-to-implement methodology for expanding the system as the organization's needs grow.

Unisys announced contracts with the following organizations: -- A3 Studio of Padova, Italy -- Blue Cross/Blue Shield of Michigan -- Jefferson County Commission of Birmingham, Ala. -- Officine Galileo of Florence, Italy -- WABCO Westinghouse of Piossasco, Italy -- Wolpoff and Abramson of Rockville, Md.

These InfoImage Folder and InfoImage EDMS (Engineering Document Management System) contracts represent a variety of industry segments. A3 Studio

Based in Padova, Italy, A3 Studio is a service bureau. A3 Studio will use its system to provide backfile conversion services to other InfoImage EDMS users.

This service will be very valuable for the many companies who have large volumes of hard-copy documents to be entered into a document imaging system, as it gives these users maximum flexibility in matching system size and peripherals to their long-term needs. Blue Cross/Blue Shield of Michigan

The second largest Blue Cross/Blue Shield insurance organization in the U.S., Blue Cross/Blue Shield of Michigan will use the InfoImage Folder system to assist in its facility utilization review process. Blue Cross/Blue Shield of Michigan monitors the performance of member hospitals.

This information feeds into the pre-certification process and is used to determine reimbursement levels. Implementation of the InfoImage Folder system is expected to increase the accuracy and productivity of the facility utilization review staff and to increase the efficiency of the pre-certification process. Jefferson County Commission of Birmingham, Ala.

Within the Jefferson County Commission, the Probate Court will be the first department to implement a comprehensive imaging system. The Probate Court records and stores legal documents such as deeds, titles, liens, veterans' discharge notices, and marriage licenses.

The court also hears cases that may involve these documents. The Probate Court will use the InfoImage Folder system to improve its document storage and retrieval capabilities, electronically ''capturing'' 200 index books that reference documents recorded in more than 5000 Probate books dating back to 1812.

Ultimately, they will capture the 5000 Probate books. The Probate Court will also be capturing its ''over-the-counter'' work, which amounts to approximately 1,300 pages per day. Officine Galileo

Based in Florence, Italy, Officine Galileo is a manufacturer of complex optical systems for defense applications. The company will use InfoImage EDMS to archive technical documents that are currently stored on paper or aperture cards, and will integrate the system into its design automation framework. WABCO Westinghouse

Located in Piossasco, Italy, WABCO Westinghouse will install a pilot InfoImage EDMS system. A manufacturer of railway signals, WABCO Westinghouse will use the system to archive and manage its technical documentation, and will integrate the system with its existing data management system. Wolpoff and Abramson

Wolpoff and Abramson, a credit collection agency in Rockville, Md., has a client base that ranges from individual doctors to retailing giants. The agency plans to use InfoImage Folder to scan various documents received from its clients and to make these documents available on-line to its credit

collection analysts.

Wolpoff and Abramson expects the system to dramatically improve the effectiveness of its collection efforts and to significantly increase its throughput of cases.

MIAMI (OCT. 11) BUSINESS WIRE - The unique participation of viewers in the programming of The Jukebox Network, America's first and only viewer programmed network, has encouraged The Jukebox Network to increase its efforts in its unique Customer Service department.

Eastern Airlines veteran Lois Schmatz has been named Manager of Customer Service and the department's duties have been expanded to include daily viewer research studies and supervision of 1-800-ASK-JUKE, the network's 24 hour toll-free viewer assistance service.

Since her appointment, Schmatz has more than doubled the staff assigned to Customer Service and has just completed an extensive survey of over 1000 viewer/customers of The Jukebox Network.

This research aids the network's programming department in offering a more targeted menu of music videos for viewer selection and in reporting to record labels the overwhelming popularity of The Jukebox Network with music buyers.

''The Customer Service issue is as important to VJN as it is to cable operators. We believe that the long-term success of The Jukebox Network depends on our ability to satisfy our viewers,'' says Andrew H. Orgel, VJN president and chief executive officer.

''The customer service department is integral to The Jukebox Network because as a trasactional service, we rely on each phone call and the resulting video to please our programmers - the viewers.''

''The Jukebox Network's Customer Service department is becoming more of a marketing arm of the Comapny, allowing us to know what our customers want so we can supply it,'' says Schmatz. ''Approximately 60 percent of our incoming toll-free calls are music suggestions or inquiries. 1-800-ASK-JUKE works more like a big suggestion box, allowing viewers to interact even further with their Jukebox.''

Schmatz reports to Cheryl Greene, Vice President-Affiliate Relations and Marketing.

Schmatz joins VJN from Eastern Airlines where she was Account Manager. She was responsible for sales and service to travel agencies, group and convention coordinators and corporate accounts. She has also coordinated and organized trade shows, trips, and seminars for travel professionals.

Video Jukebox Network Inc. is an interactive television company that currently operates 116 units of The Jukebox Network, the leading interactive television network in the country. The Jukebox Network is now available in 29 states and reaches 10 million households.

#90284b0840 10/11/1990 ~Business Wire

CLEVELAND (OCT 11) BUSINESS WIRE - October 11, 1990 -- NACCO Industries, Inc. (NC-NYSE) announced today the completion of the previously announced merger of its Proctor-Silex, Inc. subsidiary with Hamilton Beach Inc., a subsidiary of Glen Dimplex of the Republic of Ireland. The definitive agreement between the parties provides that upon completion of the merger the combined company, to be known as Hamilton Beach/Proctor-Silex, Inc., will be owned 80 percent by NACCO and 20 percent by Glen Dimplex.

Arnold H. Dreyfuss, chairman and chief executive officer of Proctor-Silex, has been named chairman and chief executive officer of the combined company, and William A. Parks, president of Hamilton Beach, will become executive vice president-Hamilton Beach of the combined company. The new company will be headquartered in Richmond, Virginia, and is expected to have combined annual sales of approximately $350,000,000.

Ward Smith, chairman and chief executive officer of NACCO Industries, said, ''We are very pleased to have Hamilton Beach join Proctor-Silex as a part of NACCO Industries. Both companies have a strong history of quality products in the small appliance business. We are excited about the increased opportunities presented by this new business combination and we are looking forward to our association with our colleagues at Glen Dimplex.''

Alfred M. Rankin, Jr., president and chief operating officer of NACCO Industries, stated, ''This merger creates an outstanding opportunity to strengthen our position in a highly competitive market. The excellent product fit gives the new company a much broader product line. In addition, the combination provides the ability to achieve significant operating savings. We intend to maintain the individual trade names, inasmuch as both the Hamilton Beach and Proctor-Silex brands have substantial consumer recognition and acceptance.''

Hamilton Beach, which was acquired by Glen Dimplex in 1985, produces small electric appliances that are largely motor driven such as blenders, food processors, mixers and knives. It operates two plants in North Carolina, at Clinton and Washington. Glen Dimplex, a corporation organized under the laws of the Republic of Ireland, designs, manufactures and markets kitchen and other household appliances throughout the European Community.

Proctor-Silex, headquartered in Richmond, Virginia, was acquired by NACCO

Industries in 1988. Proctor-Silex produces small electric appliances that are largely heat generating such as toasters, irons, coffeemakers and toaster ovens. It also operates two plants in North Carolina, at Southern Pines and Mt. Airy, and a manufacturing facility in Juarez, Mexico.

NACCO Industries is a holding company that has two other major operating subsidiaries in addition to Hamilton Beach/Proctor-Silex. Hyster-Yale Materials Handling, Inc. designs, manufactures and markets forklift trucks and related service parts under the Hyster and Yale trade names. The North American Coal Corporation mines and markets coal for use primarily as fuel in power generation by electric utilities.

#90284b0850 10/11/1990 ~Business Wire

FORT WORTH, TX (OCT. 11) BUSINESS WIRE - Burlington Northern Inc.'s (NYSE:BNI) board of directors Thursday elected Gerald Grinstein chairman, succeeding Richard M. Bressler, who retired from the board.

Grinstein, 58, is president and chief executive officer of Burlington Northern parent of Burlington Northern Railroad. He joined BN's board in 1985 when he was chief executive officer of Western Air Lines. In 1987 Grinstein was elected vice chairman and he became president and CEO in early 1989.

A graduate of Yale and Harvard Law School, Grinstein is a former partner in the law firm of Preston, Thorgrimson, Ellis & Holman in Seattle. In 1958 he became counsel to a Senate subcommittee and from 1963 to 1967 he was chief counsel to the Senate Commerce Committee. From 1967 to 1969 Grinstein was administrative assistant to Sen. Warren G. Magnuson of Washington.

Bressler, 60, had been chairman of Burlington Northern since 1982. He joined BN in 1980 as president and chief executive officer after holding executive positions at General Electric, American Airlines and Atlantic Richfield Co.

Under Bressler's leadership, BN changed from being primarily a railroad to a corporation with broader interests including businesses related to natural resources. In 1981 the subsidiaries Milestone Petroleum and Meridian Land & Mineral Co. were formed. Another subsidiary, Glacier Park Co., was reorganized to focus on commercial development of BN real estate.

BN began to increase its business in timberland management and forest-products manufacturing and in 1983 both businesses were merged into Plum Creek Timber Co.

In 1983 Burlington Northern acquired The El Paso Co. and entered the natural gas transmission business. At the end of 1984, BN's oil and natural gas exploration and production activities were combined with those of The El Paso Co. to form a subsidiary called Meridian Oil. In 1985, BN acquired Southland Royalty Co., which bolstered the oil and gas operations.

In the meantime, cost control, efficiency and improved service in the railroad operation were emphasized and the rail system was upgraded. In 1988 Burlington Resources Inc. was created as a holding company for BN's natural resource operations. On Dec. 31, 1988, Burlington Resources was spun off from Burlington Northern, leaving BN with one principal subsidiary, the railroad.

Bressler also was chairman of Burlington Resources. On Wednesday he retired from the chairmanship but he remains on the board.

HAUPPAUGE, N.Y. (OCT. 11) BUSINESS WIRE - William G. Mustain, president and CEO of Comdial Corp. (NASDAQ Symbol: CMDL) and Richard J. Riccoboni, chairman and CEO of Eagle Telephonics Inc. (OTC) announced Thursday the signing of a letter of intent to merge Eagle into Comdial.

Under the terms of the proposed merger, Eagle would merge into a wholly owned subsidiary of Comdial. At the effective time of the merger, Eagle shareholders would receive Comdial Common Stock (or options to purchase Comdial Common Stock, with respect to Eagle option holders) equalling between 20 percent to 22 percent of Comdial's outstanding common stock on a fully diluted basis. The transaction is subject to, among other conditions, the negotiation and execution of a definitive merger agreement, approvals of the boards of directors and shareholders of both companies, an effective registration statement with
respect to the Comdial shares to be issued in connection with the merger, the consents of the lenders of both companies, the termination or modification of certain existing contractual arrangements by Eagle, and Eagle's having not incurred losses in excess of certain specified amounts prior to the merger.

Comdial is a Charlottesville, Virginia-based designer and manufacturer of advanced telephone sets and telephone systems for business use. It is the successor of an organization that has been producing telephones in America since 1894. Comdial currently markets its products primarily through wholesale supply companies. Comdial reported 1989 sales of $81.4 million.

Eagle is located in Hauppague, N.Y. and also designs and manufactures telephone systems. Eagle's products are primarily for use behind Centrex and ''Caller ID'' service, both service offerings of the Regional Bell Telephone Companies. Eagle's major customers are the Regional Bell Operating Companies and the U.S. Government. Eagle reported 1989 sales of $18.1 million.

Mustain and Riccoboni elaborated, ''As a result of substantial discussions over this past year, we recognized considerable potential for synergies in our firms. It is our mutual conviction that the combination of our resources will bring us into a considerably strengthened market position for the future.''

#90284b0854 10/11/1990 ~Business Wire

SOUTHBOROUGH, MA (OCT. 11) BUSINESS WIRE - Bytex Corp. (NASDAQ: BYTX) Thursday reported financial results for its third quarter ended Sept. 30, 1990.

In addition, the company announced the intention of Dr. Steven G. Finn to resign as vice president of business planning and development effective Dec. 31, 1990. Dr. Finn will continue to serve as Bytex's chairman of the board of directors.

A graduate of MIT and one of the three original founders of Bytex in 1980, Dr. Finn was president and chief executive officer of the company until mid-1987 when he spearheaded the search for his successor, Jeffrey S. Goodman, Bytex's current president and chief executive officer.

Looking back on Bytex's first decade, Dr. Finn said, ''I am extremely proud of our accomplishments at Bytex over the past 10 years. We set out to build a successful, high quality company that provides significant benefit and value to our clients. That objective certainly has been met, and much more.''

Continued Finn, ''During the past three years I have worked with Jeff to extend Bytex's market reach and build our staff and technical capabilities to assure the company's future. Looking ahead at my own career, I would now like to evaluate other ventures and explore several opportunities of interest to me. As an active member of the board, my input will still be readily available.''

Total revenue for the 1990 third quarter was $11.3 million, representing a 10 percent increase over the $10.3 million reported for the same quarter in 1989. Year-to-date 1990 total revenues of $31.7 million rose by 13 percent from 1989 year-to-date revenues of $28 million.

Net income of $1.3 million for the third quarter of 1990 increased by 17 percent from the $1.1 million reported a year ago. Year-to-date 1990 net income of $3.2 million rose by 38 percent over year-to-date 1989 net income of $2.3 million.

Earnings per share for the third quarter of 1990 was 20 cents versus third quarter 1989 earnings of 18 cents per share. Year-to-date 1990 EPS was 51 cents versus 40 cents for the corresponding period a year ago.

Commenting on the company's third quarter results, Bytex President and Chief Executive Officer Jeffrey S. Goodman said, ''We are pleased that we are

meeting our 1990 objectives for growth and profitability while continuing to invest heavily in the development of new products. In addition, our balance sheet remains strong, which is important in building for the future.

''In the quarter, international demand increased significantly, but domestic bookings slowed from the first half of the year. The slowdown in domestic business was largely related to delays in capital spending as some companies are taking additional time to scrutinize their capital equipment expenditures.

''Internationally, we experienced a high level of activity in the Pacific rim countries and in Canada. In Europe, we shipped initial orders to the Spanish telecommunications carrier Telefonica as their first step toward automated network control. With the coming of the 1992 Olympics and World's Fair in Spain, we are hopeful for additional business opportunities in that country.

''Thirty percent of total orders received in the third quarter came from new customers, including Telefonica of Spain and Boeing Computer Services. We were also pleased by the contribution of orders comprised of products introduced within the past year.

''We continued to invest heavily in product development. In particular, we have been ramping up investment in our LAN business in order to introduce new products for that high growth market area.

''As for the reminder of 1990, we believe that revenue and earnings will increase from the levels achieved a year ago. We are encouraged by the positive momentum generated by our international business and by significant new customers. At the same time, however, an uncertain U.S. economic outlook causes us to be cautious in our planning for the balance of the year and into 1991.''

Bytex Corp. designs, manufactures and supports fault-tolerant systems and related data communications products which improve the reliability of data communications networks and enhance the ability to manage and control these networks.

The company is the leading supplier worldwide of electronic matrix switches and has recently entered the LAN marketplace with the acquisition of VANCE Systems Inc. of Chantilly, Va., a leader in Token Ring technology.

SOMERVILLE, MA (OCT. 11) BUSINESS WIRE - Central Co-operative Bank (NASDAQ:CEBK) announced Thursday that it has received a Form F-11 report filed by Haymarket Co-operative Bank which states, among other things, that ''Haymarket now intends to propose to the Board of Directors of Central a merger that would combine Central and Haymarket.''

The Form F-11 also states that ''the details of the merger proposal have not yet been determined, but Haymarket expects that the proposal will involve a stock for stock merger of Haymarket into Central that will combine the two banks, their boards of directors and their management teams.'' According to the Form F-11, Haymarket owns 9.9 percent of Central's outstanding stock.

While Central has in the past engaged in informal discussions with Haymarket regarding a potential combination of the two banks, no such discussions, informal or otherwise, are currently ongoing, or have been held in the recent past. Central is, therefore, unable to comment on whether any such discussions will commence, the likelihood of any agreement providing for a combination of the two banks being reached, or the possible terms of any such combination.

BELTSVILLE, MD (OCT. 11) BUSINESS WIRE - John Hanson Savings Bank, F.S.B., Thursday reported net income for the three month period ended Sept. 30, 1990 of $448,000, or 8 cents per share, based on 5,783,564 weighted average number of shares outstanding.

This compares to a reported net income of $2.1 million, or 37 cents per share, based on 5,770,653 weighted average number of shares outstanding, for the three month period ended Sept. 30, 1989.

The fiscal 1991 quarter income includes minimal loan and security sales and is indicative of substantial improvements in John Hanson's normal operating activities over the past year. The difference in net income from the fiscal 1990 quarter compared to the fiscal 1991 quarter is primarily the result of a $2.7 million gain recorded on the sale of approximately $95 million of residential loans and mortgage-backed and U.S. Government securities in the fiscal 1990 quarter.

The Savings Bank is continuing to seek compliance with the capital requirements established by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA). FIRREA established required capital levels to be: tangible capital of 1.5 percent of adjusted total assets, core capital of 3.0 percent of adjusted total assets and risk based capital of 6.4 percent of risk weighted assets.

At Sept. 30, 1990, John Hanson Savings Bank's ratios were 1.53 percent, 2.31 percent and approximately 4.0 percent, respectively.

At Sept. 30, 1990, the Savings Bank's total assets, total deposits and stockholders' equity were, $874.6 million, $697.8 million and $21.4 million, respectively. This compares to total assets of $904.1 million, total deposits of $704.3 million and stockholder's equity of $31.0 million for the period ended Sept. 30, 1989.

Comparable levels at June 30, 1990, the Savings Bank's fiscal year-end were $887.6 million, $685.0 million and $21.0 million respectively.

John Hanson Savings Bank, F.S.B., has 15 branch offices and is headquartered in Beltsville. The bank's stock is traded on the National Association of Securties Dealers' Automated Quotation (NASDAQ) National Market System under the symbol ''JHSL.''

RICHMOND, VA (OCT. 11) BUSINESS WIRE - James River Corp. (NYSE: JR) Thursday announced that as part of a management transition plan, Chairman and Chief Executive Officer Brenton S. Halsey will relinquish the title of chief executive officer and that the board of directors has elected Robert C. Williams, currently president and chief operating officer, to the position of president and chief executive officer, both effective Nov. 1.

Halsey will continue as chairman of the board and chairman of the executive committee, will oversee the divestitures related to the recently announced restructuring plan to their completion and will continue to directly oversee James River's European joint ventures. The transition plan is in anticipation of Halsey's formal retirement in April of 1992.

Halsey, the company's first chief executive officer, and Williams, the company's first chief operating officer, co-founded James River Corp. in 1969 by way of an initial acquisition with annual sales of $4 million and, through internal growth and approximately 40 acquisitions over 21 years, have grown the company to $6 billion in consolidated sales last year and an additional unconsolidated overseas sales of $1.8 billion.

James River Corp. was ranked as the 81st largest U.S. industrial corporation last year.

NEW YORK (OCT. 11) BUSINESS WIRE - AmBase Corp. (NYSE:ABC) Thursday announced that an investor group had filed a Form A statement with the New Hampshire Department of Insurance regarding a possible acquisition of control of The Home Insurance Company.

The investor group filing the statement included Sequoia Associates, White Mountain Partners and Whitman Heffernan Rhein & Co. This group had previously submitted bids for The Home and 50.1 percent of AmBase.

The statement said the Sequoia Group was examining their options for proposing alternatives to the sale and evaluating their position with respect to the solicitation of proxies in opposition to the sale. The group also said they were filing the statement to expedite the N.H. Department's review of any transaction they may propose with respect to The Home or AmBase, but said there was no assurance any proposal would be made.

As previously announced, on Oct. 1, the AmBase board of directors approved the sale of The Home Insurance Company for $970 million to an investor group headed by Trygg-Hansa Holding AB, Vik Brothers International USA Inc., International Insurance Advisors Inc., and Donaldson, Lufkin and Jenrette. This transaction is subject to due diligence, stockholder approval, financing and regulatory approvals.

The company said it is continuing to work to complete the Trygg-Hansa/Vik transaction as soon as possible. AmBase also said it had retained

Prudential-Bache Capital Funding to advise management on formulating a restructuring plan for the company.

TUPELO, MI (OCT. 11) BUSINESS WIRE - Bancorp of Mississippi Inc. (NASDAQ/NMS:BOMS) Thursday reported that net income for the quarter ended Sept. 30, 1990, amounted to $3,844,000 compared to $3,186,000 for 1989, an increase of 20.7 percent.

On a per share basis, primary net income for the third quarter amounted to 81 cents in 1990 compared to 66 cents in 1989, an increase of 22.7 percent, and fully diluted net income for the third quarter amounted to 77 cents in 1990 compared to 64 cents in 1989, an increase of 20.3 percent.

For the nine months ended Sept. 30, 1990, net income totaled $10,419,000 compared to $9,623,000 in 1989, an increase of 8.3 percent. On a per share basis, primary net income amounted to $2.18 in 1990 compared to $2.01 in 1989, an increase of 8.5 percent, and fully diluted net income amounted to $2.09 in 1990 compared to $1.93 in 1989, an increase of 8.3 percent.

At Sept. 30, 1990, total assets amounted to $1.50 billion, an 8.3 percent increase over 1989. Total deposits amounted to $1.31 billion at Sept. 30, 1990, an increase of 6.5 percent over 1989. Loans and lease receivables, net of unearned discount, increased 7.4 percent to $933.87 million at Sept. 30, 1990.

At Sept. 30, 1990, common shareholders' equity totaled $101.12 million, which represented a book value of $21.70 per share.

BOMS is the parent company of Bank of Mississippi, which operates 72 branch offices in 32 Mississippi communities. The company's common stock is traded in the NASDAQ National Market System under the trading symbol BOMS.

#90284b0902 10/11/1990 ~Business Wire

IRVINE, Calif. (OCT 11) BUSINESS WIRE - Printronix Inc. (NASDAQ:PTNX), manufacturer of computer printers, Thursday reported a net income of $201,000, or 5 cents per share, on sales of $27,919,000 for the second quarter ended Sept. 28, 1990.

This compares with a net income of $1,237,000, or 30 cents per share, on sales of $31,886,000 for the second quarter of the previous year and net income of $1,005,000, or 26 cents per share, on sales of $29,668,000 for the quarter ended June 29, 1990.

For the six months, the company reported a profit of $1,206,000, or 32 cents per share, on revenue of $57,587,000 compared with a profit of $630,000, or 15 cents per share, on revenue of $61,136,000 for the first six months of fiscal 1990.

The Sept. 28, 1990, period ended with no bank debt and cash of $9,512,000 net of purchasing and retiring 287,690 shares, or 8 percent, of Printronix stock over the last six months.

Released backlog as of Sept. 28, 1990, was $14,823,000 compared with $14,577,000 at the end of the previous quarter and $26,896,000 at the end of the second quarter of the previous fiscal year.

The lower sales levels reflect a persistent weakness in the North American

market brought about by a general industry downturn and economic recession. However international markets continue to show steady product orders.

In response to current market conditions, the company continues to implement cost reductions to sustain profitability at lower sales levels.

These productivity improvements, coupled with increased investments in engineering research and development, sales and marketing of new products, will continue with a view toward improving the company's position to weather the recession and promote future growth.

Printronix introduced a number of new products during the past quarter, including the L1016 continuous-form laser printer. Designed for applications which require high-resolution text and graphics, this 16-page-per-minute printer combines 300 dot-per-inch resolution with the applications convenience and data integrity of continuous-form printing.

Also introduced during the quarter was the extra-quiet P3240 matrix line printer. With a sound rating of 52 dBA, this 400 line-per-minute (lpm) printer is 50 percent quieter than other ''quietized'' models which are generally rated at 55 dBA and is the quietest line printer available today.

Printronix, founded in 1974, designs, manufactures and markets a full range of printers for business and industrial applications. Printronix leads the industry as the supplier of printers for rugged industrial applications.

Products include patented matrix line printers for heavy-duty cycle, medium and high-speed printing and plotting; non-impact page printers for shared office applications requiring letter-quality printing and high-resolution graphics; and Intelligent Graphics Processors (IGP) for on-line generation of forms and bar code labels.

The company's products are marketed worldwide to original equipment manufacturers (OEMs), value-added resellers (VARs) and through a network of exclusive full-service distributors.

#90284b0908 10/11/1990 ~Business Wire
WASHINGTON (OCT 11) BUSINESS WIRE - Arms control groups representing scientists, physicians, lawyers and other professionals Thursday called for cutting off Northrop Corp. (NYSE:NOC) from defense dollars for two years.

The professionals' groups said it is past time to take away Northrop's contracts, responding to an Air Force review finding serious problems in every system that the Los Angeles-based firm produces and previous recommendations

by House investigators and the Justice Department that Northrop be debarred for corruption and shoddy work.

''Northrop is the target of at least seven grand jury probes and 11 criminal investigations,'' said Dr. Robert K. Musil, executive director of the Professionals Coalition for Nuclear Arms Control. The House Subcommittee on Oversight and Investigations called in July for debarring Northrop. ''Yet, amazingly, the Pentagon continues business as usual with Northrop,'' Musil said.

''This is a flagrant example of government spending gone wrong,'' he said.

''The message this sends to Northrop, Congress and the American taxpayers could not be more destructive,'' added Kevin Knobloch, Union of Concerned Scientists legislative director. ''The questions really need to be asked: Has Northrop's shoddy management contributed to the B-2's enormous cost? And will it contribute to enormous cost overruns in the future?'' Knobloch said.

Air Force Secretary Donald B. Rice Thursday was called before the Senate Armed Services Committee to answer senators' concerns about Northrop. The arms control groups termed Rice's testimony a ''whitewash'' of the Air Force's own criticisms and noted the Pentagon has not allowed out any written report of the review's findings.

The professionals' groups singled out the B-2 ''Stealth'' bomber, on which Northrop has allegedly falsified test data, covered up cost overruns and attempted to double-charge taxpayers by $2 billion, as the most obvious example of Northrop abuse of its close relationship with the Pentagon.

''This should be budget-cutters' No. 1 target in seeking responsible cuts in the defense budget during the post-Cold War, deficit-plagued 90s,'' said John Isaacs, legislative director for the Council for a Livable World.

''As our defense budgets decline, it is important to establish the principle that inefficient and corrupt manufacturers should not continue in the defense business. We have less money to waste,'' Isaacs said. At $871 million each, B-2 bombers would cost approximately 1.4 times their weight in gold.

Isaacs added, ''We should consider this bomber a litmus test of whether Congress can be fiscally prudent. It's time to kick Northrop out of the defense business.''

As even Rice admitted, Northrop has failed to meet what he called ''management challenges'' as it more than tripled its sales volume since the early 80s and has grown from mainly a subcontractor to prime contractor on several large systems.

They include the MX missile guidance system, AV-8B Harrier fighter-bombers,

Tacit Rainbow air-launched cruise missiles and F/A-18 fighters as well as the B-2 bomber. Groups calling for debarring Northrop include Council for a Livable World (MIT and Harvard scientists are among the board members), the Professionals' Coalition for Nuclear Arms Control (representing doctors, lawyers, scientists, architects, designers, planners and psychologists), Physicians for Social Responsibility and the Union of Concerned Scientists.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (OCT. 11) COMTEX - Congress has received yet another warning that the nation's bank deposit insurance fund faces further depletions which could threaten its solvency.

Rep. Frank Annunzio (D-Ill.) announced yesterday that the Office of Management and Budget calculated in the budget summit agreement that the Federal Deposit Insurance Corp's bank insurance fund will lose $6.1 billion over the next three fiscal years. Prior to the budget summit, the OMB was predicting the bank insurance fund would post a $600 million surplus over the same period.

Last month the General Accounting Office and Congressional Budget Office released reports affirming the bank insurance fund is under severe stress. The GAO said a recession or single large bank failure could be enough to deplete the fund and the CBO forecast the FDIC will spend $30 billion to $35 billion through 1993 to pay for an additional 631 bank failures.

From 1987 through 1989, the deposit insurance fund fell 28 percent from $18.3 billion to $13.2 billion following a record number of post-Depression bank failures. At the end of 1989, the FDIC fund's ratio of reserves to deposits fell to an historical low of 70 cents per $100 of deposits.

FDIC Chairman L. William Seidman recently projected the cost of bank failures to the insurance fund will jump from $2 billion to $3 billion in 1990.

The OMB forecasts the bank insurance fund reserves will fall to $5.3 billion by 1993, or only 22 cents for every $100 of insured deposits. The FDIC's targeted minimum reserve ratio is $1.25 per $100 of deposits.

The FDIC recently voted to raise the rate it charges member banks from 12.5 cents per $100 of deposits to 19.5 cents per $100 in the next fiscal year, the maximum amount allowable under present law.

Lawmakers, fearing another savings and loan debacle, have taken action to allow the FDIC a free reign to boost the premiums it charges banks to keep the bank insurance fund at safe levels. The House has passed such a bill and the Senate Banking Committee is scheduled to mark-up similar legislation tomorrow.

The downside to raising bank premiums is this could hurt many small, healthy banks operating on low profit margins, threatening the viability of additional institutions.

Rep. Annunzio has introduced legislation which would require banks to put an amount equal to one percent of their deposits into the bank insurance fund, which he says would raise $25 billion for the fund.

The American Bankers Assocation believes Annunzio's proposal is misguided.

"We feel that the problems associated with the deposit insurance system need to be addressed from another direction than the funding aspect," said Mark Burneko, an ABA spokesman. "This doesn't go to the core of the problem which is the policy, de-facto or otherwise, that protects the nation's largest financial institutions from failure."

WASHINGTON (OCT. 11) COMTEX - Buffelsfontein Gold Mining Co. Ltd. (TICKER: BFEL) filed its annual report with the NASD showing it earned 104.64 million South African rand, or 622 cents per share, on revenues of 917.14 million rand for the fiscal year ended June 30, 1990.

This compares with earnings of 166.55 million rand, or 541 cents per share, on revenues of 922.89 million rand in fiscal 1989.

-30- 572
#90284c0053 10/11/1990 ~Comtex
WASHINGTON (OCT. 11) COMTEX - The 8-K report filed at the SEC shows on Oct. 2 1990, Cellular Communications Inc.(TICKER: COMM) announced its board of directors and Pacific Telesis Group (TICKER: PAC) agreed to certain amendments to a merger agreement announced on July 25, 1990.

The amendments will provide that the private market value appraisal process for Cellular Communications will begin five years from closing and end no later than six years from closing.

Should significant adverse economic conditions exist at the initial fifth year appraisal date, Cellular Communications can defer the process for an additional six months.

This represents a change from the 5 1/2 to 8 year period in the original agreement.

In addition, the amendments will provide that Cellular Communications may not take any action that would result in a waiver of Telesis' "make-whole" payment of obligations to Cellular Communications' shareholders without the approval of Cellular Communications' shareholders.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 2

GROUP LED BY R.A. SAMANS OWNS 1,238,555 SHARES (38.90%) OF SCANFORMS INC (TICKER: SCFM) OF BRISTOL, PA.

ANNOUNCEMENT:

On Sept. 14, 1990, the company removed Mr. Morris as the chairman of the board and treasurer and replaced him with Samans. Morris filed a complaint in US District Court against R.A. Samans and Mr. Carcioppolo on Sept. 20, 1990 alleging various breaches of fiduciary duty. On Sept. 23, 1990, the court in the New York Action granted the motion of Carcioppolo and Samans and the members to dismiss the causes of action relating to the alleged right of first refusal, tortious interfering by Samans with the alleged contractual right and breach by Carcioppolo of his alleged fiduciary duty to Morris and aiding and abetting by the other defendants of such breach of fiduciary duty. The remaining claims, relating to the Cybermatics indemnification and stock sale, remain in effect. As a result of the dismissal of claims relating to the proposed sale of Carcioppolo's company stock, the court vacated the Sept. 5 order and denied Moriss' motion for a preliminary injunction. On Sept. 27, 1990, the company and Samans filed a complaint against Moriss which alleged, among other things, that the sale of Carcioppolo's shares to the members was of material interest and benefit to the company due to Levine's background and expertise as a financial consultant to businesses allied to the business of the company. The complaint seeks preliminary and permanent injunctive relief against Moriss. The company and Samans then filed a motion to dismiss the Federal Action. On Oct. 2, 1990, Carciopolo sold and delivered to the members

600,000 shares of the company's shares pursuant to the purchase agreement dated Sept. 5, 1990. At a special meeting on Oct. 2, 1990, the board elected Levine and Seidman to the board and adopted a resolution that, in connection with the next annual meeting, the board will be reduced from five to four members. Samans entered into an option agreement that allows him to purchase 250,620 shares for $,75 per share from Carcioppolo. The board also approved an employment agreement for Samans and a consulting agreement with Levine as well as appointing Bleakley, Platt & Schmidt as special consultant to the company in connection with matters relating to mergers and acquisitions.

SEC - AMENDMENT NUMBER: 1

ANNOUNCEMENT:

On Oct. 10, 1990, the Southerland/Rosenstein Group filed a supplemental and amended counterclaim and third party claim for injunctive relief in a Texas District Court. The counterclaim alleges the company engaged in false and misleading communications with shareholders and asks for an injunction prohibiting future securities and proxy law violations and mandating corrective disclosure.

PARIS (OCT 11) - French direct foreign investments have tripled since 1986, to reach 115.2 billion francs (now about 22 billion dollars) last year, according to a study by the finance ministry released here this week.

While such direct foreign investment was on the order of 20 billion francs a year from 1981 to 1985, the improvement that then took place in French companies' financial situation led to higher investment by French business, both in the country and abroad, the study says. Direct foreign investment hit 36.2 billion francs as early as 1986.

Physical investments by companies in France in value terms rose by 10 per cent a year in 1987-89, against an average of 47 percent a year for their foreign investments, the ministry notes.

The surge reflected an increasing trend to internationalization, restructuring and concentration of production facilities on a world scale.

Since 1986, such investments have been concentrated in the Organization for

Economic Cooperation and Development (OECD) area, particularly in the European Economic Community (EEC), as it moves toward a unified market.

In 1988, investments in the OECD area accounted for almost 96 percent of French direct investment abroad, with investments in the EEC representing two-thirds of that amount.

The investments in Europe relate primarily to the services sector, such as banking and insurance (80.4 percent of 1988 investments). This is due to the liberalization of financial operations within the Community in connection with completion of the unified domestic market.

The United States attracted a fourth of French direct foreign investment in 1988, 45.5 percent of the French manufacturing sector's foreign investments and 9.2 percent of the services sector's.

WASHINGTON, (OCT. 11) - During his three-day visit to Moscow next week, Secretary of State Dick Cheney will again request Soviet intelligence on Iraq's defensive firepower, a Pentagon official said Thursday.

The official said the Soviets had not met previous U.S. requests for detailed information on Iraq's mostly Soviet-made military hardware, responding instead with generalities on Iraqi intentions in Kuwait.

Mr. Cheney will meet with Soviet President Mikhail Gorbachev, Foreign Minister Eduard Shevardnadze, and his Soviet counterpart Dimitri Yazov during his October 17-18 Moscow visit.

KGB chief Vladimir Kryuchkov said last month during an interview in Moscow that he was ready to share secret information on Iraq with the United States, but never made the offer official.

Nearly all the estimated 3,500 tanks and most of the combat aircraft deployed in southern Iraq and Kuwait since Iraq invaded Kuwait August 2 are Soviet made said the Pentagon official.

Before Moscow, Mr. Cheney will be in London October 13-16, and afterward in Paris October 19-22.

Meanwhile, Soviet deputy foreign minister Vladimir Petrovsky said Thursday at U.N. headquarters in New York that his country has suggested that the U.N. Military Staff Committee meet at its highest level to discuss the Gulf crisis.

The Military Staff Committee -- composed of military officials of the five permanent member nations of the U.N. Security Council -- regularly meets at the

military attache level.

Mr. Petrovsky said that Moscow has suggested that the five -- Britain, China, France, the Soviet Union and the United States -- meet at the armed forces chief of staff level.

The suggestion, he said, was included in a memorandum given to U.N. Secretary General Javier Perez de Cuellar on suggestions to strengthen the U.N. role in crisis management.

BEIRUT (OCT 12) - The Syrian Army deployed tanks and troops around areas controlled by Lebanese Christian chief General Michel Aoun late Thursday, local residents and security sources said.

Gen. Aoun meanwhile called for mobilization of the population within his territory against a possible invasion.

Local residents said Syrian tanks, armoured vehicles, personnel carriers and jeeps were moving toward the frontline southeast of Beirut, facing the presidential palace where Gen. Aoun has his headquarters.

"I am taking this threat seriously. I cannot say that it is a psychological ploy," the Christian leader told Agence France-Presse by telephone.

He said that he did not think the Syrian forces were ready to launch an attack Thursday night, and added that if they intended to do so, they would probably wait until Friday morning.

The troop movements which started at 7 p.m. (1600 GMT) were continuing, local residents said. Syrian Army checkpoints in mainly Moslem west Beirut were left almost unmanned.

Security sources said the army had over the past 24 hours moved tanks, artillery, anti-mine devices and troop reinforcements to the frontline in the mountains southeast of the capital.

The operation follows a call from the Damascus-backed president, Elias Hrawi, for Syrian military aid to help the government extend its control over Lebanese territory, according to government sources.

Gen. Aoun refuses to recognize President Hrawi and controls almost 300 square kilometres (120 square miles) of Christian territory in the Metn region, home to around 500,000 people.

The government has imposed a blockade on the Metn since September 28 to

pressure the general, who has rejected a year-old Arab peace plan for Lebanon because it failed to call for the withdrawal of Syrian troops.

Around 35,000 Syrian troops are deployed in the mainly Moslem portion of the country.

SOFIA (OCT. 11) - Bulgaria's socialist (ex-communist) government on Wednesday submitted a program of economic reform to parliament, warning the shock measures would cause pain.

The project, conceived by economic experts from the U.S. Chamber of Commerce, would abolish most state subsidies and end price controls on more than 40 percent of all goods before the end of the year.

The price of fuel would immediately be aligned with the international market.

Prime Minister Andrei Lukanov, presenting the draft program, warned that its immediate and long-term measures would be "extremely painful."

The government requested a 300-day moratorium on strikes or action which "could destablize the economic and social situation even further."

Before the end of the month, the government is to submit a draft law on foreign investment that will allow foreign commercial banks to open branches in Bulgaria by the end of the year.

Beginning January 1, the Bulgarian currency, the lev, is to have a single rate replacing the three rates currently applied.

Exporters will have the right to buy foreign currency and Bulgarian citizens will be able to deposit foreign currency into personal bank accounts without having to show where the money came from.

A stock exchange should be opened in Sofia towards the middle of next year.

The reform project includes measures to help the most disadvantaged adjust to a market economy, including compensation for the rise in energy and food prices.

"The Bulgarian nation must wake up and accept the reality of the world we live in," Mr. Lukanov told parliament. "We must go ahead with radical reforms and accept the difficulties or else go backwards towards self-destruction or towards a new totalitarianism."

#90284d5920 10/11/1990 ~French/German News Agency
BONN (OCT. 11) - German Foreign Minister Hans-Dietrich Genscher said he favors a 30 percent tax reduction for employers and workers in the former East Germany as an incentive for them to remain in the east, in an interview in Thursday's edition of the Cologne paper Express.

Mr. Genscher said "such fiscal advantages could incite qualified workers to work in the new Laender", meaning the East German states now merged with the west.

Residents of the former East Germany "who would perhaps like to move to the west would remain home with such advantages. They would also more easily accept receiving a smaller salary for the same work" than in the other German states.

Mr. Genscher, who heads the electoral list for the small Free Democrats Party in the first all-German elections in December, felt it was up to the federal government to create such incentives to "attract investments" to the former East German states.

He also felt the incentives should apply to both big and small companies.

Mr. Genscher conceded that differences remain on this question.

While his Free Democrats want to lower taxes, the opposition Social Democrats want to increase taxes, and the Christian Democratic Union of Chancellor Helmut Kohl wants to keep the status quo.

DHAKA (OCT. 11) - At least 640 fishermen were still missing in the Bay of Bengal after a storm that lashed coastal Bangladesh two days ago, press reports said here Thursday.

The official BSS news agency, quoting a top official in southeastern Cox's Bazar district, it was hoped the missing would turn up in two or three days.

Bangladesh Navy ships were searching for them.

Some 500 boats with 5,000 fishermen aboard were missing just after the storm, which left at least 70 people dead.

The worst-hit islands of Swandip and nearby Urir Char were still under two to three feet (60 to 90 centimetres) of sea water, newspapers reported Thursday.

Deltaic Bangladesh is hit by twisters every October and November.

#90284d6170 10/11/1990 ~French/German News Agency
SYDNEY (OCT. 11) - Shares in Rupert Murdoch's News Corp. tumbled to an almost five year low of 5.92 Australian dollars on Thursday due to continued fears about the group's debt.

Debt woes also pushed John Elliott's Elders IXL shares down to a 57-month low and shares in Peter Abeles' transport giant TNT Ltd. dropped to a four-year low.

Brokers said TNT fell 13 cents to 1.55 dollars, its lowest level since 1986, due to fears about its high debt level and price-cutting wars when airline deregulation starts next month. A month ago it was trading at 2.30 dollars.

Higher oil prices from the Gulf crisis also affect the international transport giant, which owns half of domestic carrier Ansett Australia with News Corp.

At one stage News Corp. slipped 58 cents to 5.80 dollars before it recovered. The stock was trading at 11.50 dollars in September.

Brokers said the international media giant was besieged by concern over its debts -- which some estimates place at 10 billion dollars (8.2 billion U.S.) -- in particular its high percentage of short-term borrowings.

Elders fell eight cents to 1.10 dollars, its lowest level since January 1986, on debt woes and doubts its proposed brewing deals would not go ahead.

Elders recently reported a loss of 1.3 billion dollars (1.07 billion U.S.) in the year to June 30.

TOKYO (OCT. 11) - The Japanese Finance Ministry will send inspectors to several European branches of the Sumitomo Bank in a few days' time to investigate the bank's operations in the wake of its lending scandal, ministry sources said Thursday.

The investigation is to be carried out mainly on Sumitomo Bank's loan lendings related with real estate and stock trading by its European branches in London and Paris, the sources said.

Last Sunday, Sumitomo Bank chairman Ichiro Isoda announced his resignation to take responsibility for the arrest of a former branch manager for his illegal lending to stock speculators.

Sumitomo Bank, based in Osaka, is the highest profit-earning bank among the 13

major Japanese commercial banks.

BEIJING (OCT. 11) - The Ministry of Communications has approved eight new shipping berths at two ports in Shandong province, seen as a Chinese gateway for trade with South Korea.

They include two general cargo berths, a mineral ore berth, a fertilizer berth and two timber berths at the port of Yantai and two timber berths at Shijiu, the New China News Agency (NCNA) reported.

Construction at Yantai began in April 1985 and at Shijiu in August 1987.

NCNA did not say if the berths had already gone into operation.

#90284d6500 10/11/1990 ~French/German News Agency
BEIJING (OCT. 11) - Chinese provinces are positioning themselves to benefit from the creation of a major new financial and industrial center in the eastern city of Shanghai.

The Pudong development project, the first phase of which will cost 10 billion dollars, is designed to become the frontier for foreign investment and a motor of the Chinese economy in the next century.

High-level delegations from nearby Jiangsu, Zhejiang, and Shandong provinces as well as from Heilongjiang and Jilin in the northeast have visited Shanghai to negotiate cooperation agreements, the New China News Agency (NCNA) reported.

The 10 provinces though which the Yangtze river flows are also planning to make good use of the waterway by cooperating with Shanghai, which is at the mouth of the river.

China's decade-old open door policy has until now mainly benefitted coastal provinces and those in the south which neighbor economic powers Taiwan and Hong Kong.

More than 70 delegations from local governments and 500 representatives of Chinese enterprises have already negotiated investments in Shanghai high-tech,

petrochemical, banking, construction and textile ventures, NCNA said, but gave no figures for the amount of investment involved.

Pudong, a 350 square kilometer (140 square mile) area, will offer preferential treatment to foreign investors, with the goal of making it a top financial and

industrial center in the Asia-Pacific region.

Some 4,000 foreign businessmen have visited Shanghai in recent months from the United States, Germany, Britain, Switzerland, Japan, South Korea, Hong Kong and Taiwan, NCNA said.

It said that many of the businessmen signed contracts establishing joint ventures or enterprises using 100 per cent foreign funds.

An international finance seminar is to be held from Sunday through Wednesday in Shanghai, presided over by Maurice Greenberg, chairman of American International Insurance.

The seminar will address ways to assure the financial development of Shanghai, China's most populous city.

BANGKOK (OCT. 11) - The United Nations Fund for Drug Abuse Control (UNFDAC) has pledged financial support for a proposed joint Thai-Burmese anti-narcotics programme, a senior UNFDAC official said here Thursday.

UNFDAC field advisor Odd Hallhiam said his organization would give "some million dollars" if such a project was taken up by the two governments.

Mr. Hallhiam said the UNFDAC, which holds a mandate from the United Nations to fight drug abuse worldwide, had in December last year initiated support for joint anti-narcotics activities at the sub-regional level.

The organization made the proposal to Burma's military junta, officially called the State Law and Order Restoration Council (SLORC). This was followed by a meeting of Thai, Burmese and U.N. officials at the UNFDAC headquarters in Vienna in January, Mr. Hallhiam said.

The Thai and Burmese sides decided in Vienna to further discuss the issue and plan to hold another meeting in December this year, before submitting a final detailed proposal to the UNFDAC office here for consideration.

Funding would come "in the context of an agreement by both countries," he said adding that the UNFDAC's assistance would not infringe on the internal political affairs of the countries involved.

Thailand has been listed by the United States' Drug Enforcement Agency (DEA) as the largest "transshipment country" in Southeast Asia, where 80 per cent of the drugs smuggled in from neighbouring Burma and Laos are shipped to Europe and the United States.

#90284d6560 10/11/1990 ~French/German News Agency
JOHANNESBURG (OCT. 11) - The International Monetary Fund (IMF) has nudged international financial markets towards concerted actions to restore South Africa's access to foreign capital, the respected Business Day newspaper said Thursday.

In a report datelined Washington, the newspaper said that this year's confidential IMF staff report on South Africa gave President Frederik de Klerk's reform initiatives and the tight monetary policies of the Reserve Bank unprecedented acclaim.

Prepared for the IMF's executive directors after its annual staff mission to South Africa in June, the report said the government had achieved a "considerable dismantling of the effective system of apartheid".

In a thinly-veiled signal to international capital markets, it called for concerted action to "raise the economy's access to savings, both domestic and foreign," and described as a "matter of urgency" the reversal of international banks' refusal to extend further credit in 1985, the Business Day said.

The IMF said changes currently under way were most encouraging and promised for the first time in decades the opportunity to address fundamental social issues underlying economic weaknesses.

#90284d6580 10/11/1990 ~French/German News Agency
WINDHOEK (OCT. 11) - A car assembly plant is to be established in Namibia with a view to exporting vehicles to South Africa, Namibian Finance Minister Otto Herringel said here Thursday.

Mr. Herringel did not give the name of the company involved, but said it would export cars to other African countries at a later stage.

The plant would be built at Gobabis, 130 kilometres (80 miles) from the Botswana border.

A tarred road linking Gobabis to South Africa's Witwatersrand -- the Johannesburg region -- through Botswana is expected to be completed by 1994.

Mr, Herringel said the Botswana government had started work on its section of the road and the Namibian government would begin construction when the road reached the border.

Business sources told the South African news agency Sapa earlier that a leading French motor manufacturing company had shown interest in investing in

Namibia.

#90284d6630 10/11/1990 ~French/German News Agency
DHAKA (OCT. 11) - The Bangladesh capital Thursday was gripped by an opposition-called half-day strike to protest alleged police brutality and condemn the killing of at least six activists during violent anti-government demonstrations.

An eight-party alliance led by Sheikh Hasina Wajed's Awami League, seven parties dominated by Begum Khaleda Zia's Bangladesh Nationalist Party and the left-leaning five-party alliance of Nirmal Sen called the strike after at least six activists were shot dead.

The six, according to the opposition, were shot by police and scores were injured including Begum Zia during a sit-in demonstration to revitalise an eight-year-old campaign against President Hussain Mohammad Ershad.

The government in a press note published Thursday admitted that five people were killed during the demonstration.

The note said that despite maximum restraint by law enforcing agencies two people were killed by police and 40 members of the security forces were injured. It did not say how the other three died.

The powerful Dhaka University Central Students Union (DUCSU) called a dawn-to-dusk stoppage to protest the killing of one of their fellow students Wednesday during the demonstrations.

Police and para-military forces patroled the streets in trucks and jeeps and some were posted at key city points. A police officer on duty said several thousand police had been deployed to thwart any possible violence.

Except for pedal-driven trishaws, most other vehicles were off the streets and shops were shuttered. Most factories and offices were either shut or operating with skeleton staffs, witnesses and sources said.

Witnesses said small brawls broke out in several parts of the city including Nawabpur and areas close to the volatile Dhaka University.

General Ershad, 60, seized power in a bloodless 1982 coup and has since been opposed by Bangladesh's mainstream opposition groups, who demand his resignation and the holding of free and fair elections under a neutral caretaker government.

The stoppage was also enforced in the southeastern port city of Chittagong where most shops and offices were shut.

Several home-made bombs rocked the city, but there were no immediate reports of other violence, sources said.

#90284d6750 10/11/1990 ~French/German News Agency

SEOUL (OCT. 11) - South Korea, irritated at Japan's reluctance to transfer technology, is now in favor of granting France's high-speed railway system a contract to build one here, press reports said here Thursday.

Seoul's largest circulation daily, Chosun Ilbo, quoted a government source as saying the government was leaning toward the French TGV high-speed train system to link the capital with the southeastern port of Pusan.

"There is a high possibility that the government will opt for the TGV system," the source was quoted as saying.

A European analyst noted however that the report by the pro-government daily coincided with the presence of a Japanese delegation which is here to lobby for the Japanese Shinkansen system.

He added that the article might have been an attempt by the government to apply pressure to the Japanese.

An official of the National Railway declined to comment on the report, but said there was still some time to go before the government is due to select which system to adopt, a decision expected in the first half of next year.

The TGV system has been in fierce competition with the Japanese Shinkansen system for the 5.8-trillion won (8.1 billion-dollar) project to link Seoul with Pusan, 409 kilometers (255 miles) away.

Then French European Affairs Minister Edith Cresson visited here in September to pitch for the TGV system, saying that Paris was prepared to transfer TGV technology to South Korea so that it could manufacture trains and export them to other Asian countries.

Chosun Ilbo said the government was getting irritated at Japan because it was reluctant in technlogy cooperation.

"In contrast, France is winning points because it is active in offering technology transfer," it quoted the government source as saying.

#90284d6760 10/11/1990 ~French/German News Agency

BOURNEMOUTH, ENGLAND (OCT. 11) - British Under Secretary of State for the Environment, Patrick Nicholls, resigned here Wednesday after being indicted for drunken driving while attending the annual Conservative Party congress here.

Mr. Nicholls, 41, was considered one of the Conservative Party's rising stars and ealier this year had launched a government campaign against drunken driving.

He said in a statement that he "was stopped by the police on a routine check, breathalysed, and found to be over the limit" after dining with friends in a Bournemouth restaurant overnight Wednesday.

He said he deeply regretted "the distress and embarrassment I have caused my family, the Government, and my constituency association. The blame is entirely my own."

Prime Minister Margaret Thatcher immediately accepted his resignation.

Mr. Nicholls has been a member of parliament for Teignbridge, Devon, since 1983.

His statement said that at his request one of his friends "had arranged for a car to take me to where I was staying in Portsmouth," he said.

"When the taxi picked us up the driver tried to increase the price far beyond what had been previously agreed. I was not prepared to see my friend treated in this way, and feeling perfectly sober I said I would drive myself."

He said his behaviour had been "foolish in the extreme. Any responsible member of society should know better".

Mr. Nicholls was educated at Redrice College, Andover, Hampshire, and the College of Law at Guildford, Surrey. He married his wife, Bridget, in 1976. He was a steward on the British Boxing Board of Control for two years from 1985.

LAGOS (OCT. 11) - The Nigerian government is planning to ban international air traffic from using its airports between midnight and 5 a.m for reasons of national security, air transport sources said here Thursday.

Most air traffic using Lagos international airport currently passes through at night, and the ban due to take effect October 28 is aimed at better spreading the load, industry sources said.

A special commission is currently studying the proposal.

The move would have a serious effect on the schedules of most of the 25 international airlines serving Lagos, observers said.

KATHMANDU (OCT. 11) - A 17-year-old French student has become the youngest person to conquer 8,848-metre (29,028-foot) Mount Everest, Nepal's Tourism Ministry said Thursday.

Bertrand Roche, from the village of Lanslevillard in the French Alps near Grenoble, reached the world's tallest summit along the eastern pillar route on Sunday with a French expedition.

Roche was climbing with his father, Jean Noel Roche, 41, and Denis Pivot, 61,

both mountain guides, 30-year-old photographer Alain Desez and 31-year-old chemical engineer Rene Debos.

Nearly 300 people have now conquered Mount Everest, the ministry said.

The previous record holder was Nepalese climber Shambhu Tamang, who climbed Mount Everest in 1973 when he was 18 years old.

The 26-member French expedition was led by veteran climber Laurence de la Ferriere, 33, a mountain guide from Chamonix.

PARIS (OCT. 11) - The Banque Nationale de Paris said Thursday its consolidated net profit fell 29.2 percent in the first six months of this year to 993 million francs (190.6 million dollars) from 1.4 billion (269 million dollars).

Gross operating profit was down 16.2 percent on the same period last year to 4.95 billion francs (952 million dollars) from 5.9 billion (1.13 billion dollars).

A six-week strike early in the year led to steeper wage costs and a loss of client operations, and cut some 400 million francs (76.9 million dollars) off the interim result, BNP officials said.

#90284d6900 10/11/1990 ~French/German News Agency

CAIRO (OCT. 11) - Egyptian President Hosni Mubarak suggested Thursday that an international force could be formed to protect holy sites in Jerusalem and denied any link between the Gulf crisis and the Palestinian issue.

Mr. Mubarak was speaking to journalists here in the aftermath of the Israeli police killings of 21 Palestinians near Islamic shrines in east Jerusalem on Monday.

The Egyptian leader expressed his "deep sadness" at the incident and called for the constitution of an international force to protect religious sites in Jerusalem "if the Israeli government is incapable of doing the job."

Iraq immediately after Monday's killings declared that its struggle to rid the Gulf of foreign forces, deployed in response to Baghdad's August 2 invasion of Kuwait, and opposition to Israeli occupation of Palestinian territory were one and the same battle.

There was concern in the West earlier this week that unless the killings were

vigorously denounced by the United States the newly formed anti-Iraqi Arab-Western alliance could fall apart.

At the United Nations, Washington has signalled its support for a draft Security Council resolution condemning Israel.

Mr. Mubarak, a leading Arab critic of the Iraqi invasion, stressed that the Palestinian question "is an Israeli-Palestinian conflict while the Gulf crisis is an inter-Arab problem.

"If we link the two it will mean that we want to settle neither of them."

NEW DELHI (OCT. 11) - Cambodian Prime Minister Hun Sen left for Phnom Penh via Ho Chi Minh City Thursday, ending a five-day official visit to India, the Press Trust of India (PTI) reported.

The Phnom Penh premier was seen off by several West Bengal state ministers from Calcutta where he had gone for a day's tour, PTI said.

Mr. Hun Sen, heading a 16-member delegation, arrived in New Delhi Sunday for official talks with Indian leaders including Prime Minister Vishwanath Pratap Singh and Foreign Minister Inder Kumar Gujral.

The Cambodian prime minister told reporters Tuesday in Delhi that he had conveyed his government's wish to Mr. V.P. Singh for India to play an "enhanced and perhaps a military role" in the proposed United Nations International Control Commission for Cambodia.

It was not known if India has accepted his requests.

New Delhi, which prefers quiet diplomacy in the Cambodian embroglio, is co-chair of a committee set up at the Paris International Conference on Cambodia charged with establishing an international control mechanism for the troubled country.

KUALA LUMPUR (OCT. 11) - The Matsushita Television Co. (M) Bhd., a member of Japan's Matsushita group, on Thursday shipped made-in-Malaysia colour television sets to Japan for the first time, a company spokesman said.

The spokesman said Matsushita Television would initially export 5,000 television sets to Japan by the end of the year.

He said Matsushita Television had been exporting locally-produced color television sets to western Asia, Singapore, Australia and New Zealand since April 1989.

It exported 300,000 sets in the year to March 31 and would raise exports to 500,000 for the current year, the spokesman said.

DUBAI, UNITED ARAB EMIRATES (OCT. 11) - Some 1,800 Indians arrived here from Kuwait Thursday aboard the Indian vessel M.V. Akbar, shipping sources said.

The Akbar was due to sail later in the day for the Iraqi port of Khor al-Zubair to receive new passengers.

Shipping sources told AFP that another Indian evacuation ship, M. V. Tipu Sultan, was Thursday taking on nearly 650 passengers at Khor al-Zubair in preparation for a voyage to India.

Both vessels will proceed from Khor al-Zubair to the Indian port of Cochin in southern Kerala state.

The sources said the Akbar, with 1,860 Indian nationals aboard, had been inspected twice during its voyage here by U.S. and Canadian warships patrolling the Gulf region to enforce United Nations sanctions against Iraq.

There were an estimated 172,000 Indians in Kuwait August 2, when it was invaded and occupied by Iraqi troops, and 10,000 in Iraq itself.

The Indian government on Tuesday announced that it had repatriated 121,000 of its nationals from Iraq and Kuwait since the invasion.

ANKARA (OCT. 11) - Turkey had a record trade deficit of 5.64 billion dollars in the first eight months of this year, almost double the deficit in the same period of 1989, the national statistics institute said Thursday.

Imports during the eight months totaled 13.13 billon dollars against exports of 7.49 billion, the institute said, giving a deficit 99.4 per cent above that for January to August last year.

The state secretariat for the treasury and foreign trade announced Thursday that eight export companies were to lose their special facilities and other privileges designed to encourage export because they had not achieved regulation export targets, the semi-official Anatolie news agency said.

The eight include Nadir Dis Ticaret, which belongs to Turkish Cypriot-born businessman Asil Nadir, chairman and chief executive of troubled British conglomerate Polly Peck.

ATHENS (OCT. 11) - About 20 prisoners in Alikarnassos prison near Heraklion in northern Crete, have occupied the third floor of the building since Tuesday in protest against conditions, prison sources said on Thursday.

The prisoners, who are serving long sentences, have demanded the removal of the prison director Manoli Psaradaki and of some wardens, and have called for modernisation of the prison system.

A unit of the anti-riot force and several dozen police have been stationed in front of the prison.

#90284d7090 10/11/1990 ~French/German News Agency

AMMAN (OCT. 11) - The border separating Iraq and Kuwait is still marked despite Iraq's occupation and annexation of the emirate last month, according to a resident of Kuwait who recently arrived here.

But he said the line has been moved 80 kilometers (50 miles) further south into Kuwaiti territory, encompassing the northern part of Kuwait, now called Sadamiyat al-Moutlaat. Iraqi authorities have declared the region to be under the administration of Basra province.

The area includes the southern part of the Rumalia oil field and the islands of Warba and Bubiyan, which offer Iraq a strategically important outlet on the Gulf.

Kuwaiti territory south of Sadamiyat al-Moutlaat, according to Baghdad, has become Iraq's 19th province under the name Kuwait.

The Kuwaiti resident, an Arab national who had gone to live in the emirate, said Iraqi police and customs officials inspect luggage and ask to see identity papers at the new demarcation line.

Iraqi forces occupied Kuwait August 2 and later announced that it had become part of Iraq according to an "irreversible" presidential decree.

#90284d7100 10/11/1990 ~French/German News Agency

MOSCOW (OCT. 11) - Workers on the Moscow underground system have agreed to call off their first strike since the metro went into operation in the 1930's, the Goudok newspaper said Wednesday.

The strike, which had been due to last two hours Thursday, had been averted after the government acceded to workers' demands, the newspaper said.

Construction workers on the underground system had been calling for assurances of financing next year for new lines and more holidays, assurances which were provided late Tuesday, it added.

#90284d7130 10/11/1990 ~French/German News Agency

AMSTELVEEN, NETHERLANDS (OCT. 11) - Dutch airline KLM said here Thursday it was continuing talks on possibile cooperation with Indonesian airline Garuda.

KLM president Jan de Soet and his successor Peter Bouw, due to take over in January, held talks on the issue with Garuda during a recent visit to Indonesia, a KLM official said.

The two companies had already agreed last year to boost cooperation and from January will increase the number of flights they operate between Amsterdam and the Indonesian holiday island of Bali.

The airlines are also considering developing links for freight transport between the Netherlands and Indonesia.

#90284d7140 10/11/1990 ~French/German News Agency

WOLFSBURG, GERMANY (OCT. 11) - Sales of Volkswagen and Audi cars in Japan are expected to reach 58,000 this year, up from 49,200 in 1989, a spokesman for the German auto maker said here Thursday.

By the mid-1990's, VW-Audi sales in Japan should reach around 100,000 vehicles a year, he added.

The company sold some 28,500 Volkswagens and 13,400 Audis in Japan in the first nine months of this year.

The German group said its sales of these two makes accounted for about a quarter of Japanese private car imports.

-30- 710

#90284d7230 10/11/1990 ~French/German News Agency

CAIRO (OCT. 11) - Egyptians on Thursday began voting in a referendum that will determine whether or not parliament will be dissolved.

The referendum, on which 15 million people are eligible to vote, was organized after a High Court ruling in May that the composition of the present parliament is invalid.

Parliament was last elected in 1987 under new proportional rules under which a voter picked a party's list of candidates. The number of candidates elected reflected the total number of votes secured by the party.

The High Court ruled that the constitution clearly stipulates a system in which voters must pick a specific candidate, and a presidential decree bringing back the old system was issued last week.

A majority vote in favour of dissolving the National Assembly would be followed by a general election within 60 days.

Results of the poll are expected to be announced Friday afternoon, according to the interior ministry.

#90284d7260 10/11/1990 ~French/German News Agency

BRUSSELS (OCT. 11) - Belgium is sending no more troops or military aid to Rwanda, Prime Minister Wilfried Martens told the Senate here on Thursday.

Political analysts said the decision was a move by the centre-left coalition government to distance itself from the Rwandan regime after formally voicing its ''concern'' to the Kigali authorities about perceived lack of respect for human rights in the army's response to an invasion on October 1 by Uganda-based rebels.

However, the 480 Belgian paratroopers already in Rwanda to protect Belgia nationals would ''probably be brought to take new initiatives'' if fighting in the nort-east between governement troops and rebels made it necessary, Mr. Martens said. He stressed that the Belgian soldiers' mission to protect the 1,300 Belgian civilians in Rwanda would be strictly respected.

As ministers met for the second day running to review developments in the former Belgian territory in eastern Africa, government sources said reports of massacres of civilians by the army and other abuses were causing great disquiet here.

It was noted that the despatch of Belgian and French troops had freed the Rwandan military from some routine tasks and enabled it to concentrate on rounding up suspects.

The foreign ministry was at pains to point out that though the Belgian military presence afforded ''a small measure of security'' for the regime of Major-General Juvenal Habybyarimana, ''Operation Green Beans'' as the mission has been named ''in no way constitutes formal support for the regime in Kigali''.

#90284d7530 10/11/1990 ~French/German News Agency
ISTANBUL, TURKEY (OCT. 11) - U.S. military pilots seem more worried about Iraq's French-made Mirage F-1 jets than the Soviet-built MiG planes that form the backbone of the Iraqi Air Force.

"I would say there is more uncertainty in our minds about the Mirage than the Soviet (aircraft). We know less about them," says an American F-16 pilot at Balikesir air base in western Turkey.

Tom Judkins has just landed his plane, the pride of the U.S. Air Force, after carrying out a simulated attack on an enemy air base under the NATO manoeuvres "Display Determination 1990."

Following the end of the Cold War, during which Atlantic Alliance pilots were trained to defeat MiG-23, MiG-29 or Sukhoi aircraft, the Soviet threat has diminished even if it is still taken seriously and a new threat has appeared to the east of Turkey, the only NATO country to have a border with Iraq.

The Gulf is theoretically outside the North Atlantic Treaty Organization's zone of operations, but the Allies would come to the help of Ankara if there were an Iraqi attack.

Asked about how his F-14 would perform against a Mirage, Brian Wild, from the aircraft carrier USS Saratoga, was cautious. "Certainly the French make good

aircraft," he said. But he had never flown the Mirage F-1.

The American pilots do not underestimate the adversary they might find themselves up against within weeks.

Judkins, based near the Iraqi border with Turkey, said Iraq's Air Force "is very good and very well disciplined." And in spite of ultra-modern radars and electronic jamming equipment, he said, the dogfight would remain the basic type of aerial combat which "will be visual ultimately.".

But the U.S. pilots say they are confident. "I am sure the U.S. Air Force is superior," Wild said with a wide grin, his scholarly-looking young navigator agreeing.

Although this annual NATO exercise is meant to consist of "practising tactics" as in previous years, the Gulf crisis is obviously on everybody's mind and in the case of combat, Wild, whose vessel is currently in the eastern Mediterranean, said: "I don't get the feeling that we'd be left out."

The manoeuvres were prepared well before Iraq invaded Kuwait on August 2, but technically they give the impression of being training for a possible operation against Baghdad forces: an amphibious landing on a mined beach, combined air raid on a military airfield or anti-tank air support for ground troops.

In an F-16, the Iraqi border is less than 50 minutes' flight from Balikesir, where waves of American, Turkish and Spanish F-16s, F-18s and F-111s take off and land in tight formation during the exercises.

While they are keeping the "enemy" planes on the ground and carrying out bombing missions, the F-14s from the Saratoga have the job of attacking the stray "enemy" plane that might have managed to take off.

Eight NATO countries -- the U.S., Britain, Turkey, West Germany, France, Italy Portugal and Spain -- have been taking part in the manoeuvres since September 28 in Turkey, northern Italy and the central and eastern Mediterranean.

#90284d7550 10/11/1990 ~French/German News Agency

KOUROU, French Guiana (OCT. 11) - For the third time since resuming flights in July, the Ariane rocket is scheduled to be fired into space Friday carrying two U.S. telecommunications satellites into Earth orbit.

The windows for launching the rocket from its jungle launch pad here fall between 7:57 p.m. and 8:37 p.m. (2257 GMT and 2337 GMT) and between 10:16 p.m. and 10:49 p.m. (0116 and 0149 GMT Saturday).

The most powerful European rocket, the Ariane-44L, will be used for the launch because of the hefty payload of satellites, which together weigh nearly 3,690 kilograms (8,100 pounds).

It will be the fifth time the 44-L has been used, the 39th mission for an Ariane rocket and the 11th for the Ariane 4 series.

The satellites were built by Hughes Aircraft and will be launched on behalf of the Hughes Communications Inc. The SBS-6 is a video telecommunications satellite and the Galaxy 6 is to be used for retransmission of cable and network telecommunications.

Initially set for October 11, the launch was put off for 24 hours to allow "the verification of supplementary measures applied to the pressurization system of the liquid hydrogen tank on the third stage of the rocket," Arianespace said.

The measures were taken following the discovery of a small drop in pressure in the hydrogen tank on the rocket's third stage during the 39th Ariane mission July 24.

The success of the July 24 launch - the first since the failure of an Ariane rocket in February - led to another launch August 31, which also went smoothly.

The February failure halted Ariane launchings for six months, but it apparently has not affected client confidence in the rocket.

Since the start of the year, Arianespace has signed a dozen satellite launch contracts, the latest on September 3 with Embratel, the Brazilian state telecommunications firm, for the launching of the Brasilsat-B1 and B2 satellites.

Arianespace's list of launch orders has risen to 37 satellites, or 50 per cent of the world market, worth about 15.5 billion francs.

#90284d8030 10/11/1990 ~French/German News Agency

PARIS (OCT. 11) - Iraq is not ready to compromise to open the way for a peaceful settlement of the Gulf crisis, French Foreign Minister Roland Dumas said here on Thursday.

France held that "no opportunity should be missed to find a peaceful solution to the Gulf conflict", but Iraq was still not ready to compromise, he said.

"It is true that many initiatives are being made by the international community but we see nothing coming from the Iraqi side. The only echoes which we pick up are negative echoes," he said after addressing the foreign affairs

commission of the national assembly (parliament).

He said that "the weapon of peace remains the embargo" which, he said, had to be strictly applied so that Iraq "feels that there is no weakness on the part of the international community".

He said that he had told the commission that the French military forces in the Gulf region, on land and at sea, were under the orders of French President Francois Mitterrand alone, and that the troops would not automatically go into action if armed conflict started.

"They remain under national command and the chief of the armed forces shall decide on their movements," he said.

Mr. Dumas commended the six French diplomats who were still in Kuwait. He said that they were "very courageous", and said that he had asked them to remain at their posts "for as long as they are able so as to alleviate the misery" of French nationals still in the Emirate.

He said that France would not close the embassy until the diplomats had reached the limits of their endurance, he said.

NICOSIA (OCT. 11) - This week's carnage in Jerusalem proves that Israel must disappear and be replaced by a democratic Palestinian state for both Arabs and Jews, Libyan leader Colonel Moamer Kadhafi said Thursday.

"The Palestinian people and the Arab world will no longer be able to tolerate such ferocious massacres," Col. Kadhafi said.

"Nor will the Jewish state be able to tolerate the revenge that it will have to face ... unless what the world wanted in the first place was to finish with the Jews and created this state for them so that it would become their cemetery."

Col. Kadhafi, quoted by the official Libyan news agency JANA monitored here, was referring to Monday's unrest in east Jerusalem during which Israeli police shot dead 21 Palestinians.

"We do not seek the extinction of the Jews, but further massacres against the Palestinian people would be intolerable for us," he said.

"As a result, the only solution is the disappearance of the Jewish state and the creation of a democratic Palestinian state that would group together Arabs and Jews."

DJIBOUTI (OCT 11) - Djibouti's maritime frontiers with Somalia are to be closed on Friday for an unspecified period, the president's office said on Thursday.

The decision follows the latest in a series of border incidents when 30 armed men, half wearing Somali army uniforms, penetrated eight kilometres (four miles) into Djibouti territory last Sunday.

Army high command said there were exchanges of fire with a Djibouti patrol. There were no casualties.

A formal protest at the "inadmissible" territorial violation was sent to Mogadishu.

Djibouti closed its land borders with its Horn of Africa neighbour in May 1989 because of fighting close by between Somali troops and rebels of the Somali National Movement.

PARIS (OCT 11) - French group Air Liquide, the world's leading maker of industrial gases, said Thursday it was to take control of Portuguese pharmaceuticals concern Lusitafarme.

Full details of the acqusition, through Air Liquide pharmaceuticals subsidiary Lipha, will be announced on October 19, a company spokesman said.

Lusitafarme specialises in cosmetics and pharmaceutical products and made a net profit last year of 150 million escudo (1.09 million dollars) on sales of three billion (21.8 million dollars).

-30- 714

#90284d8500 10/11/1990 ~French/German News Agency

LONDON (OCT. 11) - Silver fell to its lowest level in 13 years in London on Thursday, dragged down by recession fears.

Silver was quoted at 4.385 dollars an ounce at the fixing, against 4.6275 Wednesday and its lowest since August 1977.

Gold was down 3.25 dollars an ounce from Wednesday's close at 388 dollars while platinum was down 4.3 dollars at 432.20.

Silver had been dragged down by the Gulf crisis, which has aggravated prospects of a recession in several industrialised countries, said William Adams, an analyst with Rudolf Wolff.

Heavy liquidation and rumours of sales in the Middle East had pulled prices down, but the market was now somewhat oversold and prices should settle at around 4.00 to 4.25 dollars, he said.

Analysts said platinum was being affected by the same factors as silver because of its industrial use, while gold was suffering a lack of investor interest, particularly in the Middle East.

#90284d8510 10/11/1990 ~French/German News Agency

ISLAMABAD (OCT 11) - Pakistan has agreed to implement the International Nuclear Events Scale (Ines) for a trial period of one year.

An announcement by the country's atomic energy commission here Thursday said the scale had been devised by the International Atomic Energy Agency and the Organisation for Economic Cooperation and Development for use primarily at nuclear power reactors.

Ines defines seven levels of nuclear incidents and accidents, indicating the significance of the events in terms of off-site release of radioactivity, on-site consequences of the events and the degradation of defence-in-depth safety systems, according to the commission.

Pakistan has a small nuclear power station, a research reactor and a secret facility near Islamabad which the U.S.-led Western countries suspect is being used to develop nuclear weapons capability.

Washington has just suspended aid to Pakistan on the suspicion.

SINGAPORE (OCT 11) - A joint chamber of commerce and industry between the Soviet Union and Singapore will be set up shortly, the deputy chief executive officer of the Trade Development Board (TDB) said Thursday.

Lee Ying Cheun said the joint chamber is to be set up in a few months. It will be designed to help entrepreneurs venture into the Soviet Union and other East European countries.

Mr. Lee was speaking at the opening of a two-day conference on "USSR and Eastern European Challenge: Opportunities and Strategies," which was attended by about 200 businessmen and government officials from seven countries.

He disclosed that the setting up of the joint chamber was provided for under a trade protocol signed in Moscow recently. It was signed by a Singapore trade delegation, which was in Moscow ahead of Prime Minister Lee Kuan Yew's visit to the Soviet Union last month.

Mr. Lee said the TDB would continue its ongoing trade promotion programmes in the Soviet Union and East European countries. He disclosed that since 1986 the TDB had sent over 10 trade missions to that region and another delegation was scheduled to go next month.

He added that to further develop trade with Eastern European countries, the TDB had set up an office in Budapest earlier this year.

One of the speakers at the conference, Victor Geraschenko, chairman of the State Bank of Soviet Union, said the bank would introduce a commercial conversion rate of exchange next January, which will peg the Soviet currency at 1.8 roubles to the American dollar.

SINGAPORE (OCT 11) - The oil-rich sultanate of Brunei is committed to rstructuring its oil-based economy and is seeking investment and long-term partnerships based on mutual benefit, a minister said Thursday.

Abdul Rahman Taib, minister of industry and primary resources, said his government would "welcome foreign direct investments from which we can derive mutual benefits" and said the private sector "will play the ultimate role" in the country's economic development.

Mr. Abdul Rahman said Brunei, under the 5th National Development Plan launched in 1986, was working on developing its non-oil industries.

He also noted the increasing economic cooperative links among member countries of the Association of Southeast Asian Nations (ASEAN).

ASEAN groups Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand.

"It is in this light that Brunei Darussalam will embark on the next phase of development," Mr. Abdul Rahman told some 130 participants attending the one-day conference on the opportunities from the diversification of the Brunei economy.

"We are optimistic that there will be greater liberalization of world trade, and for our part, we shall endeavor to continue to provide and improve the environment for investment with emphasis for mutual economic benefits," he said.

MILAN (OCT 11) - Italian merchant bank Mediobanca said here on Thursday that it now holds five percent of the capital of Germany's Continental tire group, which covets Italy's Pirelli Group, and 2.02 percent of French bank Paribas.

Mediobanca's balance sheet for the 1989-90 financial year, released on Thursday, shows that the bank spent 104 billion lire (90 million dollars) for its stake in Continental, and 201 billion lire (174 million dollars) for 1.4 million shares in France's Compagnie Financiere de Paribas.

When Pirelli first expressed its interest in Continental, Mediobanca was mentioned as among the backers of the Italian group. Milan financial circles say that almost 20 percent of the Continental capital has been acquired by Italian businesses.

BERLIN (OCT 11) - Three major west German oil companies have been given authorisation to buy petrol (U.S. gas) stations from Minol, the former East German state monopoly in oil and petrol distribution, Minol president Wolfgang Burkhard said Thursday.

Minol signed cooperation agreements with Aral, AGIP and DEA, after the Bundeskartelamt, the federal competition agency, gave the go-ahead, he told a press conference.

After the sales of some of the 1,200 stations, Minol may keep 500 and manage 300 others with its new German partners, he said.

Modernisation will require investment of tens of millions of Deutsche marks (dollars), he said.

Mr. Burkhard added that Minol would yield a profit in 1990, on the basis of a turnover of five billion marks (3.1 billion dollars) for the second half of the year.

Since the introduction of the Deutsche mark on east German territory last July 1, Minol has no longer had recourse to borrowing and practically paid off all its debts, he said.

Although unemployment threatens many east Germans, none of Minol's 9,000 employees had been made redundant, he said.

By NORBERT SCHNORBACH

TEGUCIGALPA (OCT. 11) - At the marketplace the talk is of the end of the world and not the price of tomatoes.

''Repent and mend thy ways or suffer the wrath of God as Sodom and Gomorrha once did,'' a preacher thunders. With passages from the Bible and threats of divine punishment, the man urges his large audience to join his evangelist sect.

No sooner has he left the marketplace, taking his dire warnings with him, than a new group takes his place.

Accompanied by drums, bells and guitar music, its members sing a halleluja. The message, ''God is love'', is milder than the preceding one but the goal is the same: to win followers.

The shady marketplace of the Honduran capital, which lies directly in front of the cathedral built during the Spanish colonial era, is thick with religious zealots.

Every day several missionaries give a performance. Some of them come with only a Bible, others haul in amplifying equipment to bring their point home with a little more emphasis.

The groups have had considerable success. At least 50 different evangelist groups, most of them from the United States, are thought to be active in Honduras.

They have managed to steal about 750,000 people, or about 15 per cent of the population, away from the Roman Catholic Church, which once had no rivals. The figure is even higher in some neighbouring countries.

Central American has become a hotbed for religious groups ranging from recognised, reputable organisations to a colourful variety of often shadowy sects. The Catholic Church is alarmed.

The evangelistic missionaries, often generously funded by their backers in the United States, have made their way into the most remote villages. Even in the smallest provincial towns, there are often a dozen different religious groups with their churches and temples.

''We have amicable contacts with the large Protestant churches like the Lutherans or Presbyterians,'' says Geraldo Scarpone, the Catholic bishop of Comayagua. ''But the small sects are aggressive and slanderous. They attack us whenever they can and also use political intrigue to harm us.''

According to Honduran sociologist Herman Caliz, ''There is definitely a political reason for the quick spread of sects.'' He said the Catholic Church directs its social teachings primarily at the poor, sometimes takes on the powerful and shelters liberation theologians.

The up-and-coming sects, on the other hand, preach about the afterlife and advocate peace and order - and political abstinence -in earthly things.

And so in the view of the United States - where they originate -as well as of the local rulers, the sects are regarded as innocuous and deserving of support Caliz says.

But Bishop Luis Alonso Santos, of Copan, recently warned of espionage by the sects, which he says have received millions of dollars from U.S. secret services.

''That's why we can see them quickly building new, modern buildings all over the place,'' Santos says, calling the groups ''an advance guard to oppress the people''.

The onetime Guatemalan putsch leader General Efrain Rios Montt -a famous preacher and infamous butcher - is cited as an example. After taking power in a 1982 putsch, he appeared on television every Sunday to preach peace, order, morality and love of country in the name of his sect, the Church of the Word.

At the same time, he was mercilessly annihilating leftist rebels. He had thousands of innocent Indios murdered and hundreds of villages destroyed until he was toppled in 1983.

Since then, Rios Montt has gathered new adherents and hopes to regain power during presidential elections in November.

BRUSSELS (OCT. 11) - Belgium's ambassador has left Iraqi-occupied Kuwait after conditions at the embassy became unacceptable, a Foreign Ministry spokesman said here Thursday.

The departure of the ambassador and his first secretary did not mean the embassy was being officially shut down, said the spokesman, adding ''Belgium continues to recognise the sovereignty of Kuwait and the legimitacy of the government.''

The government of Iraq had made the supply situation at the embassy compound impossible and thereby contravened all the rules of diplomacy, said the spokesman. The two Belgian diplomats have travelled initially to Baghdad.

The closure of the embassy was agreed with the Netherlands and Germany two days ago. France is among the last countries to maintain embassy personnel in the Arab sheikhdom invaded by Iraq August 2.

BEIRUT (OCT. 11) - The Syrian Army reinforced its positions around territory controlled by Lebanese Christian chief General Michel Aoun late Thursday, local residents and security sources said.

Local residents said Syrian tanks, armoured vehicles, troop transports and jeeps were moving toward the frontline southeast of Beirut, facing the presidential palace where Gen. Aoun has his headquarters.

The troop movements which started at 7 p.m. local time (1600 GMT) were continuing, local residents said. Syrian Army checkpoints in mainly Moslem west Beirut were left almost unmanned.

Security sources said the army had over the last 24 hours moved tanks, cannon, anti-mine devices and troop reinforcements to the frontline in the mountains southeast of the capital.

The operation follows a call from the Damascus-backed president, Elias Hrawi, for Syrian military aid to help the government extend its control over Lebanese territory, according to government sources.

Gen. Aoun refuses to recognize President Hrawi and controls almost 300 square kilometres (120 square miles) of Christian territory in the Metn region, home to around 500,000 people.

The government has imposed a blockade on the Metn since September 28 to pressure the general, who has rejected a year-old Arab peace plan for Lebanon because it failed to call for the withdrawal of Syrian troops.

Around 35,000 Syrian troops are deployed in the mainly Moslem region of the country.

Santiago (OCT. 11) EFE - Chile has reduced its foreign debt by more than dlrs three billion in the past five years by offering to buy debt bonds at preferential prices from foreigners who invest in the country, officials said.

Central Bank officials said Wednesday that the scheme has enabled Chile to cancel dlrs 3.4 billion in debt, reducing the country's external obligations since 1985 to dlrs 16.8 billion in July this year.

Under the plan, foreign investors can buy Chilean debt bonds from creditors in international money markets at 70 per cent of their nominal value.

The Chilean government will then buy the bonds from the purchasers at a guaranteed 80 per cent of the nominal value, provided the money is then invested in sectors of the Chilean economy approved by the Central Bank.

Bonds converted into Chilean pesos are directed to invest mainly in the financial sector, followed by communications, transport and industry.

About 57 per cent of the bonds purchased by foreign investors derive from private-sector debt backed by the state, with 30 per cent belonging to the Central Bank.

Analysts say the success of the scheme is due to the economic and political stability that ex-dictator Gen. Augusto Pinochet imposed on the country during his harsh 17-year rule.

The scheme has been continued by Pinochet's successor, democratically-elected President Patrico Aylwin.-EFE

#90284h0006 10/11/1990 ~Chinese News Agency

UNITED NATIONS (OCT. 11) XINHUA - THE U.N. GENERAL ASSEMBLY TODAY UNANIMOUSLY ADOPTED A RESOLUTION DECIDING TO PROVIDE HAITI WITH THE BROADEST POSSIBLE SUPPORT DURING THE GENERAL ELECTIONS OF THE COUNTRY.

THE RESOLUTION REQUESTED THE U.N. SECRETARY-GENERAL TO SEND A NUCLEUS OF SOME 50 OBSERVERS TO HAITI BEFORE THE VOTER REGISTRATION AND KEEP THEM THERE UNTIL THE ELECTIONS.

THE ASSEMBLY MADE THE DECISION IN RESPONSE TO THE REQUEST BY HAITIAN PROVISIONAL PRESIDENT ERTHA PASCAL TROUILLOT IN HER LETTERS TO THE U.N. SECRETARY-GENERAL.

THE RESOLUTION REQUESTED THE U.N. CHIEF TO REINFORCE THE NUCLEUS AT THE TIME OF ELECTIONS AND VOTER REGISTRATION BY BRINGING THE TOTAL TO A FEW HUNDRED, AND TO OBSERVE THE ELECTORAL SECURITY PLANS.

IT URGED THE INTERNATIONAL COMMUNITY TO INCREASE ITS TECHNICAL, ECONOMIC AND FINANCIAL CO-OPERATION WITH HAITI IN ORDER TO SUPPORT THE COUNTRY'S DEVELOPMENT EFFORTS.

ACCORDING TO A DECISION MADE BY THE FIFTH COMMITTEE (ADMINISTRATIVE AND BUDGET) TODAY, THE NET ADDITIONAL AMOUNT REQUIRED FOR THAT ASSISTANCE SHOULD NOT EXCEED 6.5 MILLION U.S. DOLLARS.

GENERAL ELECTIONS ARE SCHEDULED FOR DECEMBER 16, 1990 IN THE COUNTRY WHICH HAS FOR YEARS EXPERIENCED POLITICAL TURMOIL CAUSE BY MILITARY COUPS.

IN ORDER TO KEEP THE ELECTIONS IN A PROPER CAUSE, THE GOVERNMENT HAS SPECIFIED THAT IT NEEDS OBSERVERS AND EXPERTS WITH EXPERIENCE IN PUBLIC ORDER AND SECURITY.

#90284h0009 10/11/1990 ~Chinese News Agency

BANGKOK (OCT. 11) XINHUA - THAILAND AND MYANMAR ARE DRAWING UP PLANS FOR JOINT DEVELOPMENT OF AREAS ALONG THEIR COMMON BORDER TO ERADICATE OPIUM PRODUCTION, WHICH ARE EXPECTED TO BE FUNDED BY THE UNITED NATIONS FUND FOR DRUG ABUSE CONTROL (UNFDAC), SAID A SENIOR U.N. OFFICIAL HERE ON WEDNESDAY.

PROPOSALS AND PLANS FOR JOINT DEVELOPMENT WERE RAISED AT A TWO-DAY MEETING BETWEEN THAI AND MYANMAR OFFICIALS IN YANGON RECENTLY, TO WHICH UNFDAC WAS INVITED AS AN OBSERVER.

ODD HALLHIAM, FIELD ADVISER FOR UNFDAC, WAS QUOTED BY THE BANGKOK POST AS SAYING THAT UNFDAC IS VERY MUCH INTERESTED IN FINANCING JOINT ACTIVITIES TO FIGHT THE PRODUCTION OF NARCOTICS AND ITS TRADE. HE EMPHASIZED THE FUNDING WILL COME IN THE CONTEXT OF AN AGREEMENT BY THAILAND AND MYANMAR.

THAILAND AND MYANMAR ARE TO HOLD ANOTHER MEETING IN DECEMBER BEFORE SUBMITTING DETAILS TO UNFDAC FOR CONSIDERATION, HE SAID.

"IT IS HOPED THAT THE MEETING WOULD LEAD TO AN AGREEMENT ON CERTAIN OPTIONS EARLIER RAISED IN YANGON, SUCH AS CROP SUBSTITUTION, EXCHANGE OF INFORMATION BETWEEN THAILAND AND MYANMAR AND TRAINING," HE ADDED.

ACCORDING TO THE OFFICE OF THE NARCOTICS CONTROL BOARD OF THAILAND, MYANMAR

SUGGESTED AT THE YANGON MEETING THAT THE TWO COUNTRIES JOINTLY DEVELOP HIGH ALTITUDE AGRICULTURE, IRRIGATION, ANIMAL HUSBANDRY, BASIC PUBLIC HEALTH AND EDUCATION, TREATMENT OF ADDICTS AND ROAD CONSTRUCTION AT THE COMMON BORDER AREAS OF THE TWO COUNTRIES, AND DETAILS OF ALL THESE WILL BE WORKED OUT AT THE DECEMBER MEETING.

HALLHIAM SAID UNFDAC THINKS THAT CHINA AND LAOS SHOULD ALSO INITIATE JOINT DEVELOPMENT ACTIVITIES TO FIGHT AGAINST DRUG TRAFFICKING AND ERADICATE OPIUM PRODUCTION.

THAI ANTI-NARCOTICS OFFICIALS SAID THE GOLDEN TRIANGLE, WHICH COVERS BORDER AREAS OF THAILAND, MYANMAR AND LAOS, WILL PRODUCE 2,500 TO 3,000 TONS OF OPIUM THIS YEAR WITH MYANMAR BEING THE BIGGEST SOURCE.

#90284h0015 10/11/1990 ~Chinese News Agency

BELGRADE (OCT. 11) XINHUA - YUGOSLAVIA AND IRAN HAVE AGREED TO SIGN A LONG-TERM ACCORD ON OIL SUPPLY.

FRANC HORVAT, MINISTER OF THE YUGOSLAV ECONOMIC RELATIONS WITH FOREIGN COUNTRIES, WAS QUOTED TODAY BY YUGOSLAV NEWS AGENCY TANJUG AS SAYING THIS HERE AFTER A THREE-DAY VISIT TO IRAN.

YUGOSLAVIA IMPORTED ANNUALLY ONE MILLION TONS OF OIL FROM IRAN IN RECENT YEARS. IN THE FIRST EIGHT MONTHS OF THIS YEAR, THE COUNTRY SPENT 100 MILLION U.S. DOLLARS ON PURCHASING IRANIAN OIL MOST OF WHICH CAME FROM THE INTERNATIONAL MARKET, BUT NOT FROM IRAN DIRECTLY.

BOTH SIDES AGREED THAT THEY WOULD AVOID MIDDLEMEN IN FUTURE OIL TRADE. YUGOSLAVIA USED TO IMPORT 10 MILLION TONS OF OIL EVERY YEAR FROM THE SOVIET UNION AND IRAQ. SINCE THE GULF CRISIS, YUGOSLAVIA CANNOT GET OIL FROM IRAQ, AND THE SOVIET UNION ALSO REDUCED ITS OIL SUPPLY FROM 600,000 TONS TO 200,000 TONS PER MONTH.

#90284h0017 10/11/1990 ~Chinese News Agency

BEIJING (OCT. 11) XINHUA - CHINA IS TO BUILD A LARGE-SCALE NATURAL GAS PRODUCTION BASE WITH AN ANNUAL PRODUCTION CAPACITY OF 3.5 BILLION CU M IN THE SOUTH CHINA SEA DURING THE EIGHTH FIVE-YEAR PLAN (1991-1995).

WEI BUREN, VICE-PRESIDENT OF THE OFFSHORE GAS UTILIZATION CORPORATION OF THE CHINA NATIONAL OFFSHORE OIL CORPORATION (CNOOC), TOLD XINHUA THAT, IN CO-OPERATION WITH FOREIGN COMPANIES, TWO LARGE-SCALE GAS FIELDS HAVE BEEN DISCOVERED IN THE EASTERN PART OF THE SOUTH CHINA SEA. NAMED YA 13-1 AND YA 21-1-1, THEY HAVE TOTAL PROVEN RESERVES OF 300 BILLION CU M.

HE SAID THAT THE ANNUAL OUTPUT OF THE PRODUCTION BASE WILL BE ABLE TO PROVIDE ENOUGH RAW MATERIAL FOR 10 PLANTS EACH WITH A CAPACITY OF 300,000 TONS OF SYNTHETIC AMMONIA OR 550,000 TONS OF UREA, OR ENOUGH ENERGY FOR 10 MILLION FAMILIES.

BUT IN THE INITITAL STAGES MOST OF THE GAS WILL BE EXPORTED AFTER BEING LIQUEFIED TO PAY OFF THE FOREIGN LOANS USED IN THE DEVELOPMENT OF THE GAS PRODUCTION BASE.

THE CORPORATION HAS DECIDED TO BUILD A PLANT FOR LIQUEFYING NATURAL GAS IN A COASTAL AREA IN THE SOUTHERN PART OF HAINAN ISLAND. MEANWHILE, HAINAN ALSO PLANS A DOZEN CONSTRUCTION PROJECTS INCLUDING RUBBER, CHEMICAL FERTILIZER AND CHEMICAL FACTORIES.

ACCORDING TO INFORMED SOURCES, THE CNOOC HAS HELD A SERIES OF NEGOTIATIONS WITH JAPANESE COMPANIES ON THE POSSIBILITY OF CO-OPERATION IN THE DEVELOPMENT OF THE NATURAL GAS PRODUCTION BASE.

#90284k0010 10/11/1990 ~Japanese News Agency

MANILA (OCT. 11) KYODO - JAPAN HAS SUSPENDED THE APPROVAL OF THE 17TH YEN LOAN PACKAGE TO THE PHILIPPINES PENDING THE PLEDGING SESSION FOR THE PHILIPPINE AID PLAN, WHICH IN TURN HINGES ON THE IMPLEMENTATION BY THE AQUINO GOVERNMENT OF CERTAIN ECONOMIC REFORMS BEING PUSHED BY ITS INTERNATIONAL CREDITORS, PHILIPPINE NEWSPAPERS SAID THURSDAY.

QUOTING TAKESHI YAGI, FIRST SECRETARY OF THE JAPANESE EMBASSY HERE, THE REPORTS IN THE DAILIES, THE MANILA CHRONICLE AND THE ANG PAHAYAGANG MALAYA, SAID THAT ALTHOUGH ALL TECHNICAL ASPECTS OF THE LOAN PACKAGE HAVE BEEN COMPLETED, ''THE FINALIZATION OF LOAN AGREEMENTS WILL HAVE TO WAIT BEFORE THE MAI (MULTILATERAL AID INITIATIVE) PLEDGING SESSION.''

THE MAI AID PLAN IS A MULTIBILLION DOLLAR SCHEME AIMED AT FUNDING GOVERNMENT PROJECTS TO REVIVE THE COUNTRY'S ECONOMY, ENDANGERED BY A SLOWDOWN.

THE REPORTS SAID THE 17TH YEN LOAN PACKAGE IS THE MAJOR PART OF JAPAN'S COMMITMENT TO THE PHILIPPINES UNDER THE MAI.

PHILIPPINE OFFICIALS SAID THEY ARE SEEKING THE EQUIVALENT OF 1.9 BILLION U.S. DOLLARS FROM JAPAN'S OVERSEAS ECONOMIC COOPERATION FUND THROUGH THE 17TH YEN PACKAGE. THE AMOUNT IS 1 BILLION DOLLARS ABOVE THE 16TH YEN LOAN PACKAGE.

THE REPORTS SAID UNNAMED PHILIPPINE OFFICIALS INTERPRETED JAPAN'S MOVE AS ''AN EFFORT BY THE PHILIPPINES' MAJOR INTERNATIONAL CREDITORS TO MAKE PRESIDENT (CORAZON) AQUINO PUSH HARDER FOR CERTAIN ECONOMIC POLICY MEASURES NOW STALLED IN THE FACE OF STRONG DOMESTIC OPPOSITION.'' ;;MORE NNNN R052 R CA15 R

:PHILIPPINES-LOAN 2 MANILA:

THE PHILIPPINE OFFICIALS NOTED THAT ''BILATERAL AID PROGRAMS BECOME CLOSELY, IF INDIRECTLY, GOVERNED BY TERMS SET'' BY THE INTERNATIONAL MONETARY FUND (IMF) AND THE WORLD BANK, THE REPORTS SAID.

THE OFFICIALS SAID THE LINKAGE BETWEEN BILATERAL AID AND IMF CONDITIONS HAS BEEN ''FORMALIZED AND FORTIFIED'' THROUGH THE AID PLAN.

THE SECOND PLEDGING SESSION FOR THE AID PLAN HAD BEEN SLATED FOR SEPTEMBER BUT HAD TO BE POSTPONED REPEATEDLY AS MANILA'S ECONOMY SUFFERED A DECLINE, COUPLED WITH A STRONG EARTHQUAKE LAST JULY 16, NECESSITATING ADJUSTMENTS IN REQUIREMENTS.

JAPAN HOSTED THE FIRST PLEDGING SESSION FOR THE AID PLAN, COMMITTING ALMOST 50

PERCENT OF THE TOTAL OF 3.5 BILLION DOLLARS PLEDGED.

THE REPORT SAID THE SECOND SESSION MAY BE HOSTED BY PARIS OR HONG KONG EARLY NEXT YEAR.

FINANCE SECRETARY JESUS ESTANISLAO NOTED THAT THE SECOND PLEDGING SESSION WILL ONLY GO THROUGH IF THE PHILIPPINES CAN FORGE A NEW ECONOMIC PROGRAM WITH THE IMF, THE REPORTS SAID.

INTERNATIONAL LENDING INSTITUTIONS HAVE BEEN ASKING THE PHILIPPINES TO CURB THE BUDGET DEFICIT, ESTIMATED TO BE BETWEEN 60 TO 90 BILLION PESOS, RAISE REVENUES THROUGH NEW TAXES, AND IMPLEMENT A TARIFF LIBERALIZATION PROGRAM.

AN ECONOMIC PROGRAM AGREEMENT WITH THE IMF WILL ALSO MEAN THE DISBURSEMENT OF 88 MILLION DOLLARS IN THE THIRD TRANCHE OF THE FUND'S EXTENDED FUND FACILITY AND 118 MILLION DOLLARS IN THE FINAL TRANCHE OF THE TOTAL OF 713 MILLION DOLLARS FROM INTERNATIONAL COMMERCIAL BANKS, THE REPORTS SAID.

JAPAN'S OSAKA GAS SETS UP SINGAPORE OFFICE

SINGAPORE (OCT. 11) KYODO - A MAJOR JAPANESE GAS UTILITIES COMPANY, OSAKA GAS CO., AND ITS WHOLLY OWNED SUBSIDIARY, OSAKA GAS ENGINEERING, HAVE SET UP A REGIONAL REPRESENTATIVE OFFICE IN SINGAPORE, COMPANY OFFICIALS SAID THURSDAY.

MASAFUMI OHNISHI, PRESIDENT OF OSAKA GAS CO., SAID THE COMPANY CHOSE SINGAPORE IN ORDER TO PURCHASE LIQUEFIED NATURAL GAS (LNG) FROM THE REGION.

LAST YEAR, THE COMPANY IMPORTED ABOUT THREE MILLION TONS OF LNG FROM INDONESIA BRUNEI, AND AUSTRALIA.

OHNISHI SAID THE COMPANY ALSO WANTED TO TAKE ADVANTAGE OF AN EXPECTED SHIFT IN ENERGY CONSUMPTION TO LNG.

ASKED ABOUT THE IMPACT OF THE GULF CRISIS AND HIGHER OIL PRICES ON LNG USAGE, HE SAID, ''THE RISE IN OIL PRICES WILL BE IN OUR FAVOR BECAUSE OF THE TIME LAG BETWEEN THE PRICES OF OIL AND LNG. IT WILL BE LIKELY WE WILL SEE A LARGE NUMBER OF USERS SWITCHING TO LNG.''

THE SINGAPORE OFFICE IS THE THIRD OVERSEAS REPRESENTATIVE OFFICE FOR OSAKA GAS AND THE FIRST FOR OSAKA GAS ENGINEERING.

#90284k0029 10/11/1990 ~Japanese News Agency

TOKYO (OCT. 11) KYODO - JAPAN WILL NOT RECONSIDER THE PACKAGE OF FARM TRADE REFORM MEASURES IT SUBMITTED TO THE MULTILATERAL TRADE TALKS UNDER THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT) LAST MONTH, DESPITE A U.S. CALL TO DO SO A GOVERNMENT OFFICIAL SAID THURSDAY.

SHIGERU MOTAI, VICE MINISTER AT THE AGRICULTURE, FORESTRY, AND FISHERIES MINISTRY, TOLD A PRESS CONFERENCE THAT THE U.S. CALL FOR A MORE DRASTIC FARM TRADE LIBERALIZATION PLAN FROM JAPAN WILL NOT CAUSE TOKYO TO REVIEW ITS PROPOSAL.

HIS REMARKS CAME AS A RESPONSE TO A RENEWED U.S. REQUEST THAT JAPAN MAKE ITS FARM TRADE PROPOSAL MORE ATTRACTIVE FOR THE UNITED STATES, WHICH WERE MADE TUESDAY TO JAPANESE INTERNATIONAL TRADE AND INDUSTRY MINISTER KABUN MUTO, WHO WAS VISITING WASHINGTON.

SECRETARY OF STATE JAMES BAKER REITERATED A U.S. CALL FOR JAPAN TO OPEN ITS RICE MARKET, AND U.S. TRADE REPRESENTATIVE CARLA HILLS TOLD MUTO THAT SHE WAS DISAPPOINTED BY JAPAN'S LACKLUSTER LIBERALIZATION PROPOSAL ON FARM TRADE.

BAKER REPORTEDLY ASKED MUTO TO RECONSIDER THE JAPANESE OFFER, AND COME UP WITH A MORE DRASTIC PROPOSAL.

JAPAN SUBMITTED IN SEPTEMBER A DETAILED LIST OF ITS DOMESTIC FARM-SUPPORT MEASURES AND A PACKAGE OF FARM TRADE REFORM PLANS TO THE GATT FARM NEGOTIATIONS FOR THE URUGUAY ROUND OF MULTILATERAL TRADE TALKS.

THE PACKAGE INCLUDES JAPAN'S PLEDGE TO CUT 30 PERCENT OF ALL AGRICULTURAL SUBSIDIES OVER 10 YEARS, AND A SPECIFIC PLAN TO TRIM THE GOVERNMENT'S TOTAL SUBSIDIES ON THREE CEREALS -- RICE, WHEAT, AND BARLEY -- BY 5.4 PERCENT OVER SEVEN YEARS.

THE PARTICIPANTS IN THE GATT FARM TALKS ARE REQUIRED TO SUBMIT THEIR PROPOSALS ON FARM TRADE REFORM BY OCTOBER 15.

NEITHER THE U.S. NOR THE EUROPEAN COMMUNITY (EC) HAVE PUT THEIR OFFERS ON THE TABLE YET.

MOTAI SAID THE COUNTRIES SHOULD MAKE THEIR OFFERS BY THE DEADLINE AGREED UPON BY THE PARTICIPANTS.

#90284k0030 10/11/1990 ~Japanese News Agency

OSAKA (OCT. 11) KYODO - OMRON CORP., A LEADING ELECTRIC MACHINERY MAKER, SAID THURSDAY IT WILL LAUNCH A NEW HIGH-SPEED WORKSTATION NEXT SPRING.

OMRON SAID THE MODEL LUNA-II IS CAPABLE OF EXECUTING UP TO 20 MILLION INSTRUCTIONS PER SECOND, OR MIPS, PROVIDING ROUGHLY FIVE TIMES THE POWER OF

ITS CURRENT TOP-RANGE MODEL.

MIPS IS A MEASURE OF THE PROCESSING SPEED OF A COMPUTER, REFERRING TO THE AVERAGE NUMBER OF MACHINE LANGUAGE INSTRUCTIONS THAT THE COMPUTER CAN PERFORM IN A SECOND.

THE NEW MODEL USES MOTOROLA INC.'S LATEST MICROPROCESSOR, THE MODEL 68040, AS A CENTRAL PROCESSING UNIT, OR THE NERVE CENTER OF A COMPUTER, THE COMPANY SAID IN A RELEASE.

OMRON SAID THE NEW MODEL WILL BE PRICED AT THE 2 MILLION YEN LINE PER UNIT.

WORKSTATIONS ARE DESKTOP MACHINES THAT ARE MUCH MORE POWERFUL THAN PERSONAL COMPUTERS. THEY ARE MAINLY USED FOR SUCH PROCESSING-INTENSIVE TASKS AS COMPUTER MODELING OF NEW PRODUCTS.

-30- 1098

#90284k0067 10/11/1990 ~Japanese News Agency

TOKYO (OCT. 11) KYODO - NKK CORP. SAID THURSDAY IT HAS SET UP A BASE IN THE UNITED STATES FOR THE SALE OF ITS OPTICAL DISK AUTOCHANGERS.

THE NEW COMPANY, NKK ELECTRONICS AMERICA INC., IN SAN JOSE, CALIFORNIA, IS CAPITALIZED AT 600,000 DOLLARS AND WHOLLY OWNED BY NKK'S U.S. SUBSIDIARY, NKK U.S.A. CORP.

THE COMPANY WILL BE A SALES BASE IN NORTH AMERICA AND ALSO PROVIDE TECHNICAL SERVICES.

THE OPTICAL DISK AUTOCHANGER IS A KEY PRODUCT OF NKK'S NEW ELECTRONICS DISVISION, OFFICIALS SAID.

NAMED "DISK INN," THE COMPACT, LARGE COMPUTER MEMORY SYSTEM CONSISTS OF TWO MAGNETO-OPTICAL DISK DRIVES AND AN OPTICAL DISK ELEVATOR MECHANISM.

IT HAS A MAXIMUM CAPACITY OF 56 5.25-INCH DISKS AND A MEMORY CAPACITY OF 36 GIGABYTES.

AN ESTIMATED 2 BILLION YEN IN SALES ARE EXPECTED IN THE INITIAL YEAR.

-30- 990

#90284k0075 10/11/1990 ~Japanese News Agency

TOKYO (OCT. 11) KYODO - FACED WITH U.S. CRITICISM OVER SUSPECTED UNFAIR BIDDING FOR A MAJOR AIRPORT PROJECT, JAPAN FINDS ITSELF IN A QUANDARY OVER HOW TO PREVENT A FLARE-UP OF TRADE DISPUTES OVER U.S. ACCESS TO THE NATION'S CONSTRUCTION MARKET.

THE ISSUE REVOLVES AROUND THE FAILURE OF A HIGHLY COMPETITIVE U.S. FIRM TO WIN A CONTRACT FOR A "PEOPLE-MOVER" AT THE NEW KANSAI INTERNATIONAL AIRPORT IN A TENDER HELD IN AUGUST.

WASHINGTON HAS BEEN PRESSING TOKYO TO EXPLAIN WHY AEG WESTINGHOUSE TRANSPORTATION SYSTEMS INC., WHICH HAS BUILT SUCH GROUND TRANSPORTATION SYSTEMS AT AIRPORTS AROUND THE WORLD, LOST THE AWARD TO A LESS-EXPERIENCED CONSORTIUM OF JAPANESE FIRMS, ALLEGING THAT THE BIDDING PROCEDURES WERE UNFAIR.

KANSAI INTERNATIONAL AIRPORT CO. (KIAC), BUILDER OF THE MULTIBILLION DOLLAR AIRPORT ON A MAN-MADE ISLAND IN OSAKA BAY, DISMISSED ALLEGATIONS OF UNFAIR PRACTICES.

"TECHNICALLY, THEY WERE THE SAME. BUT THE PRICE THE U.S. FIRM OFFERED WAS 3 BILLION YEN HIGHER (THAN THE JAPANESE WINNER)," SAID A KIAC OFFICIAL, WHO ASKED NOT TO BE NAMED.

JAPANESE GOVERNMENT OFFICIALS ARE AFRAID THAT THE DISPUTE WILL REVIVE THE ONCE-SETTLED TRADE NEGOTIATIONS ON EXPANDING FOREIGN ACCESS TO JAPAN'S CONSTRUCTION MARKET.

JAPAN AND THE UNITED STATES AGREED IN MAY 1988 TO FACILITATE FOREIGN ENTRY INTO JAPAN'S CONSTRUCTION MARKET AND ALLOW FOREIGN CONCERNS TO BID FOR PUBLIC WORKS PROJECTS.

THE U.S. IS TAKING SUCH A TOUGH STAND THAT IT CANCELLED TALKS SLATED IN TOKYO LAST MONTH TO REVIEW PROGRESS SINCE THE 1988 PACT.

THE CONSTRUCTION MINISTRY, WHICH IS RESPONSIBLE FOR TRADE TALKS ON CONSTRUCTION, IS TRYING TO GET THE CONSTRUCTION MINISTRY TO TAKE ACTION IN FAVOR OF U.S. CONTRACTORS OVER PROJECTS FOR THE AIRPORT AS IT HAS STRONG INFLUENCE OVER THE AIRPORT BUILDER.

BUT A SENIOR OFFICIAL AT THE CONSTRUCTION MINISTRY SAYS IT IS DIFFICULT TO SATISFY WASHINGTON.

"THEY ARE PUSHING US NOT ONLY TO OPEN THE MARKET, BUT ALSO TO SHOW RESULTS," THE OFFICIAL NOTED.

THE OFFICIAL AND OTHERS SAY THE DISPUTE WILL PROVIDE A FOCUS AT BILATERAL TALKS SLATED IN BOSTON ON OCTOBER 15-16 TO FOLLOW UP PROGRESS SINCE THE TWO COUNTRIES WRAPPED UP STRUCTURAL IMPEDIMENTS INITIATIVE TALKS LAST JUNE WITH TOKYO PLEDGING TO TAKE MEASURES TO OPEN ITS MARKET FURTHER.

-30- 2469

#90284k0091 10/11/1990 ~Japanese News Agency

KITAKYUSHU (OCT. 11) KYODO - DANTANI CORP., A LEADING PLYWOOD MANUFACTURER

BASED IN KITAKYUSHU, SAID THURSDAY IT HAS ENTERED INTO A TECHNICAL ASSISTANCE AGREEMENT WITH THE MALAYSIAN LUMBER EXPORT FIRM SAMLING CORP.

UNDER THE AGREEMENT, DANTANI WILL PROVIDE GUIDANCE TO SAMLING IN BUILDING AND OPERATING A PLYWOOD FACTORY IN BINTULU, SARAWAK.

THE FACTORY, NOW UNDER CONSTRUCTION, IS DUE TO BE COMPLETED AND BROUGHT INTO OPERATION NEXT MARCH. IT WILL HAVE A MONTHLY PRODUCTION CAPACITY OF 10,000 CUBIC METERS.

SAMLING WILL GIVE DANTANI THE PREFERENTIAL RIGHT TO SELL PLYWOOD, MANUFACTURED AT THE BINTULU FACTORY, IN JAPAN.

-30- 791

#90284k0103 10/11/1990 ~Japanese News Agency

OSAKA (OCT. 11) KYODO - ITOMAN AND CO. WILL ENTIRELY WITHDRAW FROM THE REAL ESTATE BUSINESS, REPAYING ALL ITS LAND-LINKED DEBTS TOTALING 700 BILLION YEN BY THE END OF NEXT SEPTEMBER, THE COMPANY'S HEAD SAID THURSDAY.

ITOMAN PRESIDENT YOSHIHIKO KAWAMURA TOLD A PRESS CONFERENCE THAT BY MARCH NEXT YEAR, THE COMPANY WILL ALSO HAND OVER THE MANAGEMENT OF ITS ITOMAN TOTAL HOUSING, FORMERLY THE DEFUNCT SUGIYAMA SHOJI, TO SUMITOMO BANK, ITS MAIN CREDITOR.

THE AGGRESSIVE LOANS AND INVESTMENT IN REAL ESTATE PROJECTS BY THE OSAKA-BASED TRADING HOUSE HAVE COME UNDER INCREASING CRITICISM AS THE BANK OF JAPAN (BOJ) AND OTHER FINANCIAL AUTHORITIES HAVE BECOME MORE SENSITIVE TO THE EXPOSURE OF JAPANESE BANKS TO REAL ESTATE LOANS AFTER A LOAN SCANDAL INVOLVING SUMITOMO BANK WAS REVEALED LAST WEEK.

IN AN UNUSUALLY LENGTHY CONFERENCE THAT LASTED MORE THAN TWO HOURS, KAWAMURA REVEALED THAT AT THE END OF MARCH THE COMPANY WAS 1.12 TRILLION YEN IN ARREARS INCLUDING 734.2 BILLION YEN IN LAND-RELATED DEBTS WHICH ARE EXPECTED TO BE REDUCED TO ZERO BY THE END OF NEXT SEPTEMBER.

KAWAMURA RULED OUT PREVAILING SPECULATION THAT THE COMPANY IS NEAR TO BANKRUPTCY DUE TO ITS TOWERING DEBTS AS TOTALLY UNFOUNDED.

"IT IS IMPOSSIBLE THAT WE WILL REVIEW DOWNWARD OUR FINANCIAL REPORTS (FOR FISCAL 1990 ENDING MARCH 31)," HE SAID.

KAWAMURA ALSO SAID HE WILL NOT STEP DOWN UNTIL THE DEBT PROBLEM IS CLEARED, ADDING THAT HE WILL RECONSIDER THE MATTER NEXT YEAR.

ABOUT SUEMITSU ITO, THE EXECUTIVE DIRECTOR WHOM SUMITOMO BANK HAS URGED ITOMAN TO DISCHARGE FROM REAL ESTATE-RELATED OPERATIONS, KAWAMURA SAID HE HAS NO INTENTION OF LETTING HIM GO.

MEANWHILE, SUMITOMO BANK SAID IT WILL PROVIDE ALL-OUT SUPPORT FOR ITOMAN TO RECOVER FROM ITS FINANCIAL TROUBLES AND TO STAVE OFF A POSSIBLE CREDIT CRISIS WHICH IS EXPECTED TO DAMAGE THE BANKING INDUSTRY AS A WHOLE.

ON ITOMAN'S PLAN TO ENTRUST IT WITH ITOMAN TOTAL HOUSING, SUMITOMO SAID IT WILL SEND OTHER OFFICIALS TO ITS MANAGEMENT, IF IT RECEIVES AN OFFICIAL REQUEST FROM ITOMAN.

-30- 2210

#90284m0001 10/11/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 11) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

World stocks are lower: ... The Nikkei loses 909 points. ... The FTSE is off 13 points in early afternoon trading. ... Bonds bounce with the long yield down to 9.01% as the dollar also rebounds. ... Brent North Sea crude is up 50 cents this morning to $39.80. ... MESA LIMITED PARTNERSHIP has agreed to sell part of its portfolio to SEAGULL ENERGY in a deal that could be worth about $475 million and cut Mesa's $1.4 billion debt by about a third. ... FITCH INVESTORS SERVICE says bondholders may seek up to half of DONALD TRUMP's stake in the TAJ MAHAL casino in return for restructuring $675 million worth of junk bonds. ... Atlanta developer JOHN PORTMAN has agreed to turn over ownership of part of his ATLANTA PEACHTREE CENTER in a restructuring of his organization's $2 billion debt.

WHAT'S AHEAD:

HOUSE MINORITY WHIP NEWT GINGRICH (R. - GA) addresses the Financial Executive Institute on the progress of the budget. ... OFFICE OF MANAGEMENT & BUDGET Director RICHARD DARMAN is scheduled to testify before the Senate Government Affairs Committee on the response of the OMB to Government Management failures. ... Columnist-commentator DAN DORFMAN is moving from CABLE NEWS NETWORK to CNBC. He will continue writing columns for "USA Today." ... AT&T plans to unveil today an inexpensive chip for personal computers that combines voice, audio, graphics and modem functions.

FROM THE BULLS:

LOUIS EHRENKRANTZ, president of EHRENKRANTZ & KING, sees the bear market coming to an end. "What I see is the other side of the coin," he says. "No bear market is a bear market unless it has a beginning without any real rally indicated that for the first time since the invasion of the Gulf, the market is weakening perceptibility without any support. That usually is the

beginning of what we call a washout. That's when the analysts who last week told you that their indicators were pointing up start throwing up the towel and you see massive selling. That's started and that selloff is usually the end of the bear market. The trick is to determine how long it will take. Sometimes it takes five days. ... Sometimes it takes five weeks, but very, very rarely any longer. So between now and early November, you've got what I consider to be shopping time." (CNBC "Market Wrap- Up", 10/10)

Pessimism about the economy is getting too extreme, says WILLIAM STERLING, international economist for MERRILL LYNCH. "We're getting to the silly season where the economic hypochondriacs are out." Sterling looks for two quarters of a "garden variety recession," but says the silver lining will be lower interest rates as a result. "We think fed funds could go as low as 6 1/2% by the early part of 1991," says Sterling. (CNN "Business Morning", 10/11)

FROM THE BEARS:

"It's going to get grimmer," says RON SLOAN, a portfolio manager and strategist with SIEBEL CAPITAL MANAGEMENT. "Investors are getting hit in the head with a hammer every day and they still aren't pessimistic enough. Stock prices may look great now. But it's premature to buy now." ("USA Today", 10/11)

"The market is not acting well at all," says EDWARD NICOSKI of PIPER, JAFFRAY & HOPWOOD. "When it became apparent stocks couldn't rally, a lot of people just threw in the towel and sold." Nicoski says the market "seems that it wants to go lower." ("Investor's Daily", 10/11)

STOCK MARKET:

The market is poised for a trading rally up to 2750 by December 4th, a major cycle turning point, according to DAVID POWELL at the "Volume Analyzer." But the rally will be against the major trend and should be played only by the most aggressive traders, advises Powell. "Long term investors should use the rally as an opportunity to sell," says Powell who sees the advance-decline line forecasting a Dow decline to below 1620. (CNBC "World Business", 10/11)

"Market breadth has turned lousy again, which tends to confirm [Wednesday's] price decline," says NEWTON ZINDER at LEHMAN BROTHERS. ("The Washington Post" 10/11)

"When [Wall] Street got the word that the [Treasury] auction went poorly, programs just ripped the market apart," says THOMAS GALLAGHER, managing director of capital commitment at OPPENHEIMER & CO. "There's a real feeling that the market is starting to fall apart." (WSJ, 10/11)

"You've got bond jitters and, of course, war jitters," says PETER CANELO of BEAR STEARNS. "At the end of the day we had a little bit of program selling,

making things worse." (CNN "Moneyline", 10/10

"There are lots of bargains out there right now even though I think the Dow is going to head lower from here," says ANDY SAMOILOFF, one of the individual investors interviewed by "USA Today." PAUL PARKER, who describes himself as an active trader, says: "This is just part of the game. I see it as a great buying opportunity, so the paper losses now don't bother me a bit. Even if the Dow hits 1800, long- term it won't matter." ("USA Today", 10/11)

"It's called white-knuckle time," says KENNETH SPENCE, technical analyst at SALOMON BROTHERS. (WSJ, 10/11)

"We're probably still in a testing process," says WALTER MURPHY of MERRILL LYNCH. "Surprises in a bear market are generally negative ... but I think ... that we can evaluate this backing and filling more as a test rather than a resumption of a downtrend. But it's all in the context of a still-developing bear market." (CNBC "Market Wrap-Up", 10/10)

"You don't want to be in companies that are not going to show very strong earnings comparisons," says LAWRENCE AURIANA of THE KAUFMANN FUND. He says the same about companies that "may have negative earnings surprises." Auriana believes investors should look to "recession resistant companies." (FNN "Marketwrap", 10/10)

"It will probably take several weeks for the market to completely heal itself " says CHARLES HOOPER of the "Mutual Fund Strategist." He looks for very rough sailing with a low probability of a sustainable advance. Hooper says he sees signs which suggest the possibility of commercial bank failures. "A money market fund continues to be the most attractive investment alternative." (CNBC "World Business", 10/11)

With the Nikkei dropping 909 points today, many analysts are looking for support at the 20,000 level. But with the average already at 22,586, it could break down even further, says ANDREW McGRATH, assistant vice-president in Tokyo for CITICORP SCRIMGEOUR VICKERS. "When the market loses 40% or two trillion dollars of value, it's telling you something about the long term situation in the [Japanese] economy." (CNN "Business Morning", 10/11)

STOCK TIPS:

With a recession on its way, investors must remember that "consumers have to eat, have to be clothed, have to go to the doctor and take their medication," says MICHAEL CARTY of VALUE LINE. He likes MICHAEL FOODS, BECTON DICKINSON, TYSON FOODS and CPC. (FNN "Marketwrap", 10/10)

TRAVELERS probably has more exposure to troubled real estate than other insurance companies, says HERBERT GOODFRIEND, insurance industry analyst for PRUDENTIAL-BACHE. The company was big lender to oil patch real estate during

the 1980's. Other insurance companies with relatively high exposure to real estate: AETNA, CIGNA, LINCOLN NATIONAL LIFE, UNUM and NORTHWEST NATIONAL LIFE. But Goodfriend says problems in the insurance industry are not comparable to those with S&Ls: "They're not as leveraged as the S&Ls. [Insurance companies] invested in a different kind of real estate and mortgage - they're better protected." (CNBC "World Business", 10/11)

"The high-visibility stocks, like HEWLETT-PACKARD, INGERSOLL-RAND, MOTOROLA, CBS and THE WASHINGTON POST, are having a particularly bad time in this bear market, which is so unforgiving when earnings come in below estimates. We seem to have at least one a day," says ROBERT STOVALL, president of STOVALL/TWENTY-FIRST ADVISERS. (NYT, 10/11)

PAUL JOHNSON of NEEDHAM & CO. is predicting third quarter profits of 39 cents per share for CISCO SYSTEMS, a long-distance computer networking company. Given last year's earnings of 12 cents, he says he's "on the high side" of Street expectations, but also thinks "they'll beat my numbers." Johnson believes Cisco will prove immune to the problems of a weak economy. ("Investor's Daily", 10/11)

DUN & BRADSTREET is a favorite stock of LOUIS EHRENKRANTZ of EHRENKRANTZ & KING, who sees a bull market beginning by the end of the fourth quarter. He also likes GENERAL MOTORS. (CNBC "Market Wrap-Up", 10/10)

"The [retail] sales fall-off has been much steeper than we were anticipating," says DANIEL BARRY of KIDDER, PEABODY. He has just cut his earnings estimates for SEARS ROEBUCK, J.C. PENNEY, DAYTON HUDSON, K MART, MAY DEPARTMENT STORES and NORDSTROM. (WSJ, 10/11)

"Although retailers are telling me their inventories are conservative, they're not conservative enough in my opinion for a slow sales environment in September, October and early November," says THOMAS TASHJIAN of SEIDLER AMDEC SECURITIES. "We'd view a market bounce as a liquidation opportunity for retail stocks, despite a likely surge in Christmas sales if the Middle East situation is remedied before the holiday season." Mr. Tashjian suggests selling J.C. PENNEY, NORDSTROM and GAP short, betting that their stock will drop. (WSJ, 10/11)

"CHASE MANHATTAN BANK and BANK OF WASHINGTON are going to have devastatingly bad results because they've already told us that," says RICHARD BOVE of DEAN WITTER REYNOLDS. "But companies like MANUFACTURERS HANOVER and CHEMICAL BANK are likely to report surprisingly good earnings relative to expectation." ("Nightly Business Report", 10/10)

#90284m0002 10/11/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 11) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED

BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

Unless war breaks out, there is "absolutely no reason to buy the dollar," says JOSEPH CAMBRIA, foreign exchange manager at BANQUE PARIBAS in New York. He notes the dollar will go through periods of consolidation. "You don't want to see the dollar falling 2% every day." (WSJ, 10/11)

Considerable downside potential remains for the dollar against the yen, says KIYOHIKO YOSHIZAWA, foreign exchange officer at MIDLAND BANK PLC in New York. "People are already looking for 120 yen," he says, and they will "use any excuse to sell the dollar" against the yen. (WSJ, 10/11)

Fed policy makers last week agreed to cut short-term interest rates 1/4 point in response to a budget agreement but balked at committing to another cut to counter weakness in the economy, says a front page report in today's "Washington Post." Greenspan pushed for the deeper cuts, says the story, but most of the FOMC expressed concern that the cut would backfire if it increased investor concerns about future inflation. (Washington Post, 10/11)

"If this budget issue were not on the table, if he were not wrestling with that, I think [FED CHAIRMAN ALAN] GREENSPAN would have eased a while ago," says CHARLES LIEBERMAN of MANUFACTURERS HANOVER SECURITIES. "The only reason he is holding back is because he is trying to dangle the carrot in front of Congress." But Lieberman says he expects the budget uncertainty to drag on past Oct. 19 "and at that point I think he eases anyway." (CNBC "Market Wrap-Up", 10/10)

"There is a sense in the bond market community that Congress cannot come to grips with the deficit problem, that there is leadership lacking in the White House vis a vis fiscal policy so that we probably cannot experience any major reduction in the federal budget deficit for quite some time," says WILLIAM SULLIVAN of DEAN WITTER. (CNBC "Market Wrap-Up", 10/10)

"The auction [for the seven year note] was very sloppy," says PETER BASS, a managing director at S.G. WARBURG SECURITIES INC. "People thought rates were high enough for it to have had a better outcome than it did." He continues, "There were absolutely no bids from Japan, which is ridiculous. Normally you would see some bidding for a seven-year, but not this time. People in Europe are becoming very pessimistic about our ability to manage our affairs and think that yields, irrespective of very weak economic activity, will rise." (NYT, 10/11)

When Treasury bonds are yielding more than 9%, some investors switch out of stocks - where the long-term annual return is 10%, but isn't guaranteed - in favor of bonds. "At least with bonds, you know you're going to get your money

back someday," says MICHAEL WOLSKI, a bond trader at CARROLL, McENTEE & McGINLEY in New York. (WSJ, 10/11)

"We're in a meltdown in the [junk bond] market," says MARTIN WHITMAN, a veteran New York investor in junk bonds. "Everyone is shell- shocked. They've abandoned hope." (WSJ, 10/11)

"I'm still bearish" on junk bonds, says JAMES CAYWOOD, managing partner at CAYWOOD-CHRISTIAN CAPITAL MANAGEMENT in San Diego. "We're going to have a lot of defaults and restructurings now. It's the new game in town. When a company runs into problems, the solution seems to be to take it out of bondholders' hides." (WSJ, 10/11)

"The silver bugs got crushed," says MIKE MIKOLAY of HOSPITAL TRUST NATIONAL BANK. "The truth is that there's too much silver around," says JOHN FACK of SHEARSON LEHMAN BROTHERS. ("USA Today", 10/11)

THE ECONOMY:

"It smells like and tastes like and acts like a recession," says RICHARD O'BRIEN, economist at HEWLETT-PACKARD. "So even if we may not be in a recession, [but] growth is so slow we might as well be." MICHAEL HALLMAN, president of MICROSOFT CORP., says, "We hear the hoofbeats of our competitors and the economy over our shoulder." ("USA Today", 10/11)

"Apparently we're going into a recession - if we're not in one already," says MARGO McGLADE of PAINEWEBBER INC. Last month, she cut her estimates on "all of the [retail] stocks we follow except WAL- MART." She anticipates reducing her estimates further after today's sales reports. "The third and fourth quarters could be even worse than we forecast." (WSJ, 10/11)

"The earnings picture is a weak one," says BARBARA SCHMIDT of BARCLAYS de ZOETE WEDD. "We believe we're in a recession that could last until the second quarter of 1991." (FNN "Marketwrap", 10/10)

IN WASHINGTON:

The OFFICE OF MANAGEMENT AND BUDGET estimates the fund that insures bank deposits will shrink by $6.1 billion - more than half its current size - over the next three fiscal years. ("USA Today", 10/11)

"Unfortunately, I think a lame-duck session [to pass a budget] has become the most likely scenario," says CHARLES LIEBERMAN of MANUFACTURERS HANOVER SECURITIES. "The only thing that will prevent that is if [PRESIDENT] BUSH threatens to veto a continuing resolution and if that forces sequestration as the only alternative. I think the prospect of sequestration would scare everybody so maybe then they could come to some agreement. But most likely it's going to be a lame-duck session, which the markets will absolutely hate."

(CNBC "Market Wrap-Up", 10/10)

"At a time when this country needs to look very much like somebody's in charge to allow sequester to take place looks a lot like nobody's in charge," says SEN. DAVID DURENBERGER (R. - Minn.), explaining why PRESIDENT BUSH did not allow automatic sequestration to take place. (FNN "Marketwrap", 10/10)

#90284p3556 10/11/1990 ~PR Newswire

ENGLEWOOD CLIFFS, NJ (OCT. 11) PR NEWSWIRE - For the third quarter of 1990 ended Sept. 30, CPC International Inc. (NYSE: CPC) today reported earnings per common share of $1.27, up 12.4 percent from $1.13 in the third quarter of 1989. Net income rose 13 percent to $98.6 million from $87.2 million.

Worldwide sales in the quarter amounted to $1.45 billion, 13 percent higher than last year's third quarter sales of $1.29 billion, and operating income of $201.3 million was up 16 percent from $173.8 million a year ago. Financing costs for the quarter were 32 percent higher than in last year's third quarter attributable largely to acquisitions made during the year.

For the first nine months of 1990, earnings per common share increased 15 percent to $3.51 from $3.05 in the comparable period last year. Net income for the period amounted to $272.5 million, a gain of 15 percent over $238 million in the first nine months of 1989.

Worldwide sales in the nine-month period amounted to $4.26 billion, an increase of 12 percent over last year's $3.80 billion, and operating income was up 17 percent to $549.6 million from $469 million in the first nine months of 1989.

As part of its growth strategy, CPC has completed 26 acquisitions since 1986, including two within the past month. As reported earlier, CPC completed the purchase in late September of the Conimex oriental food business from a Dutch affiliate of Reckitt & Colman PLC of the United Kingdom. Conimex, with annual sales of close to $40 million, is a leading producer and marketer in the Netherlands of authentic Indonesian and other oriental-style foods.

Since the quarter ended, CPC has also acquired Milwaukee Seasonings, Inc., a producer of custom-formulated food ingredient systems for the U.S. foodservice and food processing industries. Its sales in 1990 are expected to be in excess of $40 million. Operating Income from Consumer Foods Increases 21 Percent in 3rd Quarter

Operating income from CPC's worldwide consumer food operations showed strong gains of 21% in the third quarter and 12.5% in the first nine months over the comparable period last year.

Worldwide sales of consumer foods in the third quarter were 17 percent higher than in the same quarter last year, and volumes were up 5.5 percent. Contributing to the gains were acquisitions made during the year and higher dollar values of foreign currencies.

For the nine-month period, sales of consumer foods were 14 percent higher than in the comparable period last year, and volumes were up 6.3 percent.

Best Foods, CPC's North American consumer foods business, posted an increase of 10 percent in operating income for the third quarter. Sales were essentially unchanged from last year's third quarter, despite 1.9 percent lower volumes than in the third quarter last year; for the nine- month period, Best Foods volumes are 1.3 percent higher than in 1989. Among products showing strong volume gains were Mazola corn oil, Mueller's pasta products, and Knorr soups and sauces. Volumes of Hellmann's and Best Foods mayonnaise were lower for the quarter but essentially unchanged for the year-to-date, while volumes of Skippy peanut butter and Karo syrup were lower than in the strong third quarter last year. In the baking business, bread volumes were lower while Thomas' English muffins continued to do well.

European operations achieved a 27% gain in operating income in the third quarter, and sales were up 28 percent. Volumes were 11.5 percent higher than in the third quarter last year, with acquisitions contributing strongly to the gain.

Latin American operating income improved sharply during the quarter - rising by 56 percent on a sales increase of 45 percent. Volumes were up 11.1 percent. In Asia, despite volume growth of 8.4 percent, sales showed a smaller gain of 4.6 percent as Asian currencies weakened, and operating income was up only marginally due in part to unsettled conditions in the Philippines.

LOS ANGELES (OCT. 11) PR NEWSWIRE - Tekelec (NASDAQ: TKLC) today announced that it has completed the acquisition of the assets of the test equipment business of Hard Engineering Inc.

ETelec designs, manufactures and markets test systems worldwide for data communications, telecommunications and integrated voice/data communications devices and networks. The acquisition enables the company to expand its telecommunications protocol and T1 test products to include portable, field service test systems.

Tekelec now believes it offers the broadest line of intelligent digital network test systems worldwide, ranging from high performance test systems for the developer to portable field service products for network managers.

#90284p3563 10/11/1990 ~PR Newswire

MOUNTAIN VIEW (OCT. 11) PR NEWSWIRE - "You gotta see it to believe it," said one of the 225 Sacramento testers of a revolutionary new television service.

David B. Lockton, president of Interactive Network, a Mountain View- based company, announced today the results of its six-month field trial of its patented interactive television system.

This unique system allows a television viewer to participate with their favorite television sports and quiz show programs using a wireless, hand-held Interactive Control. While watching the program, the viewer can predict the next play in a football game, answer a quiz show question or guess the winners of the Emmy awards. Each answer adds points to the player's score which, at the end of the game, is sent to Interactive Network's computers to determine the interactive winner of competitive contests.

"Eighty-two percent of the likely purchasers of the service said that it changed their overall viewing habits," said Lockton. Typical consumer responses included, "It challenges me to think more," "I like the fact of participating with my television, also the competitiveness of it all," "This is wholesome entertainment."

"The results of this test confirm Marshall McLuhan's claim that television is a participatory medium," said Lockton.

A viewer rating log was kept for all the interactive programs throughout the test based on the participants' daily diaries. Viewership ratings were two to five times higher than the Nielsen's using a methodology which was developed jointly with A.C. Nielsen, an investor in Interactive Network.

"Interactive television programs not only attract more viewers through renewed interest, but also encourage significant crossover in viewer habits," said Lockton. "There are viewers who did not formerly watch 'Jeopardy!(TM)' at all for example, but now find the interactive version addictively engaging."

Interactive Network Inc., plans to introduce the patented interactive television system in Northern California by early 1991. The market introduction will include all of California by fall of 1991. Here are some of the key findings:

-- 78 percent are either "very" or "somewhat" likely to pay a minimum of $20 per month for interactive television.

-- 51 percent were "extremely interested" ("10" on a 10 scale) in buying one or more tiers of service.
-- The group played and scored nearly six times more frequently than Interactive Network expected. One tester has played and scored over 1,000 different games.
-- Of the expected customers, 75 percent now watch more game shows and 54 percent now watch more sports, interactively.
-- 94 percent of them say that the Interactive Network system "enhances" the experience of viewing game shows while 66 percent say that it "enhances" watching sports.
-- 43 percent said they would "subscribe" to basic cable or upgrade to premium cable channels if it provided the opportunity for more interactive programming.

This independent market research was administered by DAC Research, San Francisco, Calif. the information was collected throughout the test using daily diaries, focus groups, customer service inquiries, field service reports computerized scoring calls, and lengthy self-administered questionnaires.

"Initial interest," said Lockton, "was from the adult member of the household. But once the Interactive Control was in the house, everyone, kids included, wanted to play. Clearly, we've touched a nerve in the behavior of an interested group of television viewers. They became very attached to their control and changed the way, possibly forever, that they watch television. For these people, Interactive Television is a passionate, not passive medium."

Throughout the test, Interactive Network operated 15 hours a day, seven days a week. A partial list of programs included Baseball, Basketball, Football, "Wheel of Fortune (TM)," "Jeopardy! (TM)," and "Family Feud (TM)."

CONTACT: Anne Doremus of Interactive Network, 415-960-1000; or Alison Holt Brummelkamp of Berkhemer Kline Golin/Harris, 213-623-4200, for Interactive Network.

#90284p3564 10/11/1990 ~PR Newswire

HAYWARD, CA (OCT. 11) PR NEWSWIRE - Nellcor Inc. (NASDAQ: NELL) today reported revenue of $34.3 million and net income of $2.6 million (17 cents per share) for the first quarter of fiscal 1991, ended Sept. 30, 1990. Revenue in the first quarter of fiscal 1990 was $30.3 million and net income was $2.5 million (17 cents per share).

The increase in revenue this quarter over the same period a year ago principally reflects continued growth in sales of adhesive sensors and shipments of the N-2500 anesthesia safety monitor and the N-1500 anesthetic agent module. These monitors were not on the market in the fiscal 1990 first quarter. International revenue increased, primarily in Europe, to $6.3

million from $3.7 million in the first quarter of fiscal 1990.

Revenue increased 13 percent this quarter compared to the first quarter of fiscal 1990 but was somewhat lower than expected. In September, some hospitals in the United States did not make planned capital equipment purchases in order to reassess their spending plans in light of uncertainty over federal Medicare funding and rising fuel costs. International revenue increased 70 percent this quarter over the same quarter last year as the company experienced strong demand for its products in Europe.

As expected, both revenue and net income for the first quarter were lower than the record levels of the fiscal 1990 forth quarter. These results are due in part to lower backlog in North America at the end of the fiscal 1990 fourth quarter, the seasonal nature of the demand for the company's products and the uncertain economic conditions facing U.S. hospitals. In contrast, operating expenses improved to $15.3 million from $16.4 million in the fourth quarter of fiscal 1990, primarily due to lower selling expenses in North America.

Nellcor Inc., founded in 1981, designs, manufactures and markets high-performance monitoring equipment for patient safety and management in operating rooms, recovery rooms, intensive care units and other hospital sites. Nellcor is the leading producer of pulse oximeters used in hospitals for the continuous measurement of patient oxygen status.

#90284p3565 10/11/1990 ~PR Newswire

EL SEGUNDO, CA (OCT. 11) PR NEWSWIRE - Infonet, the leading international value-added network services company, today announced that it has acquired a majority ownership interest in Osiware International by purchasing 67 percent of the firm's shares.

Headquartered in Paris, Osiware International is the parent company which owns and operates Osiware software marketing, development and research organizations focusing on open systems interconnection (OSI) technology. Osiware's shareholders are now Infonet, the Osiware management team and two system integration firms, Inforgal of Portugal and Intercom Data Systems Ltd. of Great Britain.

Osiware offers software products for X.400 messaging, X.500 directory systems, electronic data interchange (EDI) and related OSI-based store and forward solutions such as interconnectivity and message handling systems.

"The core Osiware development team in Vancouver, Canada, will help us further enhance and expand our own Notice 400 family of X.400 products," said Jean-Noel Moneton, vice president of product management for Infonet and newly

appointed chairman of Osiware. "In addition, we will leverage Osiware's expertise in developing our forthcoming messaging products and services, including an X.500 directory. Infonet will in turn give Osiware key international technical and marketing support and financial backing."

Under the terms of its agreement with Infonet, Osiware will continue to function as a separate and independent corporation. "As a new distribution channel for our products, Infonet will help us increase our present stronghold in North America and enlarge our market share in Europe and Asia," explained Robert C. Mealey, Osiware's director of marketing and sales for the United States and Canada. "The additional resources provided by Infonet will also put us in an even better position to meet the needs of our existing client base and system integrators."

Osiware's Vancouver office provides direct sales and services for the firm's North American customers. The company has also developed relationships with a worldwide network of system integrators. These integrators include: HTS HiTech in Canada, Disel and Telefonica Sistemas in Spain, Derieux in France, Cap Gemini Pandata in The Netherlands, Intercom Data Systems Ltd. in Great Britain, Inforgal in Portugal, Intec in Japan, Interep in Switzerland and KCOM in Korea.

According to Moneton, this worldwide network of system integrators will provide a valuable service to Infonet's NOTICE 400 customers who want to implement mail-enabled applications in remote global locations. In some instances, NOTICE 400 users may, for example, wish to integrate their E-mail software with their inventory and order entry applications.

Established in 1970, Infonet is the leading standards-based international value-added network services company. It provides and directly supports communication and computer services worldwide. The company is jointly owned by MCI (NASDAQ: MCIC) and 10 major telecommunication administrations in Europe and the Asia-Pacific.

#90284p3566 10/11/1990 ~PR Newswire

LOS ANGELES (OCT. 11) PR NEWSWIRE - Tekelec (NASDAQ: TKLC) today announced the ChameLAN 100, a specially designed test system which provides complete monitoring and statistical analysis for high speed FDDI (Fiber Distributed Data Interface) networks.

FDDI product developers can use the ChameLAN 100 to test and diagnose problems in their products, evaluate network performance and resolve interoperability

issues in a network environment. Network managers can use the new tester to evaluate, install and maintain FDDI products. Developers can use the ChameLAN 100 to interpret FDDI protocols such as MAC and SMT, and such higher level protocols as TCP/IP and OSI.

The ChameLAN 100 was designed to meet FDDI's high performance power requirements and those of future technologies. It features an industry standard user interface which runs over X Windows and UNIX. Its state-of-the-art hardware design includes a front-end RISC Transputer. It also includes up to 200 MB built-in hard disk. The ChameLAN 100 is the first test system to incorporate a thin film transistor flat color display which provides high resolution graphics. Tekelec's future plans include options for FDDI network node simulation, load testing and conformance testing.

"Tekelec continues to design and market test products addressing leading edge communications," said Peter N. Vicars, president and chief executive officer. "With FDDI, we are expanding our Chameleon data products line beyond WAN and ISDN to include LAN and high speed broadband technologies."

Tekelec co-developed the ChameLAN 100 as part of the Interop FDDI network showcase. Shipments are expected to begin during the first quarter of 1991. Pricing for the system starts at $36,000.

Recognized as a leading test equipment manufacturer, Tekelec's product line encompasses testing of data protocols (ISDN, X.25, OSI) FDDI Local Area networks, transmission services and equipment (T1, Fractional T1, DDS, T3), signalling (SS7), cellular (GSM), and emerging intelligent network applications. Its products are marketed worldwide through its subsidiaries in Japan and the United Kingdom, and distributors.

ROCHESTER, NY (OCT. 11) PR NEWSWIRE - Bausch & Lomb (NYSE: BOL) today announced it has signed a contract with the International Olympic Committee to become a worldwide sponsor of the 1992 Olympic Games in Albertville, France, and Barcelona, Spain.

Under terms of the contract, Bausch & Lomb was awarded exclusive marketing rights in eight product categories: soft and rigid gas permeable contact lenses, contact lens care products, general eye care products, sunglasses, prescription eyewear frames, sports optics products and specified oral care products.

Designation as a TOP (The Olympic Program) sponsor provides Bausch & Lomb with a comprehensive association with the Olympics including the right to use Olympic symbols and mascots in advertising, sales promotion and publicity in more than 100 countries.

"Bausch & Lomb's decision to become a TOP Sponsor reflects our commitment to worldwide healthcare and optics markets," said Thomas C. McDermott, president and chief operating officer. "We intend to leverage the Olympic connection globally with a wide range of marketing programs that serve the interests of our customers -- including healthcare professionals, distributors, retailers and consumers -- as well as our employees."

Bausch & Lomb completes a field of 12 TOP sponsors including Coca- Cola, Kodak Visa, 3M, Matsushita, Mars, Philips, Ricoh, Brother, Time/Sports Illustrated and the U.S. Postal Service.

Headquartered in Rochester, N.Y., Bausch & Lomb manufactures prescription and over-the-counter healthcare products for ophthalmic, optic and dental use, as well as consumer optical products. Bausch & Lomb is the category leader in each of its established businesses, with well-recognized brands including Ray-Ban, ReNu, Boston, Bushnell and Interplak.

Founded in 1853, Bausch & Lomb has marketing and manufacturing operations in 25 countries, and its products are also distributed in more than 70 others.

LOS ANGELES (OCT. 11) PR NEWSWIRE - Carter Hawley Hale Stores Inc. (NYSE: CHH) today reported sales for the five weeks ended Oct. 6, 1990, were $257.4 million, a decrease of .2 percent from the $258.0 million recorded in the comparable prior year. The company also reported sales for the 35 weeks ended Oct. 6, 1990, were $1,671.4 million, an increase of .6 percent from the $1,661.2 million recorded in the same period last year. On a comparative store basis, sales were down 1.3 percent in September and flat for the 35 weeks.

Sales for the first two months of the company's fiscal year ended Oct. 6, 1990 were $457.2 million, an increase of .4 percent from the $455.4 million reported in the same period last year. On a comparative store basis, sales were down .7 percent for the period.

Carter Hawley Hale operates 114 department stores under the names of The Broadway-Southern California, The Broadway-Southwest, Emporium, Thalhimers and Weinstocks.

COLUMBUS, OH (OCT. 11) PR NEWSWIRE - The Limited, Inc. (NYSE/LSE/TSE: LTD) reported net sales for the September fiscal month ended Oct. 6, 1990 of $459.3 million, an increase of 10 percent from sales of $416.1 million for the same period in 1989. Sales of $3.129 billion for the eight months ended Oct. 6 increased 17 percent from the same period last year, excluding results of Lerner Woman.

The company's comparable store sales decreased 3 percent in September 1990 and increased 5 percent for the eight months ended Oct. 6, 1990.

As a result of the softening retail environment, margins in the third quarter are expected to be somewhat lower than last year. However, current inventory levels are on plan, merchandise deliveries have been carefully reviewed and the business is well-positioned to achieve expected fourth quarter sales.

The Limited, Inc., through the Limited, Express, Victoria's Secret, Henri Bendel, Lerner New York, Lane Bryant, Abercrombie & Fitch and Penhaligon's, presently operates 3,355 specialty apparel stores and distributes apparel nationally through the Victoria's Secret, Lerner Direct, Lane Bryant Direct and Roaman's catalogues.

WESTBORO, MA (OCT. 11) PR NEWSWIRE - Visual Technology, a Hembrecht & Quist Company, is pioneering a new level of security in the X terminal market by offering Smart Card technology security systems integrated with its family of X Display Stations. Visual is working with Dial-Guard to integrate the two technologies.

The agreement between Visual and Dial-Guard will result in the first X terminals anywhere which offer the level of security available only with Smart Card technology and data encryption. For the first time, user organizations can be assured of virtually complete data security by providing each X terminal user, regardless of where that user is located, with an individual authentication password based on three criteria: what the user knows about the information resident in the database; what hardware the user has; and where the user is physically located.

Ronald A. Smith, president and chief executive officer of Visual, explained, "Organizations in every industry are faced with the crucial challenge of finding efficient new ways to get sophisticated data to the people who need it while protecting that data from the threat of security breaches, both from without and within. By offering our X Display Station customers the Dial-Guard Smart Card technology, Visual provides the industry's most advanced X Windows technology integrated with a totally new level of data security."

Donald L. Mandell, vice president of sales and marketing at Dial-Guard, explained, "In the finance industry, for example, electronic funds transfer occurs every day. People can tap into communications and change the value of dollars or filter dollars off and move them to unauthorized accounts. For the first time, organizations can use Visual's X Display Stations with Dial-Guard to protect their funds transfer systems from unauthorized activity. They will also get realtime monitoring on who is accessing a system, what they are allowed to access, and encrypt this information."

Ronald A. Smith of Visual added that in cases in which a company employs outside programmers who need access to the databases and mainframes, the company needs to protect itself against potential data security breaches. By integrating the Dial-Guard Smart Card technology with Visual's X terminals, companies will be able to offer their users the benefits of X technology, and keep sensitive data secure at the same time.

The Dial-Guard Smart Card/Authenticator System The Dial-Guard security system provides a layer above standard computer security. Dial-Guard allows companies to monitor who is accessing a mainframe database, from which point they enter, and when they leave it. It also monitors unsuccessful login

attempts and generates management reports. It integrates the user-friendly Smart Card/Authenticator with Dial-Guard's system security software to provide access control for PCs, host computers, and enterprise-wide networks. To access a Dial-Guard-protected Visual X Display Station, the user signs on and inserts the Smart Card into the Dial-Guard Authenticator. The systems then performs a transparent challenge and response dialog to validate both the Authenticator and the encrypted user password which is stored in the card. Once the user is authenticted, Dial-Guard's systems establishes encryption keys and a password in the card for use during the next user session login or reauthentication. The Dial-Guard security system is installed in organizations including the Bank of Bermuda, Mellon Bank, Sovran Financial Corporation and at the federal government level. Dial-Guard also has an OEM agreeement with Bull HN Information Systems Inc.

AKRON, OH (OCT. 11) PR NEWSWIRE - The BFGoodrich Company (NYSE: GR) announced today that it intends to repurchase shares of its common stock. The repurchase will occur under an existing authorization from the company's board of directors. The authorization, granted in January 1988, permits the company to hold in its treasury up to 10 percent of its issued common shares.

The company intends to make the purchases over a period of time, primarily in the open market. The timing of the purchases and the actual number of shares to be repurchased will depend on market conditions. Goldman, Sachs & Co. will act as exclusive agent for these purchases.

"The repurchase of our shares represents a sound, long-term investment and, because of our excellent financial condition, does not compromise our ability to make strategic investments that will continue to strengthen our businesses " John D. Ong, BFGoodrich chairman and chief executive officer, said.

BFGoodrich is a major producer of plastics and specialty chemicals and supplies components and services to the aerospace industry.

DOMINGUEZ, Calif. (OCT. 11) PR NEWSWIRE - Pic 'N' Save Corp. (NASDAQ: PICN) announced today that its sales for the five weeks ended Sept. 30, 1990 were $37,018,000, down 5.2 percent from $39,031,000 in the prior year. Sales for the 35 weeks ended Sept. 30, 1990 were $300,391,000, up 10.1 percent from $272,915,000 in the prior year. Sales in comparable stores for the month of September decreased by 3.9 percent and increased by 2.2 percent for the year to date.

The company also announced that since the start of 1990 through Oct. 10, it had purchased 4,167,500 shares in open market transactions as part of its previously announced share repurchase program. The company now has 31,641,044 shares outstanding.

During September, Pic 'N' Save opened a total of six stores with the trade name "The WOW! Store," three in Miami, two in Tampa/Clearwater, Fla., and one in Mobile, Ala., bringing the total number of stores in operation at the end of the month to 182.

"We are particularly pleased with the grand opening sales results in our new Florida markets," said William M. Jacobs, Jr., senior vice president, chief financial officer. "While sales trends since mid-August in our established markets, particularly Southern California, have remained soft, we have seen some improvements in the most recent 10 days as our holiday/seasonal inventories have begun to arrive in our stores."

The company, through its subsidiary, PNS Stores Inc., operates a chain of 182 retail stores in the West and the South. These stores all specialize in new, closeout, variety general merchandise which is sold at substantial reductions from original retail prices.

GRAND RAPIDS, Mich. (OCT. 11) PR NEWSWIRE - Gantos, Inc. (NASDAQ: GTOS) today reported sales of $24.7 million for the five-week period ended Oct. 6, 1990, an increase of 5 percent from sales of $23.5 million for the comparable period of 1989. The company's comparable store sales decreased 9 percent in September 1990, reflecting a continuation of the difficult retail environment experienced for the past several months.

For the 35 weeks ended Oct. 6, 1990, Gantos sales were $163.1 million. This represents an increase of 13 percent over sales of $143.8 million during the same period in 1989. Comparable store sales year to date through Oct. 6, 1990 declined 1 percent from the 1989 period.

Gantos, Inc. is a leading retailer of quality women's wear. The company currently operates 161 stores in 25 states.

#90284p3592 10/11/1990 ~PR Newswire
NAPERVILLE, ILL. (OCT. 11) PR NEWSWIRE - First Midwest Bancorp, Inc. (NASDAQ: FMBI) has reported that net income from continuing operations increased for both the quarter and nine month period ending Sept. 30, 1990.

Net income from continuing operations for the quarter increased to $5.880 million or $.47 per share from $5.612 million or $.45 per share for the like quarter of 1989, an increase of 4.8 percent. And for the nine months, net income from continuing operations increased to $16.859 million or $1.34 per share, from $15,655 million or $1.25 per share for the like period of 1989, an increase of 7.7 percent.

Net income from continuing operations for the nine month period of 1989 does not include after-tax gains totaling $3.135 million, or $.25 per share, realized last year from the sales of a bank and a bank branch. Additionally, all results have been restated to include the recent acquisition of Plainfield National Bank which was accounted for on a pooling of interests basis.

First Midwest Bancorp, Inc. (NASDAQ: FMBI) has reported that net income from continuing operations increased for both the quarter and nine month period ending Sept. 30, 1990.

Net income from continuing operations for the quarter increased to $5.880 million or $.47 per share from $5.612 million or $.45 per share for the like quarter of 1989, an increase of 4.8 percent. And for the nine months, net income from continuing operations increased to $16.859 million or $1.34 per share, from $15,655 million or $1.25 per share for the like period of 1989, an

increase of 7.7 percent.

Net income from continuing operations for the nine month period of 1989 does not include after-tax gains totaling $3.135 million, or $.25 per share, realized last year from the sales of a bank and a bank branch. Additionally, all results have been restated to include the recent acquisition of Plainfield National Bank which was accounted for on a pooling of interests basis.

The quarter's improved performance resulted primarily from an increase in net interest income relatable to a significant growth in average earning assets offset, in part, by a reduction in net interest margin. The growth in earning assets was funded by retail deposit growth experienced across all First Midwest banks. As these funds are deployed into higher yielding assets net interest margins are projected to return to the higher levels previously enjoyed.

While down for the nine month period, other operating expenses increased during the quarter primarily as a result of the incurrence of certain nonrecurring expenses. Management believes that other operating expenses continue to be well controlled and anticipates improvement in this category in the fourth quarter.

The quarter's provision for loan losses of $1.988 million was comparable with the first quarter's $2.278 million and second quarter's $1.893 million. At Sept. 30, 1990 the reserve for loan losses stood at 1.36 percent of net loans, up from 1.32 percent a year ago and 1.33 percent at the beginning of the year.

The level of problem assets improved during the quarter with nonperforming assets plus loans past due 90 days or more declining 6.5 percent from the June 30, 1990 peak levels. Further improvement is projected during the remainder of the year.

With total assets of $2.3 billion, First Midwest Bancorp is one of Illinois' largest bank holding companies operating 33 banking and five trust offices in northern Illinois.

#90284p3593 10/11/1990 ~PR Newswire

KALAMAZOO, MI (OCT. 11) PR NEWSWIRE - Stryker Corporation (NASDAQ-NMS: STRY) reported today that net sales for the third quarter ended Sept. 30, 1990, were $67,636,000, representing a 24 percent increase over sales of $54,668,000 in the third quarter of 1989. Net earnings before extraordinary item for the quarter increased 20 percent to $5,650,000 from $4,695,000 in 1989, and net earnings per share before extraordinary item increased 20 percent to 24 cents from 20 cents.

An extraordinary gain of $9,910,000, equal to 42 cents per share, relating to the settlement of patent litigation increased net earnings to $15,560,000 and net earnings per share to 66 cents for the third quarter of 1990.

During the first nine months of 1990, net sales increased 23 percent to $202,969,000 from $165,372,000 last year. Net earnings before extraordinary item were $17,485,000, equal to 74 cents per share, compared to $14,360,000, or 61 cents per share, in 1989, representing a 22 percent increase in net earnings before extraordinary item and a 21 percent increase in net earnings per share before extraordinary item. The extraordinary gain increased net earnings to $27,395,000 and net earnings per share to $1.16 for the first nine months of 1990.

Sales of surgical products increased 31 percent in the third quarter and 26 percent for the first nine months of 1990 compared to the prior year periods. The leading surgical sales gains came from Osteonics orthopaedic implants, arthroscopy products and powered surgical instruments.

Sales of medical products declined 3 percent in the third quarter and increased 12 percent for the first nine months of 1990 compared to the prior year periods. The incoming order rate for medical products in the third quarter was very strong across the entire product line.

International sales increased to 30 percent of total sales in the first nine months of 1990 compared to 29 percent last year. The strong international sales growth of 27 percent during the first nine months of the year was led by Osteonics orthopaedic implant, arthroscopy and powered instrument sales by the company's European operations.

Stryker Corporation develops, manufactures and markets specialty surgical and medical products including orthopaedic implants, powered surgical instruments, arthroscopy systems and patient handling equipment for the world market.

MINNEAPOLIS (OCT. 11) PR NEWSWIRE - Infinite Graphics Incorporated (NASDAQ: INFG) today announced results for the first quarter ended July 31, 1990.

Sales for the first quarter ended July 31, 1990, were $1,011,003 compared to $1,750,234 for the same period last year. The company reported a net loss of $439,715 for the three months ended July 31, 1990, compared to a net loss of $253,264 for the same period last year.

During the first quarter of fiscal 1991, the company concentrated on its reorganization plan, which was to focus on sales to the printed circuit board industry and restructure its debt. The company has been able to restructure its bank debt and continues to try to restructure some leases. Sales and interest in the company's products to the printed circuit board industry has increased over last year and is expected to continue.

Infinite Graphics Incorporated is a total solutions precision graphics company that has served the engineering and manufacturing marketplace since 1969. Infinite Graphics develops and markets engineering graphics services and products for precision graphics and printed circuit board: manufacturing, design and testing.

Headquartered in Minneapolis, the company markets its services and products in the United States, Canada, and Western Europe.

#90284p3599 10/11/1990 ~PR Newswire

MINNEAPOLIS (OCT. 11) PR NEWSWIRE - Dayton Hudson Corporation (NYSE: DH) today reported that its net retail sales for the five weeks ended Oct. 6, 1990 increased 11.3 percent to $1.23 billion from $1.10 billion a year ago.

Comparable-store sales were down 2.0 percent on the 1990 accounting calendar. Comparable-store sales on an adjusted exact week comparison were up 2 percent.

Kenneth A. Macke, chairman and chief executive officer, said the corporation saw a slowdown in sales during September. "Our apparel- oriented Mervyn's and Department Store strategies saw more softening in sales and an increase in promotions. Target's business, which is more commodity oriented, was stronger.

"With the uncertainty in the economy, we are less optimistic about sales and earnings in the fall season," Macke said.

"Given the calendar shift this year, it's most meaningful to look at the results for August and September combined," Macke said. "Total sales for the two-month period were up 15.4 percent and comparable-store sales were up 2.7 percent."

September sales by business segment for the five weeks were as follows: - Target's total sales rose 7 percent while comparable-store sales were up 3 percent. On an exact week comparison, Target's total sales were up 10 percent and comparable-store sales were up 5 percent.

- Mervyn's total sales decreased 4 percent and comparable-store sales decreased 6 percent. On a exact week comparison, Mervyn's total sales were up 1 percent and comparable-store sales decreased by less than 1 percent.

- The Department Store Division's total sales were up 59 percent and comparable-store sales were down 8 percent. On an exact week comparison, the Department Store Division's total sales were up 62 percent and comparable-store sales were down 3 percent. (The total sales increase for department stores primarily reflects five weeks' sales from Marshall Field's; the comparable-store sales number includes Field's, this year and last.)

During the month, Target opened its experimental super store, Target Greatland in Minnesota. Early results are very positive.

The Corporation's sales for the 35 weeks ended Oct. 6 were $8.57 billion, up 13.4 percent from $7.56 billion in the same period a year ago. Comparable-store sales for the 35 week period were up 4.8 percent.

As of Oct. 6, 1990, Dayton Hudson operated 696 stores in 33 states. NOTE: 1989 numbers exclude Lechmere, which was sold, effective Sept. 30, 1989.

DETROIT LAKES, MINN. (OCT. 11) PR NEWSWIRE - Dynamic Homes, Inc. today announced that it received approval for a $400,000 economic development funding package from state and regional agencies, the city of Detroit Lakes, and its board of directors. The company said it expects to receive the funds before Dec. 31, 1990.

The company will use approximately $120,000 of these funds for upgrading transportation equipment, while the remaining $280,000 will be used to finance growth.

The $400,000 package consists of loans from the Minnesota Department of Trade and Economic Development, the West Central Initiative Fund, the Detroit Lakes Development Authority, and $100,000 from the company's board of directors.

David K. Knudson, Dynamic's president, said, "On behalf of Dynamic Homes, I want to extend our sincere thanks to everyone involved with this program. These funds will create new jobs, spur Dynamic's growth and generally strengthen our company. This will be good for our community, our region and our shareholders."

Dynamic Homes is a leading regional builder of modular single-family homes, multi-family dwellings and commercial structures. The company's products are marketed through a network of builder-dealers in Minnesota, Iowa, North Dakota South Dakota, Wisconsin and Wyoming. The company's stock is traded on the local over-the-counter market.

#90284p3602 10/11/1990 ~PR Newswire

LAWRENCEVILLE, NJ (OCT. 11) PR NEWSWIRE - Imo Industries Inc. (NYSE: IMD) today announced that its board of directors has authorized an extension of the company's stock buy-back program to 1,750,000 shares of its outstanding common stock, up from the 1,000,000 shares previously authorized.

Since its original authorization in January the company has acquired 713,100

of its shares, and at this time has 17,647,866 shares outstanding.

Third period results of the Instruments Group were negatively impacted by second quarter adjustments which set a major portion of the electro-optical operation's backlog at the break-even level for the balance of the year. As a result, group operating margins were below historic levels. Deliveries within the electro-optical operations scheduled for the fourth quarter, primarily to customers outside of the United States, should result in significant operating income improvement.

Vacation period closing of the Roltra-Morse plants in Italy was a substantial factor in reducing the Controls Group's sales and earnings compared with the second quarter. Competitive pressures, and a continuation of depressed pleasure marine markets both in the United States and Europe, will continue to limit performance in the fourth quarter.

The move of the Power Transmission Group's Boston Gear production activities from Quincy, MA to a modern, efficient facility in Charlotte, NC was largely completed during the third quarter as planned. Manufacturing has commenced at the new location. During the quarter an unfavorable mix of pump repair work was experienced. The outlook for this Group is for moderate recovery of revenue and margin in the fourth quarter.

In the Power Products and Services Group, aftermarket maintenance and repair operations were relatively flat with some pick-up noted toward the end of the quarter. Rotating machinery unit business was good, although delivery of gas turbine units of the type which attractively benefitted the second quarter did not occur. Major units with favorable margins are scheduled for shipment in the fourth quarter. In conclusion, Holcombe stated, "It is now apparent that the convergence of a number of internal and external circumstances will hold IMO's 1990 earnings below those of 1989. The underlying strength of our company, however, is emphasized by the fact that our operating income for 1990 is expected to exceed that of last year despite the severe decline in year-to-year earnings of our electro-optical operations.

IMO supplies analytical and optical instruments, electronic and mechanical controls, engineered power products and their support services to industrial and defense customers worldwide.

#90284p3604 10/11/1990 ~PR Newswire

TROY, MICH. (OCT. 11) PR NEWSWIRE - Kmart Corporation (NYSE: KM) today reported a sales increase of 10.2 percent for September 1990 over sales during the same period of last year. Consolidated sales for the five-week period ended Oct. 3, 1990 amounted to $2,817,601,000 versus sales of $2,556,627,000

for the five weeks ended Oct. 4, 1989.

Sales for the 35 weeks ended Oct. 3, 1990, were $19,979,913,000, up 11.9 percent from the $17,851,773,000 for the first 35 weeks of 1989.

Kmart Chairman of the Board and Chief Executive Officer Joseph E. Antonini said, "Sales of basic commodity categories of merchandise, as well as pharmacy products, were generally good during September, more than offsetting some weakness in apparel sales caused by unseasonably warm weather and lower sales in electronics and other big-ticket categories, undoubtedly reflecting consumer caution stemming from Persian Gulf developments. In-stock positions and the availability of seasonal merchandise are much better than a year ago, and the reduction in prices on several thousand items is stimulating store traffic.

Kmart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. Kmart, currently operating 2,331 Kmart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse Clubs and The Sports Authority.

Preliminary Report of
KMART CORPORATION ESTIMATED CONSOLIDATED SALES

	5 WEEKS ENDED 10/03/90	35 WEEKS ENDED 10/03/90

HARTSVILLE, SC (OCT. 11) PR NEWSWIRE - Sonoco Products Company's (NASDAQ-NMS: SONO) third quarter financial results included a one-time charge to earnings announced by the company in August. "We are restructuring several operations to improve Sonoco's cost and competitive positions and taking other actions that will allow us to better utilize our resources for future growth in the packaging industry," said president and chief operating officer Russell C. King, Jr. As previously announced, the plan will eliminate approximately 500 jobs throughout Sonoco's worldwide operations. When complete, ongoing annual savings from the restructuring are expected to be approximately $20 million pre-tax, or about $.28 per share after-tax. The up-front cash impact of the restructuring will be neutral due to the tax benefit from large non-cash write-offs. Ongoing annual after-tax cash flow will be enhanced by approximately $10 million.

Earnings from ongoing operations in the third quarter of 1990, before the one-time charge, amounted to $.59 per share, level with the third quarter of

1989. After the restructuring charge of $75 million pre-tax, or $55 million after-tax, a net loss of $28.9 million or $.66 per share was recorded for the quarter. Sales of $415.6 million were up 3.2 percent from the third quarter of 1989.

For the nine months, sales were $1,239.8 million compared with $1,251.1 million in the same period in 1989. Adjusting for the April 1989 merger of Sonoco's plastic bottle operations with Graham Container Company, sales on a comparable basis were us 2.5 percent. Excluding the one-time restructuring charge, nine month earnings were down 1 percent from the same period in 1989. After the charge, earnings for the nine month period were $23.5 million, or $.54 per share.

DALLAS (OCT. 11) PR NEWSWIRE - JCPenney stores and catalog sales for the five weeks ended October 6, 1990, amounted to $1,302 million, down 2.3 percent from $1,334 million in the same 1989 period. On a comparable store basis, that is stores open at least a year, sales decreased 3.4 percent.

Commenting on September's performance, William R. Howell, chairman of the board, said that sales gains of such large volume entities as women's dresses and men's suits were not sufficient to offset the slower pace of business in other merchandise categories.

For the 35 weeks ended Oct. 6, 1990, sales of JCPenney stores and catalog rose 2.5 percent to $9,168 million from $8,945 million for the same period a year ago. On a comparable store basis, sales were up 1.4 percent.

BOULDER, CO (OCT. 11) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ-NMS: CELL), the Colorado-based biotechnology firm specializing in the development of biologic response modifier (BRM) technology, today announced the formation of an alliance with Dexon Limited, a rapidly growing Israeli-based pharmaceutical company.

Cell Technology and Dexon have agreed to clinically develop, test and ultimately commercialize ImuVert(R), Cell's principal anticancer BRM, in Israel. Dexon is the third largest pharmaceutical manufacturer headquartered in Israel. The parties have agreed to refrain from disclosing the economic terms of the agreement.

Commenting upon the significance of this transaction, Cell Technology's Chairman and President W. Terrance Schreier noted, "This clinical development and commercialization relationship with Dexon and Cell underscores the importance of the further development and deployment of our company's BRM technology throughout the world. Dexon and various prestigious Israeli medical centers will participate in these important scientific and clinical development ventures which will further the commercial viability of ImuVert in an important market. We think this is an outstanding achievement and are proud to co-partner ImuVert with Dexon in Israel."

Cell Technology, Inc., is a biotechnology company specializing in the field of immunotherapy. The company's innovative BRM products are being developed to activate the body's own immune response to fight cancer, viral infections, and to act as a general immunomodulating agent.

BOWLING GREEN, OH (OCT. 11) PR NEWSWIRE - Mid Am, Inc. (NASDAQ: MIAM) announced today that it has completed its acquisition of Home Saving and Loan Association, Defiance, Ohio, in a transaction whereby the thrift will be operated as a wholly owned subsidiary of the holding company. Mid Am expects to transfer all assets and liabilities of Home Saving to its Bryan, Ohio-based affiliate, First National Bank Northwest Ohio, in November of this year, and thereafter operate the combined entities as a commercial bank.

Mid Am, Inc. will significantly strengthen Home Saving with the infusion of additional capital, management assistance, product and operational resources and financial strength. After the transaction, the holding company will have total assets of more than $1.1 billion and total equity capital of $72.4 million.

Mid Am, Inc. operates 52 offices in northwest and west central Ohio through its affiliates: Mid American National Bank and Trust Company, Bowling Green, Ohio; First National Bank Northwest Ohio, Bryan, Ohio; The Farmers Banking Company, N.A., Lakeview, Ohio; The Citizens Loan and Building Company, Lima, Ohio; and Home Saving and Loan Association, F.A., Defiance, Ohio.

MAYNARD, MASS. (OCT. 11) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) today announced it has received a five year, $28 million dollar contract from the diversified British retailer W. H. Smith to supply and run the company's computer network. Digital will manage the system and provide the network linking W. H. Smith's stores and distribution centers with its administrative offices. W. H. Smith has nearly 2100 outlets in Great Britain, the U.S. and Canada.

According to Martin Cutler, W. H. Smith divisional director, information services division, based in London, "We chose Digital for their expertise and because they have the resources to provide the service we need to support our business through the 90s. Digital has an excellent track record in communications and they are committed to Open Systems."

Digital will replace the existing W. H. Smith network with a Managed Data Network Service (MDNS), layered on Digital's own Integrated Digital Network (IDN). W. H. Smith will be linked to their current Digital network with switching equipment installed at sites around Britain. This will free them from the costs and level of expertise required on staff to manage their own network and will yield an estimated savings of nearly $6 million dollars.

According to Digital Vice President William M. Steul, whose group focuses on service industries such as retailing, "This industry offers a significant opportunity for Digital in the 90's. The distributed structure of retailing - large numbers of stores and distribution centers spread out geographically - complements Digital's distributed computing architecture which locates computer power where it is needed most." Steul added, "Digital has developed state-of-the art corporate network technology to meet just this need."

In 1989, W. H. Smith asked Digital to submit a proposal for the management of their wide-area network. This network currently links over 450 sites, allowing access to applications running on ICL mainframes at Swindon, England and a Digital VAXcluster system at Bradford, England. Digital's aim is to reduce the costs of managing and maintaining this essential corporate network while incorporating the latest network technology and services.

Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

WASHINGTON (OCT. 11) PR NEWSWIRE - The Federal National Mortgage Association

(Fannie Mae) (NYSE: FNM) today reported net income for the third quarter of 1990 of $299.5 million, or $1.15 per share, fully diluted.

This compares with earnings of $211.9 million, or 80 cents per share, for the third quarter of 1989 and $289.6 million, or $1.10 per share, for the second quarter of 1990.

For the first nine months of 1990, Fannie Mae's net income was $865.7 million, or $3.31 per share. This compares with $570.1 million, or $2.17 per share, for the same period of 1989.

David O. Maxwell, chairman and chief executive officer of Fannie Mae, said: "Fannie Mae's 11th consecutive quarter of record earnings reflects the strength and stability of the company. We are encouraged that our acquisitions of foreclosed properties are down by 15 percent compared with the third quarter of last year, while our inventory of foreclosed properties has declined by more than 30 percent from its year-ago level."

Maxwell noted that even with the continued declines in foreclosures and inventory, the company increased its provision for loan losses to $80 million in the third quarter of 1990 from $75 million in the second quarter and $75 million in the third quarter of 1989.

"We have increased our loan loss provision in response to the strong growth in business volumes, particularly Mortgage-Backed Securities," Maxwell said.

MINNEAPOLIS (OCT. 11) PR NEWSWIRE - Best Buy Co., Inc. (NYSE: BBY) today reported sales for September 1990 (Sept. 2 through Oct. 6), the seventh period of the company's 1990-91 fiscal year.

According to Allen Lenzmeier, senior vice president/finance, September 1990 sales of $58 million were 35 percent more than the $43 million achieved for the comparable five week period last year. Year-to-date sales were $337 million, a 27 percent increase over $265 million for the comparable period last year. Comparable store sales increased 4 percent for September 1990 (41 of the company's stores are considered comparable).

Best Buy reports sales on a 5-4-4 week basis. Net income and earnings per share are disclosed quarterly. Best Buy is the fourth largest publicly held consumer electronics and major appliance retailer in the U.S. The company sells nationally recognized name brand consumer electronic products, 35mm photographic equipment, home office products, entertainment software, and major appliances at 53 stores located in Minnesota, Iowa, Wisconsin, South Dakota, Illinois, Kansas, Missouri, Nebraska, and Texas. Best Buy's common stock is traded on the New York Stock Exchange, symbol BBY.

HOUSTON (OCT. 11) PR NEWSWIRE - Enron Corp. (NYSE: ENE) announced today that Richard D. Kinder has been elected president and chief operating officer. Kinder was formerly vice chairman of Enron and chairman and chief executive officer (CEO) of Enron's Gas Pipeline and Marketing Group.

Kinder joined Enron in 1980 and has served in various management positions including senior vice president and general counsel and executive vice president and chief of staff. He holds undergraduate and legal degrees from the University of Missouri.

Ronald J. Burns will succeed Kinder as chairman and CEO of Enron's Gas Pipeline and Marketing Group. Formerly president of the Gas Pipeline and Marketing Group, Burns will continue to be responsible for Northern Natural Gas, Transwestern Pipeline, Florida Gas Transmission, Northern Plains Natural Gas, Houston Pipe Line and Enron Gas Marketing. He also will continue to serve on Enron's management committee and will report to the office of the chairman, which consists of Lay and Kinder.

Burns joined Enron in 1974 and has served as executive vice president of gas transportation, president of Enron Gas Marketing and president of Enron Interstate Pipelines. He holds an undergraduate degree from the Univ. of Nebraska at Omaha.

Enron also announced two additional promotions. Edmund P. Segner III has been promoted to senior vice president of investor, public and government relations for Enron Corp., and E. G. Parks has been promoted to senior vice president of finance and accounting for the Gas Pipeline and Marketing Group.

Segner formerly served as vice president of public and investor relations, a position he has held since he joined Enron in early 1988. Prior to that time, Segner served as a natural gas equity research analyst at Drexel Burnham Lambert. He also held management positions in planning, rates and regulatory affairs and financial relations at United Gas Pipe Line Company and United Energy Resources. Segner holds an undergraduate degree from Rice University and a graduate degree from the University of Houston. He will serve on Enron's management committee and will report to the office of the chairman.

Enron Corp., America's leading natural gas company with approximately $10 billion in revenues and $9 billion in assets, operates the nation's largest natural gas transmission system. The company also markets natural gas, gas liquids, crude oil and refined products nationally and worldwide and owns 84 percent of Enron Oil & Gas Company, one of the country's largest independent

(non-integrated) natural gas exploration and production companies. With extensive experience in combined heat and power installations, Enron is also one of the largest independent producers of electricity in the United States.

BOULDER, COLO. (OCT. 11) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ-NMS: CELL), the Colorado-based biotechnology firm specializing in the development of biologic response modifier (BRM) technology, today announced that it had reached a comprehensive joint research, clinical and licensing option agreement with Laboratories Andromaco, S.A. (Spain), a pharmaceutical company partially owned by Grunenthal GmbH of the Federated Republic of Germany.

Andromaco, a renowned European developer of BRM technology, has successfully developed a series of BRM products for anti-viral and anti- infectious indications, and as adjuvants in cancer treatments. Inmunoferon(R),

Andromaco's first BRM commercially available in Spain, Portugal and Mexico, and recently approved in South Korea, generates more than $10 million ($US) in revenues. Grunenthal, which owns a minority interest in Andromaco, is a leading German international pharmaceutical firm with consolidated revenues exceeding $600 million ($US). The parties have agreed to refrain from disclosing the economic terms of the agreement.

The formation of this joint research and clinical alliance involves an initial two year period of collaborative research and clinical testing by Cell Technology and Andromaco of Inmunoferon and ImuVert(R) by each of the parties, respectively. Andromaco has agreed to co- develop ImuVert, Cell Technology's anticancer BRM, for commercial therapeutic use in Spain, Portugal, Mexico and potentially other European countries. In tandem with this relationship, Cell has agreed to simultaneously develop Inmunoferon for clinical testing in viral diseases, mainly Chronic B Hepatitis and bone marrow restoration in cancer patients in the United States and Canada. Also, at the conclusion of these joint research and clinical activities, Cell and Andromaco have agreed in advance to negotiate cross licenses for ImuVert and for Inmunoferon whereby ImuVert would be commercialized by Andromaco in Spain, Portugal and Mexico and Inmunoferon would be commercialized by Cell in the United States and Canada.

Commenting upon the significance of this joint research alliance, Cell's Chairman and President, W. Terrance Schreier noted, "This joint arrangement involving Cell Technology and Andromaco signifies the importance of the developing field of BRM technology both in the United States and in Europe. Andromaco has been strategically positioned to develop and commercialize promising BRMs in the anti-viral and cancer fields. Our partnership with Andromaco cements our commitment to develop ImuVert in Europe and Inmunoferon in the United States."

Cell Technology, Inc. is a biotechnology company specializing in the field of immunotherapy. The company's innovative BRM products are being developed to activate the body's own immune response to fight cancer, viral infections, and to act as a general immunomodulating agent.

#90284p3641 10/11/1990 ~PR Newswire

LEXINGTON, MA (OCT. 11) PR NEWSWIRE - Raytheon Company (NYSE: RTN) today reported a 0.5 percent increase in earnings and a 1.4 percent increase in earnings per share, on a 2.4 percent increase in sales for the third quarter of 1990 compared with the same period last year.

Earnings were $138.0 million, or $2.11 per share, on sales of $2.241 billion.

In the third quarter last year, the company earned $137.3 million, or $2.08 per share, on sales of $2.189 billion.

These results include a $17.5 million before-tax provision, equivalent to $11.5 million after tax or $.18 per share, for the previously announced closing of the company's Caloric appliance manufacturing facility in Topton, Pa.

Excluding the Topton closing costs, third quarter earnings and earnings per share were $149.5 million and $2.29, increases of 8.9 percent and 10.1 percent respectively, versus the same period last year.

For the first nine months, earnings were $413.7 million, or $6.33 per share, on sales of $6.812 billion. In the same period last year, earnings were $391.8 million, or $5.94 per share, on sales of $6.552 billion.

"Four of our five business segments continued to grow," said Thomas L. Phillips, Raytheon chairman and CEO. "During the quarter, our Electronics, Aircraft Products, Energy Services, and Other Lines segments continued their strong operating performance."

Total backlog at the end of the quarter was $8.581 billion, including funded U.S. government orders of $6.193 billion. Total backlog at the end of last year's third quarter was $7.947 billion, including a government backlog of $5.905 billion.

#90284p3648 10/11/1990 ~PR Newswire

NORTHBROOK, ILL. (OCT. 11) PR NEWSWIRE - IMC Fertilizer Group, Inc. (NYSE: IFL) today reported net earnings of $23 million or 87 cents per share for the first quarter of fiscal 1990/91, ended Sept. 30.

That result compares with net earnings of $20 million or 76 cents per share for the same period a year ago.

Sales for the first quarter were $266.1 million, compared with $251 million for the same period last year.

"The performance achieved in the first quarter, represented a 15 percent improvement over the same period in 1989," according to Billie B. Turner, chairman and chief executive officer. "Since prices remain a key factor in improving bottom-line numbers, the gains made in that area are especially gratifying after a prolonged period of depressed levels.

"Prices improved for phosphate chemicals and ammonia, with potash and phosphate rock prices remaining steady during the quarter," Turner said.

The IMCF chief executive also said that, based on the company's improved first-quarter performance, there is some reason for optimism that fertilizer supply/demand could continue strong during the year ahead.

"Continued improvement in demand in both the large U.S. market and overseas, would support better prices. The fundamentals appear positive at this point."

He cited record net farm income, comfortable grain stocks and low fertilizer inventories held by producers and dealers as positive factors concerning the domestic market.

"Major customers such as China and India have returned to the international market, and volumes reflect that renewed activity. In other, non-marketing areas, continued excellent financial performances, including aggressive programs to control costs, must be recognized as important contributors to the company's performance."

IMC Fertilizer Group, Inc., headquartered in Northbrook, Ill., is the world's leading private enterprise producers of two basic fertilizer materials, phosphate and potash, and a manufacturer of two other major crop nutrients, phosphate chemicals and anhydrous ammonia. The company also recovers uranium oxide from phosphoric acid for upgrading by electric utilities for use as fuel in nuclear power plants.

CLEVELAND (OCT. 11) PR NEWSWIRE - The Sherwin-Williams Company (NYSE: SHW) today reported that earnings per share for the third quarter increased 11.5 percent to $1.07 per share from $.96 per share in the same quarter of 1989.

Net income was $46,746,000 versus $41,498,000 last year. Net sales for the quarter increased 7.1 percent to $638,532,000 from $595,983,000. For the first nine months, sales increased 6.4 percent to $1,749,377,000 and earnings per share increased 13.0 percent to $2.34 from $2.07 a year ago. Net income for the first nine months was $101,651,000 compared to $89,104,000 last year.

Sales in the paint stores segment increased 5.0 percent during the quarter with comparable-store sales increasing 4.3 percent. For the quarter, stores' operating income improved only slightly over last year as price competition remained intense. For the first nine months, paint stores' sales have increased 6.6 percent while operating income increased 2.5 percent.

The coatings segment's sales increased 11.2 percent due, in part, to the acquisition of the Krylon and Illinois Bronze aerosol businesses late in the second quarter. Excluding this acquisition, and the disposition of Lyons Transportation Lines Inc. which also occurred in the second quarter, coatings segment sales increased 5.5 percent for the quarter. Operating income for the coatings segment increased 17.4 percent in the quarter. For the nine month period, coatings' sales increased 5.9 percent and operating income increased 12.7 percent.

Commenting on the quarter and nine months, John G. Breen, chairman and chief executive officer said, "We are very pleased with the operating results for the quarter and nine months in light of the softening economy. Although raw material costs have stabilized during the first nine months of the year, oil price increases are beginning to adversely affect this trend. Intensive price competition continues to affect the paint stores segment although we continue to gain market share. The second quarter disposition of Lyons and acquisition of Krylon and Illinois Bronze had little affect on operating income during the third quarter but will help the company's long-term expansion of market share and profitability, particularly in the aerosol products market."

CHRYSLER INTRODUCES NEW "ADVANTAGE GOLD KEY LEASE PROGRAM"

HIGHLAND PARK, MICH. (OCT. 11) PR NEWSWIRE - Monthly payments to lease a new vehicle for 24 months are less than monthly payments to purchase a vehicle with a 60-month loan in a new Chrysler Corporation (NYSE: C) lease program introduced today.

The Advantage Gold Key Lease Program is the most comprehensive in company history, according to Tom Pappert, vice president - sales.

"We're offering the widest choice of vehicles and the lowest rates we've ever offered before," Pappert said.

"More and more customers are being attracted to leasing because of programs such as Advantage Gold Key," Pappert said. "They can drive a more expensive vehicle with lower monthly payments, get a new vehicle more often, bypass the trade-in process and avoid 'upside down' financing - in which a consumer owes more on a vehicle than it is worth."

Chrysler's Advantage Gold Key Lease includes a wide range of 1990 and 1991 models, covering 24-, 36- and 48-month lease periods.

Lease customers can also benefit from lower payments through cash incentives, ranging from $250 to $1,500 depending on the length of the lease, on six 1990-91 models. Cash incentives are available on the Dodge Shadow, Plymouth Sundance, Jeep Cherokee, Eagle Premier, Chrysler Fifth Avenue and Dodge Dakota.

The only 1991 models excluded from the Advantage Gold Key program are Chrysler's minivans and the Dodge Stealth, Colt, Vista, Ram 50 and Maserati TC. These models, however, can still be leased under Chrysler's standard Gold Key lease program.

The only 1990 models excluded are the Colt, Vista, Ram 50, Plymouth Laser, Eagle Talon, Summit and Maserati TC.

Advantage Gold Key runs indefinitely on 1991 models and expires Dec. 31 on 1990 products.

Here are some examples how Advantage Gold Key 24- and 36-month leases with cash incentives compare with 48- and 60-month financing.

BASKING RIDGE, N.J. (OCT. 11) PR NEWSWIRE - Crum and Forster, Inc., the New Jersey-based insurance holding company, announced today it has signed a definitive agreement to sell NAVCO Corp., an auto insurance specialty company, to Motors Insurance Corporation, a subsidiary of General Motors Acceptance Corporation. The purchase price is approximately $250 million.

In August, Crum and Forster announced that a memorandum of understanding had been signed by the two companies. At the same time, chairman and chief executive officer Robert J. Vairo said that proceeds from the sale would be used to support C&F's primary commercial lines business.

Headquartered in St. Louis, NAVCO provides personal automobile insurance primarily to members of associations through its wholly owned subsidiary National General Insurance Company.

The consummation of the sale is subject to regulatory approvals. Crum and Forster, Inc. is a Xerox Financial Services company.

SANTA MONICA, CALIF. (OCT. 11) PR NEWSWIRE - Canon Communications Inc., a leading publishing company for the medical and electronics manufacturing industries, announced today that it has assumed control of three major industry trade shows: Medical Design and Manufacturing East, Medical Design and Manufacturing West and Microcontamination. These conferences and expositions are the leading events in their respective fields and complement Canon's trade publications -- "Medical Device and Diagnostic Industry," "Medical Product Manufacturing News," "International Medical Device and Diagnostics Industry" and "Microcontamination" magazine.

For more than a decade, Canon has served as a primary information source to the markets these publications and trade shows address. Until recently, these shows were co-produced by a contract trade show organizer, Expocon Inc. Canon has now purchased all rights to the events, assuming complete control, effective immediately.

Commenting on the buy-out, Canon's Executive Director Bill Cobert noted, "Gaining ownership of these three industry events was a logical progression for Canon, and for the industries we serve. We will now be able to fully leverage our expertise in the medical and electronics markets to create the highest caliber conferences and expositions for these dynamic industries."

To meet this goal, Canon's strategic plans include expanded conference sessions and training seminars with increased participation from key industry trade groups and government agencies. The exhibits will continue to be the leading showcase for new product information. Additionally, enhanced marketing and promotional efforts are planned.

Coinciding with the announcement, Canon also revealed that Shirley Heim Organization (SHO), Inc. of Los Altos, Calif., has been selected as the official show management organization for all three events. "SHO is uniquely qualified to meet our exhibitors' needs," said Cobert. The company has an impressive background in show management with both domestic and international events, comprising some of the largest in the nation. Prior to forming the organization in 1982, President Shirley Heim was show manager for the Semicon

expositions which are produced annually in the United States, Europe and Asia.
Since its formation more than eight years ago, SHO has built a strong roster of trade shows in the disk drive and computer industries as well as in the hazardous materials market.

CHARLOTTE, NC (OCT. 11) PR NEWSWIRE - United Dominion Industries (TSE,NYSE: UDI) today said it has signed a definitive agreement to acquire substantially all the assets of AEP-Span from the Overhead Door Corporation. Terms of the proposed purchase were not disclosed.

Located in Dallas, Texas, AEP-Span is a national leader in the design, manufacture and distribution of architectural metal roofing. The company also offers a composite wall product for non-residential construction applications and a line of home improvement products such as patio covers, carports and awnings.

The unit will operate as an independent division of United Dominion Buildings, which is headquartered in Memphis, Tenn. Other divisions within United Dominion Buildings are Varco-Pruden Buildings and Stran Buildings, which manufacture pre-engineered metal buildings for low-rise, non-residential construction markets.

United Dominion indicated that the AEP-Span acquisition is part of its ongoing efforts to enhance its position as a leader in the manufacture and distribution of quality building products and services. Closing is expected to occur November 1 or earlier and is subject to regulatory approval and fulfillment of other conditions in the agreement.

United Dominion (formerly AMCA International) provides manufactured products and engineering/construction services in the areas of pre-engineered buildings industrial products, energy production and steel fabrication. Its common shares are traded on the Toronto, Montreal and New York Stock Exchanges.

MELBOURNE, FLA. (OCT. 11) PR NEWSWIRE - Harris Corporation (NYSE: HRS) won a $5 million contract to supply a depot repair facility for an advanced HF radio communications network known as Cross Fox with the Norwegian Defence Communications and Data Services Administration (NODECA), on behalf of NATO.

The contract was awarded to Harris RF Communications Group, Rochester, N.Y.

The $60 million Cross Fox system, also supplied by Harris RF Communications, is a distributed, computer-controlled HF communication network used by the allied NATO navies for ship-to-shore and shore-to-ship communications, and is located at 27 sites in eight NATO countries.

The depot repair facility will provide special test fixtures and software development facilities that will allow NATO to provide on-going maintenance for the Cross Fox system.

Harris RF Communications Group is a world leader in the design, manufacture, installation and support of advanced HF, VHF and UHF radio equipment, turnkey systems and networks.

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: Electronic systems, semiconductors, communications and office equipment.

HOUSTON (OCT. 11) PR NEWSWIRE - BJ Services Company (NYSE: BJS) has officially announced the availability of a newly developed fracturing fluid system for well stimulation employing sea water. This method eliminates the necessity of costly fresh water which has, up to now, been the limiting factor of the number and volume of hydraulic fracturing operations on the North Slope.

BJ Services has successfully applied this technique on several wells for British Petroleum Alaska with positive results. A recent treatment of this type consisted of 83,000 gallons of sea water based fluid and 140,000 pounds of propping agent.

In addition to its availability and low cost, sea water has inherent properties which renders it compatible with formation fluids and water sensitive reservoir minerals. This advanced fluid is designed to accommodate the salinity variations which normally occur in Beaufort Sea water due to seasonal changes.

BJ Services Company is a leading participant in the pressure pumping business serving the petroleum industry worldwide. Principal services include cementing and stimulation work for oil and gas wells.

ST. LOUIS (OCT. 11) PR NEWSWIRE - The May Department Stores Company (NYSE: MA) today reported preliminary sales from continuing operations increased 3.5 percent to $901.2 million for the five-week period ended Oct. 6. Sales reported during the similar year-ago period were $870.9 million.

Year-to-date sales for the first eight months of fiscal 1990 were $6.04 billion, up 9.1 percent from sales of $5.54 billion reported in the same period last year.

Department store sales for September were $773.8 million, an increase of 3.1 percent or $23.6 million from last year. Sales for Volume Shoe totaled $127.4 million, up 5.6 percent or $6.7 million.

During the month, May opened two department stores and 18 net new Payless ShoeSource stores. May Company, California, opened a department store at Stonewood Center in Los Angeles and Filene's opened a store at CambridgeSide Galleria in Cambridge, Mass.

Sales have been restated to exclude the sales of divisions which have been discontinued, as well as stores which have been closed and not replaced. Year-to-date sales, including non-replaced closed stores, were $6.07 billion and $5.66 billion in the 1990 and 1989 periods, respectively.

As announced previously, May will distribute .13 shares of common stock of Venture Stores, Inc., per share of May common stock to holders of record of May common stock as of Oct. 15, 1990. The shares will be distributed on Nov. 3, 1990. The spin-off will complete May's previously announced disposition of Venture, May's wholly owned discount retail subsidiary. Sales for Venture, which are being reported as discontinued operations, were $123.2 million for September, an increase of 5.1 percent, and were $834.5 million year-to-date, up 6.3 percent. Venture's store-for-store sales increased 0.2 percent for the month and 2.8 percent year-to-date. On a calendar-adjusted basis for September, Venture's sales increased 5.6 percent and store-for-store sales increased 0.8 percent.

The May Department Stores Company is one of the largest retailers in the United States, operating 300 department stores and 2,836 specialty shoe stores.

DALLAS (OCT. 11) PR NEWSWIRE - Sun Oil Largeau Chad Limited (Sun) a subsidiary of Sun Company, Inc. and Hunt International Petroleum Company Limited (HIPCO-Tchad) have entered into an agreement to explore a 62 million

acre concession in the African Republic of Tchad. Approval in principle of the joint venture by Tchad's Oil Minister Mahamat Senoussi Khatir was confirmed today.

Tchad is located south of Libya in north-central Africa and the license area is situated south of the Tibesti mountains and north east of Lake Tchad.

HIPCO-Tchad originally obtained the rights to the large license area in 1988 and had done some initial surface geology and gravity work in the area. In October, 1989 HIPCO-Tchad opened an office in N'Djamena, the capital of Tchad, and has maintained the office since that time. Under a HIPCO-Sun agreement Sun will acquire a 50 percent working interest and will become the operator. During the next 18 months Sun will obtain about 800 kilometers of seismic data across the license area.

"We are excited about the prospect of exploring this frontier area with such an experienced and knowledgeable partner," commented HIPCO- Tchad's President Jim McGowen from his Dallas office. "We think this area has an excellent potential for giant reserves."

NEWARK, CA (OCT. 11) PR NEWSWIRE - Ross Stores Inc. (NASDAQ: ROST) today reported sales of $63 million for the five-week period ended Oct. 6, 1990, a 5 percent increase above the $60 million in sales for the five weeks ended Oct.

7, 1989. Comparable store sales for the same period were down 6 percent from last year.

For the eight months through Oct. 6, 1990, sales were $499 million, an 8 percent increase above $464 million in sales for the prior year's comparable period ended Oct. 7, 1989. For the eight months, comparable store sales were down 4 percent on a day-for-day basis from last year.

Ross Stores Inc. operates a national chain of off-price retail stores offering first quality, in-season, branded apparel and apparel-related merchandise for the entire family. The company had 169 stores in operation at Oct. 6, 1990, compared to 147 stores at the end of the same period last year.

LAKE HAMILTON, FL (OCT. 11) PR NEWSWIRE - Orange-co, Inc. (NYSE: OJ) (OCI) announced today that it had signed an agreement to sell for cash a citrus grove totaling about 320 acres in Okeechobee County, Fla. The price will not be disclosed at this time. A closing is expected in November.

This transaction is incremental to the sales completed since August of three citrus groves encompassing about 2,760 acres located in St. Lucie County, Fla. Proceeds from these three transactions totalled $32.6 million. All profits from these transactions will be fully sheltered by the company's tax loss carryforward position.

The company had previously reported that its balance sheet had already been strengthened considerably by the groves that had been sold since August and that outstanding bank debt had been reduced from over $55 million earlier in the year to about $9 million currently. This latest transaction, when complete, will result in additional reduction of debt and further balance sheet improvement.

Orange-co has received a letter from its largest stockholder, Stoneridge Resources (NYSE: SRE) requesting that the reorganization plan announced by OCI in April consisting of the sale of 22 percent of its Florida real estate and other assets with the objective to improve its profitability, cash flow, balance sheet, return on assets and position the company to diversify, be expanded to include the orderly liquidation of all the company's assets and a cash distribution of all net proceeds to its shareholders. Orange-co, Inc.'s board will discuss this request at its next regularly scheduled board meeting and will respond as soon as possible once the request has been sufficiently analyzed.

Separately, Orange-co.'s estimate of this year's crop production from its

17,600-acre Joshua grove located in southwest Florida has increased to the highest level of production since 1982. The company is pursuing the joint venture of this large grove which will provide funds to rehabilitate it and more than triple its production which will result in a unit cost of production which will be highly competitive internationally.

CINCINNATI (OCT. 11) PR NEWSWIRE - Higher sales and lower earnings were reported by Frisch's Restaurants, Inc. (AMEX: FRS) for the sixteen weeks ended Sept. 23, 1990.

Craig F. Maier, president, reported that total revenue increased 1 percent to $45,455,155 compared to $45,151,444 last year. Net earnings for the first quarter declined 10 percent to $778,852, or $.14 per share, from $865,517, or $.16 per share a year ago.

Maier noted that the sales increase came primarily from six new Big Boy Restaurants opened over the last fifteen months. During the quarter two new Big Boys were opened while four restaurants -- one Big Boy and three Roy Rogers -- were closed. Frisch's operated 101 Big Boy restaurants, 8 Roy Rogers restaurants, two Prime 'n Wine restaurants and two Quality Hotels at the end of the quarter.

The company is in the process of converting five of its remaining Roy Rogers restaurants to Hardee's (the new owner of the Roy Rogers franchise) by the end of December. Maier stated, "We believe that Hardee's is one of the premier chains in the fast food business and we expect that the conversion to Hardee's will give us a much stronger opportunity."

Jack C. Maier, Louis J. Ullman and Alfred M. Cohen were re-elected as directors of the company for two year terms at the annual meeting of shareholders which was held on Oct. 1, 1990.

DALLAS (OCT. 11) PR NEWSWIRE - Commercial Metals Company (NYSE: CMC) announced today that it has been awarded the contract for the city of Dallas Household Recyclable Material Collection Pilot Program. The pilot program, to include 14,000 Dallas households, will provide convenient residential collection of recyclable materials. In addition to the once a week

residential pick-up, CMC Recycling will be responsible for processing and sales of the aluminum and steel cans, glass, newsprint, and plastics such as milk jugs and soda bottles.

Stanley A. Rabin, president and chief executive officer, commented that although the Dallas pilot program is a small beginning the company believes citizens throughout Texas are ready to support increased recycling efforts. Rabin stated, "It is appropriate that CMC, a Dallas based company with 75 years of recycling history, be the leader in encouraging household recycling in this area. For many years we have been a major recycler of metals throughout the southern half of the United States and particularly in Texas."

Rabin said the company is excited about developments in municipal, household and non-traditional recycling. "CMC Recycling will be an active participant. We are studying plans for a major multi-materials recycling facility, the first of its kind in the Dallas/Fort Worth area. This initial city of Dallas program will give us a base to add other creative sources of recyclable materials, including programs being considered by area municipalities, industries and groups of concerned citizens. Our goal is to be the major multi-materials recycler in the area."

Commercial Metals Company was founded in Dallas 75 years ago as a scrap metal recycling company. In addition to 37 recycling facilities, it has three steel minimills, steel fabrication shops, a copper tube plant, and world-wide trading in various minerals, metals, steel and semi-fabricated, nonferrous metal.

ROY, UTAH (OCT. 11) PR NEWSWIRE - IOMEGA Corp. (NASDAQ: IOMG) announced today the results for its third quarter ended Sept. 30, 1990. The company reported sales of $31.3 million and net income of $3.6 million or 22 cents per share. In the corresponding quarter of 1989 sales were $27.7 million and net income was $3 million or 18 cents per share.

For the nine months ended Sept. 30, 1990, sales were $87.6 million and net income was $9.2 million or 56 cents per share, compared to sales of $78.5 million and net income of $6.3 million or 37 cents per share in the comparable nine months of 1989.

The increases in net income were due to increased sales and higher gross margins resulting from better manufacturing performance and product cost reductions. The company's gross margins were 48 percent in the third quarter and 47 percent in the first nine months of 1990, compared to 42 percent and 41 percent for the corresponding periods of 1989, respectively.

The improved gross margin performance has allowed the company to invest more money in sales and marketing and research and development activities. Consequently, operating expenses have increased 20 percent in the first nine months of 1990 compared to the first nine months of 1989. Third quarter and

year-to-date selling, general and administrative expenses include a $.5 million charge to reduce the valuation of the Salt Lake City building held for resale. This charge brings the value in line with similar properties in the area.

The company's balance sheet remains strong. Cash and temporary investments have increased by $4.2 million since Dec. 31, 1989 to $28.4 million. On Aug. 3, 1990 the IOMEGA board of directors authorized the repurchase of up to 1,000,000 shares of its common stock. During the third quarter, 115,300 shares were repurchased.

IOMEGA Corp., Roy, Utah, develops, manufactures and sells high-performance removable mass storage products for desktop computers. IOMEGA's patented Bernoulli Technology provides unlimited data storage capability by combining the removability of floppy drives with the high capacity and performance of rigid drives. IOMEGA's stock is listed on the NASDAQ National Market System under the symbol IOMG.

PITTSBURGH (OCT. 11) PR NEWSWIRE - Westinghouse Credit Corp., the principal subsidiary of Westinghouse Financial Services, today announced net income of $31 million for the third quarter of 1990, 13 percent lower than for the same period a year ago.

Net income for the first nine months of 1990 was $109.9 million, one percent lower than for the first nine months of 1989.

William A. Powe, chairman, said the company's assets were essentially flat during the third quarter, at $10.7 billion, and the quarter's lower results reflect increased reserves and a higher provision for income taxes.

Westinghouse Credit is the nation's largest finance company providing capital exclusively to business. Its parent, Westinghouse Financial Services Inc., is owned by Westinghouse Electric Corp. (NYSE: WX).

WESTINGHOUSE CREDIT CORP.

Net Income (Unaudited)	1990	1989
Three months ended Sept. 30	$ 31,009,000	$ 35,486,000
Nine months ended Sept. 30	$109,938,000	$110,717,000

MINNEAPOLIS (OCT. 11) PR NEWSWIRE - The board of directors of The NWNL Companies, Inc. (NASDAQ: NWNL) today declared a regular quarterly dividend of 33 cents per share of common stock payable on Nov. 9 to shareholders of record on Oct. 22. This dividend continues NWNL's indicated annual dividend rate at $1.32 per share, making 1990 the 19th consecutive year in which dividends have increased.

Dividends have been paid by the company and its predecessor, Northwestern National Life Insurance Co., without interruption since 1936.

The announcement follows a statement issued by NWNL on Monday which said that its management is confident that the company's earnings from operations will remain strong, based on current information and expectations for the year.

NWNL also announced that it has applied to list its common stock on the New York Stock Exchange and expects trading on the exchange to begin on Nov. 12 with the trading symbol NWN.

John E. Pearson, NWNL's chairman and chief executive officer, said, "As a major company in the insurance industry, we believe that a listing on the New York Stock Exchange will give us access to investors both here and abroad that might not be available to us otherwise. Our stock has been well served by NASDAQ over the years, and as we grow, we look forward to the access and visibility that the New York Stock Exchange listing will give us."

The NWNL Companies, Inc. is a Minneapolis-based diversified holding company specializing in insurance and financial services.

ANNAPOLIS, MD. (OCT. 11) PR NEWSWIRE - Henry A. Berliner Jr., president and chief executive officer of Second National Federal Savings Bank (NASDAQ-NMS: SNFS), a $1.8 billion Mid-Atlantic thrift, predicted that after banks and thrifts, the insurance industry is "the next big financial industry accident waiting to happen."

Addressing a group of Maryland contractors at their annual leadership conference in Williamsburg, Va., he also outlined alternative real estate development funding sources to fill the void left by capital-stripped banks, thrifts, insurance companies and pension funds struggling with new loan loss reserve requirements.

According to Berliner, insurance companies won't feel the full effects of the current commercial real estate crisis until later in the economic cycle. Insurance companies have been big investors in commercial office buildings. When these older buildings are forced to compete with new ones struggling to avoid foreclosure in a soft market and offering bargain rents, they'll lose their tenants, causing "defaults triggering massive losses."

In the face of "a regulator induced credit crunch," Berliner urged builders to seek alternative funding sources such as "unions, public utilities, brokerage firms, hospitals, private schools, churches and associations, or publicly funded projects with bond issues, industrial revenue bonds, public improvements," or seller financing through "bank-owned REO or assets held by the Resolution Trust Corporation (RTC)." Berliner is chairman of the Region One Advisory Board for the RTC.

Second National has a branch network of 40 banking offices and 11 loan production offices in Maryland, Delaware, Pennsylvania, Virginia and the District of Columbia.

#90284p3710 10/11/1990 ~PR Newswire
DETROIT (OCT. 11) PR NEWSWIRE - NBD Bancorp, Inc. (NYSE: NBD) today reported an 11-percent increase in Net Income for the quarter ended Sept. 30, 1990. Net Income totaled $69,924,000, or $.95 per fully diluted share ($.96 primary) compared with $62,833,000, or $.84 per fully diluted share ($.87 primary), for the quarter ended Sept. 30, 1989. Net Income for the nine months ended Sept. 30, 1990, was up 6 percent to $204,518,000, or $2.76 per fully diluted share ($2.79 primary), compared with $192,344,000, or $2.57 per fully diluted

share ($2.67 primary), for the first nine months of 1989.

In commenting on the higher earnings, Chairman and President Charles T. Fisher III stated Net Interest Income in the third quarter was up 9.0 percent vs. the same period last year. He attributed the increase to a 9.3-percent growth in average interest earning assets partially offset by a decline in interest margin earned on assets. Margin for the current quarter was 4.08 percent compared with 4.11 percent a year earlier. For the first nine months of 1990, Net Interest Income was up 6.2 percent when compared with the first nine months of 1989; average interest earning assets increased 9.5 percent, and interest margin dropped to 4.06 percent from 4.19 percent.

Non-Interest Income, excluding Securities Gains and Losses, for the quarter increased 8.1 percent from the third quarter 1989 level due principally to growth in trust fees and charges for deposit account activity. Non-Interest Income in the third quarter of last year included approximately $1.5 million of pretax gain from nonrecurring asset sales. For the nine months ended Sept. 30, 1990, Non-Interest Income was up 9.8 percent. Securities losses of $6.3 million have been taken in 1990, principally from sale of U.S. Government securities in the first quarter, vs. gains of $142,000 in the first nine months of 1989.

Non-Interest Expenses in the third quarter increased 7.5 percent vs. the third quarter of 1989 due in part to a 55-percent increase of FDIC insurance expense. Non-Interest Expenses year-to-date were up 5.7 percent compared with 1989.

The Provision for Possible Credit Losses was $16.3 million in the third quarter of 1990 and $14.0 million one year earlier. The Provision for the first nine months of 1990 was $45.3 million vs. $40.1 million in the comparable period of 1989.

Net Loan Charge-Offs in the current quarter were $18.2 million, or 0.46 percent (annualized) of average loan and lease balances, and $41.2 million, or 0.35 percent (annualized), for the nine months. Comparable figures for 1989 were $13.9 million, or 0.37 percent, for the quarter and $44.3 million, or 0.40 percent, year-to-date.

Excluding $88.9 million obligations of the United Mexican States renegotiated during the first quarter of 1990 at a below market interest rate, nonperforming loans and leases at Sept. 30, 1990, totaled $150.3 million, or 0.93 percent of total loans and leases. Nonperforming loans and leases at June 30, 1990, were $139.4 million, or 0.88 percent of total loans and leases, and were $112.7 million, or 0.74 percent, at Sept. 30, 1989. Other Real Estate was $15.5 million at Sept. 30, 1990, $14.2 million at June 30, 1990, and $13.6 million at Sept. 30, 1989.

The Allowance for Possible Credit Losses at Sept. 30, 1990, was $240.0 million

or 1.48 percent of total loans and leases. Comparable amounts at June 30, 1990, were $241.7 million, or 1.53 percent, and $233.5 million, also 1.53 percent, one year earlier. The Allowance at the end of the current quarter was equivalent to 160 percent of nonperforming loans and leases (excluding renegotiated United Mexican States Obligations) vs. 173 percent at June 30, 1990, and 207 percent at Sept. 30, 1989.

NBD Bancorp, Inc. total assets at Sept. 30, 1990, were $27.0 billion compared with $25.0 billion at Sept. 30, 1989. Total loans and leases increased $1.0 billion in the past year to $16.2 billion. Deposits totaled $21.4 billion compared with $19.5 billion one year earlier. Total Shareholders' Equity at Sept. 30, 1990, was $1.8 billion, an increase of $168 million since Sept. 30, 1989.

NORFOLK, VA. (OCT. 11) PR NEWSWIRE - Norfolk Southern (NYSE: NSC) today announced the restructuring of its transportation department, effective Oct. 16. Railroad operating divisions will be reduced from 13 to 10 and operating regions from three to two. The rail system's Eastern and Western regions both will be headquartered in Atlanta.

J.W. Fox, Jr., will become general manager of the Eastern Region, which will consist of the Norfolk Terminal and the Georgia, Piedmont, Virginia, and Pocahontas divisions. G.B. Montague will continue as general manager of the Western Region, which will include the Alabama, Tennessee, Kentucky, Illinois and Lake divisions.

Norfolk Southern's Coastal division, which has been based at Macon, Georgia, will become part of the Georgia division headquartered in Atlanta. The Ohio division, which has been located at Bellevue, Ohio, will be consolidated with the Fort Wayne division into a newly named Lake division headquartered at Fort Wayne, Indiana. The Eastern division, which was located at Greensboro, N.C., will become part of the Piedmont division headquartered in Greenville, S.C. Finally, the division at Decatur, Illinois, will be renamed the Illinois division.

"This is another phase in our railroad consolidation, and it will streamline operations to the benefit of our customers," said Stephen C. Tobias, Norfolk Southern's vice president of Transportation.

CINCINNATI (OCT. 11) PR NEWSWIRE - Chiquita Brands International, Inc. (NYSE: CQB) announced today that it has acquired the operations of FRUPAC, a major Chilean packer and exporter of fresh fruits and vegetables. In addition, Chiquita purchased marketing organizations for Chilean produce in North America and Europe. Terms were not disclosed. Revenues for the most recent year were approximately $40 million.

Keith E. Lindner, Chiquita's president, explained that this acquisition represents a further development of Chiquita's worldwide fresh distribution capabilities. "FRUPAC is a well recognized and established organization," said Lindner. "This acquisition strengthens our ability to service our worldwide customers on a year-round basis." The diverse variety of fresh produce include grapes, apples, pears, raspberries, peaches, nectarines, kiwis avocados, artichokes and asparagus.

Chiquita, headquartered in Cincinnati, is a leading international marketer, processor and producer of quality fresh and prepared food products. Revenues in 1989 were $3.8 billion.

HOUSTON (OCT. 11) PR NEWSWIRE - Cabot Oil & Gas Corporation (NYSE: COG) today announced it will increase its capital and exploration budget by 19 percent, to $52 million, for the fiscal year ending Sept. 30, 1991. The budget includes $44.7 million for capital spending, a 17.6 percent increase over fiscal 1990, plus $7.5 million for exploration, a 25 percent increase.

A substantial portion of the capital and exploration budget will be committed to drilling 150 new wells in Cabot Oil & Gas's producing areas in the Appalachian Basin and Anadarko Basin. Additionally, the company will make capital expenditures to continue upgrading its West Virginia pipeline system, which transports natural gas to a number of industrial plants, interstate pipelines, and a local utility company.

During the fiscal year ended Sept. 30, 1990, Cabot Oil & Gas drilled 131 new wells, of which 128, or 98 percent, were successful. The company concentrates in low-risk development drilling opportunities at shallow-to-moderate depths, and has over 700 billion cubic feet equivalent of proved natural gas reserves.

Cabot Oil & Gas Corporation is a leading producer of natural gas in the

Appalachian and Anadarko Basins. The company is headquartered in Houston, with regional offices in Pittsburgh; Charleston, W.Va., and Oklahoma City.

NEW YORK (OCT. 11) PR NEWSWIRE - The Rowland Company has announced a new management lineup, with Mark Weiss named chief operating officer, Rowland, U.S.; Mary R. Trudel appointed general manager of the New York office; and Samuel D. Ostrow, president of the public affairs division of Rowland U.S. The three executives were promoted to senior executive vice president posts and form the office of the president, joining Martin Franken, chief financial officer, and Herbert L. Rowland, chairman and CEO of Rowland Worldwide, Inc.

The New York headquarters office is the flagship of Rowland Worldwide, fifth largest public relations company in the world, with 34 offices on five continents. The firm employs more than 750 people and has annualized fee billings in excess of $50 million.

Each of the top executives is also management supervisor for several client

accounts and will continue to have overall supervisory responsibility for those programs, while assuming their new roles.

Weiss will serve as U.S. deputy to Mr. Rowland. He will take the lead role in national business development -- the expansion of offices in the U.S. and Canada and the creation of new agency services for clients. He will also work closely with Mr. Rowland in fostering the extension to other Rowland Worldwide offices of programs now conducted for U.S.-based multinational clients.

As general manager of the New York office, Trudel will be responsible for the overall management functions of the New York office and all general agency issues, including staff assignment and administration. She will direct internal and external communications and be responsible for all agency support departments -- including Information Services and the Television, A-V Graphics and Video Production departments.

As the president of public affairs division of the U.S. Rowland Company, Ostrow will be responsible for the agency's corporate, financial, government relations and crisis management business as well as its extensive health care practice. He joined The Rowland Company in 1984 from another national public relations firm, where he served as head of corporate and financial public relations.

GREENBELT, MD (OCT. 11) PR NEWSWIRE - Group 1 Software (NASDAQ-NMS: GSOF), the leading provider of marketing and mailing software, announced today that it has entered into a strategic marketing alliance with R.L. Polk & Co., the leading compiler of consumer and demographic data and a major direct mail list provider.

Under the agreement between the two companies, R.L. Polk will provide the data for Group 1's Demographic and Geographic Coding System products. These software packages append demographic and geographic information to marketing databases, enabling marketers to identify and target prospective customers more effectively.

Ron Friedman, president of Group 1 Software, commented: "Group 1 believes that its new relationship with R.L. Polk, combining the expertise of two companies at the top of their fields, is important to the entire marketing profession. It is also timely because the 1990 census data will be incorporated into the software, giving marketers the latest in consumer information. Also significant will be the availability of the TIGER File from Geographic Data Technology (GDT), an R.L. Polk affiliate, which will provide demographic mapping capability for all types of businesses. All in all, we expect these to be extremely powerful marketing and sales tools."

Friedman continued, "In the future, we plan to introduce additional products combining Group 1's technology and the information from R.L. Polk and GDT."

Stephen Polk, president of R.L. Polk & Co., said: "We look forward to our new association with Group 1. Our combined abilities will provide the best marketing software products available to the industry. Polk's data resources and GDT's geographic expertise perfectly complement Group 1's software technology and customer support."

Founded in 1870, the Detroit-based R.L. Polk & Co. employs approximately 6,900 people in more than 50 offices and production locations throughout North America and in the United Kingdom, Australia, West Germany and Barbados. In addition to being a major direct mail marketer, the company publishes 1,300 city directories, serves as the leading statistician for the motor vehicle industry, publishes an international bank directory and is one of the largest manufacturers of calendars and other advertising specialities.

Group 1 Software offers a broad range of list management, postal discount, mail personalization, demographic and database marketing software products as well as professional services. The company has offices throughout the United States and in Canada, and is represented by distribution partners in the U.K., Australia and New Zealand.

#90284p3739 10/11/1990 ~PR Newswire

SECAUCUS, N.J. (OCT. 11) PR NEWSWIRE - The Genlyte Group Inc. (NASDAQ: GLYT) today announced that sales and earnings for the three- month period ended Sept. 30, 1990 were below the results for the same period last year. Sales were $123,002,000 versus $123,432,000 in 1989; operating profit was $8,863,000 versus $10,491,000; net income was $2,148,000 versus $2,842,000 and earnings per share were 17 cents versus 22 cents.

David E. Momot, president of Genlyte, cited two major reasons for the decrease in third quarter earnings versus the same period last year. One was increases in material, labor and insurance costs, which were not recovered due to the competitive pricing environment resulting from the continued decline in the construction market. The other was an increase in bad debt reserves due to the effect of the market slowdown on Genlyte's customers.

Momot pointed out that while the Canadian construction industry strike was settled in the third quarter, the U.S. construction market continued to weaken resulting in third quarter sales approximately equal to the second quarter of 1990. He went on to say that even with the flat sales and the increase in the bad debt reserve, earnings per share increased 4 cents over the second quarter due primarily to the favorable impact of cost reductions implemented earlier in the year, lower interest expense and the Canadian strike settlement.

Momot concluded by saying that Genlyte was able to reduce debt by about $3,200,000 in the third quarter bringing the total down to approximately $159,500,000, the lowest it has been since Genlyte became an independent company in 1988.

The Genlyte Group, Inc. is a leading manufacturer of lighting fixtures and controls for the commercial, industrial and residential markets. Its products are sold under the brand names of Lightolier, KLP, Hadco, Wide-Lite, Bronzelite, Timely, Crescent, Stonco, Diamond F and Basic Concept in the U.S. and Lightolier, Keene-Widelite, Prodel and C.F.I. in Canada.

#90284p3747 10/11/1990 ~PR Newswire

NEW YORK (OCT. 11) PR NEWSWIRE - The Bank of New York Company, Inc. (NYSE: BK) reported net income of $71 million for the third quarter of 1990, compared to the $271 million loss reported in last year's third quarter.

Fully diluted earnings per common share amounted to $.90 for the quarter, compared to the $4.10 loss per share in last year's corresponding period. For the nine months ended Sept. 30, 1990, net income was $243 million, compared with a loss of $56 million in the same period last year. Fully diluted earnings per share were $3.16 for the first nine months of 1990, compared with a loss of $1.18 per share for the same period of 1989.

On Oct. 9, 1990, the board of directors of the company declared a regular quarterly cash dividend of 53 cents per share of common stock. This dividend is payable on Nov. 2, 1990, to holders of record as of the close of business on Oct. 19.

The performance this quarter reflects a $113 million loan loss provision. Of this total, domestic charge-offs were $61 million and $50 million was added to the domestic allowance for loan losses. The company further reduced its medium-term LDC debt to $512 million, primarily due to $34 million of charge-offs of non-performing Argentine and Brazilian loans. Transactions scheduled to close in the fourth quarter of 1990 will further reduce the company's medium-term LDC debt. At Sept. 30, 1990, the LDC loan loss allowance was $279 million, or approximately 55 percent of such loans. The total allowance, which includes the LDC allowance, increased to $955 million, or 2.76 percent of loans, compared to $940 million at June 30, 1990.

Non-performing assets, which include non-accrual and reduced rate loans and real estate acquired in satisfaction of loans, were $1,475 million at Sept. 30 1990, compared to $1,336 million at June 30, 1990. Real estate acquired in satisfaction of loans was $210 million at the end of the third quarter, unchanged from the second quarter. The increase in non-performing assets primarily resulted from the addition of six real estate loans and one highly leveraged transaction loan. Approximately $123 million or 88 percent of the net increase in non- performing assets this quarter is represented by loans that are still current but that are expected to become non-performing at a future date. The non-performing asset ratio was 4.2 percent at Sept. 30, 1990, and 3.7 percent at June 30, 1990.

At Sept. 30, 1990, highly leveraged transaction loans outstanding declined to $4,471 million from $4,700 million at June 30, 1990.

Return on average common equity and return on average assets were 10 percent and .56 percent for the third quarter of 1990. For the first nine months of 1990, these ratios were 12.08 percent and .66 percent. At Sept. 30, 1990, the

company's tier I capital ratio was 4.89 percent and its total capital ratio was 7.94 percent, compared to 4.72 percent and 7.74 percent at June 30, 1990, respectively.

#90284p3757 10/11/1990 ~PR Newswire

WINSTON-SALEM, N.C. (OCT. 11) PR NEWSWIRE - SALEM CARPET MILLS, INC. (NASDAQ-NMS: SLCR) has reported net sales for the third quarter ended September 29, 1990, of $108.5 million compared to $117.6 million for the same period a year ago. For the first nine months of 1990, sales were $339.1 million, compared with $315.9 million a year earlier, an increase of 7 percent.

Net income for the third quarter of 1990 was $1.1 million or $.13 per share compared to net income of $2.0 million or $.25 per share for the third quarter of 1989. For the first nine months of 1990, total net income was $2.6 million or $.31 per share, compared to a net income of $5.1 milllion or $.63 per share for the same period a year ago.

W. Douglas Foster, Chairman and Chief Executive Officer, stated that sales volume continues soft in the residential segment of the market due to a recession-prone U.S. economy. The uneasiness about the situation in the Middle East coupled with worries about recession keeps consumer confidence low. Efforts continue to improve market position in the mid to higher priced product categories and to eliminate all non-essential expenses. Shareholders' equity has now climbed above $68 million or $8.40 per share.

Salem designs, manufactures and markets broadloom tufted carpets in a wide range of styles, colors and prices for the residential and commercial markets nationwide. The Company's manufacturing operations are vertically integrated from fiber and yarn processing through finished product. It has nine manufacturing plants in Georgia, South Carolina, and Tennessee, distribution centers nationally and corporate headquarters in Winston-Salem, North Carolina.

BLUE ISLAND, IL (OCT. 11) PR NEWSWIRE - Heritage Financial Services, Inc. (NASDAQ: HERS) today reported third-quarter net income per share of 47 cents, up 9 percent from the 43 cents per share earned in the comparable 1989 period. Net income for the quarter ended Sept. 30, 1990, was $1,883,000, an increase of 9 percent from $1,731,000 in the 1989 third quarter.

For the nine months ended Sept. 30, 1990, net income per share was $1.35, up 3 percent from the $1.31 per share earned in the first nine months of 1989. Net income for the 1990 nine-month period was $5,428,000, compared to $5,262,000 in the comparable 1989 period.

Richard T. Wojcik, chairman and chief executive officer, said higher earnings primarily resulted from increases in net interest income, reflecting the continued growth of the company's loan portfolio which was up $40 million, or 11 percent, from a year ago. Growth in net interest income was partially offset by increases in the provision for loan losses, as well as higher operating expenses, principally reflecting the initial costs of branch expansion throughout 1989. During that period, three branch facilities were opened in southwest suburban Chicago. The second phase of the company's program to centralize operations was completed in the 1990 third quarter.

"Although the initial expenses attributable to these efforts have affected 1990 earnings," Wojcik said, "we expect that each will contribute to the company's long-term growth and future profitability."

According to Wojcik, the company experienced an increase of delinquent and non-accrual loans in the 1990 third quarter. Since Dec. 31, 1989, non-performing loans increased $1.8 million, primarily reflecting the addition of two large commercial loans. At Sept. 30, 1990, the ratio of non-performing loans to net loans was 1.58 percent, compared to 1.22 percent at Dec. 31, 1989 and 1.55 percent at Sept. 30, 1989. He also said, "Significant loan losses are not anticipated and appropriate increases to the reserve for loan losses have been made based on our evaluation of potential loan losses." At Sept. 30 1990, the loan loss reserve as a percent of net loans was 1.20 percent,

compared to 1.13 percent at Dec. 31, 1989.

For the third quarter ended Sept. 30, 1990, there were 3,982,197 weighted average common shares outstanding compared to 4,012,146 in the 1989 third quarter. Weighted average common shares outstanding for the nine months ended Sept. 30, 1990, were 4,002,053 compared to 4,012,146 in the 1989 period. In July 1990, the company announced and instituted a program to repurchase up to 200,000 of its common shares. To date, it has repurchased 61,720 common shares and currently has 3,950,426 shares outstanding.

Heritage Financial Services, Inc. is a multibank holding company with assets of $622 million. It operates eight banking offices located in Blue Island, Crestwood, Oak Lawn, Tinley Park (two), Orland Park, Palos Heights and Mokena, Ill. The company also operates a trust company which serves all locations.

#90284p3765 10/11/1990 ~PR Newswire

SAN DIEGO (OCT. 11) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced the introduction of its new Fluoroscan(TM) 1200 Radioscopy System, a flexible industrial system for real-time X-ray inspection and manufacturing process control.

The system features a newly designed, integrated cabinet that provides a single, space-saving enclosure for the inspection area, imaging subsystem, X-ray generator, four-post manipulator, auxiliary subsystems and all cabling. The cabinet provides two service doors, allowing easy access for maintenance, an improvement over the previous Fluoroscan 1200 design. The control console which is independent to allow convenient positioning, includes imaging and control monitors and all system control and auxiliary modules, such as videocassette recorders and hard-copy printers.

"The integrated cabinet in the new Fluoroscan 1200 system delivers two key benefits: best use of floor space and easy service access," said Fred Schlieper, industrial systems marketing manager for IRT. "An added service door has replaced a less-convenient X-ray shielding shroud over the imaging system, so periodic maintenance can be completed faster and easier."

The new system is being demonstrated at two conferences in October: the American Society for Nondestructive Testing (ASNT) 1990 Fall Conference and Quality Testing Show in Seattle (Oct. 9-10); and the North American Die Casting Association's Chapter 30 Conference in Las Vegas, Nev. (Oct. 25-27).

IRT's Fluoroscan systems are used for quality assurance and other applications in such industries as automotive, aerospace, electronics and defense, across a wide range of materials, processes and products. With Fluoroscan systems, operators can quickly view internal areas of materials or manufactured parts to detect flaws or missing components, manipulating the test objects as needed to provide the required angles. Using IRT's image analysis systems, the process can be automated to deliver computerized decision-making about part quality.

With the appropriate configuration of IRT's advanced system modules -- including a wide range of X-ray sources, object manipulators, image processing and analysis systems and lead cabinet enclosures -- a Fluoroscan system can provide real-time X-ray inspection of materials ranging from ultralight ceramics and composites to dense steel castings.

The four-post manipulator in the Fluoroscan system provides precise motion control. Such precision is critical in many X-ray inspection applications, particularly where object manipulation and inspection sequences are automated and controlled by IRT's Sequencer (TM) software.

The four-post manipulator, manufactured by IRT, is available in manual-control or programmable configurations and in a range of sizes and weight capacities for objects ranging from 50 to 120 pounds. The five- axis manipulator controls object motion in x, y and z axes, rotation and tilt.

IRT's Fluoroscan series now includes the Fluoroscan 1200, which accommodates a 15-by-15-inch part; the Fluoroscan 2400, which can accommodate parts to 24 inches and 120 pounds; and the Fluoroscan 4800, which accommodates parts to 48 inches and 250 pounds.

CONTACT: Fred Schlieper, 619-450-4343, ext. 432, or Michael Green, 619-450-4343, ext. 560, both of IRT Corp.

#90284p3772 10/11/1990 ~PR Newswire

BAGSVAERD, DENMARK (OCT. 11) PR NEWSWIRE - Novo Nordisk A/S (NYSE: NVO) and Boehringer Ingelheim today announced that a letter of intent has been signed by the two companies. According to the agreement, Boehringer Ingelheim is to take over all of Novo Nordisk's activities in the area of veterinary medicine. These activities are today concentrated in Novo Nordisk Agrovet A/S, a subsidiary of Novo Nordisk A/S.

The Agrovet division was formed by the merger in 1988 of the veterinary activities of Novo and Ferrosan. After the merger, which was a result of Novo's takeover of Ferrosan, Agrovet became one of the largest suppliers of veterinary medicines in Scandinavia.

In spite of Agrovet's positive development in a declining market, it is the opinion of Novo Nordisk that the veterinary business will profit from the improved opportunities offered by a company which has veterinary medicine as a primary area of interest.

Prior to the agreement to sell to Boehringer Ingelheim, Novo Nordisk has thoroughly examined the possibility of finding a partner which could offer Agrovet the best possible development potential. The choice of Boehringer

Ingelheim is closely related to the fact that the German company is one of the world's most important suppliers of veterinary medicine. Added to this is that an extensive part of Agrovet's product range is complementary to Boehringer Ingelheim's activities in the area.

According to the plan, Agrovet's production, which is situated in Novo Nordisk's production plant in Kalundborg, Denmark, is going to be gradually ceased. Subsequently, the plant is to be used for the production of other products, and it is, therefore, not expected that the takeover will result in redundancies among the staff. Boehringer Ingelheim stated that it intends to maintain the present level of activity in Agrovet. This means that sales and administrative staff is expected to remain employed by the new owners.

Novo Nordisk A/S is one of the world's leading biotechnology companies. It is a major force in insulin manufacture and diabetes treatment and is the world's largest producer of industrial enzymes. The company also manufactures and markets a variety of other pharmaceutical and bioindustrial products. Headquartered in Denmark, Novo Nordisk employs more than 8,000 people in 30 countries and market its products in 120 countries.

MINNEAPOLIS (OCT. 11) PR NEWSWIRE - Analysts International Corporation (NASDAQ: ANLY) today reported net income of $1,374,000, equal to 29 cents per share, for the first quarter ended Sept. 30, 1990, compared with last year's $1,323,000, also 29 cents per share. Revenues were $28,057,000, up from $24,650,000 last year.

Frederick W. Lang, chairman and chief executive officer, said the company experienced delays in contract extensions and additions during the quarter, causing utilization and margins to decrease temporarily. However, by the end

of the quarter, the technical staff on projects was back to the beginning level, he said.

Analysts International Corporation is a Minneapolis-based computer software services company.

CHICAGO (OCT. 11) PR NEWSWIRE - R.R. Donnelley and Sons Company (NYSE: DNY), North America's largest printer, today announced it has elected Gerald J. Bender, 55, to the newly created position of vice president of environmental affairs. This election marks another step in Donnelley's creation of the company-wide environmental task force referred to in "Printing Clean," a 20-page environmental policy statement published last month.

As the leader in the graphic arts industry, Donnelley has taken a leadership role in environmental awareness. Donnelley's policy statement cites ink solvent recovery and raw material waste recycling as two of the ways the company prevents pollution. Donnelley also is working with its suppliers and customers to develop better grades of recycled paper, water-based inks and recyclable binding materials and coatings.

Bender, Donnelley's new vice president of environmental affairs, joined the company in 1967 as a staff specialist in the research department. His management roles have encompassed environmental control, process development, energy and safety. He was the technical director of manufacturing engineering from 1982 to 1988 and, most recently, group manager of environmental engineering at the company's research and development center in Lisle, Ill.

A native of Carrolltown, Pa., Bender received a bachelor of science degree in

chemical engineering from Pennsylvania State University. He and his wife, Joan, reside in Park Forest, Ill. They have four grown daughters.

R.R. Donnelley is the world's foremost printer of catalogs, newspaper advertising inserts, magazines, books, directories, computer documentation and financial printing. The company operates printing plants, service centers, sales offices and subsidiaries in nearly 100 locations in the United States, the United Kingdom, Ireland, Mexico, the Caribbean and the Far East.

PARK RIDGE, NJ (OCT. 11) PR NEWSWIRE - Chep USA today announced the management team for its innovative new pallet pooling program, in which it intends over the next five years to revolutionize the multi- million dollar shipping pallet business in this country.

President and CEO of the new company is Michael McCarthy, an Oxford graduate who has been overseeing the launch of the new pallet pooling concept here since March of 1989.

Chep USA is a joint venture of GKN plc of England and Brambles Industries of Australia. It intends to invest $140 million over the next two years to launch the first national shipping pallet pool in the U.S. Its five year plan calls for it to provide a high percentage of the shipping pallets in the U.S.

"We're confident of our success not just because we're well-funded," said McCarthy, "but because we're putting into place programs that have already proved enormously successful in Europe and the Pacific Basin. And many of the members of our management team have played important roles in the success of the pallet pooling concept in other companies."

At any time, there are more than 100 million shipping pallets in use in the U.S. Chep won't sell shipping pallets, but will rent them, and claims superior design, workmanship and maintenance that not only will lengthen the life of the shipping pallet, but also greatly reduce damage resulting from defective pallets.

McCarthy comes to the U.S. after a successful role as Operations Director of the first European pallet pool starting in 1974. In 1979, he established and was managing director of Chep France before returning to the U.K. to become managing director of GKN Chep and most recently, chief executive of the Chep Division of GKN.

A London native, he is a graduate of Brasenose College in Oxford. Other members of the Chep USA management team announced today are: G. Andrew

Paterson, senior VP operations of the new company. Paterson is a graduate of Christ College, Cambridge, and had his first taste of the Chep pallet pooling system as a customer. Before joining the U.S. company, he had management responsibilities for Chep Deutschland and Chep Canada.

Joseph Pinto, senior VP commercial. Pinto joined Chep in 1980 as controller of Chep France, and led the team which successful introduced the Chep pallet pooling concept in Spain. Most recently, he was chairman of Chep France and Chep Espana. He is a graduate of Rouen University in France and Manchester University in England.

Arthur W. DeMelle, senior VP finance and administration. Before joining Chep, he was chief financial officer of Purolator Courier Corp. for seven years and executive vice president, chief financial officer of Emery Air Freight.

HARTFORD, CT (OCT. 11) PR NEWSWIRE - At least six shareholder class actions have been filed in federal court here against Travelers Corp. (NYSE: TIC) and its principal officers Edward H. Budd, Richard J. Shima and Allan D. Schuster.

The complaints allege violations of federal securities laws as a result of allegedly false and misleading statements made by Travelers during the period of approximately Nov. 15, 1989, through the present.

In essence, the complaints seek to recover for the investors their losses. During the class period, Travelers common stock has traded as high as $42 per

share. In the wake of the announcement last Friday to the effect that the company was adding $650 million to its reserve for troubled real estate loans and was forced to cut its common stock dividends by one-third, the common stock has plummeted in value and closed yesterday at 13-5/8 per share.

Richard D. Greenfield, of Haverford, Pa., a lawyer who specializes in representing investors in shareholder litigation and one of the lawyers for the plaintiffs, said, "Given the total surprise in the market place, we can understand why investors are shocked and the stock has traded at its currently low level. Hopefully, through this litigation, people who are members of the class will have an opportunity to recover their losses".

The Class is defined in Greenfield's litigation as all those persons who purchased Travelers stock during the period of approximately Nov. 15, 1989, to the present who have suffered losses.

NEW YORK (OCT. 11) PR NEWSWIRE - The international accounting, tax, and business consulting networks of Spicer & Oppenheim International (SOI) and the main members of NR International (NRI) today announced that a preliminary agreement has been reached to form a new, combined international network with a new name yet to be announced.

With local worldwide revenues of $415 million, the combined network of independent accounting firms will operate in 57 countries and rank as the 12th largest accounting organization in the world, 12th in the U.S. and 11th in Europe.

Patrice de Maistre, chairman of SOI, said "The larger network will build on our existing strengths, particularly in the United States and Europe, and provide us an enhanced platform for international referral business."

Alan Dyer, chairman of NRI, said "The new network will provide, among other things, a more complete global network that will enable us to serve our clients' international needs more effectively."

Internationally, the new group will include all the current members of SOI, together with the U.K. firm of Neville Russell.

In the U.S. members will include the national firm of Spicer & Oppenheim: Clifton, Gunderson & Co., a regional midwest firm; Wolf & Company, Boston; and Lorimore Warwick & Co., Wilmington, N.C. along with most other United States members of the NRI network.

Not only will international coverage be strengthened by the merger, it will significantly expand geographic coverage in the U.S. and will combine the two group's specialist skills in the agribusiness and health care with financial services and bankruptcy sectors.

CHICAGO (OCT. 11) PR NEWSWIRE - William E. Chapman II will be nominated to the position of senior vice president, pension/savings programs for Kemper Financial Services, Inc., (KFS) at the next meeting of KFS' board of directors announced Stephen E. Gibson, executive vice president and director of marketing for KFS.

According to Gibson, Chapman, who joined the firm on Oct. 8, will head up Kemper Financial's Pension/Savings Programs department, which is responsible for the centralized support of marketing and sales of Kemper qualified plans.

"With more than 24 years of experience in the financial services industry -- and with much of that experience in the qualified plans marketplace -- Bill is an excellent choice to head up this important and rapidly expanding area for Kemper," Gibson said. "We are extremely pleased to have someone with his experience and credentials join KFS," he said.

Chapman, 49, comes to KFS from the Connecticut General Life Insurance Company (CIGNA), where he was senior vice president of CIGNA Investments, Inc. and president of CIGNA Asset Advisors and CIGNA Capital Brokerage, Inc. At CIGNA, Chapman was responsible for investment management sales to large corporate and public pension plans, financial institutions and individual markets. Prior to that, Chapman was president and chief executive officer of CIGNA Financial

Partners, Inc. and CIGNA Securities, Inc. Chapman began his career with CIGNA in 1967 in the group pension sales area.

Chapman is a 1963 graduate of Bowdoin College. In 1989, he was part of the Stanford Business School International Investment Programme at the London Business School. He is a chartered life underwriter and certified employee benefit specialist.

Kemper Financial Services is one of the nation's largest asset managers, with over $62 billion in assets under management, including approximately $5.5 billion in retirement plan assets under management. KFS is a major investment management and financial products company under the umbrella of Kemper Financial Companies, Inc., a holding company for the financial services units of Kemper Corp (NYSE: KEM). Kemper Corp. is a non-operating holding company with major subsidiaries in property-casualty insurance, life insurance, reinsurance and investment services.

MINNEAPOLIS (OCT. 11) PR NEWSWIRE - First Bank System, Inc. (NYSE: FBS) announced today that it had received Federal Reserve Board approval of its previously announced merger agreement with The Northern Cities Bancorporation, Inc., to acquire The Northwestern Bank in Anoka and The Northern National Bank in Forest Lake. FBS purchased the banks from J. Stephen Schmidt and other shareholders for an undisclosed amount.

The banks will continue to operate as The Northern Bank in Anoka and The Northern National Bank in Forest Lake until operations conversions are completed some time in 1991, at which time they will become branches of First Bank, First Bank System's lead bank with 37 branches in the Minneapolis/St. Paul area. The Northern Bank has locations at 301 Jackson St. and Seventh and Tyler in Anoka and has a branch in Ramsey, Minn. The Northern National Bank in Forest Lake is located at 320 W. Broadway. The closest First Bank location is in Coon Rapids.

At June 30, 1990, The Northern Bank in Anoka and the Northern National Bank in Forest Lake had assets of $72.7 million and $26.4 million, respectively.

First Bank System is a regional bank holding company headquartered in the Upper Midwest with assets of $19.4 billion. The company provides complete financial services to individuals and institutions through 32 banks and trust companies with more than 140 offices located in Minnesota, Colorado, Montana, North Dakota, South Dakota, Washington and Wisconsin.

CHICAGO (OCT. 11) PR NEWSWIRE - Ameritech is the winner of a series of awards given by the U.S. Small Business Administration (SBA) and U.S. Department of Commerce for its efforts in assisting minority-owned businesses.

The company received four awards:
-- The SBA 1990 Illinois Private Sector Award for Support of Minority Business;
-- The SBA Region V award for its minority business development program achievements (Region V includes Illinois, Indiana, Michigan, Ohio, Minnesota, and Wisconsin);
-- Corporate awards for Ameritech and its Schaumburg, Ill.-based subsidiary, Ameritech Services, for "dedication and distinguished service in promoting minority businesses" from the SBA and U.S. Department of Commerce's Minority Business Development Agency.

"We at Ameritech view seriously the responsibility to ensure that individuals in all segments of our society can participate in business opportunities, whether as employees or as business entrepreneurs," said Ameritech Chairman and Chief Executive Officer William L. Weiss.

The Ameritech companies' efforts "are consistent with our commitment to work for the betterment of the social, economic and cultural life of our communities, our states and our nation," Weiss said.

Among Ameritech activities cited by the SBA include:
-- Minority business purchases and contracts in excess of $96 million in 1988 and 1989.
-- Management, technical and operational assistance to help small vendors increase cash flow.
-- Programs to assist minority vendors in securing lines of credit from suppliers and the amendment of bonding requirements where appropriate.
-- Procurement training workshops to inform vendors, improve purchasing procedures and provide quality programs.

"We are pleased by the Small Business Administration and U.S. Department of Commerce's recognition," said William Yablecki, executive director of Ameritech Services' purchasing and material management organization. "This shows our program is doing the job and that we're committed to promoting and helping minority businesses."

Ameritech is the Chicago-based parent of the Bell companies serving Illinois, Indiana, Michigan, Ohio and Wisconsin, and several other information-related companies providing mobile communications, directories, lease financing, voice messaging and audiotex services.

Ameritech Services provides centralized purchasing and material management for the Ameritech Bell companies, in addition to marketing, technical and regulatory planning support.

DALLAS (OCT. 11) PR NEWSWIRE - Endevco Inc. (AMEX: EI) announced today that on Oct. 9, 1990, it completed the "open season" transportation request period for its proposed Cornerstone Pipeline. Total firm transportation requests among 11 different shippers amounted to 870 million cubic feet per day, of which 250 million cubic feet per day are attributable to Endevco, with interruptible requests by 47 companies totalling 5.427 billion cubic feet per

day. Endevco Inc. stated that these requests represent indications of interests and it will now proceed to negotiate firm transportation agreements.

The proposed Cornerstone Pipeline is a 44 mile, 36-inch pipeline that will transport gas from Delhi, La., to Endevco's Mississippi Fuel Co. near Vicksburg, Mississippi with planned interconnections to the interstate pipelines owned by ANR, Arkla, Columbia Gulf and Tennessee Gas. The pipeline would have an initial capacity of 600 million cubic feet per day and capacity could be increased by addition of compression facilities. This pipeline project is being developed jointly with entities owned by certain members of the Bass Family of Fort Worth, Texas.

Cornerstone's request for an Optional Expedited Certificate is presently being reviewed by the Federal Energy Regulatory Commission. This request was filed on Aug. 1, 1990.

"The favorable response by potential gas shippers supports our belief that this pipeline will serve a vital need for the nation's gas consumers, pipelines and producers," said James W. Bryant, chairman and chief executive officer of Endevco, Inc.

Endevco is a rapidly growing natural gas company built around a core business - gas transportation, consisting of gathering, transmission, storage and marketing natural gas. The company is also engaged in the closely related and complementary business of treating and processing natural gas and natural gas liquids.

NEW YORK (OCT. 11) PR NEWSWIRE - James P. Lennane, chairman of the ASK Shareholders Committee, announced today that ASK Computer Systems Inc. (NASDAQ: ASKI) has failed to furnish the committee with certain shareholder information, which ASK had previously promised to deliver and to which the committee is entitled to under Delaware law. ASK has not given any explanation for its refusal to furnish the information and has not responded to repeated requests from the committee.

Lennane stated "I am disappointed that ASK management has failed to honor its legal obligations and prior promises in this fashion. It is another instance of ASK management attempting to thwart lawful communication with shareholders." Lennane also indicated that the committee would seek an appropriate judicial relief.

Lennane has brought a lawsuit against ASK seeking to enjoin the issuance of

common stock to Hewlett-Packard Company and Electronic Data Systems Corporation in connection with ASK's acquisition of Ingres Corporation unless shareholders approve the transaction. On Monday, Oct. 8, the NASD sent a letter to ASK stating the issuance should be approved by shareholders in order for ASK common stock to remain listed on the NASDAQ National Market System. A decision is expected today in Lennane's lawsuit.

LAKEWOOD, CO (OCT. 11) PR NEWSWIRE - Plains Petroleum Co. (NYSE: PLP) announced today a number of promotions, effective Oct. 1, 1990, at its wholly owned subsidiary, Plains Petroleum Operating Co. (PPOC). J. Charles Farmer was promoted to Manager of Acquisitions, and he will be moving from Midland, Texas to Lakewood. Farmer had been District Manager in Midland the past two years. Under Farmer's direction the district has approximately doubled in terms of property developed and acquired since 1988.

Also promoted were Jeffrey Carlson to District Manager of the Rocky Mountains District; Darrell Cochell to District Manager of the South Central District; James Sutherland to District Manager of the Southern District; and Paul Brandt to District Engineer for the South Central Division.

The promotions were made in connection with the creation of three new districts by PPOC. The Rocky Mountains District based in Lakewood, Colo., includes Colorado, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming. The states of Arkansas, Kansas, Mississippi and Oklahoma and the Texas Panhandle are in the South Central District with its district office in

Lakin, Kan. Louisiana, New Mexico and the balance of Texas activities will be the responsibility of the Southern District located in Midland, Texas.

The districts were designed to better focus PPOC's expanded production, exploration and development efforts. Plains' preliminary 1991 spending plan is $23 million, or more than 50 percent greater than its 1990 capital budget. The company's historical focus on acquisiitons will also be intensified with these promotions.

Plains, a Colorado based company, produces, develops and explores for oil and gas in the Midcontinent, Permian Basin, Gulf Coast and Rocky Mountain Regions of the United States.

#90284p3818 10/11/1990 ~PR Newswire

MONTREAL (OCT. 11) PR NEWSWIRE - Alcan Aluminium Limited (NYSE: AL) today reported a consolidated net income of U.S. $97 million for the quarter ended Sept. 30, 1990, which compares to $180 million reported in the same quarter of 1989. After preference share dividends, net income per common share was 41 cents versus 77 cents a year ago.

Net income for the third quarter of 1990 includes a gain of $19 million, or 8 cents per share, resulting from a change in Alcan's holdings of Nippon Light Metal Company, Ltd. (NLM). Alcan's ownership interest declined, from 46 percent to 45.3 percent, primarily due to the exercise of publicly-held warrants to subscribe to NLM common shares. Net income in last year's quarter included non-operating expenses of $6 million, or 3 cents per common share.

Commenting on the quarter and the outlook for the balance of the year, David Morton, chairman and chief executive officer, observed that "Earnings in the third quarter benefited from higher volumes and prices in our sales of primary ingot. While this is satisfactory, the economic outlook for the next six to nine months is less encouraging, particularly in North America. However, the industry fundamentals remain sound in the longer term."

Fabricated product shipments were 12kt, or 3 percent, lower than in the year-ago quarter and just slightly below the level of the second quarter of 1990. Margins on fabricated products showed no change from this year's second quarter but were 30 percent lower than the year earlier quarter. Shipments of ingot products rose above the levels of this year's second quarter by 7 percent. Ingot realizations strengthened during the third quarter, but remained somewhat lower than one year ago.

Earnings from North American operations were similar to those in the second quarter, but well below those in the same quarter last year. Profits from operations in Europe declined in the third quarter with continuing weakness in the United Kingdom more than offsetting a strong German market. Latin American earnings continued to be affected by the difficult economic situation in Brazil, but profits from operations in the Pacific region showed a marked improvement over the second quarter.

#90284p3826 10/11/1990 ~PR Newswire

CHICAGO, (OCT. 11) PR NEWSWIRE - First Colonial Bankshares Corp. (NASDAQ: FCOLA) today announced a 19 percent increase in its third quarter net income compared with the third quarter of 1989. Earnings per share increased by 6 percent to $.35 from $.33 one year earlier. Excluding nonrecurring items, earnings per share increased 13 percent. Chairman and Chief Executive Officer C. Paul Johnson explained that the third quarter of 1989 included a pension curtailment gain of $.08 per share, partially offset by a $.06 charge from the company's mortgage banking operations. Excluding these items, earnings per share were $.31 for 1989.

Johnson stated, "We are especially delighted with our performance in light of our acquisition of four banks earlier this year, which increased total assets by $300 million to nearly $1.6 billion, making First Colonial the sixth largest independent bank holding company in the state of Illinois." He added that the company is already recognizing cost savings from the integration of the new banks into the First Colonial system and that other cost reduction efforts have significantly improved earnings compared with prior quarters.

For the first nine months of 1990, net income increased by 4 percent to $8.7 million, compared with $8.3 million in 1989. On a per-share basis, net income was $.95 versus $.94 in the prior year; earnings per share for the first nine months of 1989 were $.88 per share excluding nonrecurring items.

Johnson also pointed out that First Colonial's traditionally conservative lending policies have kept nonperforming assets at a very low level, actually declining from 1.44 percent of total loans at June 30 to 1.39 percent at Sept. 30. Charge-offs have actually declined this year as a percentage of total loans from an annualized rate of .36 percent in 1989 to .31 percent in 1990.

The company's book value per share increased 17 percent from a year ago to $11 per share.

First Colonial owns and operates 15 banks with 22 offices in the Chicago metropolitan area and is also parent of several non-bank subsidiaries including Mid-States Financial Corp., a commercial leasing firm, and First

Colonial Trust Co.

#90284p3827 10/11/1990 ~PR Newswire

WEST PALM BEACH, FL (OCT. 11) PR NEWSWIRE - A full-size propulsion system designed by Pratt & Whitney to power the National Aero-Space Plane (NASP) has successfully completed an initial series of ground tests to simulated Mach 3 conditions.

The system is undergoing testing at The Marquardt Company's facility in Van Nuys, Calif. The initial flow tests lasted more than 30 minutes. Testing will continue throughout the ground test facility flight envelope capability.

"This series of tests validates our design concept and the test data exceeds our performance expectations. We are excited with the progress we have demonstrated," said Bob Wolfe, executive vice president of P&W's Space Propulsion and Systems Division.

The goal of the NASP program is to develop a single-stage-to-orbit research vehicle that takes off like an airliner and flies directly into orbit. For return to earth, the vehicle would decelerate for a conventional horizontal landing. First flight is planned for 1997.

Since May 24 when the Department of Defense and NASA approved the innovative contractor teaming arrangement, P&W has participated as a team member with Rockwell International, General Dynamics, McDonnell Douglas and Rocketdyne. As a national contractor team, this unique new approach allows the government and the contractors to capitalize on five technical industry bases for design and development of a NASP baseline propulsion system. Through teamwork and consolidation, the government expects greater benefits from a synergism of ideas.

P&W began developing the key technologies required for the NASP propulsion system in September 1986 under a U.S. Air Force contract. The company received a $66 million contract in April 1989 to continue development of the NASP propulsion system.

Products for the U.S. space program are produced by Pratt & Whitney's Space Propulsion and Systems, located in West Palm Beach, Fla.; which includes Chemical Systems Division, San Jose, Calif.; and USBI, with facilities in Florida, Alabama and Louisiana. Pratt & Whitney is a unit of United Technologies Corporation (NYSE: UTX) based in Hartford, Conn.

BRAINTREE, MA. (OCT. 11) PR NEWSWIRE - Grossman's Inc. (NASDAQ: GROS), announced today that, according to the preliminary report of the independent inspectors of election, the Shidler/Holman Group received valid unrevoked consents to replace the board of directors of Grossman's representing only 29.9 percent of Grossman's stock, far less than the necessary majority of outstanding shares.

The preliminary report also stated that no individual Shidler/Holman nominee received consents from more than 33.9 percent of the outstanding shares. Grossman's noted that these vote totals were significantly below the results announced by the Shidler/Holman Group two days ago and reflected, among other things, the effect of the large number of revocations of consents received by Grossman's.

Grossman's, a major retailer of lumber and building materials, operates 156 stores in nine Northeastern states and in California.

DALLAS (OCT. 11) PR NEWSWIRE - Sterling Software Inc. (NYSE: SSW) said it intends to make an exchange offer of additional shares of its $7.20 exchangeable preferred stock and cash for up to 1,500,000 shares of the company's common stock.

Sterling said that for each share of common stock it will offer to exchange 1/8 of a share of preferred stock plus $2 cash. The closing prices of the preferred stock and common stock on the New York Stock Exchange on Oct. 10, 1990 were $46 and $6 per share, respectively. Based on these prices the indicated exchange value for the common stock is $7.75, a 29 percent premium. The preferred stock has cumulative annual dividends of $7.20 per share and a liquidation preference of $48 per share. Sterling has the option to exchange a 15-year 15 percent subordinated note for the preferred stock.

The exchange offer is expected to commence within two weeks and expire 20 business days from that date.

DECATUR, Ga. (OCT. 11) PR NEWSWIRE - Prime Bancshares Inc. (NASDAQ: PMBS), holding company for Prime Bank, FSB, formerly DeKalb Federal Savings Bank, reported third quarter net earnings of $520,000, or 30 cents a share, compared with $608,000, or 35 cents a share a year ago.

Earnings for the third quarter of 1990 included an after-tax gain of $193,000 from the sale of loans and securities, compared to $358,000 in third quarter of 1989. For the nine months ended Sept. 30, net earnings were $1.6 million or 95 cents a share, compared to $1.3 million for the same period in 1989.

At Sept. 30, consolidated assets totaled $582 million, an increase of 15 percent since December 1989. The corporation's capital was $34.8 million on Sept. 30, which is 6 percent of total assets and exceeds regulatory requirements. Prime Bancshares' book value per share was $20.43 at Sept. 30.

Non-performing assets amounted to $9.2 million or 1.56 percent of total assets compared to $8.5 million at Dec. 31, 1989. At Sept. 30, Prime Bank's allowance for possible loan losses totaled $1.8 million.

The common stock of Prime Bancshares is traded Over-the-Counter and quoted on the National Association of Securities Dealers Automated Quotation (NASDAQ) System under the symbol "PMBS."

OAKHURST, CA (OCT. 11) PR NEWSWIRE - In response to recent declines in its stock price, Sierra On-Line (NASDAQ: SIER) announced today that its board of directors has authorized the company to repurchase up to 300,000 shares of its common stock in open market purchases as market conditions warrant. Sierra's shares traded at $11.50 per share today and have recently traded as high as $28 per share. Sierra currently has 3.6 million shares of common stock outstanding.

Sierra's president, Kenneth Williams, believes Sierra's stock price has been disproportionately affected by a combination of fears of recession, world politics and analysts' concerns regarding delayed release dates for new Sierra products during the Christmas season. Williams stated that he did not believe these delayed product introductions would have a material long-term adverse impact on Sierra. Williams also stated that "Sierra has recently been experimenting with some interesting new products that may give Sierra On-Line new business opportunities, and we hope to have a better understanding of the commercial feasibility of these products toward the beginning of the year." Williams went on to say that "Sierra is considering repurchasing its stock simply because it believes it is significantly undervalued." Although Sierra has no immediate targeted purpose for the shares it may repurchase, Williams indicated that such shares could be used in future acquisitions or securities offerings.

Sierra On-Line develops and publishes premium-priced interactive animated adventure software for the high-end of the consumer market. The company's products feature high-quality graphics, music and sound effects and are designed primarily for IBM PCs, IBM PC compatibles and computers manufactured by Apple Computer Inc.

HAUPPAUGE, NY (OCT. 11) PR NEWSWIRE - Robotic Vision Systems, Inc. (NASDAQ: ROBV), a leading manufacturer of machine vision-based inspection and measurement products for improved manufacturing productivity and quality control, announced today the receipt of more than $6.7 million in contracts from the U.S. Navy and Air Force.

The U.S. Navy award, worth $6.5 million, is related to the automated intelligent inspection and machining of critical Navy ship's propellers. RVSI was awarded $4.5 million in December, 1989 for a previous phase of this project.

The system will use RVSI's advanced high-speed, high-definition 3-D Surface Mapping technology to rapidly acquire hundreds-of-thousands of precise three-dimensional measurements from the propeller casting surface. This information will be used to guide a sophisticated milling machine through the removal of excess material, creating a finished propeller. Expected benefits include a dramatic reduction in propeller manufacturing time and improved precision in propeller geometry.

A second contract award, funded by both the U.S. Air Force and Navy, involves the company's 3-D Surface Mapping technology for the inspection and measurement of aircraft parts. This contract is valued at more than $200,000.

Robotic Vision Systems, Inc. designs, develops, manufactures and markets advanced three-dimensional vision-based inspection and measurement products for industrial and military purposes.
